They come and they go from the Replacement Center more quickly now, or perhaps it merely seems that they do. The training cycles have not been cut down much, but the turnover of men seems greater. Perhaps it's just that we notice the arrivals and departures more, now

that war has given them grimness. We call the train-the one that brings in recruits and takes out soldiers-the Shanghai Express. The term probably was used first by some disgruntled soldier who put into it the bitterness of a difficult transition from civilian to soldier. Now the term is used with a certain tender fondness by the permanent personnel of the Center, we who

watch the men come and go. The melancholy moan of a train whistle is heard in the distance of the night and a sergeant clicks his teeth wistfully. "Here she comes, boys," he says. "Here comes the Shanghai Express." The sound of the whistle identifies all that touches

A little reassured but still suspiious, the men went from the train to the theater, where they would see a program of entertainment and posubly hear a short and casual welcoming address by General Parker.

This afternoon the sound of marching feet came up Headquarters Street from the south and a battery of departing soldlers approached. As they neared the headquarters building, there came the order. "Count endence-command?" and two hundred voices took up a chant. They

Just as their arrival marks an emotional ebb, their departure is the flood tide. The men who came in a few weeks ago, green and terrified, leave now as soldiers. The corporal whom they dreaded then is now just a jerk who's bucking for sergeant. Although they are glass that they have been trained with other men on the same level here the training center which was first a vast and awful place is now just a training center, all right in it way-for roomies. Derived from the principal's of- Bess Fouts, Freshman, fice is the following record concerning registration day at Haskell High School.

One hundred and sixty nine students enrolled during the two days. Statistics show that this is a decrease over last year's enrollment. It is believed that this decrease is due to the labor shortage caused by the war. Many students are helping to gather the cotton crop, and therefore more students are expected to enroll later.

Sketch of a Victorious Invasion Route

This sketch was made by the English artist E. G. Lambert as the Allies were bombing Messina harbor shows the entire area of the strait of Messina from the air. Across this strait, which separates Sicily from Italy's toe, the British Eighth army spearheaded the first invasion of the European continent which resulted in Italy's surrender. The distance across the strait, at its narrowest point, is two miles. Prior to landing on Italy proper, Allied batteries along the Sicilian coast shelled Axis positions across this stretch of water.

War has put 10 million more workers in industry and raised their pay

60%. Farm prosperity results from

industrial employment at good pay.

When a factory worker earns
\$1,000 a year he spends about \$300

of it to feed his family, buying low-

priced, bulky food. When his earnings reach \$2,000 a year his grocery bill is nearer \$600. His family eats

better food, more costly things, and maybe a little more of it. That's

when the farmer prospers. And

Back The Attack

Invasion today means countless numbers young Americans seizing beach heads and forcing their way into enemy and conquered lands. A few years hence Americans will be treated to a different kind of invasion.

It requires little imagination to foresee the conquering tide of returning War Bond dollars which will begin their we ome invasion of American homes in 1951.

The first of the War Bonds to mature will start their march back to the lenders in May, 1951. In May of that year millions of War Bonds will

marure; come back home at the rate of \$4 for every \$3 which goes into today's attack on Hitler and his partners in crime.

Back the Attack with War Bonds"-the Third War Loan slogan-becomes today's imperative war job for the home front. A few years hence this same slogan will acquire a vital peacetime meaning for all of us because our maturing War Bonds will back the attack for better living.

Planning That Counts

All the postwar planning in the world will collapse unless it can be financed by the people. That is why it is important for our people and our government to work out plans for private employment when the war-spending letdown inevitably

Recognizing these facts, and knowing that distribution will play an indispensable part in the reconversion period, chain store executives, in order to give manufacturers something concrete upon which to base their postwar plans, are stud-inhow to place orders at once for a large variety of staple items which they formerly sold in qualititie. and which they know they will be able to sell again. If every business and industry would plan in this manner, it would assure an orderly change to peacetime production and employmen:

Merchants and consumers alike know that the OPA must be surported. An thing Mr. Bowles can do to simplify OPA methods and conduct its operations along truly American lines of fair play, will gain public approval and cooperation.

Mr. Bowles would have to spend a week in grocery store to find out what the local merchant is up against in trying to comply with OPA regulations. It is almost a safe bet that neither Mr Bowles nor any of his official family would attempt to read or comply with the blanks and forms with which the average merchant is bombarded by the CPA, without consulting a lawyer-and the small merchant has no lawyer

INVASION COMES HIGH-in blood and money.

Part of the cost must be paid with human life. That means deep and lasting hurt for many and many an American family.

Part of the cost must be paid in cash . . . this September. And that's going to hurt, too!

The 3rd War Loan is Here!

To pay for invasion—to get the money to keep our fighting machine going-you, and every man an in America, are asked to invest in at least one extra \$100 Bond in September.

\$100 EXTRA, mind you—for everybody!

No man or woman can hold back. No man or woman can point to his Payroll buying and say, "They don't mean me!" No man or woman can say, "I'm already lending 10% or 12% or 20%-I'm doing enough!"

Sure-it's going to hurt. It's going to take more than spare cash this time—more than just money that might have gone for fun. It's going to take money we have tucked away. It's going to take part of the money we've been living on-money that might have meant extra shoes or clothes or food! Money that might have gone for anything that we can get along without!

Sure—it'll be tough to dig up that extra money. But we've got to do it-and we will.

We'll do it partly because of the look that would come over the faces of our fighting men if we should fail. We'll do it partly because the cheapest, easiest way out of this whole rotten business is for everybody to chip in all he can and help end it quick. We'll do it partly because there's no finer, safer investment in the world today than a U.S.

But mossy, were the smack in the middle of the bigg st, deadlier, dirtiest war in history. And we're Americans.
