## 8-Day Revival At First Methodist Begins July 22

A revival meeting will be held at the First Methodist Church in this city beginning Sunday, July 22 and continuing through Sunday, July 29, according to announcement this week by the Rev. T. G. Craft, pastor.

The revival will be conducted by Dr. Kenneth Copeland, pastor of Travis Park Methodist Church, San Antonio. He is a former pastor of the Methodist Church here and returns to conduct the coming revival at the invitation of the Methodist congregation here.

Rev. and Mrs. Orion D. Smith of Leuders will lead the singing and direct Young People's services for the revival.

Time originally set for the revival, July 29-Aug. 5 has been changed at Dr. Copeland's request to begin July 22 and continue through July 29. The church invites every member to make plans now to attend the revival. People who are not members of any church are given special invitation to come and hear Dr. Copeland.

"A revival is not only designed to bring new spiritual life into the hearts of the members, but to bring unbelievers to accept Christ as Lord and Saviour of one's life," Rev. Craft said. The minister continued, "Dr. Copeland said that our church must be called to prayer. He would not be anxious to come to us unless we first have a week of prayer meetings. Our Prayer Week is from July 15 through the 20th."

Rev. Craft said the women of the church will have prayer services each week through this week. They will also have their prayer service, and the Board of Stewards and the men of the church are asked to meet for prayer on Monday, Wednesday and Friday nights of Prayer Week.

Stressing the need for prayer, Rev. Craft said: "Dr. Copeland has requested that our people, all the people who pray, to meet and pray for the success of the revival as God may lead us. People who do not pray in public may come and pray in secret. It is prayer that counts."

Standards for the lights were set up several weeks ago, and the four-way lights and control boxes were installed during the week by J. W. (Jake) Jones and W. T. Cutbirth, engineers with the district Highway Department office at Abilene.

The control lights were swung over the center of the street intersections, and are automatic in operation. However, the setting can be changed to any interval desired, they added.

Praise for the work done by volunteer firemen was expressed by Judge T. R. Odell, Haskell attorney, in an impromptu talk at the regular meeting of the Haskell Fire Department Monday night. Judge Odell was a caller at the City Hall, and firemen invited him to attend their meeting.

The Haskell lawyer, a volunteer fireman at one time when he lived in Throckmorton, recalled incidents when he has seen Haskell firemen take great risks in helping save someone's property from fire. "There is no more unselfish service than the work you volunteer firemen are doing," Judge Odell declared.

Two members of the City Police Department, Chief Brooks Middleton and Traffic Officer C. B. Loper were elected members of the fire department, and will be officially inducted at the next regular meeting.

## Mexican Seriously Injured Thursday In Cutting Affray

A Mexican farm laborer, Roberto Rodriguez, about 23, received severe knife wounds on the face and several serious stab wounds in the lower abdomen in an altercation with another Mexican man last Thursday morning. The affray occurred on a farm several miles northeast of Haskell where the two men were members of a crew of Mexican employed to hoe cotton.

The injured man was brought to the Haskell Hospital for treatment, and was dismissed Tuesday afternoon after his condition had been determined favorable for recovery.

The second Mexican involved in the affray left the scene before officers arrived, and to date has not been apprehended. The two Mexicans had come to Haskell the first of last week from Taylor, Texas, and officers were able to secure but little information concerning the man allegedly involved. Other Mexicans in the crew of farm workers declared they did not know the man's name.

## July 25th Deadline For GI's Education Training Program

Only one-third of the ex-GI's have used their full eligibility rights under the educational bill, David H. Persons, director of the Haskell County Vocational School said this week.

Virtual assurance was received this week that the \$100,000 bond issue recently authorized by Haskell County voters for enlargement of the Haskell County Hospital will be matched by Federal funds in the equal amount of \$100,000.

County Judge Alfred Turnbow Tuesday received telegrams from U. S. Senators Tom Connally and Lyndon Johnson advising him that the U. S. Public Health Service had given preliminary approval for the Haskell County Hospital project at a total cost of \$200,000, with a Federal share of \$100,000 in cost of the planned program.

The proposed enlargement and modernization project had previously been approved by the State Hospital Board, and county-wide bond issue May '48 has been approved and the bonds registered by State departments, Judge Turnbow said.

Davis S. Castle, Abilene architect, has been employed to provide plans and specifications for the building program. Capacity of the hospital built in 1938, will be enlarged from 20 to 36 beds under the modernization program, and considerable new equipment will be added.

The Abilene architect met with the Commissioners Court Monday to go over tentative plans for the project, and bids for the construction work will be sought in the near future, county officials said.

Both men attended the State sponsored school last year, taking the basic firemen's training course. This year, Martin will enroll for the Fire Marshal course and Lusk will take an advanced course in fire apparatus pump operations.

The training school is endorsed by the State Fire Insurance Commission, and attendance of representatives from the local fire department earns a credit on fire insurance rates in Haskell.

### Telephone Co. Employees To Get Increase In Pay

Southwestern Telephone Company has signed a new agreement for one year with the Communications Workers of America effective July 1, 1951, it was announced in Dallas today by Company President Roy Autry. The new agreement calls for a ten per cent increase in basic wages for employees within the designated bargaining unit.

Part of the increase will be put into effect on July 1, 1951, and the balance must await determination by the Wage Stabilization Board. It is anticipated that the company and the union will present a joint request to this Board in Dallas.

Mr. Autry pointed out that the increase in wages will cost the Company approximately \$400,000 per year and would undoubtedly make it necessary to ask for increases in telephone rates. "Our company is growing rapidly," said Mr. Autry, "and it is our policy to pay employees good wages in line with those which prevail in the communities where we operate. Naturally, if we are to meet existing wage standards to attract and retain good people for our company, we must increase our revenues accordingly. In the telephone business this money can only be made available by a proper adjustment of telephone rates."

### Texas Farm Cash Income Up 45 Per Cent Over 1950

Texas farmers' cash revenue was 45 per cent greater the first five months this year than in the same 1950 period, the University of Texas Bureau of Business Research reports.

The Bureau estimates Texas farm cash income from major commodities through May at \$484,853,000, compared with \$34,184,000 during January-May last year.

Cattle, the main farm-income producer for both periods, brought in \$165,046,000, a 2 per cent more than January-May, 1950. Only commodities bringing less money in the 1950 period were cotton, cottonseed, fruit, vegetables and wheat. Meat, income drops were caused by unfavorable weather.

### P. M. A. To Accept NPA Building Applications

Very little on-farm construction is affected by the National Production Authority's building Order M-4, B. F. Vance chairman of the State Production and Marketing Administration Committee points out, because most new farm buildings do not involve enough steel.

As applied to the food field, the order primarily requires food production and processing and wholesale food distribution industries to obtain permission for necessary new construction when the amount of steel to be used in the new facilities will exceed 25 tons.

Authority to act on authorization for new construction in the food field has been delegated by NPA to the Secretary of Agriculture, and operations under the delegation will be handled by PMA.

State PMA Committees are authorized to receive applications, either directly from applicants or by reference from NPA field offices, which previously have handled such applications. For the present, applications will be forwarded to the PMA office in Washington, D. C.

**Colorful 'Lone Wolf' Gonzauillas Leaving Ranger Force**

Homer Garrison, Jr., Director of the Texas Department of Public Safety at Austin has announced the retirement of one Texas Ranger, the transfer of another and the promotion of a third.

Retiring is Captain M. T. (Lone Wolf) Gonzauillas, commanding Company B of the Rangers at Dallas, and one of the most colorful peace officers of the Southwest.

Named to succeed Gonzauillas at Dallas is Captain R. A. Crowder, who now commands Ranger Company C at Lubbock. Texas Ranger Raymond Waters, assigned to the Lubbock company, will be promoted to Captain of that unit.

The changes will be effective August 1, according to Garrison.

Gonzauillas is a veteran of the Ranger force, having joined the organization in 1929. He applied for retirement in order to accept a contract as technical advisor on law enforcement and western movies and radio and television programs.

Captain Crowder, a Ranger since 1937, was one of the original "fifty" Texas Highway Patrolmen appointed in 1930. He was promoted to Ranger Captain in 1947.

Waters, long-time sheriff of Wheeler County in the Texas Panhandle, was appointed to the Rangers in 1941.

## Early-Day Minister Here Is Visitor Saturday

Rev. and Mrs. J. S. King of Hamlin were visitors Saturday in the home of Mrs. King's sister, Mrs. W. W. Johnson in this city and Rev. King made a pleasant call at The Free Press office while here.

A veteran Baptist minister of West Texas, Rev. King was pastor of the Weaver community Baptist Church southeast of Haskell more than 40 years ago, and he recalls many pioneer residents and early-day incidents here. He particularly remembered the disastrous tornado in June, 1908. He left Haskell that year, and jokingly remarked that he was "blown out" of Haskell.

During the time he lived here, Rev. King also served as part time pastor of the Roberts Baptist Church, and recalled having preached at numerous community churches in various parts of the county in 1908-09.

Rev. King is still active in the ministry, and has a regular pastorate.

## Social Security Man Will Visit Haskell Thursday, July 19

Ralph T. Fisher, manager of the Abilene office of the Social Security Administration, will be at the Chamber of Commerce in Haskell at 11 a. m. on Thursday, July 19. Persons wishing assistance with retirement claims or death claims under the Social Security Act, or needing information about their social security accounts, should call at that time for necessary help and information.

Mr. Fisher called attention to the fact that the wife of a retired worker may receive social security benefits before she is 65 provided she has in her care a child entitled to benefits based on her husband's social security account. The wife's benefit is one-half of the amount of her husband's benefit. "Children" include adopted and step-children. For a step-child to qualify, the wage earner must have been married to the child's mother three years before the day on which her application is filed. Also, the wife must be living with her husband.

The benefit of a wife under 65 terminates if her marriage to the wage earner is ended by divorce, or when the child arrives at 18, marries or dies. At the time the claim is filed the wife must submit proof of marriage.

and "garden sass" isn't the only thing increasing in value these days. Your home, household furniture and furnishings, any business property that you own, are all worth more than they were a short time ago. They would be more difficult and costly to replace. To safeguard fully the dollar value of what you own, it is important to have full insurance coverage.

**Cotton Picked For Kids' Clothes**

The majority of mothers prefer cotton for seven out of ten items of children's clothing, a recent survey by the Bureau of Agricultural Economics reveals.

In the study of fiber preferences for children's clothing, a sample of 2266 mothers with children under 13 years of age were interviewed. They were asked to express opinions on winter baby shirts, crib blankets, dresses, girls' winter bathrobes and one-piece summer dresses, boys' sweaters and knitted school shirts, girls' children's summer anklets and snowsuits.

For most of the items, cotton was the only fiber with which the majority of the mothers reported any experience.

**August Draft Call For 28,000 Men Is Announced**

The Defense Department at Washington this week ordered the drafting of 28,000 men into the Army and Marine Corps in August and September. It marked the first call for Marines since the draft was resumed last September. Up to now, all draftees have gone into the Army. The draft quotas called for 28,

000 men for the Army and 7,000 for the Marines in August. In September, the call is for 28,000 Army men and 8,000 Marines. The Army call for August was 6,000 higher than a previous defense department request. The department said the increased Army draft and the start in drafting Marines was made necessary by a recent drop in voluntary enlistments. **July 4th Is Memorable Date For German Family Now In New Home at Sagerton**

By MRS. DELBERT LEFEVRE

July 4th, 1951 will be remembered for the rest of their lives by Mr. and Mrs. Anton Herlika and their children, Bobby, 13, and Uno, 2, a German family who came to Sagerton to make a new home. The Herlikas arrived in Abilene by plane at 10:30 on July 4th from Schwelm, Germany. They left Germany Monday, July 2 and after a nine-hour stop over in New York came on to Sagerton where they are staying with relatives, Mr. and Mrs. Albert Stremmel and family.

The Herlikas was a factory and construction worker in Germany where the average worker received 52 marks a week, which amounted to approximately \$10.40 and was the only income for a family of four. Prices for food are approximately the same as here, except for coffee which is \$4.00 per pound, the family reported. They lived in two rooms in an apartment house which housed 20 families. They reported that their water had to be boiled before they could drink it and they were surprised that the American people drink so much water.

Mr. and Mrs. Herlika will live with the Stremmels and help out on the farm the rest of the year while Mr. Herlika learns the American way of farming and then next year they will farm for themselves. They are anxious to get a su n tan like Americans. Their daughter, Bobby, will be in the 8th grade when school begins next fall. She is the only member of the family who knows any English at all. She studied English in school in Germany, but she is anxious to learn our way of speaking.

**Paint Creek FHA Classes Round Out Successful Year**

The adult Homemaking Classes of Paint Creek school have had a successful year's work. Subjects studied were leather craft, textile painting, figurine painting, corsage making, metal craft, home improvement.

The classes made 10 corsages, 90 large and 40 small aluminum trays, 17 dish towels, two pair of pillow cases, two luncheon cloths, painted eight napkins; and made leather belts, purses, cigarette cases, bill folds. There were 49 adults who participated in the adult work.

The group projects of the FHA girls were to put new linoleum in the bathroom of their building, paint the walls, and make new tiebacks for curtains. They also made a wastepaper basket out of a nail keg, planned the redecorating of the walls and floors of the living room also the walls of the laboratory and fitting room, and refinished an occasional table for the living room.

The girls also broadcast a 15-minute program over the radio from Stamford, made a vacation trip to Sulphur, Okla., and planned and prepared the yearbook for 1951-52.

Individual projects included home improvement, preserving, raising chickens and turkeys, and metal craft.

Achievement Day included the radio program and a visit to the homes of each of the girls who took a Summer project, so the group could see what each had accomplished. Pictures were also made.

**Cotton Insect Losses Reach 27 Per Cent**

Insects slashed the 1950 cotton yield almost 27 per cent in 13 Southern states; the greatest reduction in 29 years and the second highest on record—the National Cotton Council reports.

Losses in the 13 states amounted to 26.9 per cent of the crop, the Council points out, referring to the final report on cotton and cotton seed production in 1950, issued by the Bureau of Agricultural Economics, USDA.

The toll levied on cotton by the boll weevil and other pests in 1950 has been exceeded only once. That was in 1921 when the full yield was reduced an estimated 35.5 per cent, the Council adds.

The dollar value of cotton destroyed in 1950 is estimated by the Council at \$907,834,000—the highest in history. This exceeds by more than \$300,000,000 the preliminary unofficial estimate of last November.

In 1949 insects destroyed an estimated 3,825,871 bales of cotton and 1,576,000 tons of cottonseed valued at \$617,874,000. In 1950 it is estimated 3,892,682 bales and 1,591,000 tons of cottonseed were lost, but gross total dollar damage (\$907,834,000) was much greater because of an increase in the price of both cotton and seed.

Although losses in 1950 were staggering, the Council adds, it should be noted that damage would have been much greater had not the states carried out an intensified insect control program. Severe insect control programs protected farmers' substantial dividends, while those who did not follow recommended schedule suffered severe losses. The Mississippi Agricultural Extension Service estimates that farmers in that state saved more than 100 million dollars through proper use of insecticides.

## March of Dimes Spends \$1,410,564 In Polio Fight

AUSTIN, July 9.—It took a lot of dimes in 1950 to take care of Texas polio patients," Ralph Frede of the National Foundation for Infantile Paralysis declared today.

14,105,640 of them, to be exact. County chapters of the March of Dimes organization spent \$1,410,564 for patient care in 1950, \$65,943 more than was spent for this purpose in 1949.

Assisted directly with hospital and other bills were 1,645 polio patients stricken before 1950 and 1,196 who contracted the disease during the year. Chapters ended the year owing \$306,326 to hospitals and doctors in Texas.

Frede said that total receipts from the 1951 March of Dimes approximately equaled the amount spent for patient care. Figures on expenditures, he noted, did not include money spent by

the National Foundation's state and national offices for iron lungs and other equipment, for training of medical personnel and health education, and for other expenses which were applied to patient care.

Also included in the chapter expenditures are costs of research grants in Texas.

Advanced to Texas Chapters when their own March of Dimes funds were depleted was a total of \$783,161 from the national epidemic aid fund. A big share of this, he said, was applied to treatment of old patients, indicating the high costs of continuing care for the 20% of patients having an extensive paralysis.

Noting the low incidence of the disease so far this year as compared with the same period in 1950, Frede expressed the hope that the early trend would be continued through the critical hot-weather period ahead. He pledged that regardless of any emergency which might arise, Texas Chapters of the March of Dimes organization would be prepared to meet the challenge with equipment and funds, assuring that no patient would be without the best of care.

United States exports of cottonseed and cottonseed oil reached a greater volume in 1950 than in any year since 1921.

## Value of Farm Conservation Practices Can Be Measured In Pounds, Bushels

The real measure of the soil and water conservation practices being carried out by the Nation's farmers including those of Haskell County with the help of the Agricultural Conservation program should be measured in pounds of meat, quarts of milk, and bushels of grain rather than in acres, yards and tons, says John Brock, chairman of the county PMA committee.

As the chairman sees it, the reason for carrying out conservation practices is production and the value of practices can be measured only in terms of the added food and fiber produced. The effectiveness of an erosion control practice, for instance, is determined by the amount of food and fiber produced which otherwise would have been lost had the soil washed away.

The cover crop turned under for green manure adds fertility to the soil, strengthens the soil structure, builds resistance to erosion, and restores organic matter. But all of these are a means of maintaining and improving the productivity of the land and the true measure of accomplishment is the added production obtained

—the bales of cotton, the beef, the milk, the bushels of corn.

The miles of terraces should be measured in the same way as should the stock water dams, the trees planted and the many other agricultural conservation practices which farmers of the Nation and of the county are carrying out. The purpose of it all, in the chairman's opinion, is better living for more people and the true measure of what these conservation practices have accomplished is in the added food and fiber resulting from practices which go to make this better living.

## AUSTIN HIGHLIGHTS

By SEN. "COTTON" GEORGE MOFFETT

(Note: The Senatorial redistricting bill passed by the recent Legislature placed Haskell County in the district served by Sen. George Moffett of Chillicothe. Below is a news letter from Senator Moffett, and similar articles will appear from time to time.)

Approximately 1400 bills were introduced in the regular session of the 52nd Texas Legislature. About 500 were finally passed. The Governor vetoed over 25 of those which reached his desk. A large proportion of the bills which passed were either local fish and game bills, or local county road laws. Local laws, which deal with those subjects, are the only one county laws permissible under the Texas Constitution. Baylor, Knox and Wilbarger Counties each have a new law restricting the taking and sale of minnows, within these respective counties. The restricting applies particularly to the sale of minnows caught in these counties and transported elsewhere.

There were 1458 roll calls in the Texas Senate in the session just closed. I missed very few of them. I do not have a record of the roll calls in the House at hand at this time.

The 52nd Legislature devoted considerable time and attention to increased safety upon the highways. Reliable figures indicate that more Texans lose their lives each month upon our highways.

than there are fatalities among Texas boys in the Korean War. One bill relating to safety on highways, requires that trucks with as many as four rear tires must be equipped with mud guards or mud flaps. The purpose of this bill is to prevent the windshields of cars following a truck from being covered with mud and road slush—the latter having been the cause of many bad accidents. This new law should prove helpful.

Among other bills pertaining to the regulation of motor vehicles are two which have caused wide comment. One is known as the Motor Vehicle Financial Responsibility Law. They deal with separate angles of motor vehicles operation, but have become confused with each other.

The Motor Vehicle Inspection Law becomes effective September 7, 1951, and requires that each motor vehicle operated upon the public highways of Texas must be inspected once each year as to mechanical condition. This inspection costs one dollar and does not include repair work should any be needed. Personally, I have considerable doubt that this law will bring benefit in proportion to the cost, and for that reason did not vote for it.

The other bill referred to above—the Financial Responsibility Law which becomes effective January 1, 1952, is a long and complicated bill and will be explained in a later letter.
