# Haskell Indians To Entertain Munday Moguls In Conference Battle Friday

## Roscoe Plowboys Down Munday, 32-8, In First 8-A Win

The Roscoe Plowboys marked up their first conference win and second game in the black for the season Friday night in defeating the Munday Moguls, 32-8, in a homecoming game at Roscoe.

Roscoe's first score came when Clifford Burnett intercepted a Munday pass thrown by Charles Rattiffan and ran it back 70 yards for his first of 4 scores. Jesse Geron added the extra point.

Munday scored a safety after Tommy Gage punted to Roscoe's 2. Jackie Fitts went back to punt, dropped the snapback and was tackled after he picked up the ball and tried to run.

Roscoe scored again in the third quarter when Fitts threw a short pass to Dan Dodson who carried it to Munday's 1-yard line, a gain of 41 yards. Burnett went over.

## Aspermont Hornets Tag 47-12 Defeat On Lueders Pirates

The Aspermont Hornets drubbed the Lueders Pirates, 47-12 Friday night at Aspermont in a 9-B contest which leaves the Hornets undefeated and tied with Rule in the title chase.

Halfback Dean Clark returned to action after recovering from a broken arm and scored two TD's and five extra points for the Hornets, while Fullback Gearld Thornton rang up four touchdowns, and Quarterback Earl Lynn Ellison wound up the Hornet's scoring spree with a counter in the fourth period.

Lueders first score was on a 60-yard play from Quarterback Homer Swenson to End M Latimer, in the second frame. Again in the third, the Pirates used the same aerial combination to rack up their second and last TD.

## Albany Lions Blank Hapless Roby 52-0 Friday Night

The Albany Lions continued to roll in District 8A with a convincing 52-0 victory over the hapless Roby Lions Friday night at Roby.

It was Albany's second straight conference win, the Munday Moguls having fallen to the Albany team the previous week. Only loss for the Albany Lions in conference play was at Throckmorton 20-14.

In Friday night's game Albany Quarterback Jimmy Allman led the devastating attack, accounting for three touchdowns, and plotting the strategy for other counters scored by Miller and Scott.

Roby penetrated the 20-yard line only once, with four of their drives backfiring on pass interceptions by alert Albany defenders.

The half-time score was 18-0.

## Mattson Mustangs Entertain Pep Squad At Supper, Party

Members of the Mattson high school football squad entertained with a chili and hot dog supper and party in the home of Supt. and Mrs. Weldon Norman Thursday evening, Nov. 6th following the Mattson-Benjamin football game which climaxed the season.

The Mustangs were honoring the Mattson Pep Squad for their loyalty and spirited support during the 1953 season, which ended with Mattson tying Benjamin for the cellar in District 13-B. Coach John Hosea stated that his boys wanted to repay the girls for an earlier supper which was given by the Pep Squad preceding the McCaulley game to buoy up their lagging spirits. The boys responded by winning the McCaulley game but failed to take Benjamin.

Coach Hosea also announced that letter awards, Football Hero and Sweetheart will be announced at the annual Football Banquet this week.

The Haskell Indians will entertain the Munday Moguls tomorrow (Friday) night in a District 9A grid battle.

The Indians, leading the district with three conference wins and no losses, will be heavy favorites to win the contest. The Moguls have a record of one conference win and two losses, having lost to the powerful Albany Lions and the Roscoe Plowboys. The Redskins have defeated Roby, Roscoe, and Throckmorton.

The Indians will be without the services of Donald Dickey, 4-year letterman, who was injured Halloween night after the Haskell-Throckmorton game.

In the past ten years, from 1942 to 1952, the Indians have won seven of the ten games played with the Munday Moguls. The Moguls have won three of the grid battles.

## Reading and Lighting and 'Rithmetic

Look what some figure-happy statistician just found out. From kindergarten through high school, school kids have to plow through a pile of books 18 feet high. A photograph taken of this pile of books would make your eyes ache. Close visual work is hard on the eyes. A New York State survey of 83,000 students showed only one in 20 kids had vision defects at kindergarten age. By senior high, eye troubles affected six students in 20. Good lighting is one readily available means of making seeing easier for these students. Lighting engineers find that over half the schools still use old, globe-type fixtures that give only one-sixth the light that ought to be on the desks.

In those schools that have installed modern lighting, teachers report that students are more eager to study, are happier and require less discipline. The teachers find their jobs easier.

To help schools analyze what light is needed, General Electric engineers work out various lighting systems in model classrooms where effects can be demonstrated and compared. A booklet is offered, "Making Schoolwork Easier on the Eyes," in which current practices are summed up. (Write the Lamp Division, Nela Park, Cleveland, Ohio.)

It is the aim of General Electric to translate its engineering help into public service at the community level.

You can put your confidence in—

*Yet—fifty-six per cent of Texas' trucks are owned by individuals with only one truck. Trucking is probably the biggest "little" business in the State!*

Texans can't do business without truck transportation.  
No community can exist, even if it is on a rail line, without trucks to haul goods away from the railroad and get them to stores and homes.  
There are 1,788 Texas towns that have no rail service at all. If it were not for trucks, they would have no commerce with the rest of the State and the nation.  
Wherever you live in Texas, whatever you do—trucking services are essential to your way of life. Trucks belong!

**And here's the biggest seller of its class in the business . . .**

Here's an all-purpose performer with a payload capacity that goes over 8,600 lbs. . . lets you carry big bulky loads with ease. Choose new V-8 power—or all-new Six!

Now is the time to winterproof the farmstead. The recent cold snaps are the forerunners of more severe weather to come. Be on the safe side and be ready.

The annual meeting of the Texas Farm Bureau Federation will be held in San Antonio, Plaza Hotel from Nov. 10-12.

There is still time in most sections of the state to plant winter legumes provided, of course, sufficient moisture falls to insure a stand.

### SMALL BUSINESS

By C. WILSON HARDER

It can be done! Out in San Francisco two veterans whose business was almost driven to the wall by a near monopoly, have won a decision in the Federal Court after a 6 year fight.

Fresh from the naval campaigns of World War II, two discharged officers, Bernard M. Weitz and Frederick J. Dannenfels, started a paint business. They decided to call their product Dutch Paint, and their company, started on very limited capital, the Dutch Paint Co.

But National Lead Company, with a near monopoly on processed lead and other paint materials, and who have a patent called Dutch Boy, immediately acted to stop the young company.

The 200 million dollar corporation found there was no copyright infringement involved. A letter from the patent department of National Lead to the West Coast advertising manager admitting the company had no proprietary legal exclusive right to the use of the word "Dutch" was entered as court evidence.

The advertising manager was instructed in the same letter to discourage use of the word by a "show of force".

Perhaps veterans just out of the wars don't respond too kindly to a "show of force". Perhaps the history they had helped write as personal peril had taught that a "show of force" was all it took for Hitler to annex territories without firing a shot.

The young veterans were not bluffed by the "show of force".

So when National Lead exhausted every weapon in its arsenal labeled "show of force" without hitting the waterline of the young company, another tactic was tried.

Today paints require as an ingredient titanium pigment. In 1947 National Lead and Dupont was found by the United States Supreme Court guilty of conspiracy and violation of the anti-trust laws in restricting the sale and production of the pigment.

But despite this Supreme Court decision, National Lead then shut off all supplies of titanium pigment to the young company.

So the small Dutch Paint Company filed not only suit for declaratory judgment, but also a treble damage suit in the amount of \$1,695,000 on the basis that at the time National Lead shut off their supplies of titanium pigment, National Lead increased their own consumption of the material ten times.

The Federal Court found that the Dutch Paint Company has every right to continue to use its own name.

Commenting on this decision, the two partners summed up the entire crux of the battle being waged today by independent business to survive.

"We are thankful," they said, "that our country's laws protect the little man against the predatory acts of giant corporations. It is evident from the decision that our courts will uphold the rights of the small businessman if he is willing to fight for them."

Without the nation's anti-trust laws, the Dutch Paint Company would have been destroyed.

This case illustrates why there is a concerted drive today to abolish the nation's anti-trust laws.

**Social Security Representative To Be Here Nov. 20**

A representative of the Abilene office of the Social Security Administration will be at the Chamber of Commerce office in Haskell at 11 a. m. on Thursday, Nov. 20. This announcement was made today by Ralph T. Fisher, manager of the Abilene office, who invited persons to call at that time who need assistance in connection with retirement claims or death claims under the Social Security Act.

Fisher called attention to a recent change in the law that will make it possible for certain persons over the age of 75 to have their retirement payments refigured. Any worker who has filed a claim for his retirement payments before April 1952, and who has continued to work in 1951 and 1952, should recheck with the social security office. Some of these workers have previously been told that no refiguring of their amounts was possible, but there is a special provision in the 1952 amendments that changes this.

Persons who are 75 years or over may now receive old age and survivors insurance payments whether or not they have retired. Any such persons who have not checked up on their rights should do so as soon as possible. Even if the worker is still on his regular full-time job, he can still draw his regular monthly social security benefits.

People in this area who cannot call to see the representative at the time and place shown above may write the Social Security Administration, 308 Post Office Building, Abilene, Texas.

**Simple Rules Will Prevent Majority of Hunting Accidents**

Most hunting accidents could be prevented if hunters would observe the simple rules of safety with firearms. "Trigger happy" careless hunters says R. E. Callender, wildlife conservation specialist for the Texas Agricultural Extension Service, not only endanger the lives of every hunter in the woods but also cause much damage to wildlife.

Practicing safety with guns in the fields or woods then, says the specialist, is just a good conservation practice and applies to both humans and wildlife. It is also very important at this time that hunters be doubly careful with fire. A wildfire can easily wipe out not only the wildlife of an area but destroy vegetation that is so badly needed at this time for livestock, says Callender. He says records kept on hunting accidents shows that two-thirds of them are caused by humans in the line of fire; mistaking humans for game and hunting with the safety catch off on the rifle.

He points out that good sportsmanship is just using good manners while on the hunt. It includes using the right gun for the right game, hunting only in season and not taking more game than can be used even though the bag limit may permit a larger take. Bird hunters, he says, should use a trained dog to retrieve crippled birds. The rights of others are always respected and permission is always secured before going onto another's property.

Here are Callender's suggestions for making the hunt a safe one. Treat every gun as if it were loaded; never carry a loaded gun in the automobile; be sure there are no obstructions in the gun barrel or action; carry the gun so that the hunter has control of the direction of the muzzle even if he should stumble; never pull the trigger until sure of the target and never point a gun at anything you do not intend to shoot.

Loaded guns, says Callender, should never be left unattended and hunters should always unload guns before climbing over a fence or into a tree. And he adds, bullets fired at flat, hard surfaces or at objects on the surface of water may ricochet and hit objects not thought to be in line of fire. Last but not least, he says gunpowder and alcohol should never be mixed for the results can be disastrous.

And finally, believes Callender the intelligent hunter is always thinking about how he can aid in conserving and even in building up the wildlife resources of his favorite hunting areas. By being careful, preventing accidents and fires and by always being the good sportsman, wildlife resources can be conserved and improved and relations between the land owners and the hunter can be given a big boost in the right direction, says Callender.

HOUSE PLAN No. 34

## Modern Ranch House Is Compactly Arranged Home

If you like the long, rambling type house you will really take to this Farm and Ranch Plan No. 34—it gives you casual ranch house appearance in a very compactly arranged home.

The rain and are looking forward to much more of that kind of weather this winter.

E. Manske who was a patient at the Stamford Hospital last week has returned home. Mr. and Mrs. Louis Manske and Whit of Stamford visited with him and with Mr. and Mrs. Oscar Manske and children Sunday.

The infant son of Mr. and Mrs. Fred Teichelman was baptized last Sunday in St. Paul's Lutheran Church by Rev. Oelke and given the name of Steve Carl. Sponsors were John Teichelman and Mr. and Mrs. Werner Teichelman.

The Christian Couples Club of St. Paul's Lutheran Church met Friday night of last week for their regular meeting. It was decided to have a Christmas party for the members and their families.

The Brotherhood of St. Paul's will have a chill supper Tuesday night Nov. 18 beginning at six o'clock. Friends and members of the church and others interested are invited to come.

The Methodist Men's Club met at the Sagerton parsonage Thursday night for their regular meeting. Bro. Riffe of Abilene was there and a number of members from Tuxedo were present. There was a discussion of plans for a joint Christmas program of the Tuxedo and Sagerton Methodist Churches. The next meeting will be Nov. 20, at Tuxedo.

Mr. and Mrs. Jack Gibson of Pecos visited with Mr. and Mrs. A. L. Gibson Sunday.

The casement windows in the attractive kitchen will let in plenty of Old Sol's rays to both work area and the eating place. This eating place is large enough for serving the family meals in comfort. Cabinet space is plentiful and the arrangement of sink, range, and refrigerator will require a minimum of housewife mileage in meal preparation. Off the kitchen the utility room will provide space for laundry equipment and possibly a freezer chest. Field hands can get rid of sweat and grime in the shower off the utility room before entering the rest of the house.

The arrangement of the bath and utility room, and kitchen in one single area permits a rather simplified plumbing system which will appreciably reduce the cost of materials and labor.

The living-dining area is more spacious than that found in most homes of this size. The large picture window and casements opening on each side will provide an abundance of light and plenty of ventilation.

All three bedrooms have wall space convenient for desirable furniture arrangement. The closets are unusually large, designed with sliding doors to save valuable floor and wall space. In addition, there is linen storage in both the bathroom and hall.

We suggest that this house be built of brick or masonry veneer with a concrete slab foundation and metal casement windows and cement asbestos shingle roof. The gables and front section under the porch should be of painted wood to give the most eye-pleasing effect.

You can obtain blueprints for this Haskell Free Press-Farm & Ranch House Plan No. 5034 and a handy list of materials by which you can figure your construction cost accurate. Send \$1 to Building Editor, Farm & Ranch-Southern Agriculturist, Dept. L-98.

### Sold District Buys Levels for Use at Haskell, Stamford

The Board of Supervisors of the California Creek Soil Conservation District approved the purchase of two land planes Monday at their meeting in Stamford. The land planes will be used to level farm land to get better distribution of water. One of the planes will be located at Haskell and the other at Stamford.

The board approved 13 new agreements with landowners who are starting a conservation program on 4832 acres of farm and pasture land.

Albert Thane, farmer from Paint Creek, has recently purchased a new chisel plow with 18 sweeps. He believes in leaving all the stubble and crop residue possible on top of the soil to prevent wind erosion as well as to keep his land in top shape to receive moisture when it comes.

Terraces have been completed on the farms of Mrs. Frances I. Glenn and W. C. Bryant. Mrs. Glenn had around a mile and a half of terraces built on her farm south of Tuxedo. Bryant built nearly 3 miles of new terraces and built up his old terraces on his farms south of Stamford to help hold more water on his land and prevent erosion.
