"See You On The Fifth...."

Where are you going to be July 5? At home? At work? On vacation? Are you real sure? What makes you so certain you may not be one of the hundreds of people who will start out on a Fourth of July holiday trip—and won't come back? Not a pleasant thought, is it? You may even be a little provoked that we've brought it up.

Well, that's all right with us. For the more provoked you get, the more you may think about this Fourth of July traffic toll that annually makes a massacre out of a holiday that ought to be for pleasure and patriotism, not for tragedy.

You think it couldn't be you? That's what the 360 people thought who were killed over the Memorial Day holiday just a month ago. That's what the 8,936 people thought who have died in holiday traffic in the last six years.

Yes, that's right—8,936 people killed in holiday traffic in the last six years! Almost three times as many as were killed at Pearl Harbor. Half as many as have died for America on the battlefields of Korea.

How many of these 8,936 people thought when they started out during the holiday that they would never come back? Not one!

This one was just driving around the block to get a morning paper. This one was taking his family to visit friends in Dallas. This one was merely crossing the street. Not one of them was purposely going out to get killed—NOT ONE!

So, you see, it could be you.

But here's the bright spot in the picture—it doesn't have to be you! The National Safety Council, which has the grim responsibility for estimating these holiday tolls in advance, says you can make its estimates look silly by merely using a little extra caution, common sense and holiday traffic hazards. The Council says the toll could be cut in half, or even by two thirds, if you and I would make up our minds, by golly, we aren't going to be one of those holiday traffic statistics.

It's just that simple. Instead of saying, "It couldn't be me," just say, "It won't be me!" Then act accordingly.

That's all there is to it. Happy Fourth of July! See you on the Fifth.

When you want to get into—or out of—a tight spot at the curb, Power Steering takes over the extra effort of turning the wheels, and you can forget the two-tons-plus of automobile you're handling. When you want to turn around in a narrow space—Power Steering lets you get the last inch of benefit from Buick's short turning radius, because it makes the maneuver so easy. When one front wheel hits a bump, a

Summer Classes In Homemaking Close Friday Night

Miss Lucille Watson, homemaking teacher in HHS, reported a full and very enjoyable program of work brought to a close Friday of last week.

Approximately 25 high school students were enrolled in summer homemaking, an oil workers adult class and a colored adult class.

The high school students did stenciling, shell craft, made ear bobs, weaving, plaiting and crocheted rugs, and did figurine painting. Quite a bit of work was done for the cottage. Cabinets, tables and floors have been waxed and polished, curtains for the clothing lab, foods lab and the lunch room were dyed and laundered, sewing machines were cleaned, oiled and adjusted, and the machine covers were laundered.

The oil workers wives were enrolled in a sewing class in which a child's garment or a garment for themselves had been made. Miss Watson said some unusually nice work was done by these women.

The colored homemaking class studied a variety of subjects. Miss Watson reported a large attendance by the colored women, with 11 women having attended every meeting. Those who did not miss a class are: Bessie Hanson, Onzia Lee Williams, Mattie Whitledge, Evester Newton, Willie Leo Sharp, Billie Justice, Josephine White, Hattie Lee Andrews, Thelma Lee Johnson and Sammie Aldridge.

The local teacher said she had several days work after the close of the classes in which she plans to work on the homemaking files next year's lesson plans, etc., as a big enrollment is expected the coming year.

THE CHRYSLER NEW YORKER 6-PASSENGER SEDAN
White side-wall tires at extra cost

WHEN YOU TRY POWER STEERING... HERE'S WHERE TO COME FIRST!

You've heard about it and read about it. Now, if you haven't felt what Power Steering does for you, we invite you to try it first in a Chrysler New Yorker... where you will find full-time (not partial) Power Steering!

What happens is this...

You handle the steering wheel in normal fashion. But 4/5 of all the work is done for you by hydraulic power, constantly at your command. Also, you turn the wheel 1/3 less distance now for every maneuver... the feeling you get of utter control is as wonderful as it is new.

Even at a standstill you can turn the wheel easily. Now, parking is shorn of its troubles (and fatigue!)... and you can negotiate traffic, awkward drives, and garage doors precisely and with ease.

You can double the longest day's drive you've

ever known... end up free from arm and shoulder strain. Rough roads, soft shoulders, snow, mud?... the power that helps you steer now prevents the car's wheels from "steering back" at you. The course you set is held, at any speed, till you want it changed. Yet, with this 5-times greater control, "wheel feel" is always the same.

Why not come try it? Learn for yourself why growing thousands of motorists say they'll never be without Full-time Power Steering from now on. Drive a Chrysler... and Learn the Difference!

State Health Officer Outlines Long-Range Program To Combat Polio

A long-range battle plan against rampaging polio was outlined by the State Department of Health at Austin this week.

State Health Officer Geo. W. Cox recommended these eight points of action in combatting the disease which this year is striking harder at Texas than at any other part of the nation:

1. Spot spray insect breeding places after they have been cleaned and destroyed. Spraying indiscriminately might kill a few insects on the wing, but it won't do the job. It might kill valuable plants and create a false sense of security.
2. Get rid of animal shelters in urban areas. They cannot be kept clean and consequently create a health hazard as fly breeders.
3. Get rid of dump piles, tin cans, old tires, and accumulated debris which breed flies and mosquitoes and provide harborage for rats.
4. Provide a properly operated sewerage system, and get rid of all surface toilets. Dr. Cox believes surface toilets constitute one of the major health hazards facing Texas.
5. Provide a source of pure water.
6. Protect food supplies in wholesale business houses, retail shops, and in private homes.
7. Make regular inspections of

Juniors nine through twelve, the Intermediates, thirteen through sixteen, the Young People seventeen to twenty-four and adults twenty-five and up. These conferences and demonstration programs are arranged for the entire membership of the church and will prove interesting for all people according to a statement made by the district president.

The First Baptist Churches of Haskell and Stamford and the University Baptist Church of Abilene will have demonstration programs during the camp program.

all premises to see that no possibility exists for fly breeding. If you have flies, somebody is maintaining a breeding spot.

Garbage should be placed in fly tight garbage cans until time of disposal. Tubs, boxes, lidless garbage cans, etc., are of no value.

He urged each home owner to assume responsibility for keeping his property clean inside and out. This will help protect you and your neighbor. More people have been struck down by polio this year than ever before.

He said it takes months and months to clean up a city, and that it "takes forever to keep it that way." The program must be continuous. "It will take from one to five years to really clean up our larger cities," Cox said.

"This is the same program we have followed and published for the past ten years. People have got to get over the notion that spraying alone will keep their city fly-free," Dr. Cox declared. "The only way to kill flies is to do it methodically, block by block, by eliminating their breeding places."

"They carry many diseases — diarrhea, typhoid fever, cholera, trachoma, just to mention a few. I firmly believe that, if this 8-point program is invoked, we'll see a lessening of polio incidence in the future."

League Baseball Organized Here

Baseball organization in Haskell and vicinity Wednesday night in the Haskell Commerce office. Representatives from Anson, Rochester, Anson, and Haskell.

The group decided to play boys up to the age of 20. A boy who is 20 years of age as of September 1, 1951, is not eligible to compete in Little League competition.

Through this organization, the boys are not only getting the benefit of the summer sport, but it will give them unlimited possibilities since the organization was encouraged by the Wichita Falls Spudders, a professional baseball team. This will add about two nights a week to the softball activities that are now in progress in Haskell.

Games will probably be played on Tuesday and Thursday nights with game time being 8:30 p. m. The representatives agreed to turn in an 18 player roster before August 1. A schedule for the Little Leaguers has not been worked out and will be announced later. But every team will probably play at least two games a week. They also agreed to play 7 inning games instead of 9.

The organizers of the Little League are planning to complete their schedule by August 15, in order that the high school boys can begin conditioning and working out for the football season.

Olen King will be at the helm of the Haskell Little Leaguers and the team will be sponsored by the American Legion.

Piggly Wiggly, Bill Wilson Head CL Slate Monday

What is expected to be one of the top games in City League competition will be unveiled at 7:30 p. m. Monday when the league-leading Piggly Wiggly nine and Bill Wilson Motor Company clash at Fair Park Stadium.

Piggly Wiggly, under the management of Olen King, has swept through three consecutive games without a loss, while their opponents have dropped two bouts in five contests. However, the possibility that this may be one of the top games of the season lies in the fact that the Bill Wilson Fordmen have handed Piggly Wiggly a 5-4 defeat in a practice game early this year.

A victory for the Fordmen will not take the first place berth away from the Piggly Wiggly contingent unless Manager King's nine drop their game to the Flying Red Horses that is scheduled for tonight (Thursday.) The triumph for Bill Wilson Motor Co. will bring them from fourth to second place in the City League standings.

Manager Bill Ponder's Bill Wilson Motor Company alignment annexed their third victory in five starts Monday night when they outfought Sagerton, the new addition to the City League, 13-7. G. W. Mullins was the winning hurler.

Dynamic Chick Hitting Trips Mackey Co. 19-0

Dynamic hitting by the entire Chick alignment surprised Haskell softball fans as the local nine swept up a 19-0 victory from strong Mackey contingent from Abilene.

The victory was the Chicks' fifth straight for the season and the most impressive one of the year. The Chicks have lost two games since play began, to Stamford, Mackey Company has played Stamford twice and lost both games, but extra innings had to be completed before they went down in defeat. The loss was their sixth in thirteen starts.

The Chicks dropped a 7-2 decision to Weinert Tuesday night at Fair Park Stadium. Leroy Hix pitched the Weinert nine to victory, handing the Chicks their third defeat in eight starts.

Black Indians Try For Sixth Win At Hamlin Sunday

Victorious in five consecutive starts this season, Haskell's Black Indians will journey to Hamlin Sunday where they will meet the Hamlin All-Star baseballers at 3 p. m.

Expected to toe the mound against the strong and potent Hamlin nine will be Tommy Rivers, a veteran righthander who posted his first victory last week in going the distance to throttle the Quannah All-Stars, 7-2. Johnson will be the backstop for Rivers.

Manager Albert Sharp reported this week that the Hamlin contingent was boasting of a 10-game winning streak, losing only two of their 12 contests this year. A Hamlin victory would pass out the Black Indians' initial loss this season.

The Black Indians have been dishing out heavy losses on opponents, being slowed down by only Quannah and Anson. They blanked Rule 15-0 in their opening game of the season, then posted an 11-1 victory over Throckmorton, were worried with Anson, but came out with an 8-6 win, trampled Throckmorton 20-6 in a return bout, and outlasted Quannah 7-2 in their last test.

The odds are making the Black Indians the favorite in Sunday's battle, but the tide could possibly turn with the stiff opposition that can be handed out by the powerful Hamlin alignment.

Haskell Corporal With Jet Bomber Crew In England
"Expects To Be Home Soon—In About 5 More Years!"

Corporal Donnie Bob Merchant of Haskell, who has been stationed in England as a crew member of the ground engineers with the U. S. jet bombers since April of last year has just been awarded the Good Conduct Medal, relatives and friends here have learned in recent letters from the young Air Force corporal. He candidly relates how his status as to rank in Uncle Sam's army has gone up and down much like an elevator since his enlistment in January of 1949. He told his mother in a recent letter that "If I can just 'hold on' for another two and a half years I will be awarded a clasp to go with the medal." Even he wonders if he can make it. His ability to see the humorous side eases him over many rough experiences.

Cpl. Merchant left the States on Friday, the 13th of April last year from the West Coast. He went by Trans-World Airlines Constellation to the East Coast where he was transferred to the USNS General Maurice Rose on which he sailed for England.

His base is located about forty miles from London, and he spends many week end leaves viewing the much-read of places of interest there. In his recent letter he said, "I spent another weekend in London a short time ago. I went back to see Buckingham Palace again. It was just the same as two weeks ago. Nothing had changed except the guards they change every two hours." In every letter he mentions the beauty of the English country side. He also says that every house has a vegetable plot as well as flowers. There is still such a shortage there of many foods and materials that strict conservation of everything is still a necessity.

Olney Boosters To Be In Haskell Monday, July 7
A large caravan of Olney Boosters will be in Haskell Monday, July 7, at 5 p. m. to present a short program of entertainment in advertising the 5th Annual Olney Rodeo to be held July 17-19. Approximately 25 to 30 cars are expected to join the rodeo booster trip, along with a hundred or more individuals. The decorated automobiles will tour this section of the country, returning to Olney after visiting several other towns in this area. Entertainment will be provided by part of the booster group and will include music by a string band and the Olney High School band, square dancing, singing and other feature acts.

Three night performances will make up the 5th Annual Olney Rodeo and will include saddle and bare back bronc riding, calf roping, bulldogging, wild steer riding, and many other rodeo events. Included in the rodeo entertainment during the three performances will be several feature events along with the comedy of the clowns.

In connection with the rodeo events will be an Old Settlers Reunion on Friday, July 18, and a Quarter Horse Show on the final rodeo day. Johnny Horaney, Sam Furr and Roy Perkins were in Haskell Monday making arrangements for the booster stop in this city. The members of the booster and publicity committee for the 5th annual Olney Rodeo said the booster caravan would also make Haskell the stop for their evening meal.

DAIRYMEN FIND HOME GROWN FEEDS CHEAPEST
Home grown feeds, especially pastures and other forages, are the cheapest and best feeds for dairy cattle. Using a silo for storage is one of the best practices dairymen can follow — "canned pasture", that's a descriptive term for silage, should be included on every dairy cow's menu at certain times during the year.

Dancing Girls Still Expensive To Clothe,
Sponsors of Albany "Fandangle" Find

Things have not changed a bit in 85 years since Fort Griffin was hustling and bustling center of the frontiers—girls are still expensive. The Dancing Girls of the Bee Hive Saloon are getting new dresses this year and the cloth alone cost the Fandangle Association nearly \$90.00 for each of the five girls, plus a great amount and time spent by the Fandangle Sewing Circle that has been meeting daily for several weeks in Albany's high school. The Fancy Ladies dresses must be of the best materials and meticulously prepared, in order to give the glamour and color that is one of the Robert Nail requirements for the Fandangle presentation. (Of course these new dresses will probably last ten years of intermittent Fandangle uses.) The Fort Griffin Fandangle is a show of the historical events centering around the Connecticut Cavalry and Frontier Outpost 14 miles north of Albany during the late 60's, being retold with music, dancing and narrative story written and directed by Robert Nail

CLEAN-UP HELPS IN FIGHT AGAINST POLIO

Everyone can make contributions to fight against polio. A clean up campaign should be the order of business around every home. Get rid of flies, mosquitoes and other insect pests by destroying breeding places. Sanitation is of utmost importance. Use insecticides to keep the pests under control. Don't wait until tomorrow to start the fight, for even today may be too late.

Electric Cooking Keeps Her Kitchen Cool and Clean!

"Someday you'll Cook Electrically. Why not now?"

Electric Cooking is Fast, Safe, Thrifty... It's Matchless!

When summer temperatures soar—electric cooking can help keep your kitchen a cool, clean, pleasant place to work. Controlled electric heat goes directly into the food, not into the room—the oven, insulated on all six sides, cooks the food and not the cook. And there's no soot, smoke or fumes to smudge walls, pots and pans because only an electric range cooks with clean "sealed" heat that leaves no residue of any kind in your kitchen.

"Electric Cooking is the fashion in modern kitchens"
