THE French engineers who were employed to devise a plan for preventing the terrible A pine torrents. noted upon the theory that the presonce of forests upon a surface would prevent the formation of a torrent, while clearing would open the way to their formation and to their progress. They assumed that the development of forests would lead to the extinction of torrents while their removal would increase their violence and number. Accordingly they adopted the plan referred to above, of planting the contiguous surface. The results were beyond their most sanguine expecta. tions. The spring rains were held in check by the abundant vegetation. The celebrated torrents which had devastated the valleys and driven away the dwellers in them were subjucated to such an extent that miles of country which had become almost a wil brness are once more populated and fertile. The torrent of Bourget. which commences at an altitude of 9,000 faet ... has now been subjugated for nine years by a young forest of uss seres planted in 1878.

Summer Carden In the Air-Propored Extension of the City Limits -The Chinese and the Camera.

Sr. Locis, Jane 25.—The highest summer garden in the world will be ready for the people by the beginning of next summer on the top of a ness buildings now going up on Olive street. The building will be fifteen stories high, and the garden will be or top of that At present, it is intended that the garder shall be simply for people to sit in and look out over the city but it is quite possible that the idea will be cluborated, and a theater

constructed on the lofty platform. The building associations of St. Louis have increased so rapidly that it has now in the city at three hundred or more. Their officers held a meeting socation, and decided to ask the legisla ture to create the office of State aminer of building assocations. The petition will doubtless be granted. An officer of this sort would protect associations from slander, and the stockhold-

ers from fraud. The Chinese of St. Louis are just be ginning to understand that they must internal revenue before May 3 of next year, and they are much disturbed about it. This is in necordance with the exclusion act, passed by Congres nated against organized labor, and last year. That provides for the photo-come to an ignominious termination, graphing of every Chinaman in the country within a year from the passage of the act, May 1, 1801. The Chinese abuninate photography as they do newspapers, and they will make every effort to evade the laws. Haskell county is situated in the southern part of the Panhandle on the line of the one hundredth meridian west from Greenwich. It is 1500 feet above the sea, and has mild winters and summers. It is thirty miles square and contains 576,000 acres of land. It was created in 1858 from a part of Fannin and Milam counties, and named in honor of Charles Maskell, a young Tennesscean, who fell at the messacre at Goliad in 1836.

It remained unsettled until 1874, when there was one or two rauches established. Other ranchmen followed, and in 1880 the county could boast of fifteen or twenty inhabitants. There was no further development until carly in 1884, when the town of Haskell was laid off, and by donating lots a few settlers were polled vote of fifty-seven electors.

Up to 1884 the soil had never been horses, as the natural grasses furnishes in the year. tood both winter and summer for immense herds. The poorer people made money by gathering many thousand tons of buffalo bones and shipping them east to be made into fertilizers used in line to Albany. These all carry express the old states.

Experiments were made in 1885 with garden products, corn, cats, wheat, rye, barley and cotton and the yield was boantiful. The acreage in farms have favorably with that of any people. The increased to at least 30,000.

TOPOGRAPHY. The county is an undulated plaine, with occasional creeks and branches. It is bounded on the north by that picturesque stream, the Salt Fork of the Brazos, and on the west by Double-

WATER. It is traversed by numerous creeks and branches besides the rivers mentioned, some of which are fed by never failing springs of purest water.

Besides the numerous branches that afford water for stock all the time, the south half of the country is traversed by Paint and California creeks with their numerous tributaries draining the south half of the county.

The north half is traversed from northwest to northeast by Lake and Miller creeks whose tributaries furnish water and drainage for the same.

The town of Haskell is the county site of, and is situated one and one-half miles south of the center of Haskell county, on a beautiful table land, and is ight years old, and bas a population of 942. Has es good water as can be found anywhere, which is secured at a depth would not exceed 10,000 acres that would of 18 to 22 feet. Also has two neverfailing stripes of pure water in the edge of tows. The town of Haskell with her extural advantages of location, climate, good water and fertility of soil is destined in the near future to be the

queen city of northwest Texas, and rail road connection for Haskell is all that is needed to accomplish these. ADVANTAGES AND RESCURCES. In almost every neighborhood of the older states and the thickly settled portion of our own state there are many of its citizens who are contemplating a removal or a change of residence for many reasons. Some to restore lost health, some to make their beginning in the world, others to repair financial losses, others seeking safe and profitable investments of serplus capital. There are many others who have comfortable homes and are well contented, but who have children, whom they would like to provide with lands suitable for a home,

and better opportunities in other and newer localities. To such we would say you are just the people we want. Come and see us, and you will find a broad field of occupation and investment to choose from, with chances greatly in your favor. ORAY HAIRS.

Aged Locks Do Not Always Indicate Decayed Constitution

The fact that some persons begin to show gray hairs while in their twenties do not indicate a premature deca y of the constitution. It is purely a local which was the worse although of phenomenon, and often co-exists with course, I always thought the last was great physical vigor. A medical journal says: Many persons; and others who have suffered extremely, both mentally and physically, do not blanch a bair until past middle life; while eng neers who stay at their posts and others, without assignable cause lose their capillary coloring matter rapidly when about forty years of age.

Race has a marked influence. The traveler, Dr. Orbigov, says that in hundred who stayed just because they | many years he spent in South America he never saw a bald Indian, and scarcely ever a gray headed one. The negres turn more slowly than the whites In this country sex appears to make little difference. Men and women life. In men the hair and beard rarely years, but there seems no general rule

as to which whitens first. The spot where gravness begins differs with the individual. The philesopher Schopenhauer began to turn gray on the temples, and complacently framed a theory that this indicates vigorous mental activity.

The correlation of gray hairs, as well as its causes, deserve more attentive study than they have received. Such a change is undoubtedly indicative of some deep- eated physiological process; but what this is we can only ascertain after more extensive observations than have yet been submitted to science.
