## Washington Sidelights

BY GEORGE MAHON

My work has thrown me into occasional close contact with General Eisenhower through the years but not until last week did I have an opportunity to observe him at close range in his new role as President.

On Monday I joined 16 other Members of Congress at the White House where we had lunch with the President, later in the day I shook his hand at a Congressional Reception, and on Thursday I accompanied 24 members of the House and Senate to the President's office for a top-level discussion of the world situation. It is evident that the President is seeking to establish good relations

with both Republicans and Democrats in the House and Senate. This is good business, because he can do little as President without the support and confidence of the Members of Congress.

The President is the same Eisenhower that he formerly was, friendly, understanding, a man of irresistible good will, particular at close range.

The Thursday meeting at the President's office lasted for 95 minutes, and it was all business. Nobody told a humorous story and if anybody even smiled, I failed to observe it. We had an over-all report involving our national debt, our tax burden, the Korean War and the international situation generally. Much of the information presented was secret in nature. Allen Dulles, Chief of our Central Intelligence Agency, Gen. Omar Bradley, chairman of the Joint Chiefs of Staff, and Joseph M. Dodge, Director of the Bureau of the Budget, participated in the meeting.

When we left the meeting, press and radio reporters met us in the President's waiting room and asked for details of the conference. But one could properly make public the details. Speaker Joe Martin commented briefly that the picture looked grim, and Senator Taft commented that no new crisis was discussed at the meeting. I believe in freedom of the press, but I think some Americans in recent years by unnecessary talk have given the enemies of our country entirely too much information which is of no value to the American public, but of very great value to our enemies. To give the enemies of our country our secret military data and a play-by-play report of what we plan to do would greatly weaken our world position.

The job of the President is almost unbearably difficult. President Eisenhower looks exceptionally fit. I hope he can remain so. He is entitled to every possible assistance from Congress and the American people. It is in our own best interest as Americans to work together in seeking the answers to the problems which beset us putting the welfare of the country above party and political considerations.

As distasteful as the truth is there is no one in Washington who knows the quick and easy answers to our problems. I have the feeling that in the old days before the press and radio became such dominant factors in our lives we had a tendency to feel that our leaders knew all the answers, and we relaxed in complacency. The modern generation has learned that there is no such thing as infallibility of leadership. We are finding it difficult to adjust ourselves to this new situation. Yet there is no reason to despair. Scepticism and distrust do not provide the answer to the problem

They aggravate it. The better approach consists in a little patience and faith in each other and faith in

God. This approach will not provide the quick and easy answers but it will provide us with the

strength and character to meet times demand, enabling us to live, to avoid major

## Quality Planting Seed Proves Cheap 'Crop Insurance'

Certified seed may cost slightly more than other seed but the added expense gives assurance of purity, higher germination and better yields at harvest time. Seed of questionable purity and germination may not be cheap at any price, says F. W. Martin, County Agent.

He points out that certified seed are usually the best seed of a particular variety available. These seed come from fields that have been inspected during the growing season, have been properly handled at harvest time, cleaned, tested for purity and germination and properly stored. All this, he adds, is insurance for the farmer.

The blue tags attached to each sack of certified seed carry information that should be of interest to the buyer. The State Department of Agriculture issues the tags for use on seed that have met certain high standards of purity and germination.

Martin suggests that farmers purchase now the seed they will need for planting this year's crop. Supplies generally are adequate, but last minute shoppers may find local stocks depleted and thus be forced to plant whatever seed are available.

Finally, says Martin, if the planting seed have not been chemically treated for controlling seed-borne and seedling diseases, farmers will find this practice profitable and more cheap insurance against poor stands and plant losses during the very early plant growth period. The county agent can supply information on seed treating and variety recommendations.

# TELEVISION ANTENNA SERVICE

We do not claim to be able to give you expert installation service as we have only had four and one-half years experience in this work. We do welcome comparison with any in this section. Ask our customers for whom we have made installations, about our work. We do not use house tops for tower bases or guy stations as damage to houses may be more than a good installation would cost.

We have equipment for raising towers and letting them down if they need repairs. We do not get on your roof.

You need not worry about getting the antenna too high as T. V. works best when Transmitter Tower and Receiving Antenna are in the line of sight. If Wichita Falls Tower is 550 feet our antenna would have to be near 1200 feet to be in line of sight. Since we can't get antenna that high the best thing to do is to use a high gain antenna with low loss lead-in on a tower as high as possible and a good Fringe Area TV Set.

We use Alprideo standard grade towers as the smaller size economy tower is not recommended for windy sections where height is needed.

If you want TV at its best let us install a new Philco or Zenith with a good antenna for you. Each installation receives special attention.

We make no rash promises but as we have been doing for the past 25 years we will render the best service possible. Our word is our bond and we will give the customers everything they have coming.

## March 1 Deadline For Reservations To Scout Jamboree

Only 15 more reservations will be taken to the National Boy Scout Jamboree to be held in Columbia this summer, announced Alex Bickler, of Abilene, chairman of the Chisholm Trail Jamboree committee. This decision was reached Wednesday night when the committee met to make some of the final plans.

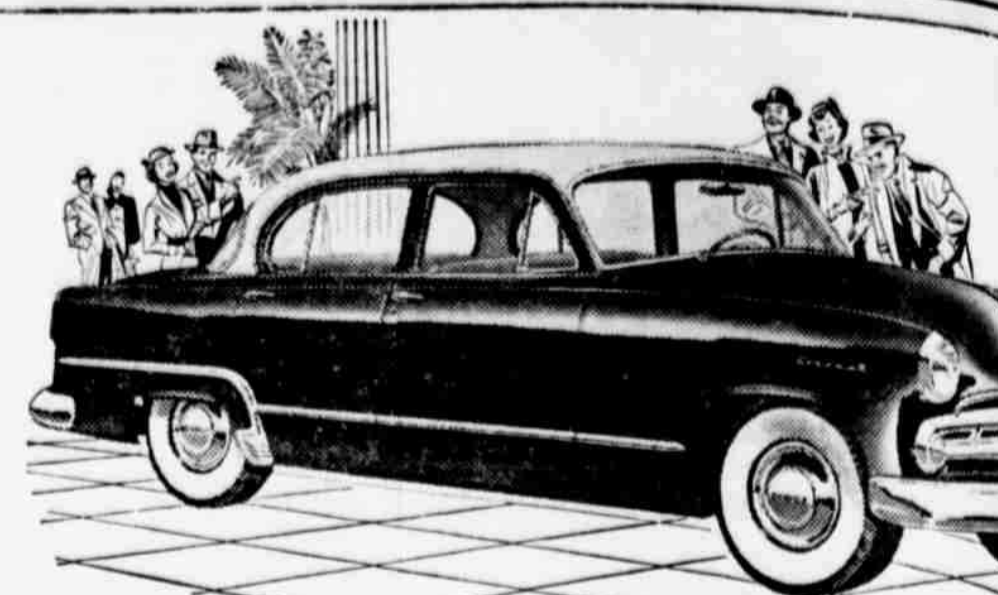

Since March 1 is the deadline for all reservations to be sent to the New York office, the committee decided to allow 105 Scouts and Explorers with 10 leaders to make the trip which will leave Abilene July 12th and return July 26th. The Jamboree is being held at the Irvine Ranch at Santa Ana, Calif.

The committee also studied drawings of suggested gateway that the Council will build to be placed in front of the Council Camp at the Jamboree grounds. Any Scout or Explorer who is over 12 years old may make a

reservation for the Jamboree. Total cost is \$199.50. When 105 reservations are reached all further reservations will be held for replacements only. For more information call or write the Boy Scout Office, Abilene.

## Christian Church Broadcast Heard Over Large Area

The Christian Church, under the leadership of John Barry Minister, is broadcasting a half hour program each Sunday afternoon at 1:30 p. m., which is reported to be heard in a large area of the state.

The program is broadcast by remote control directly from the auditorium of the Christian Church here with the local members composing the choir and filling all other needs of the program. Bro. Barry brings a 15 minute message, and the choir under the direction of Mrs. Lynn Pace, Jr., fill in with the musical background of the message. Bordie Worsham is the announcer for the church and each Lord's Day different members of the church lead the radio audience in prayer.

The program is broadcast over the Stamford Radio Station KDWT and has been on the air since October. In the beginning the program was for only 15 minutes and was broadcast from Stamford. December the church enlarged the program to one-half hour and began to broadcast by remote control so that a more interesting and informative program could be produced. Reports have been received from Abilene, to the south Seymour to the north, Knox City to the west, and Throckmorton to the east that the program is being received with much interest. All those who have heard the program have thought it a very informative one. Those participating in the program have expressed much interest and enjoyment in producing the broadcast.

Anyone wishing to see the program as it is broadcast may visit the church any Sunday afternoon before 1:30 p. m. and see the production of "New Testament Christianity On the Air."

### CARD OF THANKS

We want to take this means to express our gratitude to the neighbors and friends for their thoughtfulness during our recent accident, for the cards and letters for the flowers and words of encouragement.

Especially do we thank the doctors, nurses and hospital staff. May God's blessing rest upon each and everyone who helped us in any way.—Mr. and Mrs. M. B. Wilson.

Sweetlovers can be planted successfully from now until April 15. Hubam and Madrid are two of the best varieties.

## The Dark Can Kill You

America's millionth traffic victim has been dead a year. Yet auto wrecks go right on changing our country crossroads into killer corners.

Where's the villain?

Some say "more cars on the road these days." Some point to "reckless youths" . . . "lax laws" . . . "drunken driving" . . . "speeding."

But something else may be more to blame for auto accidents than any of these. Darkness. Plain old darkness.

Look at one case. In a Connecticut area 182 pedestrians were killed at night in two years—179 on poorly lighted streets.

Busy traffic centers are waking up fast, lighting their death-trap streets. Salt Lake City cut night deaths 92% in one area, Grand Rapids 78%, Bridgeport 93%.

Some small communities have been first to pick up the newest in lighting equipment. Oakwood, Ohio, has the largest installation of fluorescent street lamps in the country. And there's a broad-daylight look in Lyndonville, Vermont, even late at night. Fluorescent lighting as developed by General Electric has now been extended to street lighting.

Good street lighting has been a pet project of ours for years. General Electric engineers work with local officials on other community problems, too—traffic control, water shortage, waste disposal, farm and home modernization—wherever electricity can help progress. For progress is our most important product. General Electric Company, Department 2-123, Schenectady, N. Y.
