Topography, Water, Soil, Products, Shipping Points, Railroads, Public Schools and Mail Facilities.

HASKELL county is situated in the southern part of the panhandle on the line of the on . adredth Meridian west from G. tet.wich. It is 1500 feet above the sea, and has mild winters and summers. It is 30 miles square and contains 576, bushels per acre, and usually sell at To such we would say you are relating to limited partnership cific company and its connections on the contains 576, bushels per acre, and usually sell at To such we would say you are upon the termes, condetions and have displayed in the present inin 1858 from a part of Fannin and Milam counties, and named in honor of Charles Haskell, a young Tennesseean, who fell at the massacre at Goliad in 1836.

It remained unsettled until 1874 when there was one or two ranches established. Other ranchmen followed and in 1880 the county could boast of 15 or 20 inhabitants. There was no further development until early in 1884, when the town of Haskell was laid off and by donating lots a few settlers were induced to build residences, and in January 1885 the county organized with a polled vote of 57 electors.

Up to 1884 the soil had never been turned by a plow, and the people depended upon raising cattle, sheep and horses as the natural grasses furnished food both winter and summer for immense berds. The poorer people made money by gathering many thousand tons of

e. barley and cotton and is the yield was bountiful.

In 1886 and 1887 the entire west. from seasons of unprecedented dry road from that city to this secness, but the faith of the few tion of the star where they control greer and in the fall of 1887 farm- principal members owns 150000 ing begun in dead earnest, and the acres in this and Knox county, becrop of 1888 far surpassed all an- sides he owns the large addition to ticipation, corn made 25 bushels the town of Haskell on the south. general crop and there was no de- to extend their lines. mand for it in the local market.
