THE DOCTOR--Dr. R.G. Howell will close his medical practice of 13 years in Knox City on May 31 because, in view of not having a second physician in town, the work load is simply too much for one person. He sees from 85 to 110 patients each day, plus emergency calls every night. Asked about the coffee pot, Dr. Howell said he definitely is drinking a lot of coffee these days. STREAMS IN DESERT PLACES by Ozelle Stephens

"Though I speak with the tongues of men and of angels, and have not charity, I am become as sounding brass, or a tinkling cymbal." 1 Corinthians 13:1

In the thirteenth chapter of first Corinthians we find sixteen statements where by we can examine ourselves to find out or to know if we have the qualities of Godley love. This kind of love, is love in the deepest sense; God is its subject and he sheads it abroad in our hearts by the holy spirit. Romans 5:5 Because Christ is in this

love, it is characterized by the following qualities: Love suffereth long, and is kind; and love is patient, and love envieth not; love is not jealous, or conceited or proud; love is not illmannered, or selfish or irritable; love does not keep a record of wrongs; love is not concited, or proud; love is not ill-mannered, or selfish or irritable; love does not keep a record of wrongs; love is not happy with evil, but is happy with the truth. Love never gives up: its faith, hope and patience never fails. Love is eternal. Have you examinded yourself by God's qualities lately? The hour is late, the time is short, the Kingdom of heaven is at hand. In seeking. finding and keeping these truths in your heart the Holy Spirit will reveal to you the deep truths of God with eternal life and joy everlast-

few years, then quit and returned in 1947 to work continuously until retirement.

During this tenure, he worked under five section foremen. Bivins stated he enjoyed working for all the foremen he served under and with all the men he worked with, which were many during his years of service. He worked on the road driving a truck until 1957 when he had a chance to become a radio dispatcher for Knox County Maintenance and Engineers. From 1957 until the present, Bivins became well-known in this area for his station carried his voice over about 25 counties in this area.

Alvin Alexander, who was Bivins' last foreman, stated he hated to see Bivins retire because he was a capable and dependable employee.

On his last day of work, Bivins was presented a rod and reel, hunting knife, and tackle box from his fellow employees. When asked what he was going to do after retirement. Bivins stated he was going to travel and fish.

Retired Teachers Complete Book

When 350 retired teachers recount vivid memories of their earliest days of teaching, the result is sure to be a grab bag of humorous, poignant, and often incredible anecdotes which illustrate the range of education in this century. As We Remember is presented to the public and the profession as the bicentennial effort of the Texas Retired Teachers Association. It is a goldmine of information about the way things were in the distant and not-so-distant

From the accounts in this volume the reader catches glimpses of pioneer teachers on the job from the piny woods of East Texas to the windswept plains of West Texas-and from the coast to the Oklahoma border. Here are documented examples of the salary scales, the procedures for securing a position, the archaic codes of conduct for teachers, and the herculean daily program of the one-teacher school.

Here also are heartwarming memories of individual children helped to overcome handicaps of many kinds as well as special recollections of such celebrities as Bill Moyers and Lyndon and Lady Bird Johnson

There are detailed accounts of surviving disaster situations such as the explosions in the New London school and the Beaumont ship channel. There are fond reports of the rigors of preparing school programs of many kinds. And various currents innovations are provided some early antecedents in the classrooms of creative teachers.

The over-all impression is one of optimism, of calling attention to the progress which has been made in the teacher's status and in public support of education.

Lois Gray of Fort Worth chaired the committee which edited this volume. Others were Buelah Bratton and Margaret Caskey.

cerning the efforts of the Brazos Valley Health Resources Inc. to raise needed funds to assist in locating the new doctor and his family, several facts need clarifying for the benefit of our readers. First of all, Dr. W.F. Thompson, who will begin practice here July 15, did not ask for, nor receive, any type of guarantee. In fact, Dr. Thompson did not ask for anything. Because of the increasing demand for doctors small communities especially, many towns do offer a guarantee but this was not the case here. AUSTIN--Comptroller Bob Bullock said Friday his department has collected nearly \$1 million in sales tax judgments in the 16 months since he took office, more than was collected during the previous eight years.

Bullock said his sales tax collected to consider. division has \$993,000 in judgments since January 1, 1975, compared to only \$763,000 collected in the previous eight years since the sales tax was implemented.

"These judgments were against hard-cord delinquents who refused to be considered uncollectable. Now we're starting to cash them in."

Also Friday, Bullock mailed checks totaling \$9.1 million to 599 Texas cities and towns. representing their May city sales tax rebates

Bullock said he has remitted \$96.5 million so far this year to the 845 cities collecting the one-cent city sales tax.

Knox City's net payment was \$1085.26. Area towns and their totals include Munday. \$1397.65; Haskell, \$2578.31; Seymour, \$3286.92; Stamford, \$3136.10; and Aspermont. \$1337.27

"The school year at most institutions is drawing to a close," Carl R. Beisuer, Social Security Representative in Vernon, commented today, 'and it is a good time to remind students receiving Social Security benefits of their obligations in making certain reports. Of course, the obligations are a year round thing. Mr. Beisner went on, "but end of the school year is a convenient time to sum them

"A student may be receiving Social Security benefits on the record of his or her retired, deceased, or disabled parent," Mr. Beisner explained. "They must be over 18 and be in full-time attendance at a properly certified school. The benefits can continue through the end of the term in which the student becomes age 22. Naturally in the four year period lots of changes can occur. Therefore," Mr. Beisner stated, "if a student who receives Social Security gets married, or stops attending school, or reduces attendance below full-time, or changes schools they must report to Social Security. Also, if your employer pays you to attend school as part of your job you must report.

"One thing students should also understand," Mr. Beisner said. "is that they are subject to the same work test as a retired person. They are allowed to earn \$2670.00 in 1976 and receive all benefits. If they expect to earn more they should report to Social Security. A parttime or summer job might cause them to be overpaid if they don't report. The local Social Security office is ready at all times to answer student questions and assist with reports," Mr. Beisner concluded

The Vernon Social Security Office is located at 170! Cumberland. The phone number is 817-552-9346.

REDDY'S HELPFUL TIPS

- * Your air-conditioner will operate inefficiently if filters are not cleaned regularly. Dirt and lint, collected on the filters, restricts air flow to the coils. Clean filters every two weeks.
- ★ Let nature help you save energy by shading your home with trees and shrubs to help cut down on summer cooling costs. Draw draperies against afternoon sun.
- * Remember to keep outside doors, windows, and fireplace dampers closed. If you have window units, close the heating vents near the floor, as cool air falls and can escape through vents.

and 55 cases of EEE were diagnosed by U.S. Department of Agriculture laboratories. Also, an additional 105 cases of WEE and 40 cases of EEE were diagnosed by state and public health labs. VEE was a problem in Texas in 1971, but since that time no cases have been diagnosed in the U.S.

VEE has a complex natural history with many hosts and it is not known which of these hosts may exist and harbor the virus in Mexico or in the U.S. Since the virtual disappearance of the disease, vaccination against it has declined considerably.

Therefore, if the virus were to reenter this country, it could spread rapidly since most of the horse population is not vaccinated against it.

Horse owners are encouraged to have their horses vaccinated for all three types of equine encephalitis as soon as possible. Taking the time now to have your horses vaccinated can save alot of heartbreak in the future.

CONTROLLING APHIDS IN GARDENS

Aphids are odd looking little insects with two tubelike structures on the end of their back that resemble exhaust pipes. They come in almost all colors--red, vellow, green, black, purple--and can play havoc with a vegetable garden.

Aphids, often called plant lice, vary in length from one sixteenth to one quarter of an inch and may have wings. They damage plants by sucking juice from leaves, stems coming out of and fruit and can also transers for several mit deseases to plants.

Aphids will attack plants of any size and at any stage of growth--from seedlings to mature plants at harvest. Since aphid numbers can increase rapidly, garden crops should be checked at frequent intervals.

Plants infested with aphids may look wilted, and the ends of leaves may curl up and look yellowish. Heavy infestations of aphids can cause severe plant losses. Diazinon, dimethoate, endosulfan, malathion and naled are all effective insecticides to treat for aphids. Before applying any insecticide, make sure it is safe to use on the crops in your garden and follow directions to the "T"

WHAT IS A SPHYGMOMANOMETER?

It is a device that is used to measure your blood pressure. First, a cuff with a rubber tube is wrapped around your arm and the tube is inflated to constrict the flow of blood.

Then a stethoscope is placed on the inside crook of our arm and the pressure is slowly released. At the first beat heard, a reading is taken on the dial attached to the cuff, this is the high point. Another reading is taken at the last beat heard and this is the low point. Your physician then interprets the two readings to determine whether your blood pressure is normal.

by Z.I. Smith

At their noon meeting Kno City Lions heard several items of interest.

A certificate of appreciation was received and displayed to the club for its contribution and part in the District 2E1 CARE program which was to build a school for underprivileged in Guatamala.

Also, President Pete Elliston expressed his appreciation for all the hard work of all Lions to make the broom sale for the blind a big success.

Lion Hob Smith brought Dave Deison from Weatherford as a guest and Lion Sterling Lewis brought as a guest Don Hawkins, who he then presented for membership. A new member presentation was made to Lion Wink Shiflett accompanied by his sponsor Lion Floyd Bailey.

The president announced that for all those who bought the Apollo Exerciser at a previous meeting, an instructor would hold a class at 7:30 p.m., May 27 at the Masonic dining room to give individual help.

Account his scheduled program could not appear, Lion Bruce Campbell Jr. reported on the progress and efforts of the steering committee to secure a doctor for Knox County. Although Doctor W.F. Thompson of Springfield. Missouri has agreed to come work here in order to secure him the area citizens agreed to maintain and operate the clinic for a year, and furnish suitable housing for one year. In order to do this a non-profit corporation has been formed and now contributions are being solicited from everyone, in any amount. Besides Knox City, other surrounding towns are making contributions.
