**CRAPE MYRTLE PLANTED IN LOCAL CEMETERY**

The Knox City Cemetery Association, through the cooperation of the local Garden Club, planted approximately seventy-five crape myrtle bushes at the cemetery Monday, Mrs. C. C. Hoge reported Wednesday.

Since the snow and moisture, the Association thinks many crape myrtles will be planted, and should be planted within the next ten days, Mrs. Hoge said.

Mrs. Bertha Perry at the Knox City Flower Shop, who ordered the plants for the Cemetery Association, still has several in stock. The plants are 55c each and the association urged everyone with lots in the cemetery to order at least one plant.

## Red Cross Drive To Begin March First

M. A. Bumpas, Jr., of Benjamin, Knox County Chairman for the Red Cross fund drive which begins March 1, said this week that organization of the county is being completed, and workers' supplies will be in the hands of local chairmen by the opening day of the drive.

All radio and television networks will carry special programs Sunday evening supporting the 1953 fund drive.

"In our county," Mr. Bumpas said, "it is traditional for neighbors to help each other in time of need. The American Red Cross, as a service agency supported by millions of Americans, is a neighbor to all of us."

"In the present world crisis the work of the Red Cross has vital significance for the personal lives of every man, woman and child in the United States. It serves the armed forces and veterans; it provides blood and plasma for the wounded, the injured and the sick; it helps disaster victims. For me to tell you the outstanding job the Red Cross has done in providing blood for our hospitals and aid stations in Korea is hardly necessary. However, the Red Cross has been asked to expand greatly the National Blood Program to obtain plasma for making a serum (gamma globulin, a derivative of blood) to protect children against the paralyzing effects of polio.

"Yes, our Red Cross dollar can help purchase life itself. I know that Knox County will answer the call to support the Red Cross fund appeal and give from their hearts."

From where I sit... by Joe Marsh

**Wrong "Train" of Thought**

Most of us knew the streamliner stopped about four miles from town last Thursday — but we didn't know why...

Seems the train was hurrying along, then came the screeching of brakes — some fellow had pulled the Emergency Stop cord.

When the conductor asked him why he did it, he said, "The train was just going too fast—I wanted to get you to slow down."

From where I sit, that streamliner has been going at that speed for the past seven years with a perfect safety record and

the passengers have always been pleased. Now—along comes a fellow who wants the train to go at his speed. Some people are like that. Some still would begrudge another person's right to a temperate glass of beer even though that person wouldn't dream of flashing a "Stop" sign on their preference for, say, milk, coffee or tea. Respecting the rights of others is the only way we can keep "on the right track."

*What every girl should know about COOKING...*

It's so easy to bake, roast or broil with an Electric Range... no flame, less shrinkage of roasts, cleaner cooking, and a cleaner kitchen.

You can plug in the coffee-maker the night before, set the automatic clock timer, and coffee's ready when you get up in the morning—you can plug in the toaster or other appliances, too.

The deep-well cooker has many uses, not only for meals—but many other things—to make large quantities of coffee or cocoa at party time, to sterilize baby's bottles—and even to pop corn!

**DID YOU KNOW**  
with an Electric Range you can:

Keep foods warm for long periods on low, gentle heat of surface units... prepare jams and preserves under broiler unit... use controlled, measured heat to cook frozen vegetables and fish without water, in aluminum foil on surface units... "prove" yeast dough in warming oven... freshen rolls by wrapping in aluminum foil and placing on surface unit on low heat for a few minutes?

"Yes, Judy, an Electric Range takes the guess work out of cooking and practically does the job itself. You can call it 'cooking without looking' because you put a meal in the oven, set the automatic controls, and forget it while you're doing something else.

"Another thing I like is the way you can cook on the surface units. Set the switch for the heat you want and you get it.

"Cook cheaper cuts of meat in the deep-well cooker, and you get delicious meals. Cakes and pies come out right every time. Broiling's a delight. You cook vegetables with so little water they retain both their flavor and their healthful vitamins."

"You're sort of fond of your Electric Range, Mom—and I understand why!"

**THOMAS B. RAMEY TO SPEAK AT MEETING OF TEACHERS ASSOCIATION**

Thomas B. Ramey, chairman of the State Board of Education and well-known Tyler lawyer, will replace R. B. Anderson of Vernon and Washington D. C. as principal speaker at the second general session of the District VII Oilbelt Teachers Convention in Vernon March 13-14. Ramey's address to an anticipated throng of some 2,000 teachers and administrators from 23 counties will be "Our Responsibility in Fitting an Educational Pattern to Our Economic Ability," it has been announced by Laura Sheridan, district president and teacher of

English in Newman High School in Sweetwater.

Program for the three general sessions of the convention to be held in the Wilbarger County Memorial Auditorium has already appeared in the February issue of the Texas Outlook.

Dr. Earl R. Douglass, director of the College of Education, University of Colorado, will be the principal speaker of the first general session to be held Friday morning. Principal speaker for the third general session Saturday morning will be Dr. J. Cloyd Miller, president of Western New Mexico College and past president of the National Education Association.

Ramey, before being elected chairman of the State Board of

Education last month, served as vice chairman of the Board for over three years.

He was a member of the Board of Education of the Tyler Junior College for 22 years, having served as president of the board for 15 years.

Since 1915 Ramey has been engaged in the practice of law in Tyler. He is a senior member of the Ramey, Calhoun, Brelsford and Hull firm.

He is a thirty-third degree Mason, and a Shriner.

Tommie Reynolds of the U. S. Navy is here visiting his parents, Mr. and Mrs. Roy Reynolds.

**STREAMS in Desert Places**

By Ozelle Stephens

Saul, the first King of Israel, was highly honored. He was humble in the beginning of his reign. He was led by God in the ruling of the nation. In later years he began to show his self-will. Instead of being obedient to God, he was disobedient. When this happened God could not use him. Through disobedience he cut himself off from God. We find this story in I Samuel.

One of the first things a person will do when he gets out of the will of God, he begins to be filled with jealousy and hatred toward the Lord's people. Saul hated David, the Lord's anointed one. He tried to kill him but the protecting hand was over David. Saul began to be superstitious of all his fellowmen. He finally turned toward fortune tellers instead of seeking God for wisdom, which was and is an abomination to God. One must strive daily to walk in the straight and narrow path or the evil one will overthrow him and he will find himself committing suicide as did Saul. In I Peter 5:8-9 we find some wonderful instructions on how to resist the evil one. "Be sober, be watchful; your adversary the devil, as a roaring lion walketh about, seeking whom he may devour; Whom withstand steadfast in your faith, knowing that the same sufferings are accomplished in your brethren who are in the world."

**NEW EMPLOYEES JOIN FHA STAFF AT SEYMOUR**

John B. Henry and Miss Eva Christene Mazac have been added to the Farmers Home Administration staff at Seymour. The Seymour office serves Knox County.

Mr. Henry, whose home is in Dallas, is a graduate of Texas A & M College, and has been assigned to the Seymour office as Disaster Loan Supervisor. Mr. Henry is acquainted with this type of work as he was a former employee of the Emergency Crop and Feed Loan and has also worked in the Area Finance Office of the Farmers Home Administration, Dallas. He was reared on a farm and understands the problems of farming.

Miss Mazac has been added to the FHA personnel as County Office Clerk for Disaster Loans. She is the daughter of Mr. and Mrs. Henry Mazac of Route 2, Seymour. She is a graduate of Seymour High School and attended business college in Ft. Worth before accepting her present position.

With the addition of this new personnel, the FHA office will

be able to take care of the emergencies arising from the drought.

Mrs. S. M. Clonts and Mrs. Neil Perdue and Charlotte were week end guests of Mrs. Clonts' sister, Mrs. E. I. Welch, in Port Arthur. They returned home Tuesday afternoon.

**AREA COUNTY AGENTS AND FARMERS GIVEN FERTILIZER INFORMATION**

Area county agents and farmers were given information on the use of fertilizers and use of supplemental pastures at a meeting in the courthouse at Benjamin recently. The information was presented by specialists of the Texas Extension Service. The program was under the supervision of J. A. Schorfeld, District Agent, from Vernon.

M. K. Thornton, Agricultural Chemist, stressed the value of soil tests by saying that each farm must be considered as an entirely different problem, as soils differ from one field to another and what is good for one may not be needed by another. This was pointed out by the fact that even though this area is generally high in lime, soil tests show that some farms are short in lime. Thornton said he is hesitant to recommend the use of lime in this area because of the limited rainfall.

In general, Thornton stated that the Rolling Plains area is high in lime, high in potash, medium in nitrogen, low in phosphorus and low in organic matter. It was also pointed out that legume crops in this area could not always be counted on because of low rainfall, therefore the use of commercial fertilizers seemed to be the best method at present in adding to the soil the elements necessary for proper plant growth.

All farmers were urged to have soil tests made, and contact the local county agent for bulletins on the use of fertilizers. Slides were presented showing the amount of the different elements that crops need from the soil. For continued high production these elements must be replaced, and the use of fertilizers and legumes is the

best method of maintaining fertility.

The second session of the meeting was devoted to the use of supplemental pastures, and this was explained by Ted Trew, Extension Agronomist. Trew pointed out that the return per acre was greater from supplemental pastures than permanent range land. Legumes and grasses that were suggested for supplemental pastures were alfalfa, clovers, vetch, KR blue-stem, blue panic, sudan and the lovegrasses. Not only would these grasses give good grazing during times needed, but would improve the soil and have a definite place in crop rotation.

In closing, Trew pointed out that grasses and legumes that are recommended for this area should be planted, while if others were used, only small acreages for test plots should be planted, for obvious economic reasons.
