School Trustees Withdraw Their Resignations

Knox City School Board members reported Wednesday that three members who had previously tendered their resignations had withdrawn the resignations and the board was preparing to work together toward an amicable solution of its differences.

The disagreement among the board members grew out of a request by School Superintendent Harold Barnett for a boost in salary and a three year contract dated from July 1. Since Mr. Barnett had a year remaining on his present contract, the new contract would amount to a two year extension.

The superintendent reports that he asked the board for an increase in pay of \$100 per month, calling attention to the fact that a bill is now before the legislature to grant all teachers a raise of \$600 per year. Under the Gilmer-Alken Bill he is also due an automatic raise of \$72 per year. Mr. Barnett specified that any raise granted by the state would apply on the raise he asked of the local board.

The board voted against granting the superintendent's requests, with one reason apparently being the factor that the cost to the local district would not be known until the legislature has acted on the pending bill.

On Tuesday, Jan. 13, Supt. Barnett tendered his resignation to the board, effective Feb. 1.

Monday night of this week, a group of students called a mass meeting at the school, of students and patrons who wanted the board to grant Mr. Barnett's requests. The group present elected three representatives to go before the board, which was meeting in a called session to act on Mr. Barnett's resignation.

Nothing was settled at the board meeting, and three members presented their resignations. The remainder of the board adjourned without acting on the resignations or any other matter, and the three members have since withdrawn their resignations.

Mr. Barnett's resignation is still pending.

The program theme for the month was "Legislation and National Security."

The next meeting will be a business session on Feb. 2.

County Assured Strawn Strike

Flowing production of 15 barrels of oil hourly has been developed at Sohio Petroleum Co. and the Chicago Corp. No. 1 F. W. Thorman, Strawn sand discovery on the Barney Arnold ranch 11 miles west of town and 4 miles north of the Katz Strawn pool.

Operators perforated the casing opposite the Strawn from 5,129 to 5,159 feet, and washed the section with 500 gallons of mud acid. After recovering the load and residue from the acid, the well kicked off and flowed at the rate of 15 barrels per hour for eight hours through a quarter-inch choke, with no water. At last report the well had been shut in preparatory to taking potential test.

Also in Knox County, six miles west of Knox City, Thomas D. Humphrey of Dallas will drill the No. 3 Mary A. Bush, a 6,000 foot wildcat. Location is 2,196 feet from the north and east lines of E. Boren Survey 51, and the test is 2 3-4 miles east of the Katz pool.

In Haskell county, a mile west of O'Brien, Geochemical Surveys of Abilene has abandoned the No. 2 S. N. Reed at 4,930 feet.

Final drillstem test was taken at 4,918-30 feet. With the tool open 3 hours, recovery was 50 feet of oil and gas cut mud, and 190 feet of salt water. The well was also tested at 4,902-17 feet, where recovery was 120 feet of gas 30 feet of mud and six feet of oil.

Due to the short crop in 1952 the bank will not pay a dividend, as the directors considered it best to hold an ample reserve.

CEMETERY ASSN. STARTS MOVE TO PUT GRAPE MYRTLE ON ALL CEMETERY LOTS

The Cemetery Association has suggested that the local Garden Club and two study clubs sponsor a move to place at least one grape myrtle on each lot in the cemetery. Mrs. T. S. Edwards announced this week.

Mrs. Edwards reminded citizens that grape myrtle is not only a hearty plant for this area but is also the official town shrub. "During last summer's drought and heat, the grape myrtles continued to grow and bloom," she said.

Sponsors of the movement have asked the public to call Mrs. Horace Finley, Mrs. Bertha Perry, or Mrs. Edwards indicating their willingness to plant one or more shrubs.

The shrubs are expected to cost around 65c each, depending on the number ordered. The shrubs will not be ordered until an estimate on the number to be planted is made.

FIRE DEPARTMENT HAS NEW TRUCK IN OPERATION

The local Volunteer Fire Department now has its new fire truck ready for use, it was announced this week.

The truck has a Howe 500-gal. per minute pumping unit and a 500 gallon tank. It is equipped with two sets of reel hose and 200 feet of 1 1/2 inch fire fighting hose, with fog nozzles and guns. It is powered by a Chevrolet engine.

The truck, which has been state tested and far surpassed the requirements, was purchased by the city. Cost of the truck and equipment, including helmets and slickers and one gas mask, was around \$8,000, which was financed through the local bank.

The department answered alarms on Sunday, Monday and Tuesday of this week. Sunday the fire was at the M. M. Glass residence, where furniture and clothing was destroyed. Tuesday the truck was called to a Mexican residence, but the fire had been extinguished when the firemen arrived. Wednesday the alarm was for a burning tractor, which was also extinguished before the firemen arrived on the scene.

Chamberlain, Goree; Hugh Rogers, Knox City.

Members of the Knox City School Board indicated this week that they will file a motion for a rehearing before the Supreme Court of the Munday-Knox City school case.

Last week, the court reversed the decisions of the 50th Judicial District Court and the 11th Court of Civil Appeals, which had upheld the action of the Knox County School Board in annexing about 16,000 acres of the old Sunset school district to the Knox City district.

The annexation was ordered after three petitions, signed by 95 per cent of the qualified voters in the area involved, had been submitted to the county board. The Munday district immediately filed suit for an injunction to recover the land, but lost the case in both the district and appeals courts.

In the supreme court's decision, written by Associate Justice Will Wilson, the three petitions were considered to be one transaction, involving more than 10 per cent of the Munday district. Under the law, an annexation of more than 10 per cent of a district requires the consent of the trustees of the losing district.

The opinion also indicated that there is no limit on the number or upon the period of time in which annexations of less than 10 per cent may occur, but added, "If this be a fault in the statute, the legislature can correct it... we need not pass upon that question." The Munday district had contended that if there were no limit on the number or period of time, one district could eventually "nibble another to death."

GREYHOUNDS TO PLAY ROCHESTER FRIDAY NIGHT

The Knox City basketball boys will wind up the first half of the conference double round robin Friday night when they play the Rochester quintet at Rochester.

So far the 'Hounds have lost only one conference game, to O'Brien, and some observers believe the district play-off will be between the Greyhounds and the Bulldogs.

Last Friday night, the local lads defeated Benjamin, 35-30. Guy Robinson was high point man of the game with 14 points. The girls' team lost to Benjamin, 29-23. Knox City's Dorothy Paul was high scorer of the game with 17 points.

Knox City won both games with Vera on the local court Tuesday night—the boys' game 51-25 and the girls 67-24. Jerry Wilson was high point man in the boys' game with 14 points, and Dorothy Paul was high in the girls' game with 40 points.

Tuesday night of next week, the teams go to Rule for the first game in the second half of the round robin.

Legislature Urged to Boost Teachers' Pay

Abilene, Jan. 16—The 33rd Texas Legislature was urged today to improve teachers' salaries in order to attract 11,000 additional teachers that will be needed in Texas Public Schools the next eight years.

Inadequate salaries are the main reason schools cannot find teachers for the classrooms being built for increasing enrollment, said Charles H. Tennyson, secretary-treasurer of the Texas State Teachers' Association.

More than 4,000 teachers left the profession last year, while population growth created the need for an extra 1,000 teachers. This meant a total of 5,000 new teachers was needed. Only 4,000 college graduates were certified to teach in Texas in 1952, and approximately half of those were turned away from the pro-

fession, primarily by high labor salaries offered by industry, Tennyson reported.

He questioned whether the average 1952-53 teacher salary of \$2,840 was adequate to hold men and women in the important profession of educating Texas boys and girls. Income and retirement deductions cut that average to \$1,278 in take-home pay, and this had a purchasing power of the 1935-39 dollar, Tennyson observed.

Mr. and Mrs. Milton Bradberry left Saturday for Miami, Fla., to visit their son, Bobby, who is serving with the Navy there.

Mr. and Mrs. Pat Miller have announced the birth of another daughter at the Knox County Hospital Friday, Jan. 9. She weighed 7 pounds, 10 ounces and has been named Janie Beth. The baby has a big sister, Sherry, 3 years old, and a big brother, Jim, 2 1/2.

TELEVISION!!

In about two months, a new T.V. Station will be in operation in Wichita Falls. This station will be on Channel 3 and will have plenty of power to give us good reception here most of the time.

Come in now and look over the Zenith line. We will have floor samples within the next few days.

Prices start at \$199.95 including the Federal Tax, Picture Tube Warranty (1 year) and 90-day Component Parts Warranty.

Suitable antenna for this area, to receive the Wichita Falls station, will cost \$150. (Approximately)

At a recent meeting of Zenith dealers, held in Wichita Falls, these questions were asked:

QUESTION: How high should a T.V. antenna be for best reception in fringe areas (over 50 miles from station)?

ANSWER: Antennas of 40 to 50 feet high give good reception in West Texas where the surface is almost level. More important that height is proper installation of the antenna so there is little signal loss.

QUESTION: In a fringe area, is reception better if the antenna is especially made for reception of one certain channel?

ANSWER: Much more dependable reception is assured if the antenna used is made for the channel you wish to tune in. Of course, you are limited to receiving one station. It is better to have good reception from one station than poor reception from a number of stations. Most stations are offering a good variety of programs.

Answers to these questions were supplied by a field engineer of Zenith Radio and Television Corporation.

"Eat - - spiritual meat - - drink - - spiritual drink." (1 Cor. 10:3-4).

Feed upon the spiritual food. Paul is referring to the nourishment miraculously supplied in the wilderness. The manna and water out of the rock which is typical of the spiritual food we require for our sustenance. We are what we eat. Man grows by what he feeds on. And as actual meat and drink forms the body, spiritual food produces spiritual physique.

Food for the body comes from the ground, so did the body. The food for the soul comes from God through His word.

There are four ingredients of the spiritual diet:

The Christ of God - John 6:48-58 - Bread.

The Will of God - John 4:32-34 - Obedience.

The Truth of God - Heb. 5:12-14, Matt. 4:4 - Bread.

The Things of God - I Cor. 3:1-2 - Milk.

A new type motor oil for the new cars

Your new car needs this new type oil

Prevents "4000-mile knock." Many 1952 and practically all the 1953 automobiles have high compression engines.

You've heard about these fine new engines.

You know, for example, that they require gasoline with extra anti-knock performance . . . a gasoline like Humble Esso Extra.

Now, Detroit's automotive engineers have discovered that high compression engines need an entirely new type of motor oil. With conventional oils in the crankcase, the new engines have a tendency to ping, or knock, after four to eight thousand miles of driving.

This "4000-mile knock" is caused by combustion chamber deposits; these increase the compression ratio to a point where no commercial gasoline will give you anti-knock performance.

Humble Esso Uniflo, an entirely new type motor oil, prevents the formation of deposits that cause "4000-mile knock" in high compression engines if you begin to use it regularly in the first 1000 miles of driving.

Protects against friction wear and acid corrosion. Second, the engineers discovered that friction is the chief cause of wear in automobile engines. Moving parts in the new engines are so carefully machined that they fit very closely. This gives you much better performance from your car, but it also requires superior lubrication. Heavy oils and oils that "thicken" in cold weather don't flow readily between such closely fitting parts. The result is excessive wear from friction, and expensive engine overhauls . . . To minimize friction wear . . . again you need Humble's new Esso Uniflo Motor Oil.

Esso Uniflo has such an amazingly high viscosity index that it gives you the quick-flowing characteristics of an SAE 5W oil at 25° below zero Fahrenheit, and the tough, full body of an SAE 20 oil at 110° Fahrenheit.

Furthermore, the additives in Esso Uniflo are anti-acid—this new type oil cuts acid corrosion as much as 50%.

You Need Only One Grade of Humble Esso Uniflo.

You use it year round. Esso Uniflo meets all the specifications for SAE viscosity classifications 5W, 10W, 20W and 20. It is a heavy duty, detergent oil, recommended for API service classifications ML (light duty), MM (medium duty), MS (severe duty) and DG (general diesel duty). Its viscosity index is amazingly high.

Premium Value—Premium Price

Humble Esso Uniflo costs something more than most motor oils. But you'll agree that the small extra cost—less than one-tenth of a cent for each mile of driving—is cheap insurance against "4000-mile knock," friction wear, and acid corrosion!

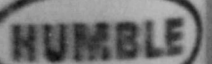

A Word to Owners of Older Automobiles

If you use an oil meeting SAE viscosity classifications up to 20—you will find it profitable to change to Humble's new type Esso Uniflo. It will protect your car against friction wear and acid corrosion; reduce starting drag and extend battery life.

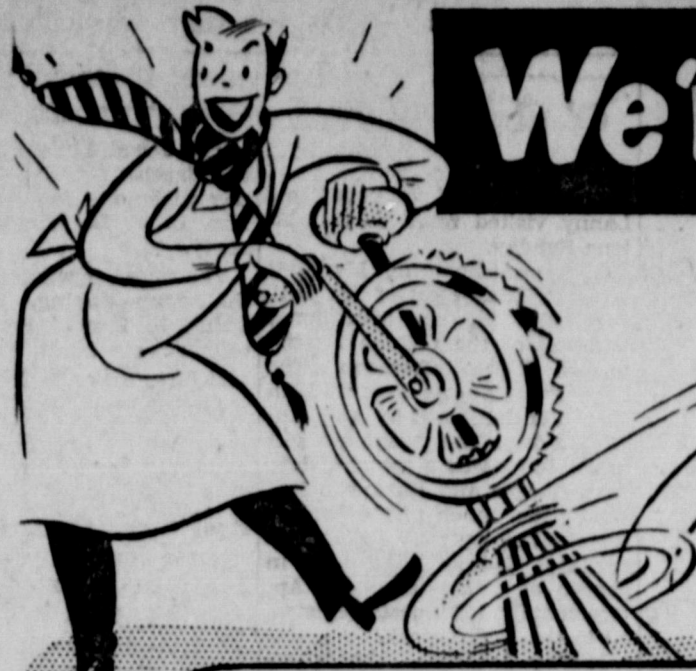

If your engine has just been rebuilt—change to Esso Uniflo. It will prevent the deposits causing "4000-mile knock"; it will protect against wear from friction and corrosion, reduce starting drag and extend battery life.

If you use SAE 30 or SAE 40 oil—Humble continues to recommend Esso Extra Motor Oil No. 3, a high quality, heavy duty, detergent oil with a viscosity index second only to that of Esso Uniflo.
