NUMBER 34

Oil Field Brings Added Activity To Knox County Seat

BENJAMIN, June 10—The newly developed oil field 13 miles west of Benjamin is developing at a rapid rate, and there is now approximately 31 wells in production, or in the process of being drilled. This activity has greatly stimulated business within the town of Benjamin, and it is estimated that fifty-five or sixty well drilling employees and their families are now making their homes either in Benjamin, Knox City or Seymour.

The oil companies most active in this newly discovered oil field area are the Ohio, Humble and the Anderson-Prichard.

The City Service Oil Company also has a well in production seven miles north of Benjamin on the Dr. G. H. Beavers Ranch, which opens up an entirely new oil field area.

Demonstration To Show Best Methods Food Preservation

Miss Mildred Carter, home demonstration agent of Throckmorton county, is coming to Knox City, on Monday, June 17th to hold a full day demonstration, which will be open to the public, on the preparation, freezing and storage of vegetables, fruits and poultry in the cold storage locker.

Miss Carter is coming to Knox City at the invitation of the Home Demonstration Council, the County Agent, and Charlie Reed, Knox City locker plant operator.

The demonstration will be held at the school lunch room, which is located on the school grounds of Knox City.

Miss Carter has given many demonstrations of this kind and is very efficient in illustrating the different steps that are necessary towards selecting, preparing and packing of the different food products in order to maintain and preserve the high quality of the product that is to be placed in storage.

A very cordial invitation is extended to all who wish to attend the demonstration, which will begin at 10 a. m., Monday, June 17th.

Dinner Honors Bride-Elect

Mr. and Mrs. R. M. Johnston of O'Brien entertained in their home Friday, June 7th, with a rehearsal dinner for the wedding party of their daughter, Jozell, and Mr. Walter York of Toledo, Ohio.

The dining table was attractively spread with a lace cloth, and was centered with a bouquet of spring flowers and white tapers.

The guests were invited to the dining table and the plates were served buffet style.

They were then seated at small bouquets of sweet peas of pastel shades.

Enjoying this delightful occasion were members of the wedding party; the bride, Jozell Johnston, the groom, Walter York, Rev. and Mrs. Bobby Fall of Benjamin, Uldine Kilgore and Joyce Johnston of Ft. Worth, Mr. and Mrs. Jack Johnston of Rochester, Claudette Barnard, Mr. and Mrs. Alton Hester and Alton, Jr. of O'Brien.

Other guests were; Mr. and Mrs. A. York, Mrs. Allen Hannon and son Edward of Toledo, Ohio, Mrs. Charlie Banner of O'Brien, and Mrs. S. G. Hove of Altus, Oklahoma, and the host and hostess.

Garrison Sells Humble Station

Billy Garrison announced today that he had sold his service station in Knox City to E. L. Lott, of Rule.

Known as the Garrison Service Station, the firm is handling Humble Oil products.

Mr. Lott said his wife and son will move here as soon as accommodations can be secured.

Billy plans to move to Salem, Oregon, in the near future.

Forrest McPherson of Abilene visited his aunt and uncle, Mr. and Mrs. G. T. Hardberger this week.

Wynell McGee Married To Howard Mayfield Here, June 7

Wynell McGee, daughter of Mr. and Mrs. J. C. McGee, and Howard Mayfield of Fort Worth were married June 7th in a twilight ceremony read by the Rev. Lloyd Hamilton of Rule. The single-ring ceremony was held on the lawn at the home of Mr. and Mrs. E. R. Carpenter with Mr. McGee giving his daughter in marriage. The couple took their vows before an improvised arch covered with roses and vinca and flanked by baskets of dahlias.

The bride wore a white silk suit and carried a corsage of carnations and a carnation ornament in her hair. For "something old" the bride wore her grandmother's wedding ring, for "something new" and "blue" she wore blue ear rings and for something borrowed she wore Mrs. Brown's watch. Mrs. Harry Brown of Fort Worth, sister of the bride and matron of honor, was dressed in white.

CPO Harry Brown served as best man and Bobby Simpson of Abilene ushered.

Mrs. Lloyd Hamilton of Rule played the wedding music on an old fashioned organ the bride's mother had played when a girl, and accompanied Mrs. Bobby Simpson, another sister of the bride, as she sang "Yours".

Thirty relatives and friends were present at the wedding and reception that followed when the three-tiered wedding cake was cut and served by Miss Ann Bell of Abilene, a cousin of the groom and college roommate of the bride. Miss Marie King presided at the punch bowl. Miss Norma Janice Coats registered guests in the bride's book.

The bride is a graduate of the Knox City schools and was a junior in McMurry college in Abilene before her marriage. The bridegroom is the son of Mr. and Mrs. H. G. Mayfield of Stephenville, a graduate of the Abilene schools and before entering service was connected with Leonard's at Fort Worth.

The couple spent the week end in Stephenville with his parents before going to Fort Worth to make their home.

Brown Bombers To Play Postponed Game Sunday

Forced to postpone last Sunday's game with Spur because of a death in the family of one of the Spur players, the Knox City Brown Bombers will play the game here Sunday afternoon.

The public is invited to attend.

O. L. Jamison of Colorado Springs arrived Tuesday and after several days business plans to drive his parents, Mr. and Mrs. E. O. Jamison back to Colorado Springs where they will stay until September.

Miss Wynell Edwards is home with her parents, Dr. and Mrs. T. S. Edwards on a three weeks vacation from the Professional School of William and Mary College at Richmond, Virginia.

Lions Club Team Adds More Scalps With Three Wins

Since suffering a defeat at the hands of Goree, the Knox City Lions Club softball team has added three more victories to their almost perfect record.

They won out over Sagerton last Friday night with a score of 4 to 2. Knox City got in two runs in the first inning and held that lead until Sagerton tied up the score by bringing in two in the third. In the last half of the third Knox City again took the lead when Collier brought a man in with a hard-hit double. In the fourth inning the last score of the game was made when Kyle Carver, manager of the Knox City team, drove a smashing homerun into left field. "Lefty" Carver did his usual good job of pitching by striking out six men.

Monday night Knox City broke in their new uniforms by downing Paint Creek 7 to 3. Again the Lions Club team got off to a good start by taking a three run lead in the first inning. Paint Creek evened the score by getting three runs in the fourth, but in the last half of the fourth Knox City sewed up the game by taking a four run lead and holding it the rest of the way. Errors accounted for most of the runs as both the Paint Creek pitcher and the Knox City pitcher, Lefty Carver, did a bang-up job by each striking out seven men.

Last night Knox City again came out on top and swamped Rotan with a score of 10 to 3. Each team got one run in the first inning—Knox City getting theirs when Johnny Carver brought Alvin Roberts in with a clean hit single. In the second Knox City scored again and in the third they got in two more runs to make the score 4 to 2. In the fourth Rotan cut Knox City's lead down by bringing in two runs. The fifth inning brought the Lions Club team a hitting spree and they ran up a six run lead. Rex Martin brought in a run when he hit a three bagger into left field; Johnny Carver again showed signs of coming out of his hitting slump when his hard hit double brought another run in; Lefty Carver brought in two more runs with a smashing three bagger into center field; and a sacrifice by George Hodges brought Lefty in to make the score 9 to 3.

In the sixth Johnny Carver got on when Rotan's second baseman dropped a pop-up and Johnny stole second, got to third when Clyde Williams got a single, and finally stoic home to make the score 10 to 3. Johnny Epley, hard-hitting left fielder, was walked three times in the game and didn't get the opportunity to do his usual job of hitting.

Lefty Carver did an excellent job of pitching. He struck 12 men out and walked only 2. Roberts, Rotan's pitcher, struck 2 men out and walked 3.

The Lions Club team has a game scheduled for tonight when they play Rule on Knox City's diamond.

Price Daniel Opens Campaign June 17

An old-fashioned political rally with placards heralding the counties represented will be staged by friends of Price Daniel in the city music hall at Houston, Texas, next Monday night, June 17, to officially open his statewide campaign for Attorney General. Heroes of World War II will be among the speakers on the half-hour radio program which will be broadcast on the Texas Quality network and the Texas State network from 8:30 to 9 p.m.

Supporters from nearly 200 counties have already indicated their intention of attending the rally in behalf of Price Daniel's candidacy. The first 15 minutes will be taken up by key speakers from various sections of the state, including GI veterans whose exploits have been recorded in the pages of Army and Navy history. The last 15 minutes will be used by Price Daniel in presenting for the first time to a statewide audience the principal issues of his campaign for Attorney General.

Mrs. Hall and Mrs. Uphaw of Stamford are house guests of Mrs. Geo. Zachery this week.

Accidental Gun Shot Kills Horace Newberry, 14

District Methodist Meeting Here Stirs Building Activity

A meeting of the Stamford district committee for the Memorial campaign was to have been held this afternoon in Knox City, the Rev. Vernon Henderson, pastor of the local Methodist church said today.

Dr. Harold G. Cooke, president of the college, and the Rev. J. Edmund Kirby, professor of Bible and director of the

religious activities of the college, are here to discuss the continuation of the \$1,750,000 campaign for the college, which is to be completed this summer. About \$1,100,000 has already been raised.

The Stamford district committee is headed by the Rev. Sam H. Young, district superintendent, of Stamford; members are the Rev. Lloyd Hamilton, Rule; the Rev. A. J. Cockrell, Aspermont; the Rev. Van Zandt, Spur; Lee Haymes, Munday; R. B. Bryant, Stamford and Connor Horton, Weinert.

Members of local church committees from the various Methodist churches of the district are expected to attend the meeting today, Henderson added.

"The campaign was laid aside last year because of the worldwide Methodist Crusade for Christ, but has been resumed by order of the annual Methodist conference, and is to be completed by July 31," Henderson added. "Approximately \$1,100,000 has been raised at this time."

"Of primary importance to the college at this time is the first \$250,000 of the remaining quota, to be used to erect a new dormitory for men. It will be named Memorial Hall, in tribute to the three or four hundred Methodist men of the Northwest Texas and New Mexico conferences who gave their lives in World War II. Since the building will house more than 80% veterans, priorities can be secured for its construction at once," Dr. Cooke said.

The building will be a companion structure to President Hall, dormitory for women, now under construction on the campus. The new Iris Graham Memorial Dining Hall also is expected to be ready for use late this fall.

Benjamin Ships Nine Cars Grain

BENJAMIN, June 10—The local agent, A. E. Ball, of the Panhandle, Santa Fe railroad at Benjamin reports that six cars of wheat have been shipped and that three more cars are expected this week. This number of cars is only about one sixth of the number that were shipped in 1945, but the number of bushels of wheat harvested in the Benjamin territory greatly exceeds the most optimistic forecast prior to the time of harvest.

Clarence Woodward, the local elevator operator of the Kimbell Milling Company, states that the wheat is of very high quality and that farmers have indicated to him that wheat acreage within the Benjamin area will be greatly increased for the year of 1947.

Mrs. O. B. Cave and her parents, Mr. and Mrs. Taylor of Rotan, spent several days in Dallas this week.

Funeral services were held in the Rochester Methodist church Wednesday for Horace Clayton Newberry, 14-year-old youth of the Needmore community, who died Monday, June 10, at 7 p. m. of accidental gun shot wounds.

Young Newberry was shot as he and a cousin, Bill Cummings, son of Mr. and Mrs. Dave Cummings, were hunting near their homes in the Needmore community, and a small rifle was accidentally discharged, the bullet striking the youth in the jugular vein. He died shortly afterward.

Horace was the son of Mrs. Eunice Newberry of Rochester. Parents of the Cummings youth live at Needmore, where Mr. Cummings operates a grocery store.

Born December 6, 1931, at Rochester, Texas, Horace was 14 years, 7 months and 4 days old. He was a member of the Methodist church. Preceded in death by his father and one sister, Horace is survived by his mother, one sister, Mrs. Onida Wilson of Los Angeles, Calif., three brothers, Clyde, Kenneth and Royce, of Rochester; his maternal grandfather, T. D. Cummings of Knox City, and many other relatives and friends who mourn his untimely passing.

Rev. Vernon Henderson of Knox City, and Rev. J. S. Tierce of Rochester conducted the services, held under the direction of E. Hob Smith, Rochester.

Burial was made in the O'Brien cemetery.

Veterans Bureau Now In Lubbock

The Veterans administration Lubbock regional office, under the management of Robert W. Sisson, swung into action this week in its temporary location at Lubbock Army Air Field. While some divisions are not completely organized as yet, all are reported to be in operation.

The Lubbock regional office is composed of ten major divisions as follows: adjudication, vocational rehabilitation and education, contact, medical, supply, communications and records, finance, legal, loan guarantee, and personnel.

In addition to the manager and assistant manager the organization is supported by a coordination and planning division and public relations division.

HOMEMAKING CHAT

The homemaking classes of the Knox City high school gave a tea for their mothers and others interested persons. Larkspur and other flowers gave the room a spring-time touch and formed an attractive background for the exhibit.

Before the mothers arrived, the eighth grade girls were asked to see our work, which consisted of work done at home and school. Around 60 persons signed our guest book and were served homemade ice cream and cake.

The exhibit consisted of 60 garments, 51 pieces of hand decorated household linens, several remodeled garments, and many booklets, made by the girls, based on the phases of homemaking covered this year in our work.

We appreciate all that was done to help make our first tea a success.

Lloyd Huntsman, Otto Lawson, H. G. Eganbacher and S. L. White attended the State Fireman's Convention in Waco this week.

Health Department Approves Benjamin Water Prospects

BENJAMIN, June 10—The entire citizenship of Benjamin is greatly elated over the recent prospective city water well test that has recently been tested for a period of 48 hours. The most optimistic results have been obtained, and the well has produced an average of 11 gallons of water per minute for a period of thirty six hours by meter test. The well was on a pump for an additional 12 hours and the water level was only lowered 8 feet during this 48 hour test, and according to City Manager Von Ray Terry, who operated the pump, the water level could not be lowered below a 16 foot water level.

Mayor A. E. Ball states that two more wells within the near vicinity will be drilled by Ree Gardner, of the J. M. Whittaker Well Drilling Company of Anson, to determine if the flow of water in the two new wells is equal to that of the first well, and if the flow of water is constant on the three wells, the city council plans to take immediate steps toward laying a pipe line and install a storage tank at the well in order that Benjamin might secure an adequate supply of water as soon as possible.

Tom Smith, driller in the oil field west of Benjamin, has cooperated with the Benjamin city council in a very fine way by furnishing all the equipment necessary for the pumping test; such as the engine, pump jack, piping and all other necessary equipment.

The State Health Department at Austin has made tests of the water and report that it is suitable for human consumption and is of a very satisfactory quality.

CARD OF THANKS

We want to thank everyone for helping us so kindly after fire destroyed our home last week.

Cleo and Lee Ware

Visitors in the William Griffith home from Wednesday to Sunday were Mr. and Mrs. Leon Waldrip of McLean and Mr. and Mrs. Coy Dial of Shamrock and Mr. and Mrs. R. L. Wyatt and sons of Shamrock.

New Armor Suits Under Experiment

Army Ordnance research technicians are striving to perfect body armor which will give foot soldiers the same protection that halved the number of deaths among Air Corps personnel in World War II, according to an announcement by Major General Everett S. Hughes, Chief of Ordnance.

The mobility of the modern doughboy makes it difficult for him to carry heavy equipment and weapons needed in the field. The "flak suit" worn by airmen has proved its worth by saving thousands of lives, however the flak suit is too heavy for the foot soldier. In the near future the Ordnance will have perfected a suit of similar material and pattern that will weigh much less than present day suits. The new suit will not protect soldiers from direct hits, however it will protect them from flying fragments of artillery shells that caused so many casualties in the past war.

Cotton Congress To Hear Famous Seed Specialists

Dr. Louis E. Hawkins, vice-
director of the Oklahoma Agri-
cultural Experiment Station,
will discuss the importance of
cottonseed and its products as
a "diversifier" in the balanced
farming program of the South-
west at the seventh annual
Cotton Research Congress in
Dallas, July 8-9.

Dr. Hawkins will speak on
the morning session, July 9,
which will be devoted to cot-
tonseed and its products. Other
sessions will discuss world
trade, domestic cotton policies
and efficient production, around
the congress theme, "Cotton, a
World Force".

Representatives of experiment
stations, extension services, agri-
cultural and cotton publica-
tions, cotton growers and mem-
bers of the cotton industry from
many cotton growing states will
attend the meeting.

It Seems Like Yesterday

It seems like yesterday that Nancy was playing with dolls. Now she's pushing her own baby carriage. Yes, there've been a lot of changes in the last fifteen years—most of them so gradual we hardly noticed them at all.

Nancy didn't grow up all at once. A tooth at a time—a curl at a time—an inch at a time—and suddenly a little kid sister was Mrs. Joe Jones, mother of Joe, Junior.

Like Nancy, the use of electricity has grown a lot in the last fifteen years. But the price of electricity has been going down steadily. You may not have noticed it because your bill may be about the same—but how many appliances have you added to your home since 1931? Actually, you're getting twice as much electricity for your money now as then.

Keeping electric service plentiful and cheap through years of rising costs was not easy. That today's electricity is at its very lowest price in history is a tribute to the hard work and experience of the men and women in the industry, and to its sound business management.

JUNE 30

A BIG DATE FOR ARMY MEN!

If you have been discharged from the Army—if you held a grade and wish to retain it—if you have dependents—then act now. . . . June 30, 1946, is the last day on which you can enlist in the Regular Army and still take advantage of two important benefits . . . retention of your old grade and family allowances.

Family allowances for your dependents will be continued throughout your enlistment only if you enter the Regular Army before July 1, 1946.

If you have been discharged from the Army and wish to re-enlist at your old grade, you must enlist within 90 days after your discharge. And before July 1, 1946. Think it over. Act now.

ENLIST NOW AT YOUR NEAREST U. S. ARMY RECRUITING STATION

COURTHOUSE CHILDRESS, TEXAS

Fishing's Fun when your mind is Free!

Look back, mister, over the last ten years. They passed pretty quickly, didn't they?

The next ten, fifteen or twenty years will pass just as quickly. What then?

Will you be forced to follow the weary grind of work and worry? Or will you be financially free to rest, relax and lead the life you dream about?

It all depends on the steps you take now, in your productive years, to insure peace and security in your retirement years.

May I discuss the matter . . . at your convenience?

Horn Fly Control Proving Successful On League Ranch

The horn fly control demonstration that is being conducted on the League Ranch is giving far better results than was even expected, according to Jack Idol, manager of the League Ranch, and R. O. Dunkle, County Agent.

These fifty nine mother cows and calves were treated for the third time, Thursday, June 6th. All farmers and ranchmen attending the annual League Ranch Bar-B-Q were invited to the headquarters and to get first hand information as to the method of mixing the sulphur and DDT powders, and the method of application as the cows and calves came through the chute.

Estimates as to the number of flies on the cows range from 5 to 8 flies per animal, and they showed no activity towards throwing their heads and switching their tails.

The farmers and ranchmen attending the demonstration were thoroughly convinced that the use of DDT in horn fly control is certainly worth while, as one and a half cents worth of powder means about 10 pounds of additional gain in weight of each animal.

C. E. Fisher, of the Spur experiment station, also attended the demonstration, and told the group of the latest information concerning the use of DDT. Mr. Fisher explained that oil sprays are not recommended because the skin of the animal will absorb the DDT as it goes into a true solution when mixed with oils, and in many cases its use in oil has proven disastrous. The safe way to handle DDT, as explained by Mr. Fisher, is mixing it with another powder, such as sulphur and dust it on the animals, or mixed with water, as water sprays made of wettable DDT powder are held in suspension and are not absorbed by the skin, and its full effect for equally as effective. At the present time experiment stations recommendations on use of DDT for horn-fly and lice control is that of the wettable powder mixed with water or with other wettable powders such as sulphur and cryolite.

"Sir, I would rather be right than be President," were Henry Clay's famous words.

HOARDING OLD MEDICINE IS DANGEROUS HABIT IN AVERAGE HOME

There are many persons who naturally hoard anything and everything including old clothes, boxes, and other useless articles, some of which constitute no greater danger than a possible fire hazard, but a very real danger is present when this tendency is applied to hoarding old medicine in any form.

Most medicine finds itself in the home through a doctor's prescribing it for some specific illness. For the sake of safety, left-over medicines should be destroyed immediately when they have fulfilled their purpose and never be stored in the medicine cabinet for future unprescribed use in case of another illness, according to Dr. Geo. W. Cox, State Health Officer.

"Self-medication with the use of left-over drugs which were of great benefit to some previous illness can sometime turn a simple ailment into a very serious condition of actual poisoning," Dr. Cox said. "This is particularly true of the indiscriminate use of sulfa drugs which have been prescribed for some specific condition."

"It is wise to use medicines as indicated for the illness for which they are prescribed by your doctor, and when they are no longer needed, destroy the remaining medicine immediately," Dr. Cox said. "Even if you expect a return of the same condition at some future date, it would be better to obtain new medicine if the condition recurs than to retain this old medicine in the cabinet and subject the members of your family to the danger of using it unwisely."

Social Security Card Asset To Worker

The summer season is approaching, the time when vacation resorts will be opening for tourists, which means that employees of such places should have social security numbers.

When they get a social security card, said Gordon James, manager of the Wichita Falls Social Security Board field office, the next thing to do is to give the employer or bookkeeper a copy of it. This will insure the employee of getting full credit for all wages received and will help the employer in keeping his records.

Men and women, boys and girls, who usually accept em-

ployment at such places should bear in mind that it is not necessary to get a social security card unless they have a job or one in sight. Also, it was pointed

out that social security cards should never be used for, nor accepted as identification of the individual in possession of a social security account card.

Twilight Years can be Gay...
... if you Prepare for them **NOW!**

Take a look at the folks in the picture. Are they spending their twilight years in idleness and worry—scrimping, every day, to keep expenses within a social security allotment?

No, sirree! They're doing things, going places, having the time of their life... all because in their productive years they made sure, through a simple insurance plan, that they would have the means to enjoy their twilight years.

May I discuss the matter... at your convenience?

Fight Begun On Cotton Pests

County-wide campaigns to save cotton from insects which threaten severe damage in the next few weeks are being organized in many Texas cotton-growing counties, and offer one of the best opportunities for preventing the annual loss of one-seventh of the cotton crop to pests, says L. E. Ellwood, Chairman, Texas Cotton Production Committee.

"Organized programs, such as those many County Agents have underway, add to the effectiveness of insect control on each individual farm and to the total value of control efforts," the Committee points out. "Immediate action is essential, however, as supplies of insecticides are limited; and the danger from insects increases daily."

In 1945, cotton insects are estimated by authorities to have destroyed 538,000 bales of lint cotton and 219,000 tons of cottonseed, in Texas alone. In addition to financial loss to growers, this represented heavy losses of cottonseed oil, cottonseed feed products and other scarce and needed products of the cotton plant.

The Committee urged that cotton farmers, ginners, businessmen and others in each community cooperate with their County Agricultural Agent in county-wide control measures against boll weevils and other pests.

Official U. S. Navy Photo

THE TWAIN MEETS—IN RECORD-BREAKING TIME!—A new east-west speed record was set by this new Navy Neptune patrol bomber, a two-motored Lockheed P2V, when it sat down at Burbank Field, Calif., 9 hours 23 minutes and 2 seconds after its take-off from Floyd Bennett Field. This sliced 25 minutes off the previous best speed, despite poor flying conditions that forced the plane 150 miles off course. The Neptune was piloted by Commander Thomas D. Davies, of Chevy Chase, Md., and carried three naval crewmen and two civilian passengers.

Lone Star Gas Company Adds To District Staff

Appointment of personnel to head Lone Star Gas Company's industrial engineering sales supervision, and employ training in the 75 towns comprising its Abilene division of distribution, has been announced by M. L. Bird of Abilene and will cover this territory.

C. R. Washburn has been named chief of industrial engineering and will supervise a staff available for consultation on the use of gas in commercial and industrial plants, air conditioning, and large heating units, Mr. Bird said.

Charles G. Barndt is appointed division sales supervisor and Norman D. Gooch will supervise employ training schools.

Washburn started with Lone Star in 1929 as industrial engineer at Denison, after graduating from Texas A. and M. He was transferred to Abilene in 1942.

Barndt joined the company in 1935 and held various assignments at Corsicana, Ennis, Marlin, Brownwood and Temple until 1940 when he was named manager at Sulphur, Okla. He entered the Army in 1942 as first lieutenant, helped activate the 90th Infantry Division at Camp Barkeley, and served with it as staff officer throughout the European campaign. He was discharged with the rank of major in April and returned to the company in Abilene. He is a graduate of the University of Michigan.

Gooch, formerly a captain in the Army Air Forces, was employed by Lone Star last January. He was with the 36th Division until April, 1942, when he was appointed aviation cadet. He became second lieutenant in December, 1942. He was attached to the Army Air Forces Aircraft Engineering School at Lowery Field, Denver, then at Yale University. For several months he was assigned to the Abilene Army Airfield as aircraft engineering officer and aircraft maintenance control officer. He was released from active duty December 5, 1945. Gooch is a graduate of the Diesel Engineering Schools, Houston.

Dr. Rainey's Platform Includes Benefits To Rural Population
 Dr. Homer P. Rainey, gubernatorial candidate, nationally known as an educator, completed the second week of his campaign last week, highlight of which was a speech on farm problems and monopoly at Palestine.

The former Texas League ball pitcher declared in this speech at the Anderson County Courthouse that Texas farmers do not want the state "controlled and milked like an old cow by money barons and their political henchmen."

The former University of Texas president said that Texas farmers want a better farm program and want to be rid of monopoly, that they want good government and "want it now."

Dr. Rainey declared that he would strive for the following objectives for Texas farm people if he is elected governor:

1. A good hospital within the reach of every farm family.
2. Good farm-to-market roads now—not 10, 20, or 30 years from now.
3. A fight against monopoly wherever "we find it."
4. Encouragement to farm cooperatives.
5. Promotion of farm and home ownership.

Use of Winter Legume Increases Wheat Yield

Bryan Cammack, cooperated with the Wichita-Brazos Soil Conservation District, increased the yield of wheat 9 bushels per acre this year through the use of Austrian Winter peas in rotation with wheat.

In the fall of 1944, Mr. Cammack planted 25 acres of Austrian Winter Peas on a trial basis as a winter soil improving crop. He harvested enough winter pea seed to seed 60 additional acres last fall. To determine the value of winter legumes, as a soil improving crop, Mr. Cammack sowed the 25 acres of pea land to wheat and the adjoining wheat land to wheat. In comparison the wheat following peas yielded 23 bushels compared to 14 bushels on land following wheat.

Along with the winter peas Mr. Cammack is well on his way towards a coordinated Soil Conservation program. He has terraced all of the sloping land, reseeded some retired land to native grass mixtures, and planted alfalfa for hay and seed with good success.

Mr. Cammack is in the West Rhineland Conservation group and is receiving technical assistance through the District the Soil Conservation technicians from the office.

Cotton Fabrics To Be Featured At Research Congress

Extensive displays of new fabrics that will help cotton maintain its leadership in the textile field will be a feature of exhibits at the seventh annual Cotton Research Congress at the Baker Hotel, July 8-9, Sam E. Kent, Dallas, member of the exhibits committee, said today.

Home Demonstration Agents and club members, teachers and students of home economics, retail merchants and others interested in men's and women's wear are being extended a special invitation to see the exhibit, Kent said.

Fashion, smart color combinations and newest textures in fabrics for women and children will be stressed, but the men will not be slighted, he points out, as the exhibit will contain fine combed cotton fabrics developed for men's apparel. An industrial fabrics booth also will be included.

Cotton clothing also will be a feature of a special night session of the Congress, July 8, arranged by the National Cotton Council, Burriss C. Jackson, general chairman of the Statewide Cotton Committee, Congress sponsor, has announced.

"Cotton, a World Force", the theme of the 1946 meeting, will be discussed by authorities on international trade, domestic cotton policies, cottonseed products, and farm production. Exhibits of farm machinery, food and feed products from cottonseed, research results, and other developments are planned.

SAVINGS BONDS SELL LIKE HOT CAKES

With the first peacetime promotion for the sale of Savings Bonds by the U. S. Treasury only nine days old, Texans have invested almost one-fifth of their \$33,000,000 quota in Series E Bonds.

Sales through June 15 were reported at \$6,429,123.75, with a total of \$9,206,266 in all U. S. Savings Bonds at that date.

The life expectation of industrial workers is eight years less than that of office workers.

Benjamin News

Mr. and Mrs. John Blair of Red Springs were in Benjamin Tuesday of last week on business.

Oliver Ilseng and son Raymond, who has just received his discharge, both of Gilliland, were in Benjamin Monday of last week.

A. E. Brawley of the First National Bank of Munday, was a Benjamin business visitor last Thursday.

Miss LaVerne McCanlies of Dallas, daughter of Mr. and Mrs. J. A. McCanlies of Benjamin, is visiting in the home of her parents this week.

Mr. and Mrs. Glenn Burnett, two daughters and son, of Amarillo, spent the past week with relatives and friends in Benjamin.

Mrs. E. Moorhouse, Mrs. J. J. Moorhouse and daughter Sue, returned last week from a two weeks trip into New Mexico, where they visited with relatives and friends. They reported having a wonderful trip.

Miss Omitene Barnett and Miss Elda Puri Laird, both of Benjamin, were in Munday on Saturday of last week on business.

Mrs. Myrtle Bisbee, Grace, Helen, and Leroy Bisbee, all of Benjamin, left Saturday to spend the weekend with relatives and friends in Abilene. They returned on Sunday afternoon, after a wonderful weekend. Miss Helen Bisbee remained in Abilene for a few days visit.

G. S. Dowell, vocational agriculture teacher of Munday, was in Benjamin Monday of this week on business.

Jerry Shipp of Lubbock spent the weekend with relatives, Mr. and Mrs. Doyle Pyatt of Benjamin.

Mr. and Mrs. Prep Mulkie and daughter, Marilyn of Oklahoma City, visited in the home of Mrs. Mulkie's parents, Dr. and Mrs. G. H. Beavers, the past week. Mr. and Mrs. Mulkie's other two daughters, Doris, who has been attending college in California, and Katherine, who has been attending a music school in New York, were also here. Mrs. Herbert Beavers, daughter-in-law of Dr. and Mrs. Beavers, and daughter Betty, of Fort Worth, also visited in the Beavers home the past week.

LEGAL NOTICE

Citation By Publication

THE STATE OF TEXAS,
TO: Bernice B. Holmes,
GREETING:

You are commanded to appear and answer the plaintiff's petition at or before 10 o'clock A. M. of the first Monday after the expiration of 42 days from the date of issuance of this Citation, the same being Monday the 5th day of August, A. D. 1946 at or before 10 o'clock A. M. before the Honorable District Court of Knox County, at the Court House in Benjamin, Texas.

Said plaintiff's petition was filed on the 12th day of June, 1946, and First Amended Original Petition was filed on the 19th day of June, A. D. 1946.

The file number of said suit being No. 4453.

The names of the parties in said suit are: Edgar T. Holmes as Plaintiff, and Bernice B. Holmes as Defendant.

The nature of said suit being substantially as follows, to-wit: Suit for divorce.

Issued this the 19th day of June, 1946.

Given under my hand and seal of said Court, at office in Benjamin, Texas, this the 19th day of June, A. D. 1946.

N. S. KILGORE, Clerk
District Court, Knox County,
Texas
(35-36-37-38)

It's Just a Habit
With Us . . .

Giving you good service is a habit we have acquired, and try to practice at all times. It is a part of the many services we offer to the car owner, and a valuable part, if we are to retain your good will.

We appreciate the opportunity to serve you, and believe in doing the job right.

May we continue to serve you as we know how best.

victims as the Texas thermometer hits 95 degrees and above. Laborers, mechanics, farmers, and white collar workers whose work causes them to sweat profusely, are in danger of having their body salt content become deficient with resulting heat cramps or heat lag. Salt is a prominent constituent of sweat; the body may lose as high as 40 to 50 grams of salt during hot days.

In industry, a method of preventing heat cramps is to take a tablet of pure salt or a mixture of salt and dextrose with each drink of water. Workmen whose duties require muscular exertion should be especially careful to add more than the usual amount of salt to what they eat and drink.

'TCU Commencement Figures'

Occupying the spotlight in commencement exercises at TCU June 24 are (left to right): President M. E. Sadler of the university, who will preach the baccalaureate sermon; Miss Janet Kroll, Houston, president of the senior class; R. G. Storey, Dallas attorney, who will deliver the commencement address.

FARM NEWS

(This is the second of twenty two articles that will appear in this newspaper on the need for soil conservation, the amount of soil conservation being carried out, crop insurance, commodity loans, marketing quotas, and other programs of interest to farmers.)

AAA assistance

The reduction in the rate of monetary assistance given farmers for performing practices and the increase in the amount contributed by farmers mean that every dollar appropriated by Congress gets more soil and water conservation and erosion protection. For some practices, the rates of assistance are now less than 50 percent of the estimated cost to the farmer, not counting the labor supplied by the farm family.

Furthermore, our policy of giving more administrative responsibility to local farmer committees is also making AAA dollars go farther. The increasing use of a plan for allocating funds to counties as well as to States gives county and community committees greater responsibilities for choosing practices to be emphasized in local areas.

Until recently, the acreages and types of land on a farm were used to figure the maximum annual assistance available for the farm. While this plan was effective in getting the program started on a wide scale, we are now trying to give more weight to differences in the conservation needs of individual farms. This approach also makes it possible for conservation needs on small farms to be met.

Here are the steps in applying the AAA program to individual farms:

1. At the start of the year, the State committee allocates a conservation budget to each county.

2. County and community committees study a list of State-approved practices and choose those which are most needed in the county and which are routine for farmers;

3. The community committee sits down with a farmer and together they plan a year's program of AAA assistance for the farm;

4. The county committee considers each farm plan on the basis of conservation needs of the individual farm and of other farms, and the total amount of assistance available under the county budget.

A measure of progress
How much progress are we making in the conserving and improving our soil productivity? A good measure is a comparison of AAA practices performed in the beginning of the program and in 1944, the most recent year for which data are available.

Every State shows remarkable advances in the volume of practices carried out under the program.

Spreading of limestone in Vermont has increased about 10 times since 1936.

The building of terraces to prevent erosion on cropland in South Carolina was four times

greater in 1944 than in 1936.

In 1944, application of 20 percent superphosphate or its equivalent to hay and pasture land and certain crops in Kentucky was more than eight times greater than in 1936.

Contour cultivation of inter-tilled crops in Iowa jumped from 2,416 acres in 1933 to 750,000 acres in 1944.

Protection of wheatland by improved summer fallowing in Kansas increased from 226,198 acres in 1936 to 2,352,397 in 1944.

When practices in all the States are added up, the sum reveals astonishing national progress toward protecting our land.

A visit to the King ranch in South Texas was made by Doyle G. Thomas, Secretary, Knox County ACA, and Elnor Todd, AAA community committeeman from Truscott. The purpose of the trip was to view results of applying superphosphate to pastureland.

"The results were astonishing," stated Mr. Thomas in discussing the trip. He stated that the King ranch started this experiment in 1937 and have carried it to this date.

In carrying on this experiment, 5 different groups of cattle are being used.

In the group 1 pasture, 36 cows have only grass and water. A 20% calf crop was all that was obtained. A large portion of the cows had creepers. These cows average 897 pounds in weight. This pasture is stocked at the rate of 1 cow to every 15 acres.

There are 43 cows on pasture No. 2. These cows are on pasture, water, bone meal supplement in self feeder. There is an 83% calf crop on this group of cows. The average weight of the cows on this pasture is 1,000 lbs. This pasture is stocked at the same rate as the number one pasture.

The group 3 cows consists of 43 head and is stocked at the rate of one cow to every 15 acres. This group of cows is on pasture, water and disorlum phosphate in self-feeder. The calf crop is about the same percent as the number 2 group. The average weight of the cows is 1,000 lbs.

This pasture is stocked at the same rate as groups 1, 2, and 3. The average weight of the cows is 1,061 pounds.

In the group 5 pasture there are 57 head on 570 acres, or one cow to every 10 acres. This group of cows has a 95% calf crop. About 200 pounds of superphosphate was applied to this pasture in 1941. All the cows have to eat the grass and water in the pasture.

Although the cows in group 4 are doing as good as the cows in group 5, representatives of the ranch think the group 5 is best because it is cheaper. The group 5 cows are on less acreage than the group 4.

The King ranch has applied phosphate to between 50,000 and 60,000 acres. They intend to keep applying it.

The cost per acre for applying superphosphate is about \$4.50. The AAA will pay about 80% of this cost," Mr. Thomas stated. He also stated that there would be at least one car of the phosphate received in the county and more if needed.
