Bloodmobile Turnout Is Termed Low

The Bloodmobile was held here last Tuesday in the First United Methodist Church with 46 pints of blood being offered.

According to Mrs. Jan Watson, chairman for the Bloodmobile in Knox City, efforts failed to meet the quota. Forty-eight donated blood with two deferrals.

Mrs. Watson explained that in previous visits the unusually large turnout has caused some donors to have to wait, so this time the Bloodmobile sent an additional unit to take care of the donors. However, due to much illness in the area and some conflicts, the turnout was disappointingly low.

Officials are hopeful now that Knox City can make up for the missed pints during the Bloodmobile's next visit in July.

B.R. Anderson was noted as a one gallon donor.

Callers for the Bloodmobile drive included Peggy Jones, Opal Egenbacher, Frankie Baker, Jo Ann Oliver, Belle Grill (Benjamin), Patsy Anderson, business, and Adrian Jones, youth.

Women from the First Christian Church made up the canteen and committee consisting of Mary Frances Shannon, Mabel Pyeatt, Cathy Marion, Myrtle Williams, Sammie Carpenter, Alma Culwell, and Vivian Ferguson.

Workers were Jo Ann Oliver, Belva Penman, Marion Perdue, Kay Johnson, Peggy Grindstaff, Laura Lynn, Barbara Barnard, Faye Graham, Sue Stephens, and Ginger Johnson.

Professional volunteers included Charlotte Welch, Dell Rumley, Hazel Tankersley, Cliff Ray, Wretha Fitzgerald, Emma Watkins, Laura Coleman, Gayle Harris, Nancy Stout, Merle Bishop, and Mabel Chaney.

Unloading and loading crew consisted of Jimmy Don Moore, Jimmy Lynn, Al Bate-man, and Jeff Graham.

Reading Course To Begin Jan. 22

Haskell-Knox Consortium is coordinating a reading course from Midwestern State University for interested teachers of the area. Any teacher in elementary or secondary schools may register and attend the first class meeting beginning at 4:30 p.m., Thursday, January 22, 1976, in the Weinert school at Weinert.

The class will meet every other Thursday beginning each time at 4:30 and will count toward several programs including both elementary and secondary administrators' certificates as well as some masters' degrees.

Dr. Charles Hill will be instructor and there will be a charge for the course.

Basic skill development in reading will be studied with workshop experiences in developing individualized reading programs.

ARTHRITIS WAR Researchers in rheumatoid arthritis, the worst of the rheumatic diseases, have found that it involves a kind of civil war inside the body, reports The Arthritis Foundation. When a foreign invader, such as a virus or bacteria, enters the body, its defense system goes into action to attack these enemies. But in rheumatoid arthritis, the defense system mistakes its own friendly tissues for enemies. The body's weaponry is directed toward its own cartilage, bone, muscle, and joint lining. What triggers this mistake is unknown, but is the subject of continued arthritis research.

To find out more about arthritis, write the West Texas Chapter of The Arthritis Foundation, 1701 North Big Spring Street, Midland, Texas 79701.

"What? Know ye not that your body is the temple of the Holy Ghost which is in you, which ye have of God and ye are not your own? For you are bought with a price; therefore glorify God in your body, and in your spirit which are God's." (1 Corinthians 6:19-20)

God made man spiritual and put him in a physical body. The Holy Spirit which God breathed into the body was a part of God himself, which was everything that had to do with the life of God. God meant for the spirit to use the mind and body as an instrument. (Which is our scripture) Man was made a perfect being and God loved him. He could walk and talk and use all of earth's creation and have life as a whole person. He did this until he believed the devil's lies and disobeyed God. Then the likeness of God disappeared from the spirit of man and he was left with a mind and body. He died spiritually. He no longer knew how to talk to God; having problems and could not solve them. He had worldly knowledge with little wisdom to use it. He walked in darkness...not knowing where he was going nor how to talk with God. His mind was blurred. He no longer could see God clearly.

Has God provided a way for man to get back to his original place so he can walk and talk with God? Yes, Sure. Next week.

IS SLEEPING SICKNESS STILL AROUND?

Yes it is according to public health officials who are worried that outbreaks of encephalitis could be spreading. Encephalitis is a mosquito-borne virus. Its symptoms include headaches, lethargy, dizziness, stiff neck, nausea and fever. In its most virulent form it attacks the brain and may produce coma and possibly death.

Though the symptoms of the virus have been pinned down, there is no specific treatment or vaccine. Health authorities still consider the best protection to be a strong mosquito control program. Do not hesitate to consult a doctor if the symptoms of encephalitis are present.

Freedom Facts

In a recent poll, it was discovered that only six percent of American people understood the close relationship between their own freedom and free enterprise. Since the two are mutually dependent, each relying on the other for its strengths, an explanation seems called for.

Our country's wealth, unmatched anywhere in the world, has come about not by accident, but because of the fundamental economic system of free enterprise on which it is based. The system assures economic rewards for the combination of talents, incentive, and initiative of its people to develop the raw materials they have at their disposal into goods or services that can be used by others.

How does this affect you? You are thus provided freedom of choice...to pick and choose your own profession, to barter in various ways for wages and benefits, to join organizations you believe will foster your own interests, to utilize those products and services you find best, to make for yourself the kind of life you want and to profit personally—both economically and emotionally—from that decision. It is only under the free enterprise system that these options and freedoms are open to the individual.

Americans are now offered the opportunity to re-dedicate themselves to the principles of freedom and opportunity on which the nation was founded by re-signing the Declaration of Independence. Part of the Bicentennial celebration, this project, sponsored by Amway Corporation, is nationwide and entirely non-commercial. To add your signature, call any Amway distributor listed in the yellow or white pages of the telephone book, or write Amway, 7575 East Fulton Road, Ada, Michigan 49355.

IN STAMFORD

Some Veterans Due Texas Tax Exemptions

Beginning in 1976, certain disabled veterans will be eligible for property tax exemptions in Texas. According to information furnished by Allen Lowrey, Veterans Service Officer for Knox County, the tax exemptions are also to be made available to the widows of some veterans as well as the widows of persons who died while in military service. These special tax exemptions were made available through the provisions of House Bill 546, which was enacted by the 1975 Texas Legislature and signed into law by Governor Dolph Briscoe.

Veterans eligible for the exemption are those who have service-connected disabilities which were incurred during military service and are so rated by either the Veterans Administration or a branch of the Armed Forces. If a disability is rated less than ten percent disabling, the veteran receives no exemption. If his disability is rated from ten percent through 30%, he is entitled to an exemption of the first \$1,500 of assessed value of his property. For those rated more than 30% to 50%, the exemption is on the first \$2,000 of the assessed value; more than 50% to 70%, it is \$2,500 of the assessed value; more than 70% to 80%, it is \$3,000 of assessed value. If a veteran has a disability rated 10% or more and is 65 years of age or older, he is entitled to the exemption on the first \$3,000 of assessed value.

The widow of a deceased veteran is entitled to the exemption which her husband would have been entitled to at the time of his death. The widow of a person who died while on active duty is entitled to \$2,500 of the assessed value of her property which is subject to taxation. Also covered by the law are the minor children of certain deceased veterans and active duty personnel.

All tax collectors in the State have been furnished with instructions showing how the law is to be administered. Anyone who believes he is entitled to a tax exemption under the law should contact his local tax offices and determine what evidence will be required to establish his eligibility.

Happenings

December 30. Mr. Davis was superintendent at O'Brien in the late forties and early fifties.

The basketball boys and girls won their games this past week. I was going to have the scores but as usual I did not get to attend. They played Lueders-Avoca and Weinert, this I do know. They are both doing a good job, just continue winning, boys and girls.

We have gained a new family in the City of O'Brien and one family southeast of town. The J.J. Rodriguez family moved into the city last week and Mr. and Mrs. Sonny Correll, Andy and Brian moved into the John Grindstaff Jr. farm southeast of town. We are happy to have new residents in town and around the area.

Visiting in the home of Mr. and Mrs. Ivan Rowan for a few days this week is Jared Lee of Pampa. Jared is the son of Mr. and Mrs. Jackie Lee, former pastor at O'Brien Baptist Church. Donna and Jackie are attending the Baptist Evangelistic Conference in Fort Worth. Also staying with Ivan and Cleo is Beth Cameron, daughter of Bob and Kathy Cameron, pastor of the Baptist Church at O'Brien. Bob and Kathy are also attending the conference at Fort Worth.

ARTHRITIS NEEDS CARE

Many people think that nothing much can be done for arthritis. Too often they are people suffering with arthritis who needlessly become disabled. Almost four million Americans have become handicapped in this way. With proper modern treatment, a great deal can be done. Much and sometimes all crippling can be prevented. Crippling which has already occurred can be greatly reduced and corrected. Pain can be controlled. The patient who sees a qualified physician in the earliest stages of the disease, before irreversible damage to joints has taken place, can expect to be saved from the most serious effects of the disease.

For more about arthritis care, contact the West Texas Chapter of The Arthritis Foundation, 3701 North Big Spring, Midland, Texas 79701.

NEWS OF JOBS

CAREER FOR GRADUATES

Here's great news for high school seniors. Young men and women need no longer panic at the thought of entering the tough job world cold. They can begin to take on the responsibilities of adulthood and feel the thrills of accomplishment before graduation.

mind, the Marine Corps Reserve is announcing a new method of recruitment. Now, high school seniors can enlist in the Marines. They must complete school and be willing to enter training within six months after enlistment and within 60 days after graduation.

There will be monthly meetings at which the basics of Marine life will be taught—in preparation for that big day when it will be time to become a full-time Marine.

What it all means is a great answer to a problem that besets many potential graduates: finding something worthwhile and exciting to do after commencement day rolls around.

Farabee Is Vice-Chairman Of Coordinating Committee

AUSTIN...Governor Briscoe has appointed Senator Ray Farabee of Wichita Falls to serve as vice-chairman of the Texas Coordinating Commission on State Health and Welfare Services. The Commission held its first meeting January 8 in Austin.

The Commission was created by the 64th Legislature as a result of the requirements of Public Law 93-641, the National Health Planning and Resources Development Act.

The Coordinating Commission's primary task is to assure the most efficient expenditure of federal funds and to avoid duplication in the process.

Chairman Tim Von Dohlen said, "The Governor has given the Commission an important responsibility to review the Health Systems Agency applications and to recommend to him which applicant should be approved. The twelve Health Systems Agencies which will function in Texas will play a vital role in determining what health care services are available to the people in their area. It is essential that the very best applicant be chosen for each Health Systems Agency."

Senator Farabee said, "The Commission adopted a work program which calls for financing Commission recommendations at its next meeting on February 11. In addition, the Commission will consider development of a work program for review of federal health care grants in Texas."

SS News

Many persons are interested in the new Individual Retirement Accounts, commonly called "I.R.A.", according to Carl Beisner of the Vernon Social Security Office. A number of persons have inquired about how an I.R.A. would affect receipt of Social Security.

An I.R.A. may result in savings on personal income tax, and it may offer security in future retirement. It does not, however, affect Social Security one way or the other. Using the proceeds from an I.R.A. at some future date will not keep a person from drawing Social Security. On the other hand, neither can it be used to reduce the amount of earnings that a person has for Social Security purposes.

For example, if a person had wages of \$6,000 and put \$600 into an I.R.A., his income for Social Security purposes would still be \$6,000 not \$5,400, or \$6,000 less \$600. Similarly, a self-employed person, such as a farmer, would determine his income for Social Security purposes by subtracting his business related expenses from his gross income from the business. Money put into an I.R.A. account is not a business related expense and would not affect income for Social Security purposes or the amount of Social Security tax.

Questions about income tax should be directed to the Internal Revenue Service. Further information about Social Security is available by contacting the Social Security Office at 1701 Cumberland in Vernon, Texas. The phone number is (817) 552-9346.

FIRST FOREFATHER

The first flag of the colonists to have any resemblance to the present Stars and Stripes was the Grand Union flag, sometimes referred to as the "Congress Colors." It consisted of thirteen stripes, alternately red and white, representing the Thirteen Colonies, with a blue field

in the upper left hand corner bearing the crosses of St. George and St. Andrew, signifying union with the mother country, according to the U.S. Marine Corps Reserve. This banner was first flown by the ships of the Colonial Fleet in the Delaware River in December, 1775. The Grand Union flag was carried by Marines and American Bluejackets comprising an expeditionary force in the West Indies during 1776.

Getting Back On The Track

Have you got those post New Year's "Oh my gosh, I ate too much over the holidays and I must get rid of these extra pounds" blues?

According to Adele McGinty, Area Director for Weight Watchers in West Texas, the Christmas and New Year's holidays traditionally are times when many persons become expansive—in more ways than one.

That Christmas dinner and the "How can I refuse?" New Year's celebrations invariably mean too much food and drink and very often the wrong foods and the wrong type of beverage.

If your trousers or your dress are a bit tighter than they were a few weeks ago, this is a good time to get back on the weight control track and start getting rid of those unwanted pounds.

Mrs. McGinty suggested a six-point program that is in line with the "Personal Action Plan" developed by Weight Watchers International, Inc.

The plan takes the form of a series of behavior-oriented Eating Management Techniques—day-by-day steps designed to help the overweight to face and overcome problems and obstacles in weight reduction.

The program is as follows:
1 Start by starting...with a breakfast exactly as specified by your weight-control program. Then you're already committed and back on the weight-reduction track.

2 Get back on the track by keeping track...Chart every food you eat, hour by hour, every day. Keeping a record can open your eyes.

3 Clean house...of all temptations. If you're struggling to

get back on the right eating track, you don't need an obstacle course.

4 Have a drink...of water, every time you pass a drinking fountain. (Try it. It's a great filler-upper.)

5 If you're stuck in the house and think you're hungry when you're not, set a timer. Wait 10 minutes, or better still an hour. It will help you adhere to your weight-reduction program.

6 Better still, get out of the house...keep busy and consider, as part of your schedule, a WEIGHT WATCHERS class. Fill up on motivation. It isn't fattening at all.

The "Personal Action Plan," which stresses individual behavior within the framework of the weekly WEIGHT WATCHERS class sessions, evolved after careful testing involving members who were given attention aimed at helping them to cope with specific eating problems.

Mrs. McGinty believes that if you follow the above suggestions you will not have to resolve to lose weight again next year.

Coaches' Comments

By JERRY LOWREY

The Greyhounds have gotten off to a slow start thus far in district play, being beaten soundly by Munday and Aspermont last week. The primary thing we've missed in these first two games is an offensive scoring punch. The statistics of our pre-district schedule showed us averaging 61.66 points per game while we've scored only 46 and 57 points in our opening games. Jimmy Don Moore averaged 18.9 points in pre-district but scored only ten and six points in our opening games and Donny Skiles averaged 10.2 through pre-district and scored four and two in our district openers. From the field we hit a very poor 32% against Munday and 39% against Aspermont. Munday hit 43% and Aspermont 53% from the floor. So the ball is just not going in for us at this time. As usual, when this happens other aspects of your game begin to break down such as execution and defense. However, this is just like a hitter in baseball. Just because he isn't hitting the ball and is in a slump, he doesn't quit swinging. The same is true in our case. You don't stop shooting. You've got to relax and shoot the ball correctly when you are open.

Our Jr. Varsity team continues to win and currently is undefeated with a record of eight wins. They did get somewhat rusty over the holiday break but are beginning to round out the rough edges. The JV's are Mark Clonts, Philip Rhodes, Larry Rios, Butch Johnson, Junior Gonzales, Jodie McGaughey, Davy Counts, Jimmy Rushing, David Benson, Terry Curd, Roy Faulk, and Charles Durham. The JV's are coached by Tommy Sloan. Offensively, they have scored 407 points for a 50.8 average. Defensively, they have held their opponents to 302 total points for a 37.7 average. Jimmy Rushing is the leading scorer with 8.5 points per game closely followed by Mark Clonts with 8.0.

Last week district play began and this, maybe, is a preview of what to expect. We lost the first game to Munday by two points and then we came back to win, by two points over Aspermont Friday night. Both games were decided in the last minute of play with us missing a key shot at the buzzer and Aspermont missing likewise. We have yet to play the

stronger teams in district. (Paducah and Crowell). We have met both of these teams earlier but this was not for district play. Haskell has also been playing good ball and they will likely be a tough opponent. All of these games will be tough and they all could go down to the wire.

As we approach the rest of our district games we are looking for consistency, not only from game to game, but from the first half and the second half of each game. The lack of consistency has really hurt us since the holiday break. At times we appear to be approaching our true capabilities only to turn around quickly and play just the opposite. Mental errors which have resulted in costly turnovers and fouls have been the chief cause of our lack of consistency. Right now we are just not mentally tough enough. This, I hope, we overcome or we'll be on the short end of the score.

I hope we can continue to have the fan support that we have had in the past. See you at the next games.

ARTHRITIS NOT HOPELESS

Contrary to popular belief, no case of arthritis is hopeless. The Arthritis Foundation reports that one back-to-work project returned three out of four handicapped victims to useful, productive lives, after a prescribed course of treatment and rehabilitation. And those were people who had already been disabled. Early diagnosis and proper treatment can prevent severe crippling in the first place in nine out of ten cases. Only a qualified physician can identify the kind of arthritis a victim has, and therefore, prescribe the best treatment. Such a program usually will include medication and a simple regimen of rest and special exercise.

For further information on arthritis care, contact the West Texas Chapter of The Arthritis Foundation, 3701 North Big Spring, Midland, Texas 79701.
