

Washington, D. C., July 6—The House of Representatives was scheduled to adjourn this week-end until early fall. However, adjournment is indefinitely tied up on account of an appropriation which some are urging for the so-called Fair Employment Practices Committee. While a number of sincere Congressmen are supporting the FEPC it is opposed by many, including all of the 21 Congressmen from Texas. This agency bears its name. The Norton Bill, now pending in the House to create a permanent FEPC, proposes to impose on the American people as a permanent agency the most meddling and troublesome of all wartime agencies. It would establish a bureau in Washington with power to tell every employer in America, in secret, who he could hire and who he could fire. It would empower its agents to find an employer guilty of violating the law without a trial by jury or without resort to court. This agency would not remove discrimination, intolerance, or prejudice, but would aggravate all these things. In fact, it would cast our Bill of Rights into the ash can. It reminds me of that patriot who cried, "Oh, Liberty, Liberty, what crimes are committed in thy name."

A principle is at stake. We'll stay here all summer if necessary to defeat this threat to our democratic way of life.

Democracy is apparently under assault in all quarters of the globe. The British elections just held will give us some idea of trends in that country. The votes will not be counted until July 26. Mr. Churchill pulled no punches in his campaign. He warned his people that "Socialism is in essence an attack not only upon business enterprise, but upon the right of an ordinary man or woman to breathe freely without having a clumsy, tyrannical hand clapped across his or her mouth." Most of us here are pulling for Mr. Churchill.

An important state official just returned, tells me he viewed a recent "Victory parade" in Rome and that he saw only the red flag of Communism. An important French official, however, tells me Communism has reached its peak in France and will not be able to command more than 25 per cent of the French vote.

A GMC advertisement has just reached my desk extolling the virtues of our amphibious trucks known as "ducks," built by General Motors. This advertisement says a German officer captured near Isigny pointed to a long line of "ducks" and said, "There is America's secret weapon." To some extent he was right. Eisenhower is reported to have said that without the duck we could not have taken our beachheads in Italy or on the Continent. The father of the duck was a truck made by an oil company for Louisiana swamps several years ago.

The War Food Administration advises me they are no longer using sugar in the making of alcohol for synthetic tire production, but now secure this alcohol entirely from other sources.

Kamikaze sounds crazy and is crazy, but these Jap suicide pilots have brought great devastation to our fleet as well as costing many American lives. Reports are that property damage done by them runs around ten billion dollars.

Drew Pearson continues in his determined campaign to discredit General MacArthur. Recent Pearson stories which MacArthur has positively denied are: (1) that MacArthur ran Senator Tydings and his party out of the Philippines recently; (2) that MacArthur would not permit General Patton to transfer to the Pacific, and (3) that MacArthur years ago removed General Eisenhower, then a Colonel, from his command in the Philippines. Colonel James of the Veterans Administration, a member of the Tydings party to the Philippines, tells me instead of MacArthur running them out he gave them every possible assistance and helped them to finish their work in one-half the allotted time.

It is almost universally felt that the United Nations Charter offers our only hope for peaceful world collaboration, and that it will be ratified by the United States Senate. The Charter is not perfect. Nothing ever touched by human hands can attain perfection.

Pvt. Cecil Anderson of Camp Hood spent the weekend with his parents. Mr. and Mrs. E. J. Anderson. His sister, Mrs. John Borchardt and family of Crowell were here also.

Land Bank Loan Provisions Altered To Improve Service

L. B. Doneho, Secretary-Treasurer of the Baylor Knox National Farm Loan Association, on his return Saturday from a meeting in Lubbock of secretary-treasurers in this part of the state, said that amendments to the Federal Farm Loan Act will provide improved long-term credit service to agriculture. "The amendments permit Land Bank loans of 65 percent of the normal agricultural value of a farm or ranch," he said. "The legislation also permits the Land Bank under certain conditions to purchase notes and mortgages from the Federal Farm Mortgage Corporation. This would reduce the interest rate on Land Bank Commissioner loans acquired by the Land Bank from 5 percent to the Land Bank's rate of 4 percent, and also give the borrower the advantage of having only one creditor."

"Other provisions in amendments to the Farm Loan Act will speed up closing of loans through the association on long-term Land Bank loans. These betterments are a result of continuous effort by the associations and the Land Bank to improve their service to agriculture. During the past two years the Baylor Knox Association received \$32,427.00 in dividends from the Land Bank, of which \$24,492.25 was put into the association's reserves and \$7,934.75 was paid to farmers and ranchers in this territory in dividends."

Benjamin Soldier Awarded Good Conduct Medal

1338th ATC, BU, China—Sgt. David A. Kyle, son of Mr. and Mrs. Newt. E. Kyle, Benjamin, Texas, and husband of Mrs. David A. Kyle, 1014 N. Range St., Dothan, Ala., was presented the Good Conduct Medal for "exemplary behavior, efficiency and fidelity" at formal ceremonies held recently at this Air Transport Command Base.

Sgt. Kyle's commanding officer, Maj. Lynn I. Jones, Pittsburgh, made the presentation.

Overseas since July, 1944, Sgt. Kyle is currently assigned as a clerk in the transportation. This base is a turnaround point for ATC's giant transports which fly over the famed Himalayan "Hump" with vital war cargo from India.

It was recently revealed that the operating efficiency of ATC's skyline route was getting more needed cargo into China than can be carried over present land routes.

4-H Club Members Enjoying Outing

The Knox and Baylor County 4-H Club boys and girls are enjoying their annual camp at Seymour park this week.

The program consists of swimming, out door picture show, games, sing-song and demonstrations.

Because of the more strict rationing regulation, each one attending the camp will be expected to prepare and furnish his or her own food.

MRS. ROSS GRIFFITH ENTERTAINS LIONS

Mrs. Ross Griffith was guest entertainer at the Lions luncheon today noon. Mrs. Griffith sang three selections for the group of 22 Lions and 8 visitors. Mrs. Mildred Joiner accompanied on the piano. Ross Griffith was a guest of the Lions.

Visitors included Sgt. Doyle Graham, son of Mr. and Mrs. L. W. Graham, Ken Fritzell, Rev. John Stout, Mr. Baker, district Boy Scout executive.

T. W. Mitchell, local garage man, was voted in as a member of the club. Lion President Holcomb read a roster of committees to serve in the present club year.

Guy Steen made a report of activity at the Abilene State Lion Convention held two weeks ago.

Mrs. J. W. Gammill has returned to her home in Lubbock after a weeks visit with Mr. and Mrs. C. A. Hull.

Mrs. E. E. Teaff is in Banana River, Florida, visiting her son, Ensign George Thomason.

Rationing Board To Close Saturday Noon

The Knox County War Price and Rationing Board will close at noon every Saturday in the future, according to Mrs. Myrtle M. Propps, Chief Clerk. New government regulations stipulate that county rationing offices observe the Saturday afternoon closing schedule.

Residents of the county are asked to bear in mind the closing hours and transact all business earlier in the week.

Draft Board Gets Praise for Splendid Work Being Done

Not all are brick bats and criticism that falls the lot of county Selective Service Boards, otherwise known as "Draft Boards."

Occasionally a bouquet of flowers fall their way, in the form of praise for the loyal and unbiased work they are doing in a job that is undoubtedly one of the toughest in the war effort.

The Knox County Local Board has done a fine job in administering the Selective Service law, and at least one draftee has sent them his thanks for the work they are doing.

John Lemuel Williams, formerly of Gooee and Rule, was honorably discharged June 10, 1945, with over three years service in the Army. Mr. Williams was living in Gooee when he registered for Selective Service in October, 1940. He was living at Rule at the time of his induction March, 1942. He was 40 years of age at the time of his discharge.

J. A. Wilson, clerk of the Knox County Local Board, has kindly forwarded the following letter written by Mr. Williams at the time of his induction in March, 1942:

Rule, Texas, March 5, 1942 Local Draft Board, Benjamin, Texas.

Mr. Idol, Mr. Pendleton, Mr. Jones,

Kind Friends You have your duties as Draft Board of Knox County, which is an unpleasant task in a way but still a pleasure to do what you can for our government and in my opinion there could not have been three more honorable and loyal men selected anywhere. The time has come for me to be called and I am willing and ready to do anything and all that I can to help win this terrible war.

I want to take this means of thanking you for your wonderful kindness to the draftees and especially do I appreciate what you have done for me.

Hoping to see each of you personally before leaving, I remain, very truly yours,

John L. Williams (1065) (May the Lord take care of each and everyone and use us as He sees fit.)

Red Cross Meeting Held in Munday

Mrs. E. C. Anderson, Mrs. Chad Wilson and Mrs. J. M. Averitt attended a meeting of the Red Cross in Munday, Friday, July 3, with Mrs. Kennedy of the Home Service Department of the Red Cross state office present.

Plans were made to open a Home Service unit in Knox City soon.

Miss Valerie Atterbury of Dallas is spending her vacation with her parents, Mr. and Mrs. J. H. Atterbury. They spent today in Wichita, Falls on business.

Marjorie Propps Marries Lt. Berkeley In June Rites

The home of Dr. and Mrs. Arthur F. Bratrud, 2808 Richfield Road, Minneapolis, was the scene of the wedding of Mr. and Mrs. A. E. Propps of Knox City, to Lieutenant Ellwood Berkeley, Jr., on Sunday afternoon, June 24.

Lieutenant and Mrs. Berkeley left the following day for Ann Arbor, Mich., where he is assigned to an advanced course in Japanese under the intelligence department of the infantry.

The bridegroom is the son of Mr. and Mrs. E. R. Berkeley of Washington, D. C., who were here for the wedding.

Chaplain Walter B. Horn of the Army Air Corps flew there from Brady, Texas, to perform

Rev. J. W. English Preaches His 50th Anniversary Sermon

Rev. J. W. English of Truscott preached his 50th anniversary sermon from the same text used for the first sermon just half a century ago—1 Thes. 5:16.

The Truscott church presented the pastor and his wife a large bouquet of red roses, together with a well-voiced expression of love and appreciation. A number of visitors were in attendance from nearby places and from other churches in Truscott. Duke Wallace of Crowell led the hymns for the morning service.

Dinner was served in the church basement and the afternoon was spent in singing. The following took turn about leading choice song selections: Duke Wallace, John Jameson, Guy Hickman, Gaye Chilcoat, Colin Jameson, Dolph Martin, Mr. Capps, and Mr. Blevins. The singing rolled on with such joy that it could not be dismissed till after 4:00 o'clock. Bro. English presided and, all told, through the day, was on the platform and in the pulpit almost five hours. He then drove to Knox City where he and Mrs. English worshipped with the First Baptist Church and helped welcome the new pastor, Rev. John Stout, at the evening service.

Since coming to Truscott about seven and a half years ago, Rev. English has led in the erection of two splendid native-stone churches—one at Truscott—the other at Gilliland. Both are about complete and free of debt. Recently Mr. English has been voted honorary membership in the International Mark Twain Society, in recognition of his contribution to contemporary literature. This society is fostered and supported by outstanding personalities, including: Bernard Shaw, Winston Churchill, The Duke of Windsor, Albert Einstein, Booth Tarkington, Henry Wallace, Gen. Eisenhower, and a score of other notable personalities.

The governors of Eugene Field Society had previously voted Mr. English honorary membership in that society. To crown all these recent honors as a poet, he was chosen one of 25 poets asked to furnish poems for use on 250 radio stations having national hook up. His quota of poems has already been accepted by Avalon National Poetry Shrine and approved for publication in the book which goes to press July 15.

Miss Lula Graham M-Sgt. Stephens Wed July 4th

Miss Lula Odella Graham of San Angelo, and M-Sgt. Wm. A. Stephens were united in marriage July 4th at Abilene.

Sgt. Stephens is the son of Mr. and Mrs. Lloyd Stephens of Knox City. Mrs. Stephens's parents reside in San Angelo. Rev. Jenkins of Abilene performed the ceremony. Sgt. Stephens has been in the service 32 months. He returned home June 20th after 25 months overseas duty with the Eighth Air Force in England. Prior to entering service, Stephens was employed by Consolidated Aircraft in California. He will report to San Antonio July 22 for further assignment.

Mrs. Stephens is presently employed at the Booterie Shoe Store in San Angelo and plans to make her home there after Sgt. Stephens sails for overseas duties.

BUY WAR BONDS and STAMPS

Marjorie Propps Marries Lt. Berkeley In June Rites

The ceremony, the bride's mother attended the wedding and her sister, Miss Lora Jean Propps of Kelly Field, San Antonio, Texas, was maid of honor. Dan Gilder-sleeve of Cleveland was best man. Mrs. Floyd Hooten (Ann Bratrud), Shoemaker, Calif., also attended the ceremony. Others who assisted were Miss Joan Bouton, soloist, and Clyda Stephens of the University of Minnesota music faculty, pianist. The bride was graduated from the school of music at the university on June 16.

Mrs. Frank Mapes, 2224 West Lake of the Isles Blvd., entertained at a luncheon and pre-nuptial shower for Miss Propps at the Woman's Club.

Knox City HD Club Organized Recently

The Knox City Home Demonstration Club had their first meeting in the home of Mrs. L. N. Bridges, Friday, June 30, with Miss Lucile King, Home Demonstration Agent, and three members of the Union Grove club, Mrs. J. C. McGee, Mrs. Lloyd Feemster, and Mrs. George Hodges, present to help them organize.

Officers elected were Mrs. Leo Smith, president; Mrs. J. M. Averitt, vice-president; Mrs. Henry White, alderman; Mrs. Shirley Park, secretary; Mrs. E. E. Teaff, reporter.

The next meeting of the club will be with Mrs. J. M. Averitt, Friday, July 20, at which time Miss King will give instructions for making slip covers for furniture. Everyone interested are urged to attend.

County HD Council Holds Meeting

In the assembly room at the courthouse in Benjamin, Friday, July 6, the Home Demonstration Council met in regular session with Mrs. T. B. Masterson, Jr., presiding.

Roll call was answered by six clubs, represented as follows: Benjamin, Munday, Truscott, Gilliland, Union Grove and Knox City. The Knox City club is a new addition to the other clubs. Knox County now has ten Home Demonstration clubs helping a great number of the county's population.

After roll call and reading of the minutes of the last meeting, the secretary read a number of communications, one from Miss Goree of Corsicana, congratulating the club members on the work they are doing in establishing a free circulating library for Knox County. We now have approximately 400 books on the shelves. Books added July 6 were 58 and the club presidents present checked out 33 for their members and anyone who wishes to read them.

Mrs. J. E. Stover gave a report from the year book committee. Mrs. Leona Darwin reported on expansion work being done in the county, and Mrs. E. B. Sams, marketing chairman, sent her report which was read by the secretary. Mrs. Sams' report showed that 342 families ordered pineapples this year through the council.

Mrs. R. M. Almanode gave a report from a meeting held in Haskell on "Planning Year Books."

The menu for our annual encampment was read by the secretary. This encampment will be held in Haskell County this year. This being one time in the year when the club members of the two counties can get together, exchange ideas, relax, have a good time and forget work and worry for two days.

Santa Fe Removes Part Pullman Cars

The order of the Office of Defense Transportation at Washington, which affects all sleeping car lines operating less than 439 miles, will necessitate cancellation of some Pullman schedules on Santa Fe trains in this territory, effective at noon July 15, according to an announcement today by H. C. Vincent, traffic manager.

The sleeping car line Lubbock to Dallas, leaving Lubbock 9:45 a. m. and returning into Lubbock at 9:20 a. m., over Santa Fe trains 94-95 will be cancelled. This sleeper is operated in connection with the T&P Railway at Sweetwater. Also discontinued will be the sleeping car operating between Albuquerque and El Paso, trains 13-14, leaving Albuquerque 11:55 p. m., arriving El Paso 7:30 a. m., and leaving El Paso at 10:45 p. m., arriving at Albuquerque 6:25 a. m.

The Pullman cars being operated on these schedules will immediately be made available for the movement of military personnel.

Mr. Vincent said: "We are sure our many patrons will be willing to make this sacrifice in behalf of the war effort."

S. N. Reed and family were in Fort Worth Wednesday where Mr. Reed attended a meeting of the Board of Directors of the Texas Ginners Association. From there they will go to Dallas for the Cotton Congress.

Ray Eads Marries Mabel Hutchins

Miss Mabel Hutchins, whose parents live at Melba, Texas, and MMIC Ray Eads son of Mr. and Mrs. E. B. Eads of Knox City, were married in Dallas on June 31st.

Following the ceremony, the couple visited Ray's parents here and later visited at Melba before Ray reports back for assignment on July 12 at Dallas.

Entering the service in October 1942, Ray has just returned from 31 months duty in the Pacific with the Navy. He returned to the states on June 12th. Mrs. Eads has been employed in Dallas.

Cotton Insects Are Financial Burden To Knox Farmers

Destructive cotton insects such as the cotton flea hopper, levy a tax upon cotton farmers even before the public tax collector gets around. Growers do not have to pay this tax, if they follow proven methods of insect control recommended by A & M College Extension Service, says R. O. Dunkle, County Agent.

It is estimated that these insects costs the farmers of the cotton belt something like \$250,000,000, or an average of \$145.00 each. Dusts, of course, are an expense to cotton growers, but it has been demonstrated that this outlay represents a profit when placed against the loss, which might occur, if no control measures are used, says Mr. Dunkle.

It is especially necessary to save every item of food this year, and cotton is one of the most important sources of food and feed, but cotton insects destroy a vast amount of both yearly. It is estimated that nearly 300 million pounds of cottonseed oil urgently needed for rationed shortening and other foods are lost each year in the cotton growing states because cotton crops are not well protected against insects. Moreover, about 800 million pounds of cottonseed meal and cake needed to produce scarce rationed meats also are among the total which flea hopper, weevils and worms take from the farmers field each season.

A large amount of cottonseed hulls and cotton linters are also destroyed in the fields as the pests feed on the growing plants. The County Agent recommends laying in a sufficient supply of insecticides such as dusting sulphur and calcium arsenate as the first step toward control and then using them promptly when needed. Saving as high a percentage as possible of your cotton crop is the important thing.

When the cotton flea hopper and the boll weevil are both causing injury at the same time, a mixture containing five pounds of calcium arsenate and ten pounds of sulphur will be effective against both insects. This mixture should be applied at the rate of 10 to 15 pounds per acre, depending upon the degree of infestation.

It seldom pays to control insects where cotton would not produce more than one-quarter of a bale per acre, if no insects were present; however, the prospect for a cotton crop in Knox County are very favorable because of recent rain and in most every case it would be desirable to determine insect infestation and to apply dust if insects are in sufficient numbers to justify poisoning.

Sam White's Heap B'g Grandparents

Mr. and Mrs. Sam White are justly proud of the arrival of twins, a boy and a girl, born to Lt. and Mrs. Bill White, at Weatherford, Saturday morning, July 7th.

The youngsters have been named William Jackson, Jr., and Virginia Sue.

Sunday Singing At Union Grove

Union Grove will be host to the regular Sunday singing here next Sunday. Plan to come out and enjoy the good old songs sung in the good old way.

Interest was grown considerably in the bi-monthly meetings inaugurated some time ago.

Mrs. Cecil Anderson, Jan and Den, are in Arlington visiting relatives.

Pfc. J. F. Faubion Killed Soon After Arrival 'On Front

A message from the War Department to his parents tells of the death of Pfc. James F. Faubion, killed in action in the battle of Okinawa, May 18, just a few weeks before his 19th birthday. He is the son of Mr. and Mrs. Gene Faubion of the Ireland community and had been in the service only eight months.

Frankie, as he was called, was a brother of Mrs. Chas. Dowling, Mrs. Frank McAuley, and W. T. Faubion of Knox City.

He was born May 29, 1926 and was reared in the Ireland community and graduated from the Evans High School with the class of 1944. He took a prominent part in the athletic program of the school.

Entering the Army September 13, 1944, he was trained at Camp Hood, and was shipped out to join the 96th Division of the Tenth Army. He had been at the front only a few days when killed.

A member of a family of 13 children, his is the first death in the family circle. One brother is with the U. S. Army in France. Six brothers and six sisters, together with his parents, survive him.

Commenting on the awfulness of war, one of his sisters said: "We who loved him very much, will miss him so and we are led to ask: Can we look at these 18-year-olds who die that we might live, and not do our part? I want to appeal to everyone to do all we can to keep the graduating classes of 1946 from accepting a diploma with one hand and donning a uniform with the other."

Pfc. Waylan Apple Gets Bronze Star

Mr. and Mrs. Marvin Apple received Wednesday a package containing a Bronze Star Medal, forwarded by their son, Pfc. Waylan Apple. Waylan had not written or notified them of having been awarded the medal but they are expecting to hear from him about it soon.

Pfc. Apple is with the 6th Armored Division of Patton's Third Army. He has been overseas since the 3rd of November 1944.

Lt. Doil Hammons Visiting Family

Lt. Doil Hammons is here on a 30-day furlough with his wife and child, and his parents, after returning home from the European theatre of war.

From here Lt. Hammons will be sent to a camp in Mississippi and Mrs. Hammons and Janice plan to accompany him.

Pfc. Arnold Reeves Will Be Home Soon

Pfc. Arnold Reeves, son of Mr. and Mrs. S. J. Reeves, wired his parents from New York that he would be home on furlough soon.

Pfc. Reeves has been in Europe for several months.

Cpl. Junior Reeves recently received a medical discharge from the Army. He had been in the Pacific area over three years.

J. S. Mogford cotton breeding specialist for the Northern Star Seed Farms is attending the Cotton Congress in Dallas this week.

Pvt. and Mrs. J. B. King and little daughter, of Camp Hood, visited in the home of Mr. and Mrs. Amen Hester last Tuesday evening.

Mr. and Mrs. Jesse Hitchcock and children are in Dallas this week. Mr. Hitchcock is attending the Cotton Congress.

The Weather

Observations furnished by Roy Baker and Mrs. Louise Finley

Table with columns: Date, Daily High, Daily Low, Rainfall. Data for July 5-11.

Rainfall To Date: Total rain this week, 1.46; Total rain this year, 10.31; Total this date last year, 13.79.

Texas Doctors To Wage Fight Against Socialized Medicine

The State Medical Association of Texas will actively oppose passage of the Wagner-Murray-Dingell bills now before Congress on the ground that these measures would socialize American medicine and impose a needless burden of taxation on the public.

"The bills, which include a compulsory health insurance program for 125,000,000 people would undoubtedly destroy the private practice of medicine throughout the United States," says Dr. H. P. Connally of Waco, President of the State Association. "Relationship between doctor and patient would be made a cold matter of law and the entire medical profession would be regimented. Physicians would become subordinate to Federal bureaus in Washington. The individual could no longer expect to have free

choice of doctor nor the doctor the free choice of patients.

"These bills provide payroll taxes of 8 percent on all wages and salaries up to \$3,600, half to be deducted from the pay envelope and half to be paid by the employer. Self employed people must pay 5 percent of their income up to \$3,600. This taxation would produce the staggering sum of \$3,142,000,000 annually. These vast funds would be administered by a single man, the Surgeon General of the Public Health Service. Thousands of Wagner-Murray-Dingell employees in all parts of the United States, exercising power over human life and health could well constitute a tremendously powerful political machine.

"The State Medical Association of Texas believes that adequate health, medical, surgical and hospital services can be secured by the individual through the many non-profit and commercial insurance plans for such services now existing. The Association's committee on Medical Economics has recommended that insurance organizations now operating in the state and providing such services, be listed for public approval after investigation of their financial responsibility and method of operation.

"Texas Congressmen will be asked to vote against these socialistic measures in order to best preserve and safeguard the public health and to maintain free practice of Americanized medicine."

Under Texas Skies

By A. Garland Adair, Curator, Texas Memorial Museum

The French Embassy in Austin played an important role in the delicate and intricate handling of affairs and relations leading to Texas Statehood.

George H. Gray, an eminent jurist and historian, in his "Outline History of Austin," a very rare article, some 75 years ago, has recorded what is possibly the best and most authentic account of how the French minister to Texas and an Austin hotel keeper made history and changed the map of the new world. Here is what he wrote about in the 70's which was about 30 years after the event occurred.

"The new city (referring to Austin) was improving very rapidly, notwithstanding the many disadvantages it had to contend with, and promised ere long to become famous among the cities of the new world. The independence of Texas had been acknowledged by the United States, France and England, and M. de Saligny, the French minister, was residing at Austin, and had erected near the city one of the finest residences then in Texas, and perhaps he might but for an unfortunate difficulty between himself and Mr. Bullock, the principal hotel keeper in the city, continue to have resided there. It appears that Mr. Bullock's pig were in the habit of running around M. de Saligny's stable, and some of them were killed by one of the servants of the French minister whereupon Mr. Bullock whipped the servant. The minister got mad and called upon Mr. Bullock about the matter, who, not being entirely in a good humor, ordered him off the premises in language perhaps not the most polite. The minister, feeling that France had been insulted, called upon the President (M. B. Lamar) and demanded the immediate punishment of Mr. Bullock, which he declined to accede to, but turned him over to the civil authorities. This did not appease the anger of the minister by any manner of means, and he conducted himself in such manner as to induce the president to ask that he be recalled. This, apparently, was a small matter, but it produced great results. It prevented the Republic from obtaining what is commonly known as the French loan, for which negotiations were then pending, and had she been successful, would have been the ruin of the young republic." (Judge Gray meant that the acceptance of the French loan would have marked the end of annexation negotiations and that Texas would thereafter become a dependency of the Republic of France.)

"Judge Gray continues as follows:

"On the first Monday in September, 1841, the general election was held. Gen. Houston, David G. Burnett and Governor Welch, were candidates for president. Gov. W. taking into consideration the low state of finance of the republic proposed in his circular to perform all the duties of the office for the sum of \$500 per annum, pay his own expenses and do all the public blacksmith free of charge. This liberal offer, however, was rejected by the people, and Gen. Houston was triumphantly elected and duly inaugurated on the second day of December, following, being the first and last president ever inaugurated at the new capital."

I GIVE YOU TEXAS by BOYCE HOUSE

After a baby boy has grown out of baby dresses and diapers and has acquired pants, freckles, and so much dirt that no one would dare kiss him; between meals, he then becomes a boy.

A boy is nature's answer to that false belief that there is no such thing as perpetual motion. A boy can swim like a fish, run like a deer, climb like a squirrel, bark like a mule, eat like a pig, or act like a wild buck, according to climatic conditions.

He is a piece of skin stretched over an appetite. A noise covered with smudges. He is called a tornado because he comes in at the most unexpected times, hits at the most unexpected places, and leaves a wreck behind him. He is a growing animal of superlative promise, to be fed, watered and kept warm, a joy forever, a periodic nuisance, the problem of our times, and yet the very hope of our Nation. Every boy is evidence that God is not yet discouraged by man.

Were it not for our boys, a thousand picture shows would go bankrupt. Boys are useful in running errands. A boy can easily do the family errands with the aid of five or six adults. The zest and enthusiasm with which a boy does an errand is equalled only by the speed of a turtle on a July day. The boy is a natural spectator. He watches parades, fires, fights, ball games, automobiles, boats, and airplanes with equal fervor, but not the clock that will stand on its head and sing when it strikes will win the undying gratitude of millions of families whose boys are forever coming home to dinner about supper time.

Boys faithfully imitate their dads in spite of all efforts to teach them good manners. A boy, if not washed too often and if kept in a cool, quiet place after each accident, will survive broken bones, hornets, swimming holes, fights and nine helpings of pie.

Maritime Service To Seek Men At Lubbock Station

In view of the urgent need for men the United States Maritime Service, which is the training organization for the United States Merchant Marine, has ordered Ensign Yale V. Clark and Chief Pharmacist Mate Walter Mahusky to the United States Employment Service Office in Lubbock. They will be there for one week beginning July 16 and ending July 21 for the purpose of giving physical examinations to eligible applicants between the ages of 17 and 50 who are interested in serving their country in one of the most vital branches of service. Training is offered in this deck, engine, radio, purser-pharmacist-mate and stewards departments with splendid opportunities for advancement.

Eligible applicants who meet the physical requirements will be sworn in and shipped direct from Lubbock to the United States Maritime Service Training Station at government expense.

The government is offering this accommodation in order to help Texas meet its quota of 200 men per week.

Applicants must present birth certificates; men under 21 must have their parent's written consent for the physical examination; men 18 to 26 must have the written permission of their draft boards to enroll in the United States Maritime Service. These papers should be obtained in advance and presented at first interview in order to speed up enrollment.

Your druggist fits into the everyday picture as well as your banker or merchant. He has a direct responsibility in matters of your health.

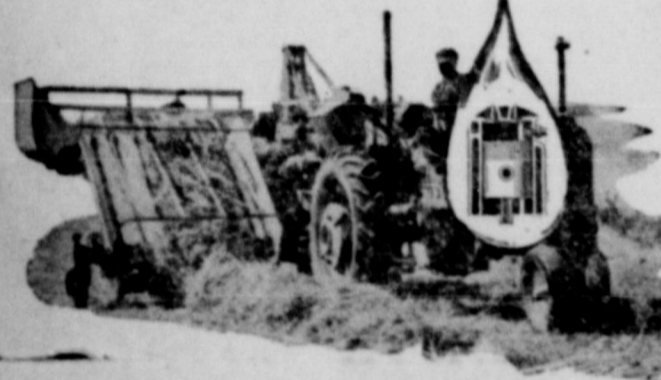

Here we make a habit of filling prescriptions right, just as your doctor orders them. Care and accuracy are our watchwords.

Lightweights Can Now Enter Service Under New Ruling

L. J. A. F. Thompson, Regional Enrolling Officer for the 10th Area of the United States Maritime Service was notified today by the Medical Section of National Headquarters that the physical standards for apprentice seamen enrollments has been modified to permit the enrollment of men with a minimum weight of one hundred and twenty (120) pounds. Formerly the minimum weight was one hundred and thirty (130) pounds.

L. J. Thompson pointed out that this modification was made in view of the urgent need for men at this time. He hopes that this modification of physical requirements will aid materially in the efforts to meet the recruiting quota of two hundred (200) men per week which has been assigned this area.

Eligible men, 17 to 50, who can meet the revised physical requirements should apply immediately to the United States Maritime Service Enrolling Office in Houston, Dallas, Galveston or Port Arthur, Texas.

A gyroscopic device enables an oil well drill to be steered thru rock in any desired direction a mile underground. Drilling can be started on an oil well on shore and oil tapped a mile out to sea.

It is to be hoped that the voters will give an overwhelming approval on August 25 to the constitutional amendment giving Texans who are now in the armed forces the right to vote without the payment of a poll tax, while in the service. As far back as 1941, the I Give You Texas man urged that a citizen of Texas serving his nation in the Army, Navy or Marines in time of war is still a citizen and should be permitted to vote in any primary or election and without the payment of a poll tax.

What it took almost 70 years to accomplish with natural rubber, American scientists, engineers, and production men have achieved in 5 years with synthetic rubber; 85 per cent of the overall volume of rubber this country is now using is synthetic.

Meal Planning Is Problem During Food Shortages

Meal planning even in normal times is a difficult job, but with shortages of food, and the ever-present problem of ration points, even more ingenuity and ability are needed in planning meals today, says Lucile King, County Home Demonstration Agent.

Not only is it harder to make meals appetizing, but it is also harder to keep them well-balanced, Miss King remarked. But when we consider the picture as a whole, we find it may not be so dark as we are inclined to believe. For instance, although we eat meat primarily because we like it, we also eat it because of certain food values.

As an example, we need protein, which builds and repairs our body tissues, and we need the iron and phosphorus which assist in the circulation of blood. Meat also furnishes us with the vitamins, niacin, thiamine and riboflavin. So we must find other foods which will furnish us with these six essentials. We can get protein from eggs, fish, milk, poultry, cheese, dried beans and peas, peanut and soybeans. Iron is furnished by leafy, green vegetables, by whole grain or enriched bread and cereals, eggs, poultry, dried beans and peas, peanuts and soybeans. Phosphorus comes with the foods that supply protein. As for the vitamins, we can get a good part of what we need from whole grain and enriched bread and enriched cereals. So, if we can't have these food values in our favorite form, we can at least be assured that we are still getting them with careful selections of alternates. Too, there are many new and delicious recipes for serving these foods in dishes the entire family will enjoy.

HEALTH LETTER

Milk is an infant's natural food, nevertheless, milk plus heat, dirt, and flies has killed many thousands of babies. The intestinal diseases that attack babies in summer are, according to Dr. Geo. W. Cox, State Health Officer, largely caused by germs carried in milk and water. Unclean or contaminated water can be as harmful in causing infant diarrhea as contaminated milk.

Thousands of babies grow and sleep well in Texas every year because they are given the right kind of care and the proper attention is given to the preparation of their food. The right kind of care includes keeping in close touch with the baby's doctor at all times; a regular daily schedule for sleeping, feeding, and bathing; sufficient time in the outdoor air; and carefully supervised exposure to sunshine—all these precautions can be important factors in keeping the baby well at all seasons of the year. In addition to benefiting the baby, this type of routine allows the mother more time for her household duties and much needed rest periods.

The baby should wear a minimum of clothing and should be handled as little as possible," Dr. Cox said. "A smooth, flat comfortable bed for the baby with a pillow and with plenty of fresh air will help him to sleep and rest."

The State Health Officer emphasized the importance of keeping the baby constantly protected from flies, mosquitoes, and other insects which may transmit diseases. Dr. Cox said that pamphlets outlining the proper care of the baby may be had upon request to local health departments and the State Health Department.

U. S. OIL OUTPUT AT RECORD HIGH POINT

The United States produced almost 71 billion gallons of crude oil in 1944, setting a new record for the country. This is approximately 42 million gallons a day higher than the pre-war level. Worldwide oil requirements of the United Nations today exceed 225 million gallons daily, of which the United States supplies 29 percent, South America supplies 14 percent, Russia, 9 percent and the Middle East, 7 percent.

The largest inland cotton compress in the world is located in Greenville, Texas.

The 32 carbon black plants in the Texas Panhandle produce approximately 79 per cent of the world's output of this product.

The fuel tank of a B-29 bomber holds as much fuel as a railroad tank car, 8,000 gallons.

Chinese Technicians Studying Railroads

Nine Chinese technicians in communications who are studying American methods under a lend-lease arrangement, have been assigned to the Santa Fe Railway at Toneyka and Argentine for training.

These technicians are among 193 young Chinese who are in this country studying methods of industry and agriculture. They are all college graduates, speak English and have two years preliminary training in their particular fields. The nine trainees assigned to the Santa Fe are making a specific study of railway equipment maintenance.

ESTABLISHED 1909

The Family Altar

By Rev. Violet Byers
Co-Pastor Foursquare Church

For our scripture reading today, as we gather at the Family Altar, let us look into the old Testament and see how we weigh up in the sight of God. In the 5th Chapter of Daniel, we find the story of a great King, and I believe this is one of the best known stories in the Bible and one that has the least atten-

tion paid to it. It is just considered a story and no more. But, dear ones, we can apply it to our own hearts and lives today. This chapter tells us of the wicked king who dared to command that the gold and silver vessels of the temple be brought to him so that he could defy the true and living God, by using them to drink a toast of wine to the gods of gold and silver, brass, iron, wood and stone.

But we see in the 5th verse where the fingers of a man's hand were seen to write on the wall, and I believe that everyone knows just what was the interpretation of the writing, "Thou art weighed in the balances, and art found wanting." Truly that wicked king shook and trembled when he realized that he had touched something in the house of God that he had no right to touch, and that God's judgment was quick and sure.

Have you ever as an individual stopped to figure out just how you weigh up in the sight of God? Can you stand before the true and living God and say that you have done your best for Him? Mothers, can you face God if you knew that you had failed to raise your children in the fear and admonition of the Lord? Could you fathers dare to defy God by not teaching your families to worship God? Truly it is the parents responsibility to train the children in the ways of God, but we see many parents who are reading the handwriting on the wall. Not only the parents are suffering, but the community and also the church.

Are we setting the example for our children to follow by loving our neighbor, taking care of the widow and the fatherless, pointing some poor lost sinner to Jesus, and teaching them to respect God's house.

Dear friends, take stock of yourself, and see if you are found wanting in the sight of God. Remember, Jesus loves you, and he said "If you love me, keep my commandments," and the first commandment is to love God with all our hearts.

Rev. Violet Byers and the Family Altar.

Texas' Crippled Children To Get Added Benefits

Directors of the Texas Society for Crippled Children will meet in Dallas July 21 to lay plans for a greatly expanded program including the establishment in Dallas of a convalescent home, according to Dr. Sam Whatley, Commerce, president of the Society. The proposed home is to be in the vicinity of the new Southwestern Medical Foundation.

New Texas legislation providing special educational services for Texas' thousands of exceptional children has released the full facilities and resources of the Texas Society for Crippled Children to the locating, procuring of medical treatment and rehabilitation of the handicapped child, Dr. Whatley pointed out. The recently passed bill, drafted and sponsored by the Society, is the result of long range planning by which the Society has enlarged the educational services of Texas to provide for less fortunate children who previously had little or no opportunity for education.

"Although several chapters of the Society have provided special classes and schools for handicapped children, the prime work of the Society has been in aiding children in need of medical attention and rehabilitation," Dr. Whatley said. "With classrooms under State supervision, the work of the Society will be multiplied

in locating and preparing these children so that they will be able to take advantage of this new opportunity."

The bill, as drafted by the Society and passed by the 49th Legislature, provides that any child of educable mind, six to 17 years of age, whose physical handicaps are such that he can not be educated in regular school classes, be furnished transportation and education in special classes. Classes may be established in any community where there are five or more of these exceptional children. In districts where there is not a sufficient number for the organization of a special class, exceptional children may be transferred to a district where the special services are provided.

If the earth did not rotate on its axis the sun would rise and set but once during the year.

The windiest point in the U. S. is on top of Mt. Washington in New Hampshire.

Due to the resistance of air it takes about 19 seconds for a bomb to reach the earth when dropped from an airplane a mile high.

Provide Land With Nitrogen Regularly

Corn Yield Will Be Materially Increased

WHILE farmers can establish a "soil nitrogen bank account," it is necessary that they manage the land on the basis of small nitrogen deposits made regularly for withdrawals in the immediate future, rather than on large deposits designed to build huge reserves for use over long periods of time, according to F. C. Bauer, professor of soil fertility of the University of Illinois.

Professor Bauer declared that experiments indicated that nitrogen—one of the most essential plant food elements—cannot be amassed in large reserves in the soil for use during succeeding years of crop production.

Nitrogen supplies necessary to secure attainable yields may be restored to the soil previous to growing crops which have large nitrogen requirements, he added. Crop rotations must be planned so as to provide legumes for transferring atmospheric nitrogen to the soil either directly or through livestock feeding and the use of manure. Such rotations do much to maintain nitrogen supplies of the soil, if desirable legumes are seeded on the same field once every four or five years, he pointed out.

Professor Bauer cited results at the Aledo Soil experiment field in Mercer county. Here, during the

The largest motor in the world is 44 feet long, 16 feet wide, and 13 feet high. It has sufficient power to life a four-stack destroyer weighing 1,350 tons, at the rate of 200 feet a minute.

Clocks were advanced one hour from standard time to war time, on February 9, 1942, by Act of Congress.

The average person will drink 90 bottles of soft drinks per year.

Although the United States has used standard time since 1883, no legislative action for the country as a whole was recorded until March 19, 1918.

A rainfall of one inch over an acre of ground means a down-pour of 27,143 gallons of water, or 663 barrels of 45 gallons each.

A pelican will eat about ten pounds of fish daily.

last 34 years, untreated land has averaged 58 bushels of corn in a four-year rotation, consisting chiefly of corn the first two years followed by oats and wheat in the absence of legume crops. The quality and durability of the soil is evident in the yield of 61 bushels obtained during the past four years. But when sweet clover was seeded in the wheat and plowed under as green manure, the long-time average yield of corn increased from 58 to 78 bushels and from 61 to 102 bushels an acre during the past four years. Bauer attributes the increases in yield to the favorable influence of sweet clover on the nitrogen supplying power of the soil.

Postwar Highway Act To Benefit Farmers

The federal aid highway act, recently approved by the President, provides half a billion dollars a year for the first three postwar years, an equal amount to be matched by the states.

The act provides for principal traffic arteries into and around the chief metropolitan areas, cities and industrial area, according to Charles

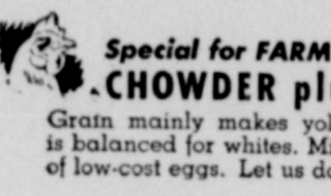

M. Upham, director of the American Road Builders association. It further provides for principal secondary and feeder roads, including farm-to-market roads, rural free delivery and school bus lines, either inside or outside municipalities of less than 5,000 population.

Plans will not await the end of the war. Routes will be determined, right-of-way purchased and a comprehensive plan drawn up in the near future.

New Lima Developed

Forkhook 242, a new bush lima, has been developed by researchers of the U. S. department of agriculture, and it is expected to aid in production of limas during 1945.

Last year, for all locations, the average for Forkhook 242 was 8,037 pounds per acre, a 37 per cent increase over the regular Forkhook yield of 5,852 pounds and 28 per cent more than concentrated Fordhook's 6,395 pounds. It has been selected for six years.

IT'S GREAT TO GET BACK FROM NATURE

POISON IVY, mosquitoes, ants, sunburn, rain—

Roughing it on a camping trip is great stuff. For a week or so. Then you begin to long for the comforts of home.

A good light to read by... a hot shower... your electric razor... an electric range... and, of course, your radio.

It's surprising the number of every-day conveniences made possible by electricity. You take them for granted—until you have to get along without 'em.

The big reason why you forget 'em is because electric service is so good and cheap. Electricity is still available at low pre-war prices. There have been no shortages.

And you can be sure there will be plenty of power for the post-war electric era—thanks to the practical experience and sound business management of America's light and power companies.
