Card of Thanks

Sudden illness and distress in a person's life can be a time that produces a response from his friends and neighbors that is quite overwhelming. Such was my situation that began Sunday morning, January 26th. The immediate and massive outpouring of prayers and love for me and Brenda was super-typical of how so many of you have responded to needs of others in the past, and this time it happened to me, in my distress. I am convinced that I received a miracle of healing because of your prayers to the Father in my behalf. Thank you for your prayers for me, and for every way that you reached out to us, to help us, to comfort us, to be there for us. The ambulance and medical care I was provided was great! Thank you all. We love you more than words can express.

METER TAMPERING NOW A FELONY

The State of Texas has recently adopted an amendment to the State Penal Code making meter tampering a third degree felony. A third degree felony comes with a punishment of confinement in the Texas Department of Corrections for a term of not more than 10 or less than 2 years. In addition to imprisonment, an individual adjudged guilty of a third degree felony may be punished by a fine not to exceed \$5,000.

Before the amendment of the new law, it was a class A misdemeanor for meter tampering unless the loss of service was more than \$200. Under the new law, any meter tampering regardless of the

amount of loss is now a felony of the third degree. Meter tampering consists of, but is not limited to:

(1) Diverting electricity from passing through a meter device.

(2) Preventing electric service from being correctly registered by a meter device.

(3) Unauthorized activation of electric service.

As a special note to our members, it will also be considered meter tampering if a meter is reset and electrical service is restored by anyone other than a Cooperative employee. All Cooperative meters are sealed. This seal should not be cut or broken without special autho-

rization. In cases where the seal must be cut for emergencies, the Cooperative should be notified

as soon as possible so that the meter can be resealed.
