

New Head of District and County Attorneys Association Says His Group To Take Up Redistricting

LONGVIEW, Texas, — (Special) — What redistricting, if any, is needed by Texas, and how best to effect it will be the first order of business of the District and County Attorneys Association of Texas, Fred Erisman, new association president, announced here today.

Erisman, serving his third term as district attorney of Gregg County, said his organization will make a thorough survey of the redistricting situation, which already is under study by a legislative committee, and will make its findings the basis for a constructive program to be announced as soon as completed. The prosecuting attorneys, he added, will cooperate fully with the District Judges Association of Texas, and the legislative committee headed by Rep. C. M. McFarland of Wichita Falls, former county judge.

The district and county attorneys also will work with the provost marshals, adjutant general's department and other military authorities for the duration, Erisman pledged.

Erisman, a dark-horse candidate elected at the annual meeting of his organization at Houston following the State Bar convention there, was born in Fort Worth nearly 35 years ago, attended public school there and at Greenville, was graduated from Texas Christian University in 1929 and afterward attended Brown University at Providence, R. I., where he was awarded a fellowship in government and economics at Duke University, Durham, N. C.

Fate decreed Erisman was not going to Duke, however. While riding horseback in a Fort Worth park he was thrown and suffered a skull fracture. While convalescing he studied law and was admitted to the bar in April, 1931. He was assistant district attorney here in 1932 and 1934, and special attorney for Gregg County in highway condemnation proceedings in 1935-36. He was then named city attorney of

Heads Prosecutors

FRED ERISMAN

Longview, serving in 1937-38. Since 1939 he has served as criminal district attorney here. He was admitted to practice before the Supreme Court of the United States in November, 1941, on nomination of Senator Tom Connally.

The new association president has been state vice president of the Junior Chamber of Commerce, winning the title of "outstanding vice president" in 1940, when he visited practically every junior chamber in Texas. He is a past chancellor-commander, Knights of Pythias, past commander, Knights Templar, member of Moslah Temple, Fort Worth, and at Brown University was a member of Alpha Tau Omega.

Late Feed Will Prevent Famine

HOW TO AVOID FAMINE
By R. O. Dunkle, County Agent

Right now... Texas has the largest cattle population in its history. And while a lot of beef is moving to markets now, there'll still be a big number to feed through the winter and into the spring of 1944. Frankly, the situation is going to be tight. And the feed shortage could get disastrous.

Because of this possible shortage and high feed prices, R. O. Dunkle is urging every farmer or stockman who has the land and the moisture to plant a late feed crop. Barring tough weather... the farmer's perpetual gamble... he'll come out on top any way you figure it.

If you're a farmer you had better plant your feed by August 1st, and it'll mature enough to make hay, bundle feed or silage. Hegari, blackhull, and schreck kafir will do the trick. So will darsa and red top cane. Others may prefer soybeans or cowpeas.

If you don't have the machinery or the labor to harvest these crops as hay or silage, you can leave them in the field and let the cattle graze these crops all winter. At present prices of feed, beef, and milk, this late feed ought to be worth from \$10 to \$20, because the cows would be doing the work.

Livestock experts point out these crops fed as hay, bundle feed or silage will furnish carbohydrates principally. The smart stockman will plant wheat, oats or barley for winter grazing to help meet the need for protein.

Robinson Gets Silver Wings

RANDOLPH FIELD, Texas—John Q. Public today received fiscal 1944's first return on his war bond purchases from the eleven advanced flying schools of the sprawling Gulf Coast Training Center as thousands of July graduates pinned on their newly-won silver wings and turned thoughts to the aerial battlefronts of global conflict.

Functioning with the clocklike precision which each four and one-half weeks produces enough fighting pilots to devastate many a Nazi munitions center or to obliterate a score or so of Japanese jungle airdromes, the Gulf Coast Training Center already is concentrating on adding the ultimate refinements to the flying skills of another class which will be graduated in August.

Today's consolidated graduation ceremonies transpire at Frederick and Altus flying fields in Oklahoma and at Aloe, Brooks, Ellington, Pampa, Lubbock, Eagle Pass, Blackland, Moore and Forter fields all in Texas.

Among the graduates was William E. Robinson, Jr., son of Mr. and Mrs. W. E. Robinson of Goree, who graduates from Brooks Field.

Activities Of Colored People

The pastor of the Church of God in Christ, Eld. L. L. Tyler of Stamford, was here at his post last Sunday, and services were held until Tuesday night.

The pastor of West Beulah Baptist church preached on Monday night at his church. He was on his way to Fort Worth, where their convention convened, and he told his people here to be obedient to God.

Mrs. Dalby Arledge of Amarillo spent the week end here with her sister, Aline Ross, and was also a guest in the home of Aline Johnson. Refreshments were served.

Willie Moore and Donnell Nappers spent the week end with their family and friends. They are now in a camp in Georgia.

Hico, Texas, for a short visit. Mr. Doyle is making his home here with his sister, Mrs. A. J. Smith.

Mrs. W. E. Robinson and daughters of Goree wear business visitors here last Tuesday.

Olie Ilse and son of Gilliland were business visitors in town Tuesday.

Mrs. Erin McGraw and daughter, Miss Evelyn, returned home last Friday from their vacation trip. They visited in Frederick, Okla., Fort Worth, Dallas and other points during their two weeks trip.

Mr. and Mrs. John Rice visited with relatives and friends in Palo Pinto over the week end.

Mr. and Mrs. J. A. Caughran left Wednesday morning for Clovis, New Mexico, where they are looking after business interests. Mr. Caughran owns a farm in that vicinity.

WHY WE MUST CONSERVE GASOLINE

Back of the whole gasoline conservation program is the basic principle that we must more and more conserve so that our fighting men and Allies may get all they need. Oil and gas constitute the very life blood of a mechanized war machine. It should be remembered that:

We are now supplying enormous amounts of petroleum products to our fighting forces in Africa.

We are stocking England and dozens of naval and military bases all over the world.

Training planes use 50 gallons of 100-octane gasoline an hour.

To train one pilot requires 250 hours in the air and 12,500 gallons of gasoline.

When flying in combat, Army planes use 100 gallons of gasoline per hour per engine.

A Flying Fortress uses 400 gallons of 100-octane gasoline per hour.

It is estimated that a modern destroyer uses more than 3,000 gallons of oil an hour.

To meet the emergency gasoline situation, motorists in the East have been ordered to cut all trips that are not absolutely necessary. OPA enforcement officials have been ordered to proceed with vigor to detect violators and to suspend rations.

Governors of the twelve states have been appealed to for cooperation of state and local police to:

1. Stop and question all motorists driving under circumstances which indicate a violation of the ban.
2. Question all motorists stopped for traffic violations to see if they are violating the ban.
3. Check on motorists found at race-tracks, amusement parks, beaches and other places which give prima facie evidence of violation.

Our Re-Caps Look Swell, and Last Well, Too!

You can't ask for a better looking job than you get when you have your tires recapped by our All-Steam method. Treads seal smoothly down to the tire shoulders.

Our High Speed Tread gives you greater service, too. This is a beautiful tread that is designed to give you extra miles.

We also do tire repairing. Let us check your tires, then repair or recap them before it's too late.

I GIVE YOU TEXAS

by BOYCE HOUSE

Hibiscus flaunts its big, crimson blossoms down in the Lower Rio Grande Valley and bougainvillea's light purple is all around. Thousands and thousands of orange and grapefruit trees line the highway and, in season, are radiant in blossoms and fruit. Then there are olive trees and lemon trees as well as palm trees of contrasting kinds—one a chunky "explosion" of dense green leaves, the other a slim and graceful trunk crowned with foliage.

Then there are mocking-birds and butterflies, the Gulf of Mexico and the Rio Grande with a "foreign land only a step away."

With this tropical wonderland of beauty, perfume and song in Texas nevertheless it is estimated that only a million out of our 6,500,000 inhabitants have ever visited the region. It is probable that more of the inhabitants of the upper half of the State have viewed much more distant but less charming

Southern California.

This should not be. Texans should see their own Magic Valley at their first opportunity.

Jim Grisham, Dallas attorney who used to practice law in West Texas, has a droll sort of wit. One day, a young lawyer of the oil boom town who had very little experience, met Grisham and exclaimed, "I've just been paid a thousand-dollar fee to represent a man accused of murder. If you were me, what would you do?" Grisham solemnly answered, "I would use part of the fee to hire me a good lawyer." Afterward, he related, "You know that fellow walked away, downright mad. I never could figure out why."

There once was a man from Nantucket

Who kept all his cash in a bucket; But his daughter, named Nan, Eloped with a man

And, as for the bucket, Nantucket—

Father followed the pair to Pawtucket—

The groom and the bride and the bucket;

And he said to the man

And was welcome to Nan

But as for the bucket, Pawtucket.

A favorite bit of philosophy: "No gentleman will offend me; no other can.

REAL MAN—This photo of Lt. Gen. George S. Patton, Jr., affectionately known as "Old Blood and Guts," shows the iron will which led him, while commanding the U. S. Seventh Army invading Sicily, to jump from a landing barge and wade ashore to personally command bitter fighting against German tank units opposing the landing.

SEND-OFF—Pretty Ann MacDonaid, atop a newly assembled tank, prepares to present it with an American flag, a send-off given every tank, armored car and tank destroyer leaving the Richmond, Calif. tank arsenal.

TOMORROW'S KITCHEN will be transformed into a playroom when meals are not in preparation, according to the above conception, designed by Libbey-Owens-Ford Glass Company "to cooperate with manufacturers and designers and help point way toward building a better post-war world." The model has been erected in Toledo, where it is to be displayed indefinitely.

Employee Recreation A Big Factor In Industry's Production Plants

NEW YORK (IPS)—The war has made a serious business of "having fun." Just how serious, is shown by the fact that two hundred men engaged in the business of helping America's industrial workers have fun on their time off, have settled down here for two days to exchange notes on how best to carry on their jobs. These men are members of the Industrial Recreation Association

who are now considering in addition to their precious chores, the ramifications of including women in their programs.

At the meetings one learns that recreation is a big thing in the nation's important industrial centers. Management was the first to realize and act upon the definite need for entertainment of workers who are putting in long hours, have less time for fun, and face overcrowding in the ordinary places of amusement.

One of the chief aims of group recreation programs in a plant, aside from the entertainment value is to get employees together and get them to know and like each other. This is especially true of the white-collar and plant staffs in most industries, which rarely have very much contact with each other in the course of their ordinary work.

Informality the Keynote

One Tennessee company has what it calls a "hillbilly program" run by a director who formerly was an accountant and was drafted for recreational leadership at the plant. His programs are entirely informal—folk dance parties, indoor games, etc.

A Detroit firm stresses bowling and softball with the same idea of getting all types and classes of employees to pitch in together, have a good time, and get to know and like each other.

Bowling is especially useful in helping new workers get acquainted. Employees can bring their wives. A Cincinnati company which also goes in for bowling in a big way was also able to run a golf tournament for 20 employees.

Lunch hour is the period in which a Dayton corporation schedules most of its extensive recreational programs. In an auditorium which will hold 2,000 persons, full-length feature movies are shown as serials in 35-minute sessions daily.

A California aircraft firm lets its employees run their own activities through a club which offers as complete recreational coverage as any in the country.

Recreational directors come from varied backgrounds. Some are big name athletes, while many are old employees well-known and well-liked around the plants.

B. M. Haymes of O'Donnell and Mrs. Otis Hardin of Levelland spent last week end here with their brother, Lee Haymes, and with other relatives.

Miss Louise Spigilmier, a student in McMurry College in Abilene, visited with Miss Flora Allice Haymes over the week end.

Miss Mary Jo Burroughs of Odessa visited in the home of Mr. and Mrs. J. O. Bowden over the week end.

Soldier Urges More Letters To Men Overseas

In a letter to the Munday Times Pfc. Rex F. Allen, who is in foreign service, urges relatives and friends at home to write more letters to the men overseas. He also expresses appreciation of having received his home paper. The letter follows:

July 15, 1943.

Dear Editor:

I thought I would write you and let you know I have been receiving my home town paper for sometime now, and it is certainly a wonderful help. I can keep up with the home town news a lot better now, than I used to. Since I left nearly two years ago, things have changed a lot, people have moved away, and of course many of the boys have gone to the army in the last two years. These things I would have never known if it hadn't of been for your paper. I can't tell where I am, but that doesn't make any difference, just so I can keep on getting the paper.

Another thing is, I learn where some of the boys are stationed, and that information might help me locate them. I know for certain that Ray Moore is pretty close to me, but I haven't seen him yet.

Mail is the most important thing, when you have been overseas a long time, like I have. So if any of you people have boys away from home write to them real often, and I would like for all my friends to write me.

Sincerely Yours,
Pfc. Rex A. Allen ASN 18109732

Concrete For Grain Storage

Concrete floors in grain storage structures have the advantage of being rat proof and of providing a plentiful substitute for scarce building materials.

According to R. O. Dunkle, county agent, concrete simplifies construction, solves the heavy load problem in grain storage, and makes it possible to keep the whole building lower since wooden floors for permanence should be at least two feet above the ground.

Many farmers have hesitated to use concrete flooring in a grain bin or crib on account of the danger of it becoming damp and causing grain spoilage. Dunkle recognizes reason for such fear, because if the floor touches water or damp soil the top will be damp. In most locations, he explains, there is no difficulty in building a concrete floor which will remain dry. The essential factors in constructing a dry floor of concrete are to build it so that the underside will be at least four or five inches above the surrounding ground and place a layer of gravel or crushed rock at least four or five inches thick beneath the concrete. Moisture from the soil will

not move up through gravel crushed rock, or similar material as it will through soil.

Dunkle cautions, however, that in a few locations water may rise and come in contact with the concrete. In such cases some method of waterproofing the floor would be needed.

If desired, concrete floors may be built high above the ground by using higher concrete foundation walls and a dirt fill.

Mr. and Mrs. Tom Martiz of Fort Worth, former residents, were here for the funeral of J. R. Nelson.

Mr. and Mrs. E. D. Herman have just returned from Saline, Texas, where they visited Mr. and Mrs. Pete Aschan for several days.

Over 2,000 Hogs Bought Monthly

Ratliff Bros., operators of the Munday Livestock Commission Co., reported Wednesday that over 2,000 hogs have been purchased by this firm each month for the past three months. These were sent to the packers to be processed into bacon, hams, and other things you get from a hog.

During July the operators reported they purchased 2,118 head of hogs.

And bacon is pretty hard to get here in Munday—even with the necessary ration points!

The hogs purchased were exclusive of those sold in the auction ring each Tuesday. The operators reported another big run of cattle and hogs for last Tuesday's sale.

Canner and cutter cows sold from \$4 to \$7.50; butcher cows, \$8 to \$9.50; beef cows, \$10 to \$11.25; butcher bulls, \$7.50 to \$9; beef bulls, \$9.50 to \$11.50; butcher yearlings, \$8.50 to \$10.50; fat yearlings, \$11 to \$13.50; rannie calves, \$7 to \$8.50; butcher calves, \$9 to \$10.50, and fat calves, \$11 to \$13.50.

Chickens, Hogs Die From Heat

Tuesday's heat wave, said to be the hottest in Munday since 1918, was a scorcher that caused damage as well as suffering.

A number of farmers reported the loss of chickens and hogs from the extreme heat. Some said they lost as many as 20 chickens during the day, and numerous farmers reported the loss of from one to two hogs.

Threatening rains on Wednesday gave some hope for relief from the heat wave, although very few places reported any rain.

Farmers in the Thorp community reported rain Wednesday evening. Although spotted, the precipitation ranged to better than an inch on some farms. Scattered hail fell along with the rain.

Mrs. G. W. Vernon Dies Wednesday

Word was received here Wednesday that Mrs. G. W. Vernon passed away at the family home in Rule shortly after midnight Tuesday night.

Mr. and Mrs. Vernon were residents of this county for many years, moving to Rule about a year ago. Mrs. Vernon had been in poor health for a number of months, and was moved by ambulance from Knox county to her new home.

The Vernons have many friends in this area who extend sympathy to the family in their bereavement. Funeral services were held on Wednesday afternoon, with burial in the Rule cemetery.

IN BASIC TRAINING

Mrs. Jerry Kane and little daughter, who have been with Jerry in Fort Stockton, came in last week for a visit with Mrs. Kane's parents, Mr. and Mrs. P. V. Williams. Jerry has been transferred to Goodfellow Field, San Antonio, where he entered his basic training in the air corps.

Weather Report

Weather report for the period of July 29th to August 4th inclusive, as recorded and compiled by H. P. Hill, Munday U. S. Cooperative Weather Observer:

	Temperature	
	LOW	HIGH
July 29th	65	91
July 30th	72	99
July 31st	72	101
August 1	71	102
August 2	79	108
August 3	80	116
August 4	75	109

Rainfall to date this year 9.60 inches; rainfall to this date last year 13.98 inches.

News From Goree

E. W. Blankenship left last Friday for Dallas, where he entered a hospital for treatment for an injured arm. The injury was sustained six months ago.

Dr. and Mrs. W. M. Taylor left last Friday in response to a call from Beaumont, stating that Mrs. Jewel Madole had undergone surgery in a hospital there and was very sick. They went by way of Austin, and Jewel Madole, Jr., went on with them from that city to attend the bedside of his mother.

Odis M. Roper Is Made Lieutenant

Aviation Cadet Odis M. Roper, son of Mr. and Mrs. Elmer K. Roper of Benjamin, was graduated from the A. A. F. Pilot School at Ft. Sumner, N. M., last week as a second lieutenant, and he is now wearing the silver wings of a flying officer.

Lieut. Roper was a member of Class 43-G, which was the first class of cadets to be graduated from the Ft. Sumner advanced 2-engine school.

If Hitler wins, the issue for you will be living itself and not just the cost of living. Think that over and figure it out for yourself how much beyond 10 percent of your family income you should put into War Bonds every payday.

Christmas Cards and Packages To Men Overseas Must Be Sent Between Sept. 15 and Oct. 15

Christmas cards and parcels for army men overseas must be mailed between September 15 and October 15, and the sooner the better. Postmaster Lee Haymes announced this week. Parcels and cards for men in the navy may be mailed as late as November 1.

No requests from the addressees are required in connection with Christmas parcels mailed in this period only. Patrons are encouraged to label each parcel "Christmas parcel."

Christmas parcels should not exceed the present weight of five pounds, or 15 inches in length or 36 inches in girth and length combined. Patrons are advised not to send food or clothing, as these are supplied men in the service. Attention is called to the fact that more than one parcel per week will not be accepted when sent to the same addressee on behalf of the same concern or person.

Owing to distance of transport, all packages should be in metal, wood, solid fiberboard, strong double-faced corrugated fiberboard or strong fully telescoped cardboard boxes. The boxes should be securely wrapped in strong paper

and tied with twine. As censorship is probable, delay in handling can be avoided by securing the covering so as to provide ready inspection of contents.

Remember, the mailing period is from September 15 to October 15.

Delmar Cadwell Is Navy Bluejacket

Acquiring the experience and knowledge necessary to enable him to fulfill a job as a Naval electrician is Delmar Cadwell, 19, son of Mr. and Mrs. James Paul Cadwell, Box 415, Munday, Texas, who is attending the Naval Training School for electricians at Iowa State college, Ames, Ia. He will be stationed there for 16 weeks. Upon graduation he will be eligible for promotion to a petty officer rating and be assigned to duty with the fleet or at a shore station.

Laboratory work is stressed in the course which includes instruction in mathematics, electrical theory, and wiring. A laboratory is maintained fully equipped with modern machines and control apparatus to give each man experience in handling this equipment and to instruct him in its maintenance and operation.

The Bluejacket earned selection to the school on the basis of scores he made in a series of aptitude tests taken during recruit training.

We Specialize In Efficient Car Service!

"The Magnolia Way" is the ideal way to have your car cared for. We specialize in expert washing and Mobil-lubrication, giving attention to those parts which, if gone unnoticed, will give you trouble.

Mobilgas and Mobiloils can always be depended on for safe and satisfactory performance. Let our service station look after your car "The Magnolia Way."

Our Tire Shop . . .

Continues to serve a vital need for motorists of this area. Here you can get efficient tire repairing and recapping, giving longer life to those old tires which must last you for the duration.

Bring us your car tires for recapping and repairing. We also specialize in repairing all sizes of tractor tires.

O. K. RUBBER WELDERS

Don L. Ratliff, Owner
Magnolia Service Station

Do you know a fellow like Joe?

JOE'S my kid brother. We've always stuck together and I've sort of watched out for him these last few years.

Well, Joe's in Africa now. His wife gets her allotment from him, and I guess when that's taken out of his check he doesn't have much left. Privates don't get paid much you know.

I figure this way. Here I am, making more money than I ever did before. You bet I work for it! I work hard. But Joe's working hard too . . . and not just from 7 to 5, either.

We've been taking 10 percent out of my check every week for War Bonds . . . they're going to come in mighty handy when the War's over, we figure. But I got to thinking about Joe. What's he going to have after the War?

So we talked it over, my wife and I. We think Joe should get a cut of the bigger money, too. So now I'm buying an extra bond every month—in Joe's name.

Maybe you've got somebody in the War, too. If you have, couldn't you squeeze out an extra bond now and then, for your "Joe"?

YOU'VE DONE YOUR BIT --- NOW DO YOUR BEST!

AUTHORIZED Flexform Shaping Service For Ladies Dresses

Yes, ladies, your garments brought to us for cleaning are "Flexformed," a new, entirely different way of assuring perfect fit.

You can know ahead of time that the waist-line will fall to the right place, the bust and hip measurements will be the same as before cleaning, and the skirt will be the right length and hang beautifully.

Our "Flexform" machine, which we have just installed, is interesting to see in operation, and we'll be glad to show it to you.

Even badly shrunk, dyed dresses can usually be perfectly restored to shape, and misfits can easily be reshaped to fit with this machine.

To preserve the fit and appearance of your favorite frock, whenever it needs cleaning, send it to . . .
