Volume XXIV.

Munday, Knox County, Texas, August 2, 1928

Number 18

Elliott Elected Sheriff; Patterson And Lee Re-elected; Glover And West To Run-Off; Osborne Is Given Majority

In Saturday's primary election Oliver W. Lee was re-elected county judge over N. S. Kilgore by a majority of 352 votes, according to unofficial returns gathered from over the county, and J. C. Patterson was re-elected district clerk over G. M. Bryan by a majority of 1078, while C. R. Elliott was elected sheriff over the present incumbent, J. W. Melton, by a majority of 223 votes. In the three-cornered race for county clerk Thos. F. Glover lead the ticket, with Thos. M. West second, and these two candidates will enter the August run-off.

In the commissioner's race in this precinct D. C. Osborne was re-elected by a majority of 58 votes over his two opponents, W. R. Condor and Walter Harris, their vote on the four voting precincts being as follows:

W.R.C.	D.C.O.	W.H.	
Munday	73	274	294
Goree	57	137	22
Rhineland	9	39	79
Hefner	26	71	13
Total	165	521	318

Election day in Munday was little different from the ordinary Saturday. There were large numbers of people in the city throughout the day, and the returns from the election were posted on a large bulletin board during the evening and large crowds gathered around the board. The first reports began coming in at 7:30 and continued to come until midnight.

Nix Is Defeated
Commissioner M. G. Nix of Precinct No. 1—Knox City and Gillespie—was defeated by W. H. Griffith by a majority of about 50 votes, and in the race for Public Weigher in the Knox City precinct Quincey C. Davis maintained a substantial lead over his nearest opponent, W. T. Freeman. The totals in this race are as follows:

G.A.	Lloyd	74
A.P.	Oliver	47
Lovce	C. Teague	97
Quincey	C. Davis	226
W.T.	Freeman	152
J.R.	Bradberry	21

Glenn and Bonds
In the race for Commissioner, Precinct No. 2, including Benjamin, Vera and Brock, W. C. Glenn and J. A. Bonds will go into the run-off in August.

Combust Leads Ticket
While a complete tabulated report on the District Attorney's race for Knox county is not available, it is evident that Combust lead the ticket in the county with J. Donnell Dickson running second, however, unofficial reports are to the effect that Combust and Dresser are to go into the run-off.

Heavy Docket Will Be Disposed of At August Term Court

A heavy criminal and civil docket will face the District Court at the opening of the August term, which convenes in Benjamin on August 13th. Among the cases that will be called at this term is a murder case transferred from Motley county, in which two men are charged with a constable.

The grand jury that has been chosen for the term is as follows: J. A. Wilson, Knox City; Jake Welch, Vera; G. W. Weber, Goree; F. N. Warren, Munday; E. E. Tremble, Goree; W. J. Tidwell, Goree; W. J. Swain, Goree; O. G. Shaw, Gililand; M. H. Reeves, Munday; W. O. Solomon, Truscott; H. B. Qualls, Benjamin; Chas. Moorhouse, Benjamin; W. R. Moore, Vera; R. V. Burton, Knox City; D. A. Eiland, Munday and S. M. Clonts, Knox City.

Petit jurors chosen for the second week of District Court are as follows: J. L. Nelson, Vera; J. P. Hollabough, Vera; L. B. J. Propps, Gililand; J. H. Johnson, Vera; Bryan Lowry, Gililand; S. D. Moore, Benjamin; Elmer Goodrich, Benjamin; R. L. Lambert, Goree; W. M. Myers, Munday; E. E. Nix, Munday; C. H. Harrell, Munday; C. M. Meyers, Truscott; I. E. Loving, Goree; Joda Perdue, Goree; Jim Reeves, Munday; C. L. Patton; Arnold Haskins; T. J. Peek, Goree; A. T. Brumley, Gililand; D. B. Pitts; J. D. Cook, Gililand; Fred McGuire; J. M. Cash, Truscott; J. H. Jones, Munday; E. W. Harrison, Knox City; J. P. Jones, Knox City; C. H. Burnett, Benjamin; Joe Decker, Munday; Fritz Zimmer, Munday; L. M. Williams, Benjamin; Eugene Milam, Munday; R. E. Wiggins, Benjamin; J. M. Walker, Vera; J. M. Humphries, Knox City; W. T. Waldrip, Knox City; E. C. Campsey, Knox City.

Petit jurors chosen for the third week, and summoned to appear on August 27th, are as follows: E. A. Thompson, Vera; E. G. Parkhill, Knox City; T. M. Hurd, Vera; B. R. Holder, Goree; J. P. Jones, Knox City; E. F. Branton, Knox City; W. A. Smith, Munday; P. C. Phillips, Munday; T. M. Busby, Munday; G. W. Myers, Truscott; A. M. Armstrong, Knox City; H. B. Howell, Knox City; L. P. Jones, Goree; M. E. Dovel, Goree; Burt Justice, Goree; Chas. Good, Goree; Ben

Will Lecture Here On The Holy Land

Evangelist C. R. Nickels of Clifton, Texas, will deliver a lecture at the community auditorium on Friday evening, August 17th under auspices of Church of Christ on the Holy Land, and his talk will be made from personal observation.

On Saturday, August 18th he will lecture on Evolution, and on the Lord's day following at 11:00 a. m. will begin a series of bible lessons pertaining to life and Godliness, embodying the facts, commandments and promises contained in God's word.

He is a very scholarly christian gentleman and you will be pleased to hear him, and we insist that you hear him from first to last.

B. Hunt, Goree; Mike Phillips, Munday; Mart Hardin, Munday; E. Q. Warren, Knox City; Henry White, Knox City; J. R. Withrow, Truscott; Olen Beach, Vera; Robert Burg, Truscott; E. L. Blach, Truscott; John Blair, Gililand; J. A. Bonds, Benjamin; J. O. Cure, Gililand; T. H. Cunningham, Truscott; C. C. Bradshaw, Gililand; R. S. Brannin, Benjamin; L. E. Brown, Benjamin; E. A. Burgess, Gililand; E. E. Caddell, Truscott; T. L. Cannon, Goree; Lewis Cartwright, Goree.

Following is a list of the petit jurors that have been summoned to appear for the fourth week, September 3rd: S. H. Bohannon, Knox City; Chester Bowden, Munday; C. M. Campbell, Munday; W. H. Bray, Munday; M. A. Bratcher, Vera; Harold Burton, Knox City; H. L. Butler, Goree; A. E. Camp, Goree; J. O. Capehart, Vera; J. C. Gray, Vera; N. L. Norman, Vera; J. P. Hester, W. H. Simmons, Knox City; W. M. Griffith, Knox City; Mike Perry, Knox City; E. O. Chandler, Gililand; E. E. Propps, Knox City; Eb Coffman, Goree; John C. McGaughey, Gililand; V. McMurry, Vera; F. O. Campbell, Munday; J. F. Moore, Vera; J. M. Howard, Goree; E. P. Norris, Goree; J. M. Kee, Goree; R. L. Tidwell, Knox City; J. W. Tidwell, Goree; C. B. Tiffce, Benjamin; S. O. Turner, Truscott; W. R. Couch, Goree; H. L. Waldrum, Gililand; T. M. Westbrook, Truscott; Claude Hill, Knox City; H. H. Williams, Gililand; B. B. Lee, Knox City; J. C. Spann, Munday.

Methodist Revival Came to Close On Sunday Evening
The Methodist revival, which has been conducted under the leadership of the Flowers party came to a close on Sunday evening, and resulted in a number of conversions and reclamations and the spiritual uplifting of the community to no small degree.

The Flowers party made many staunch friends while in our city, and their work won the admiration of all who heard their messages, for they preached the plain gospel and resorted to no sensational methods in attracting folks. Their work will be lasting and Munday is better for having had the Flowers party with us for the two weeks.

Many New Faces Will Be In Evidence At Opening of Schools

Many new faces will be in evidence at the opening of the next school term, September 10th, as a number of resignations have been tendered by former members of the faculty and other instructors have been elected to fill the vacancies caused by their resignations.

Among the teachers who will be missed from the faculty at the opening of the 1928-29 term in September will be Prof. and Mrs. H. V. Standley, who will go to Kirkland, where Mr. Standley has been elected superintendent. Miss Mary Langford will go to Albany as a member of the faculty of the schools there. Miss Naomi Bowden will go to Wichita Falls as a member of the faculty of the Wichita schools. Miss Mills will go to Rule as a member of the faculty there. We have not learned of the future plans of J. C. Elliott, who has tendered his resignation.

Cemetery Ass'n Is Bably In Need of Financial Assistance

A. U. Hathaway has asked that we send out another S. O. S. call for financial aid for the Munday cemetery association, as he states that the graves out there are growing up in weeds and there are no funds available to keep them down, in fact, he states that the cemetery funds are already overdrawn, and unless the work that is needed is done at once it will be far more expensive to do it later.

We are sure that those who have loved ones at rest will come to the aid of the association and assist in cleaning off and beautifying the cemetery. Usually all that is necessary is to call attention of the people to the need of these things and they respond readily, and we are sure that they will in this instance. Those wishing to contribute to this fund should mail their check to A. U. Hathaway at once, or if you reside here just hand it to him at the Tate Furniture Company.

New Hotel Opening To Be Celebrated At Truscott

Truscott will celebrate the opening of their new hotel with a free bargeeue and costume concert on the afternoon and evening of August 8, starting at four o'clock.

The Commercial Club, and citizens of Truscott and trade territory are sponsoring the celebration. It is their hope that people from joining counties, as well as the citizens of Knox county, will attend and help rejoice over their latest business achievement.

W. R. Moore has been in Ardmore and Dallas this week transacting business matters.

Woman Physician Is Newest Acquisition To Profession Here

Dr. Maudie M. Burns, physician and surgeon, arrived in Munday first of the week to be associated with her uncle, Dr. E. J. Burns, in the practice of her profession, and to her belongs the distinction of being the first woman to practice medicine in Munday.

Dr. Maudie M. Burns is a graduate of the medical department of the University of Texas, located at Galveston, and has served for the past year an intern in John Seley Hospital at Galveston, having resigned that position to come to Munday and become associated with Dr. Burns in the practice of medicine. She is a native of Austin, where her father is a general freight agent for the Southern Pacific lines. We are pleased to welcome her to Munday and are sure that she will find a hearty welcome awaiting her from our citizenship.

P. D. O'Brien Is In Good Meeting This Week At Weinert

The Rev. P. D. O'Brien is conducting a revival meeting for the Baptist church at Weinert this week and last week and reports are that there are excellent crowds in attendance and that the interest is growing with each and every service. Many Munday citizens have been going over each evening to hear the wonderful messages that are being delivered by the Rev. O'Brien, and already a number of conversions have been made.

J. C. Ewing is leading the singing for the meeting.

Munday High Gets Additional Credits

State Department of Education Gives Credits of General Science and 4th Year English

Two additional points of credit have been awarded the Munday High School on the merits of the work done during the last school term according to a statement given out by Superintendent J. E. Rhodes. The subjects upon which the additional credits were given are (1) General Science and (1) Fourth Year English. Mr. Rhodes expressed himself as being gratified at securing the credits of the Fourth Year English, as few schools of this size in the state have been able to procure affiliation on this subject, as the requirements are exacting in the extreme.

Mr. Rhodes also stated that additional credits would be secured at the next term of school, as two additional courses are to be added to the curriculum, home economics and type writing. The home economics classes will be cared for by the erection of a cottage on the school, as two additional courses is slated over the addition of this work, especially is he enthusiastic over the addition of home economics, for he believes that this course is more worth while than many others by reason of the fact of its general practicality.

CEMETERY WORKING TO BE HELD AT GILLESPIE ON WEDNESDAY, AUGUST 8

We are requested to announce that there will be a cemetery working at the Gillespie cemetery on Wednesday morning, August 8th, and everyone who is interested in the beautifying of this cemetery is urged to come early in order that the work may be done in the cool part of the morning.

Miss Mary Brown is visiting friends in Plainview this week.

Mr. Pendleton Gin Co. Equips Its Plants For Round Bales

Plants at Munday, Goree, Bomarton and Weinert, Will Handle Square & Round

In answer to a popular demand from farmers over the section of the country served by his plants, H. A. Pendleton announced on Monday that the work of installing round bale facilities in the plants of the Pendleton Gin Company at Munday, Goree, Bomarton and Weinert had been completed, and that each of the plants were in the best condition ever to begin the season's work, and Hap is optimistic over the crop outlook in this section.

In the installation of the round bale presses in these plants Mr. Pendleton pointed out that the only change that has been made is that the farmer has the choice of having his cotton put up in either square or round bale, and he points out that if there are really any advantages that accrue from having the fleecy staple put up in round bales he proposes that his patrons shall have the benefit of it.

In commenting upon the addition of the round bale facilities in his plants Mr. Pendleton said, "Personally, I have no preference as between the patrons having their cotton put up in either round or square, for we shall do custom ginning and the ginning is what we are after, and the only inducement we have to offer is the service we can render to our patrons."

"However," continued Mr. Pendleton, "I feel that the installation of the round bale system will mean much to the farmers whom we serve, for I know that there are a number of advantages that accrue to the farmer who has round bale facilities at his disposal, for this method of handling cotton has proven economical in the handling between the producer and the spinner, and this advantage will accrue to the producer who has his bale put up in the most economical form for such handling."

Mr. Pendleton stated that his company would maintain a buyer for round bale cotton at each of the plants, and where the farmers wished to have their cotton put up in this form they would not be required to handle the cotton in any way after it had been ginned, as they would take the cotton at the gin and issue check in payment for same at their gin offices. At each of the plants facilities will be available for storing about 200 bales, and this storage is available to the patrons of the various plants with assurance that it will be kept in good condition without exposure to the elements. Another advantage that will accrue to those who use the round bale facilities will be that when the cotton is baled a sample will be taken from which the staple will be graded and sold.

Mr. Pendleton does not make the contention that it will be to the advantage of the farmer to have his cotton baled in the round bale press at all times, but there are times when the advantage will be apparent, and Mr. Pendleton has provided the facilities for caring for the cotton in the manner that will be to the interest of his patrons. All cotton ginned at each of the plants will be ginned on the same stands and run through the same cleaning machine that is used in putting up square bales.

Summing it all up, Hap says that a round bale press just makes a good gin plant better, and his plants will be in position to serve the farmers in the communities in which they operate, and this is the big reason for the installation of

AT THORP CHURCH

The revival meeting starts Friday night, August 3rd. Let us work and pray that this will be a genuine revival of religion in the Thorp community. We hope that every Christian in the community is interested and will be active during the campaign.

A. G. HULME, Pastor.

Sunday School Lesson

PAUL IN A PAGAN COUNTRY

Acts 14: 8-20.
Rev. Samuel D. Price, D. D., Associate General Secretary of the World's Sunday School Association.

Mighty purpose to continue his ministry possessed Paul. He was not a quitter as John Mark had been at Perga. This young man might not have faced up to trouble as Paul and Barnabas did at Iconium. Being driven out of any town did not cause these missionaries to say: "We have reason enough now to hurry back to Antioch and safety." Rather, they went forward to Lystra and sought opportunities of telling the people who would listen about the long expected Messiah who had come.

The usual approach in the different cities was through the synagogue services but none appears to have been established at Lystra. Meetings were accordingly held in the open, wherever a group could be assembled. Among the listeners there was one who heard Paul's words with particular eagerness. He had been a cripple from birth and was amazed to hear that by spiritual power through One, called Jesus Christ, fullness of strength could come, and he would be just like others in ability to go about on his feet.

As he heard he began to believe. That faith manifested itself in a changed countenance, which when Paul noted, encouraged the preacher to command in His name. "Stand upright on thy feet." Instantly the cripple "leaped up and walked." Faith found its expression in obedience.

The throng standing about recognized that a wondrous miracle had been wrought in their very presence. The healed man was a well-known character, always to be seen in the market place as a beggar, because he was a life-long cripple. Whether always recognized or not there is a religious sense in each. The Lystrians had a pantheon of gods, such as are described in both Greek and Roman mythology. At once the people, aware of the superhuman event that had just taken place, shouted in their agreement that their gods were actually and actively in their midst in the persons of Paul and Barnabas. They called Barnabas Jupiter—their chief god—either because Barnabas was the better built man, for we know that Paul was inferior in appearance, or because Paul as spokesman could not be thought

of as the leading personage, so he was styled Mercury—the messenger.

Credit must be given to the local priests for their quick action in bringing garlands for decorations and oxen for a worth-while sacrifice to these visiting deities. Here was Paul's chance to stay a while in popular favor and then turn situation to advantage in carrying on his mission. Rather, he sought at once to assure the people that he and Barnabas were just plain humans, such as they were, and together they needed the help of this crucified and risen Nazarene. Indeed, the occasion was well used to proclaim the Gospel again.

Jealous Jews came from Antioch in Pisidia and Iconium, places from which Paul had recently been driven out—to stir up the Lystrians against these men to whom sacrifice had nearly been offered. A mob was soon incited to stone Paul, who was then dragged outside the city, by another miracle rose up in full strength. The city was quietly entered and the next morning both Paul and Barnabas went forward on their God-called mission.

A WORD OF APPRECIATION

Walter Henderson has requested that we extend to the voters of the precinct his sincere thanks for the vote accorded him in Saturday's primary. While not successful, he is nevertheless grateful for the support given him, and is glad to be able to emerge from the "battle of ballots" with good will toward all and malice toward none.

DR. FRANK CRANE SAYS

Water-Tight Compartments

Every once in a while we hear a man say, "Business is business," or that he follows "art for art's sake," or that he as a scientist cares only for the truth, not for its practical results, and so on.

Everything you do affects all parts of your nature. What you do in business reflects on your art, what you do in art colors your business, and what you think in religion has much to do with your scientific conclusions. Mankind is one, one organic whole, and its various departments of activity

have merely been listed for convenient reference. They do not exist in reality.

If your religion is ugly and cruel your business will be immoral.

If your business is heartless and vindictive your whole life will show it.

The scientist must pay some attention to the practical bearings of his investigations, for it would be foolish for him to spend his whole life on investigating some perfectly useless matter.

Business must be beautiful. Art in some way must rest upon a business basis.

A man cannot have his whole head submerged in literature, he must have sense enough to market his wares.

The beautiful works of art of past generations had their influence upon believers in religion and religion is what it is owing to a thousand other causes within itself.

Much recent art shows contempt for any but aesthetic values. Such art is transient, and will give place to a greater art, in which beauty of thought and expression will confer enlarged values.

The total of all values is what counts.

This result can be achieved not by preaching in art nor by making science "practical," but by universal education in values so that artist, business man, or scientist will express himself in synthesis of all values.

HINTS FOR THE HOME

When we read that, according to statistics, each family spending \$25 a year for soft drinks outside the home, we realize a very nice saving could be effected by serving these beverages from the home fountain.

Almost any pungent syrup from canned or preserved fruit can be used with a lemon or orange juice base to make wholesome fruit drinks. Malted milk powder added to cold cocoa and well shaken makes excellent chocolate malto' milk, and the cold cereal beverages can also be combined with cracked ice and milk to make a delicious summer drink.

Not one of the drinks suggested costs more than a few

cents to make at home—so in the interest of economy, let's try this scheme of being our own refectory and see if it isn't a success.

A Company Dish for Tea

Butter the bottom of individual glass baking cups and drop a tablespoon of canned crab meat in each; add a tablespoon of cream, dot with butter or margarine and break an egg on top. Season well and bake until egg is set. Um—mm it's delicious!

Ever Try Jellied Soups?

At smart tea rooms and hotels jellied broths are in great favor for summer service—especially this cold tomato soup made by dissolving a tablespoon of lemon-flavored gelatin in a half cup of boiling water and adding it to the liquid from a can of tomatoes. First season juice with a teaspoon of sugar, pepper and salt and juice of an onion and simmer for ten minutes. Then add dissolved gelatin and set on ice until cold. Serve in cups with whipped cream, if desired.

Don't Forget the Ice

In your enthusiasm over ice cream dainties don't forget fruit sherbets are just as tempting and often a better selection for summer meals. To a pint of any crushed ripe fruit add one and a half cups of orange juice and a cup powdered sugar (beet or cane). Cook until sugar melts, cool and freeze.

Gooseberry Time!

Ever try gooseberry jam? It's fine with roast meats. Measure 4 level cups crushed berries into large kettle, add 1/2 cup water and stir until boiling. Cover and simmer 15 minutes. Add 7 1/2 level cups sugar, use hottest fire and stir constantly. Bring to full rolling boil and boil hard one minute. Remove, stir in 1/2 cup liquid pectin, skim, pour and seal.

Improves Flavor of Fruit Pies

Almost any berry pie will be improved if a little salt is added to the filling of the pie.

THE TIGER TRAIL

by Edison Marshall Illustrations by PAUL FREHM

There was an effect of silence, too, possibly induced by the accentuation of the faint sounds that were present. It seemed to me that I could hear distinctly the rustle and whisper of portieres dragged on the floor by the wind. A window shade wavered with the faintest stir of sound. Then there were the hushed, manifold sounds of the night that came hushed and strange through the noises—noises so obscure that the ears had to strain to perceive them.

"Ahmad Das!" he commanded. "Go and get some candles."

"I cannot, sahib," the Hindu answered from the floor. "They are all gone but these two. Every one, I can not bring more."

"Then I'm going out to look for Southley."

"He will be hard to find, sahib. There are shadows and water and jungle between."

Then Ahmad's voice seemed to grow indescribably eager. "You will need a guide."

"A guide—what do you mean?"

"If the sahib goes, I will take him there. The sahib must not start out in the dark alone? And if the sahib has despaired of Miss Southley meeting him here, and wishes to go to his room, I will go thence with him, too."

Vilas Hayward suddenly snatched open the drawer in the table. For an instant his frenzied hands thrust at its interior; then he whirled toward Ahmad.

"Where's my pistol?" he cried. "It was in the drawer."

"Perhaps one of the detectives borrowed it for the hunt today—"

Again Vilas flung into his chair. Again Ahmad went back to his dusting. His motions seemed to grow more sinuous, more silent. And now I looked in vain for the cloth. He seemed to have dropped it.

"Does the sahib wish to go look for Sahib Southley?" he asked. "If he does, I will be glad to go with him—"

To me the words seemed charged with some terrible kind of passion. The effect that they had on Vilas was not pleasant to see. The manhood seemed simply to go out of him. His lips were loose, his eyes protruded, shaking hands reached for the chair-arms.

"No, you devil!" he cried, his voice rising. "You won't get me out there, where you got my father."

"Sahib!"

"And I order you to get off the floor. You're not working now. Get up, or I'll kill you where you lie!"

Ahmad Das got up. He rose very softly to his full height. He tiptoed across the room. And he blew out the light on the little stand.

The shadows deepened. There was only one candle now, the one that burned on the table. And I heard a soft, whispered sigh from Alexander.

"The man's a devil," he breathed in my ear. "Vilas called him by the right words."

"Then get up and save him," I answered. "Do you want to see Vilas murdered before our eyes?"

"Hush—and watch."

We watched. A long time there was silence. Ahmad Das stood still beside the extinguished candle.

"What are you going to do?" "Do, sahib." The answer came at last, trembling with some unceremonious kind of passion. "It is not well to be imprudent with candles. The detectives might need a brighter light when they return to see what remains here."

Vilas tried to meet the snaky eyes.

"What do you mean?" he whispered.

"They will come back soon, and want to talk to your zips— one of their zips is gone—you know where? Yesterday they bore him across the water. You only remember and you are very dear to them, sahib, Strumburg."

Vilas leaned forward. "Strumburg? How dare you call me that? My name's Hayward—"

"Once Strumburg—then Roderick—then Hayward—what does it matter, sahib? Names die when their bearers die."

"But I'm not Strumburg. I tell you I'm not—"

"I will remember, sahib, that you told me that. But consider again, and see if you don't want to make me another answer."

"I'll never admit it."

"I will go from you for a minute, sahib—just a minute into the darkness—and then I will return. I will want your answer then. And there might be other things for you to tell me, too, when I come into your presence a moment from now. You really had no proofs that Sahib Southley is wanted in prison."

"But I have! You can't scare me out of it."

"Both things you can answer when I return to the sahib's presence. It will be just a little moment—"

Vilas half rose in his seat, ordering the servant to relight the candle. But Ahmad didn't obey. Rather he faded. The shadows hid him, and darkness closed round him.

Yet it wasn't as if he had completely gone. I knew that he was waiting somewhere in the darkness just beyond—perhaps behind the curtains, possibly in the hall. I didn't hear or see him. I simply knew he was there, and in a moment more would come back into the light for the answer to his questions. A long moment passed away. The house was tense and still. And once more I looked at Vilas Hayward.

He had his head turned over his shoulder, and he was watching with fascinated horror something that approached him in the darkness. I couldn't see what it was at first. It was farther away from me. But yet I was aware of the sense of something moving—something half crawling, half sliding toward the man in the chair. And then I saw an irregular gray patch of shadow that was not quite so dark as the shadow around it—a patch which seemed to be moving. And all at once it halted.

The Tiger of Southley Downs had come again. The candlelight was ineffective and dim, yet it showed the outline plain. Even then I tried to tell myself it was some mental fallacy, a mirage or delusion that could not possibly be true. I tried to say it was the effect of light and shadow; but the lie died before it came to my thought. It wasn't any use to try to deny the reality of the thing. There was the tawny hide, darkened, of course, by the shadow, the low-hung head, the great black stripes. The details were obscured; but my eyes didn't need them to recognize the creature. It seemed to be lying close to the floor, in the position a tiger takes just before it springs.

And I couldn't say it wasn't true. It would not have been so convincing if Vilas had not seen it, too. And I know by the suppressed gasp of the great detective beside me that his eyes were also resting on the thing. I think that he started to whisper some message of wonder. But I didn't hear him. All I heard was Vilas' scream.

He backed up against the wall, his fingers at his throat. There was no record left in my brain of the sounds he made and the words he said. Ahmad Das had returned just as he had promised, to get the answer to his questions. The transformation was complete—the tiger soul at last in its own body. And Vilas was ready to answer.

(Continued next week)

double the quantity of stiffly beaten eggs.

To Keep Bread Box Sweet
Bread molds quickly in hot weather, so keep containers free from scraps of stale bread, and scald at least twice a week in summer.

A Good Floor Polish
A small quantity of kerosene applied to hardwood floors and rubbed with woolen cloth makes a very good and lasting polish. This may also be used for furniture.

To Silence Creaking Doors
Rubbing door hinges with hard soap will stop their squeak and is much better than greasing. This also applies to drawers that stick.

ANNOUNCEMENT

Dr. E. J. Burns wishes to announce that his niece, Dr. Maudie M. Burns, of Austin, has come to Munday to be associated with him in the practice of medicine. Offices will be maintained over the First National Bank.

Dr. Maudie M. Burns graduated in medicine in May of last year at the medical department of the University of Texas, located at Galveston, after which she served one year as intern in the John Sealy Hospital at Galveston, which service she finished two weeks ago, and is now in the offices of Dr. E. J. Burns and will pay special attention to the diseases of women and children.

The city of Glen Falls, N. Y., lights its street lamps by radio.

Ninety per cent of the American motion picture films are made in California.

Doctor Found Women and Children Sick More Often than Men

As a family doctor at Monticello, Illinois, the whole human body, not any small part of it, was Dr. Caldwell's practice. More than half his "calls" were on women, children and babies. They are the ones most often sick. But their illnesses were usually of a minor nature—colds, fevers, headaches, illnesses—

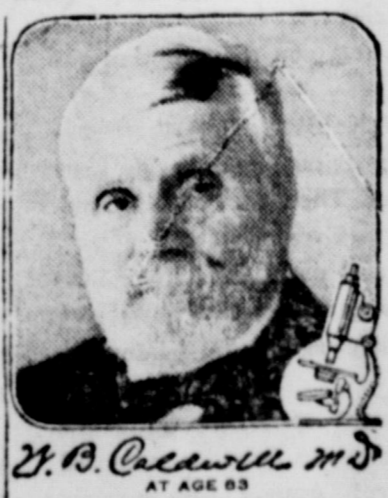

...all of them needed first a thorough examination. Many were constipated.

In the course of Dr. Caldwell's 47 years practice (he was graduated from Rush Medical College back in 1875), he found a real deal of cases in such cases with a prescription of his own containing simple laxative herbs with pepsin. In 1902 he decided to use this formula in the manufacture of a medicine to be known as Dr. Caldwell's Syrup Pepsin, and in that year his prescription was first placed on the market.

The preparation immediately had as great a success in the drug stores as it previously had in Dr. Caldwell's private practice. Now, the third generation is using it. Mothers are giving it to their children who were given it by their mothers. Every second of the working day someone somewhere is going into a drug store to buy it. Millions of bottles of Dr. Caldwell's Syrup Pepsin are being used a year.

...is great success is based on merit, a repeated buying, on one satisfied user telling another. There are thousands of homes in this country that are never without a bottle of Dr. Caldwell's Syrup Pepsin, and we have gotten many hundreds of letters from grateful people telling us that it helped them when everything else failed.

While women, children and elderly

J. C. Caldwell, M.D.
AT AGE 83

people are especially benefited by Dr. Caldwell's Syrup Pepsin, it is completely effective on the most obstinate cases. It is mild and gentle in its action and does not cause griping and strain. Containing neither opiates nor narcotics, it is safe for the tiniest baby. Children like it and take it willingly.

Every drug store sells Dr. Caldwell's Syrup Pepsin. Keep a bottle in your home—where many live, someone is sure to need it quickly. We would be glad to have you prove at our expense how much Dr. Caldwell's Syrup Pepsin can mean to you and yours. Just write "Syrup Pepsin," Monticello, Illinois, and we will send you prepaid a FREE SAMPLE BOTTLE.

Mrs. C. C. Wright of Pecos, Texas, is here this week visiting her mother, Mrs. C. A. Webb.

Mr. and Mrs. C. M. Smith are rejoicing over the arrival of a fine boy in their home on Sunday, July 29th.

Raymond Reeves, who underwent a serious operation in Fort Worth some days ago, has recovered sufficiently to return home and will be on the streets again in a few days if he continues to improve.

Grady Blake and family will leave this week for a vacation trip to Galveston and other points. They plan to go to Galveston and from there take a swing through southwest Texas.

D. E. Holder and family have gone to California, where they will visit his father and will take in some of the beauties of the golden west.

Mr. and Mrs. W. C. Newsom are visiting relatives and friends in Haskell, Abilene and other points this week.

Mr. and Mrs. Tom Rigby and children went to Thurber the latter part of the week for a visit with his parents. Mr. Rigby returned home early in the week while Mrs. Rigby and the children will remain for a more extended visit.

James Harburn is visiting "friends" in Hillsboro this week. He plans to have two week's vacation and expects to spend a major portion of that time in Hillsboro.

Mrs. M. F. Billingsley and children will return home the latter part of the week from Dallas, where they have been visiting relatives for some days.

Soft rolls, ruts and other obstructions are less likely to interfere with a wheelbarrow recently introduced for it is fitted with an endless-tread arrangement, common to the tractor. Demonstrations have shown that it can be pushed through muddy ground that stopped the ordinary wheelbarrow with a narrow wheel.

Easily attached in a conventional position on the dash, a chemically-plated reflector gives the driver an opportunity to observe any change in overhead traffic-light signals by day or night. This saves him the trouble of peering out of the car with its consequent risk.

Fitted with a spring that throws it back into place after shot is made, a golf tee now on the market offers little resistance to the ball so that longer and more accurate shots are possible.

Several interesting features are claimed for a ladder that can be collapsed into a unit no larger than a step-ladder of six rungs, but which provides twelve rungs when extended. The inventor demonstrated that it would support the weight of five men, while resting wholly on its own standards.

Mr. and Mrs. J. E. Rhodes of Grand Saline were here the latter part of last week for a brief visit. Mr. Rhodes stated that he came over to cast his ballot and to look after some matters pertaining to the opening of school.

Clotis Stogner went to Lelia Lake in Hall county the latter part of last week and was accompanied home first of the week by his aunt, Mrs. M. E. Ewing, and Miss Birdie Stogner.

Chas. and Nellie Farrington and William Fritz are on a vacation trip in New Mexico, where they will visit the Carlsbad cavern and other points of interest.

A. D. Barnes and family of Comanche, Texas, are guests this week of Mr. and Mrs. Victor Edwards here and are also visiting friends at Goree, where Mr. Barnes was formerly in the dry goods business.

Mr. and Mrs. Aubrey L. Smith of Weibert were here Sunday visiting relatives and friends. Smith was receiving congratulations from his many friends over his narrow escape from death recently when he

received a portion of a load of shot from a shotgun in his face, but we were very glad to note that he looks none the worse from his perilous experience.

Mrs. J. A. Elliott of Ebby, Texas, is here visiting in the home of her son, C. R. Elliott.

Mr. and Mrs. George Rayburn have moved to Wichita Falls, where George has accepted a position with the Wichita Falls Battery Co.

Mrs. C. E. Jones of Mineral Wells is here this week.

Mrs. Olga Terry Walters, who has been in Wichita Falls taking a course of instruction in beauty culture, spent the week-end here with her parents, Mr. and Mrs. J. W. Terry.

Homer Billingsley of Wichita Falls and sister, Miss Nell Billingsley, of C. I. A., Denton, were week-end guests of their uncle, A. J. Glasgow.

Rev. and Mrs. A. G. Hulme and daughter, returned Tuesday from Missouri, where they have been for some days visiting relatives and friends. They were a few days later returning than they had planned by reason of the fact that they encountered some heavy rains in Oklahoma upon their return.

Mrs. C. M. Hendrix and daughter, Miss Delphine, are in Denton this week making arrangements for Miss Delphine to enter the College of Industrial Arts there for the opening of the term next month.

SINGING AT KNOX CITY SUNDAY, AUGUST 5TH

There will be singing at the First Baptist church, Knox City, Sunday, August 5th, at 8:00 p. m. Every singer and music lover invited. We are expecting to have a great time. Come!

Thanks, Press Hitchcock. Microphone Aids Teachers As Well As Pupils.

Sitting at her desk, a teacher in a New Orleans school can speak to the entire student body or make announcements to other teachers in their rooms, says Popular Mechanics Magazine. This is accomplished by the "public address" system which utilizes the microphone and amplifiers in broadcasting the voice through loud speakers. The plan saved the construction of an auditorium large enough for the 510 pupils, as all of them can hear announcements, speeches and programs in their own rooms.

Wide Difference In Crude Oil Price and Price of Gasoline

Crude oil is selling so low that development has almost come to a standstill throughout Texas, yet, the price of gasoline continues to go higher.

This fact was pointed out this week by E. P. Lightfoot, who, with an associate, is working upon the proposition of building a small refinery at some point throughout this section to be owned by the citizenship of the communities in which the products are sold, and the big difference between the crude oil price and the price of the gasoline at the filling stations, or in drums, are to accrue to the consumers interested.

Mr. Lightfoot states that according to the plan upon which he is working the balance of power will always be with the directors, as he and associates will control only 40 per cent of the stock, and will have only two members of the board of directors, while the 60 per cent stockholders will have four members of the board. All funds of the company are to be protected at all times by a bond. Mr. Lightfoot was here first of the week and stated that the citizens of Haskell and other towns in the proposed territory are giving him excellent cooperation and have readily and he stated that he would very gladly place his proposition before the citizens of this county.

VIOLIN WITH STRAIGHT SIDES IS EASIER TO PLAY

Instead of being curved, the body of a violin constructed by a Chicago maker is angular, the form enabling the player to reach farther on the strings although his fingers may be short, and making the instrument easier to hold under the chin, says Popular Mechanics Magazine. At the same time, an improvement in tone is claimed for this pattern.

WANTED—To sell on 25% commission, 2nd hand wearing apparel, fancy work, quilts, etc. You can use your money for Parent-Teacher association, church building fund for your self or any way you like. I will take good care of your goods and try to sell them as fast as possible, but will not be responsible in case of fire or theft. See me at our store 1001 to 6:00 p. m. Price of goods must be low and divisible by four. Bring blank envelope for each piece of goods.—Mrs. Jim Lewis.

A single pound of the finest spider web would reach around the world.

A Good Place To Trade

Whether it's a most complicated prescription, a proprietary remedy, a bottle of castor oil, or turpentine, or just a cigar, a pack of cigarettes, a cold drink or what-not, you'll always find that this is really a good place to trade. We are convinced of this fact by reason of the constant growth of our business, and many of our patrons of long standing have expressed their satisfaction.

With us no transaction is closed until the customer is satisfied, and we make good every guarantee we make, whether large or small. Nothing could be more fair than that.

And above all, courtesy accompanies every transaction here.

These, and the many other advantages make—

Knox Delegation To A. & M. Short Course Left Saturday Night

Headed by County Agent W. O. Logan and County Home Demonstration Agent Miss Grace Nelson, the Knox county delegation departed Saturday night for College Station to attend the annual A. & M. Short Course. The party departed from Monday over the Wichita Valley, and will board a special train enroute.

Those attending the course this year are: Lela Hurd, Vera; Belma Swain, Hood; Sybil Bowler, Monday; Mrs. J. B. Rowson, Monday; Mrs. Jim Banks, Gilliland; Mrs. Tina Strable, Vera; Mrs. Ethel Thompson, Vera; Mrs. Roy Jones, Hefner; Homer T. Melton and W. T. Ward of Benjamin; Paul and Earl Pruitt, J. B. Rowson, Jr., and Weldon Parker, Monday; J. G. Curv and son, Louis of Gilliland, and Mr. Logan and Miss Nelson.

More than three thousand men, women, boys and girls interested in farm problems are in attendance at the short course this year from all parts of Texas, and we are glad indeed that Knox county will be so well represented for those who attend these short courses get invaluable information, and return home with an ambition to do more toward bettering conditions of the home and of the farm.

RHINELAND WINS FAST GAME VS. GILLILAND

In a fast game between Rhineland and Gilliland Sunday afternoon the Rhineland boys were again victors by a score of 3 to 1. Ioran again did the pitching for Rhineland, and his excellent work, together with the perfect support given by his teammates gave them the big side of the ball.

We believe the Rhineland boys have established a state

side record in amateur baseball during the past two years, having played during that time 28 games, losing only four. On Sunday afternoon at Rhineland that team will cross bats with either Weinert or O'Brien. The game is called at around 3:00 o'clock.

SENTER'S RIFLE

A real rifle with the delivery of a machine gun. This is the title of a monthly pocket magazine published by E. G. Senter at Dallas, Texas. It is outspoken on all public questions and affirms that it intends to tell all the pertinent truth which the public is entitled to know, without fear or favor. It supports the democratic ticket and fires its "Rifle Balls" into the column of the hollers. It also fights for court reforms, reduced taxation and lowered cost of government. The student of Texas politics can hardly do without The Rifle. Subscription price, \$1.00 per year. Address 1412 Republic Bank Building, Dallas, Texas.

HARDY MOTOR COMPANY
Stamford, Texas

Liberal Trade--In Allowance For Your Old Coal or Oil Range On the New De Luxe White Star

BETTER COOKING GREATER GAS EFFICIENCY!

The new design Even-Heat burner used with this range speeds and improves cooking and effects real gas economies through scientific heat application. Gives same even heat under every part of the cooking utensil—a welcome betterment!

Cleanliness Comes First In Cooking

In the preparation of food cleanliness is of first importance. You wouldn't think of cooking without clean pots and pans, clean hands, clean foodstuffs and clean kitchen implements. And so, too, you want a clean gas range.

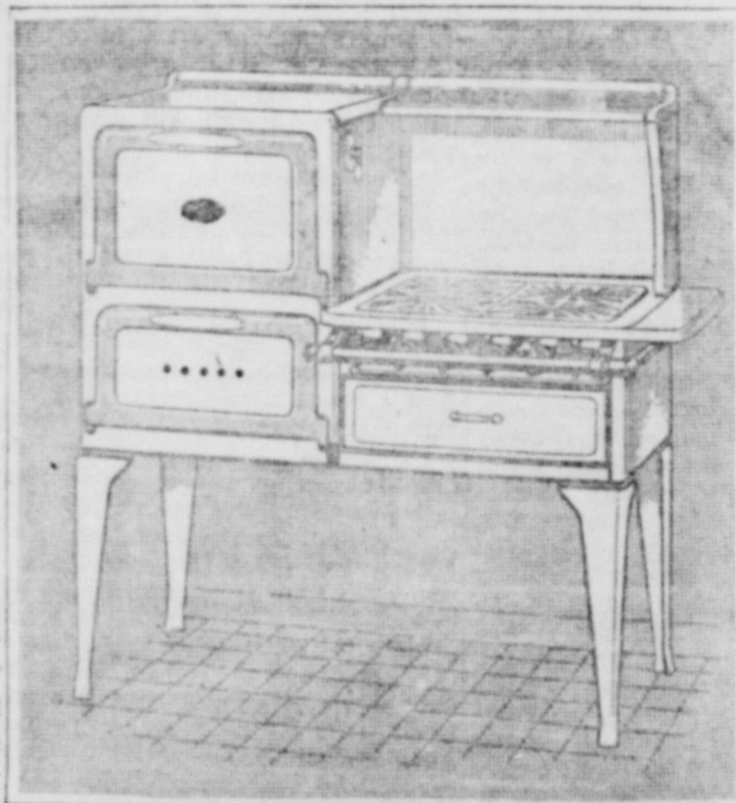

The beautiful, modern White Star solves the cleanliness problem. For this range is not only easy to keep clean, but it stays clean longer. The broad shining surfaces are porcelain enameled. Even the grates and burners are enameled inside and out. The White Star is easily cleaned in a few minutes with only a damp rag. And the oven, inside and outside, is guaranteed for the full life of the range.

The White Star is the most up-to-the-minute gas range on the market. It offers you fourteen patented improvements that are exclusive! Among them is every modern idea—oven heat control, fresh air oven, rust-proof lining, etc. You must see this range to realize what an efficient one it really is.

Space does not permit a detailed description of the fourteen exclusive features, but we shall be glad to

APPRAISAL OF YOUR OLD STOVE FREE AND WITHOUT OBLIGATION

Barry-Johnson Hardware Company

"THE WORLD'S CLEANEST GAS RANGE"

point them out to you when you visit our store.

Even with these fourteen important improvements, the White Star is moderately priced. It costs considerably less than other ranges of high quality that do not have the fourteen patented advancements.

The White Star is recognized by the United States Government as being new and improved in fourteen ways—14 patents covering exclusive betterments have been granted.

Not a single crack, crevice or rough edge on the snowy White Star. All corners are rounded. Three coats of hard, marble-like porcelain cover every part, even the oven linings, grates and burners.

This beautiful range appears to be made in one piece of gleaming porcelain. Five minutes with a damp cloth cleans it completely, like washing a dish.

We invite you to inspect this wonderful range—see the always cool oven handles—the boltless valve handles that can't loosen—the porcelain lined cooking burner pit—the fresh air oven that prevents "soggy baking" and many other new features designed for your convenience.

THANKS!

Elliott Expresses Thanks for Majority Given Him Saturday

C. R. Elliott is very thankful to the voters of Knox county for the excellent vote given him in Saturday's primary election, in which he was nominated for Sheriff and Tax Collector by a majority of about 223 votes. Especially is Mr. Elliott grateful for the excellent vote given him in Munday, where his record as an officer is well known to all the people, and he is none the less thankful to the citizens of other portions of the county for the excellent support given him, and he stated that he hoped to make the county such an able and efficient official that none would have cause to regret having given him their support. He also expressed gratitude that the campaign had been conducted on a high plane and at no time during the campaign did he seek support upon any other issue than his merits.

TO THE VOTERS OF KNOX COUNTY:

I wish to express my appreciation to the people of Knox county for the support given me in the Primary Election of last Saturday, and also to ask for a continuation of your support in the run-off primary on August 25th. And if I am re-elected, I will faithfully discharge the duties of my office, and will serve the people of Knox county to the best of my ability. Respectfully submitted, THOS. F. GLOVER, County Clerk of Knox Co.

CARD OF THANKS

I wish to express my sincere thanks to the voters of this precinct for the vote given me in Saturday's primary election. I shall always feel grateful to those who cast their ballot for me, and shall hold no ill will toward those who did not. For the benefit of my friends I will say that I will have a statement next week as to my future plans. Respectfully, T. W. (Wash) Rayburn.

CARD OF THANKS

I wish to express my sincere thanks to the voters for the excellent vote accorded me in Saturday's primary, enabling me to lead the ticket. And, at this time I wish to solicit your support in the August primary, and I promise that if elected I will give my best efforts to discharging the duties in such a manner that will meet with the approval of all. Respectfully, LEE HAYMES

D. C. Osborne Thanks Voters for Excellent Support Accorded Him

Commissioner D. C. Osborne was in town first of the week and requested The Times to express his gratitude through the columns to the voters of the precinct for the excellent vote given him in Saturday's primary election, and stated that he would strive to render a service to his constituents that would cause them to have no feeling of regret for the confidence they have shown in him. Mr. Osborne stated that he would give every portion of his precinct the very best roads possible and would use discretion in expending the funds of the tax payers.

Quincy C. Davis Is Grateful For Vote Given Him Saturday

I wish to express my sincere thanks to the voters for the excellent support given me in Saturday's primary, which enabled me to lead the ticket in the race for Public Weigher, Precinct No. 5, and at the same time I wish to renew my solicitation for your support in the August run-off and again promise you that if elected I will give you my full time to the discharge of the duties and shall strive to make such an efficient official that none will have cause to regret having imposed confidence in me. I wish to state further that if I am elected I will install wagon scales for the use of farmers having other commodities to sell than cotton. Respectfully, QUINCY C. DAVIS.

THANKS

To my friends: I hasten to tender my most sincere thanks for your support, either passive or active, in the campaign just closed. This unmistakable expression of your confidence renews my determination to a continuance of the loyalty to the public interest you have every right to expect. Yours to command, OLIVER W. LEE

TO THE VOTERS OF KNOX COUNTY:

I wish to thank the citizenship of the county for the splendid majority given me in last Saturday's primary election, and if there is anything at Benjamin that I can do for you, when you are here, or by writing me here, it will only be my pleasure to serve you. Respectfully submitted, J. C. PATTERSON, District Clerk.

CITY HALL Friday Night, August 3rd

POLITICAL ANNOUNCEMENTS.

- For District Attorney: Dick Dresser, Wm. B. Combest (re-election)
- For District Judge: Isaac O. Newton
- For District Clerk: J. C. Patterson, (re-election)
- For Sheriff and Tax Collector: C. R. Elliott
- For County Judge: Oliver W. Lee, (re-election)
- For County Clerk: Thomas R. West, Thos. F. Glover (re-election)
- For Tax Assessor: Earl B. Sums, (re-election)
- For Public Weigher, Prec. No. 6: Lee Haymes, T. W. (Wash) Rayburn.
- For Public Weigher, Prec. No. 5: Quincy C. Davis.
- For Commissioner, Prec. No. 4: D. C. Osborne (re-election)
- For Commissioner, Prec. No. 1: W. M. Griffith

ORDINANCE

An Ordinance Regulating the Installation of Gas Fittings and Requiring the Inspection Thereof

Be it ordained by the City Council of the City of Munday, Texas, Section 1. That hereafter mains placed for the conveyance of natural gas to any house, residence, building or structure in the city of Munday shall be the following dimensions:

No. fires	Length	Pipe	Size	pipe
1	10	1/2		
1	30	3/4		
1	100	1		
1	350	1 1/4		
2	20	3/4		

For house five rooms or less, main line to meter 1 1/4 inch. Meter to small boiler or furnace, not less than 1 1/4 inch. First to second opening, 1 inch. Second to third opening, 1 inch. Third to fourth opening, 3/4 inch. Houses over five rooms with 10 fires or less:

2	60	1
2	160	1 1/4
3	40	1 1/4
3	120	1 1/4
4	20	1 1/2
4	90	1 1/2
5	70	1 1/2
5	125	1 1/2
6	40	1 1/2
6	90	1 1/2
7	30	1 1/2
7	75	1 1/2
8	15	1 1/2
8	50	1 1/2
9	40	1 1/2
10	30	1 1/2

For more than ten fires or houses larger than ten rooms, the city gas inspector shall prescribe the necessary sizes in lengths. For houses of from five to ten rooms the pipe from main line to meter shall be 1 1/4 inch. All pipes run on ceiling or under floors shall be mechanically installed and strapped with necessary support.

All mains for gas lights to be of 1/2 inch pipe reduced to 3/8 for fixtures.

Section 2. All gas fittings used in any such houses, buildings or structures shall be safe design, all pipes shall be wrought iron and all fittings malleable iron, brass or bronze, shall be free from all defects and shall be installed without the use of lead pipe, calking tools, or rubber hose connection of any kind.

Every connection of pipe and fittings shall be made by the joining by means of thread of iron pipe, brass or bronze fittings.

No shoddy or defective parts or fittings shall be used, and no paint, cement, preparation or dope of any kind shall be used on said pipe or fittings to close cracks, openings or defects except pure white lead shall be used on the thread of every joint connected.

Section 3. Every piece of pipe, fitting or fixture hereafter installed in the city of Munday, shall be approved and inspected by the city gas inspector before any gas shall be turned on in the city, and the said inspector shall test the line and fitting by means of a mercury gauge at a pressure of ten pounds to the square inch for fifteen minutes. No gas shall be turned into lines or fittings either by the gas company or the fitter or the consumer until the same has been tested and approved by the inspector.

Section 4. Whenever alterations or repairs are made in any line of gas pipe leading from service box to any house, residence, or structure of any fitting therein, except setting stoves or lights and necessary fittings, the gas shall be turned off, and shall not be again turned on until inspected and approved as provided for in Section 3 of this ordinance.

Section 5. There is hereby created the office of City Gas Inspector for the City of Munday.

Section 6. The City Gas Inspector shall be a resident citizen of the City of Munday, shall be appointed by the City Council of the City and shall

hold his office at the Will of the City Council. He shall execute bond in the sum of One Thousand Dollars conditioned that he will faithfully discharge and perform the duties of his office. The City Gas Inspector shall receive such salary or compensation as may be fixed by the City Council in the contract of employment.

Section 7. The City Gas Inspector shall inspect all material that is intended to be used in the installation of any connections with Gas Mains or installation of gas services in buildings in the City and shall approve same if found to be of good quality and meeting required standard of such and if not such material shall reject same and require the use of material meeting requirements.

Section 8. It shall be unlawful for anyone not having a permit from the city gas inspector to turn gas off or on, at or to interfere in any way with the street box.

Section 9. Inspector's fees shall be charged by the city gas inspector as follows: Twenty openings or less, \$1.00.

All additional openings, 10c each.

All re-inspections after failure to stand test, same as above. Inspector's fee to be paid by parties securing permit before clearance certificate will be issued.

Section 11. Any person or persons, firm, corporation or company who shall violate any of the provisions in the foregoing ordinance shall be guilty of misdemeanor and upon conviction thereof shall be punished by fine of not less than ten dollars nor more than two hundred dollars.

Section 11. This ordinance shall be in force and effect from and after its passage and publication as required by law.

Passed this 26th day of July, 1928. C. L. MAYES, Mayor Approved 26th day of July, D. T. Mauldin, Sec'y.

That's the way some have described our new bread. It's just the same as the bread we've been making all the time, but is worked differently on a new machine which we have just installed. Nothing but the highest grade of flour and purest of ingredients go into bread made here, and it is fine for toast and sandwiches. Good for the kiddies. We believe that the best is none too good for our patrons, and we're always striving to make a good product a little better.

Years of Service in Model T Fords

Expenditure of few dollars may enable you to get thousands of miles from your old car

THE Model T Ford is still a great car. It led the motor industry for twenty years and it is used today by more people than any other automobile. More than eight million Model T Fords are in active service in city, town and country, and many of them can be driven for two, three and five years and even longer at very small up-keep expense.

The cost of Model T parts and of necessary labor is unusually low because of established Ford policies.

New fenders, for instance, cost from \$3.50 to \$5 each, with a labor charge of \$1 to \$2.50. Tuning up the motor and replacing commutator case, brush and vibrator points costs only \$1, with a small charge for material. Brake shoes can be installed and emergency brakes equalized for a labor charge of only \$1.25. A labor charge of \$4 to \$5 will cover the overhauling of the front axle, rebushing springs and spring perches, and straightening, aligning and adjusting wheels.

The labor charge for overhauling the average rear axle runs from \$5.75 to \$7. Grinding valves and cleaning carbon can be done for \$3 to \$4.

A set of four new pistons costs only \$7. For a labor charge of \$20 to \$25 you can have your motor and transmission completely overhauled. Parts are extra.

All of these prices are approximate, of course, because the cost of materials needed will depend on the condition of each car. They show, however, the low cost of putting the Model T Ford in shape for thousands of miles of additional service.

See the nearest Ford dealer, therefore, and have him estimate on the cost of re-conditioning your Model T Ford. He will tell you, in advance, exactly how much the complete job will cost.

HAVE YOU SENT YOUR VOTE IN YET?

Nationwide Presidential Poll Now In Progress

The Nationwide Presidential Poll which the Munday Times inaugurated in its last week's issue is now going on at full swing, but is a little too early to begin compiling the results. The local results, however, may prove illuminating.

This newspaper is taking this straw vote in connection with 2,000 other daily and weekly newspapers scattered throughout the country. The voting will be completed on October 11. The final vote will be announced in the Munday Times shortly thereafter.

We will make weekly reports of the progress of the voting, the report from other states being forwarded to us through the Publishers Autoeaster Service of New York, through which national news-gathering organization this newspaper is served.

Have you voted yet in this poll? If not, we urge you to do so at once. We want the vote of every citizen in this community. We want to be able to show other communities just where we stand.

This newspaper is neutral and independent in regard to this poll. This poll is conducted in the interests of all voters.

STONE AGE MUMMIES THE GREATEST MAGNET ROCKEFELLER SEES KINDNESS WAX DOES NOT PAY

Mammoths, extinct thousands of years, have been found preserved, skin, hair, flesh, in Northern ice. Hoping that men of the Stone Age might be similarly preserved, an expedition was sent to look.

On an island, far North in cold Alaska, scientists discovered at the top of an almost inaccessible cliff the grave of an ancient Stone Age chief. His coffin was lined with well tanned skins of the sea otter. His shirt was of bird skins, his clothing made of the finest furs. A favorite child, a seamstress to sew his boots, a servant, and hunter to get game for him, had been killed and buried with him to accompany him on his death journey.

This mummified family from the Stone Age will enlighten scientists, it interests us all, illustrating the unchangeable belief in a future life so deeply planted in the human brain.

Why was the belief put there if only to be disappointed?

The French Government builds a gigantic magnet several thousand miles as powerful as any built thus far.

It will be used in scientific experiments in connection with the molecular and atomic construction of matter, etc. The magnet eventually will be of great use in industry.

Here the steel companies use magnets picking up tons of steel nails and loading them on cars. Dropping them down, lifting them up, as a boy lifts trucks with his toy magnet.

Man is an intelligent animal. Seeing on a gigantic combination power wheel and magnet—the earth. He constructs his own little power plant, builds his own electric and magnetic power.

In the north day before yesterday man's electric work felt an electric storm, and an amazing aurora borealis, stretching all across the northern part of the continent. If men could borrow and use the inexhaustible electric power of the earth, they need not turn coal or water falls into electric current.

John D. Rockefeller, beginning his sixtieth year, said: "I never worry, and I am anxious."

"Kindness of people generally." Eighty years ago, from his father's cottage doorway, in the Carolinian foothills, he watched his uncle drive off to trade horses—then saw him come back with better horses.

Now his ships go out to every part of the world, his scientists are fighting disease in every part of the earth. And looking at his right hand, now wrinkled, he knows it has made gifts to education and human progress totaling hundreds of millions.

A good deal in one life time.

Thomas W. Lamont, partner of J. P. Morgan, and an able citizen, tells business men they can be a distinct factor in preventing future wars.

They can and will be, for they have discovered that war, in the past, often promoted by business, DOES NOT PAY.

Another big war would mean not merely sixty per cent income tax, but confiscation of principal, on a gigantic scale. Young men would not again consent to have their bodies sent to war, unless the rich man's dollars also went. Wise business men will oppose war and demand preparation for it.

BOY FARM LEADERS

One of the most interesting talks made at the recent national encampment of the 4-H Clubs of farm boys and girls held in Washington was made by Everett Saylor of Decatur county, Iowa, who sketched the results of his eight years of club work.

He began with pigs and through them became interested in alfalfa, which in turn led him to study problems of soil fertility. To make the story short, through the example set by this club boy a large area in his county has now been planted

to alfalfa, which has proved to be a most desirable and profitable addition to the resources of the community.

Another club boy, C. D. McMillan of Spartanburg county, South Carolina, told of net profits of \$1,200 made in spare time in eight years of club work in pig, poultry and cotton projects. He also said that the keeping of records and accounts in connection with these activities had been of great value to him.

On such boys and their leadership will largely depend the success of agriculture in the fu-

ture. Haphazard farming will never again be profitable, any more than haphazard manufacturing of merchandising. Boys thoroughly trained in club work will never be haphazard farmers.

SEEING THROUGH METAL

To protect eyes, a Hungarian oculist has devised a pair of spectacles that have an exceedingly thin piece of metal foil between two sheets of plain or

curved glass, says Popular Mechanics Magazine. This not only keeps out rays of light that would be hurtful to the eyes, but is also said to exert a healing effect as it admits short

waves of daylight which are beneficial to the organs. In case of inflammation of the iris, platinum foil is recommended, as it passes but two per cent of visible light.

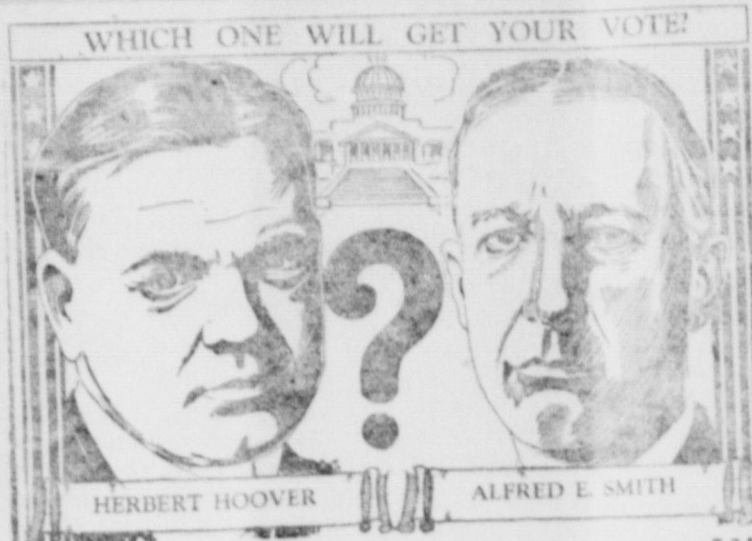

FEDERAL LAND BANK LOANS FIVE PER CENT

A long term loan with the option to pay at any interest pay date, provided the payment to be made is out of ones own funds. And contrary to the general belief, THIS LOAN DOES NOT CARRY ANY LIABILITY ON YOUR FARM, OTHER THAN YOUR OWN LOAN.

This loan offers a saving of \$10.00 on the \$1,000.00, over any loan offered by any Loan Company in Texas.

LINDY GETS EVEN

Col. Lindbergh is good-natured, but some things get on his nerves. One of them is the song "Lucky Lindy," which he hates with a robust and persistent hate.

Knowing this, Chairman Bixby of the St. Louis Chamber of Commerce and others sang the song at a Lindbergh banquet in New York, as a little joke. Lindbergh said nothing, but awaited his revenge.

Next day he took Bixby and another of the singers for an airplane trip. Taking them to a great height, he dived, and looped and spun until they were dizzy and sick.

When their discomfiture was complete he turned around in the cockpit and shouted: "Now sing 'Lucky Lindy.'"

TO AVOID SLUMPS

Although the idea is not new, a recent magazine article sets forth a plan for preventing periodical business depressions and consequent unemployment, by means of regulating government spending.

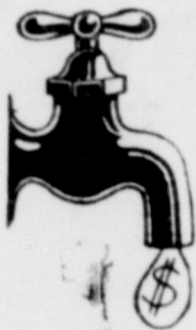

Briefly, the plan is that the government should curtail its building activities during "good times," and speed them up to relieve unemployment when private business is at a low ebb.

While apparently sound in theory, it is doubtful whether the plan could ever be put into practice with any marked degree of success. The government, like individuals, wants things when it wants them, and if members of Congress feel that appropriations for this or that are demanded by their constituents at a certain time it is not likely that the funds would be withheld for the purpose of stabilizing conditions.

Notes On Permanent Agriculture

This discussion has nothing to do with the present security, nor the present land values, nor the fluctuations of land values from year to year, but does pertain to the permanency of our security over the period of years covered by a loan.

Erosion In General

With a slope of 1 foot in 100 feet, on any land, in any section of the state, under clean culture especially cotton, land left bare throughout winter, the security will not remain sound over a 34 year period. The danger of deterioration increases as the slope of land increases. It is possible to prevent erosion by proper cropping system on land with slope of less than 3 feet in 100 feet. However, it is hardly probable that any farmer in Texas is in position to practice or inclined to practice a system of farming that will prevent erosion on land with greater slope than 1 1/2 feet in 100 feet. Land in cultivation with slope of 3 feet in 100 feet or more, must be terraced if erosion is prevented. Land with slope of 12 feet in 100 feet has been terraced and farmed successfully. As the slope of land increases, the personal element increases. The length of loan is beyond the average life of the borrower, consequently, the personal element must be based, or recognized, more upon the individuals making up the community than upon the one individual.

In our business it is hazardous to make a loan on any land in cultivation that has more than 5 feet slope in 100 feet. On land of this slope these must be a high community value and an unquestionable desire and ability upon the part of the borrower to make good, for the security to remain adequate.

Clean Culture and Rotation

Under the average system of farming practiced in the state, the farm is kept more or less clean of vegetation throughout the late fall, winter and early spring. These are the reasons of excessive rainfall throughout most of the state. During this time erosion is the greatest. Over most of the state cotton is grown as the principal crop. Experience and experiment data have proven that erosion is greater under cotton culture than any other crop with the possible exception of peanuts grown, and the vines, roots and nuts removed from the ground. Experiment Station data have proven, and it has been verified in practice, that crop rotation where a winter cover crop is used, will very materially lessen the soil losses. Records show that land with clean culture crops and without winter cover crops will wash seven times as fast as land with rotation including winter cover crop.

Rolling land under the "one crop system," is and will remain doubtful security over any long period of time. Rolling land, under a definite, permanent system of rotation, is fairly stable security over a long period of time.

Well sodded pasture land, or timber land, is safe security, insofar as soil erosion is concerned, throughout the life of any loan.

Permanent Agriculture

Crop rotation and permanent pasture of necessity brings livestock into the farm operations. Since time started there has been no permanently successful system of agriculture without livestock. There can never be because nature's plan is based upon animal and plant life. They cannot be successfully separated in any plan of operation that depends upon the laws of nature.

Problems of Sections

In the sections of the state which is mainly located east of the H. & T. C. Railroad, the land is mostly rolling sandy loam. This character of soil is conductive to erosion and it also lies within the heavy rain belt. All of this land with the exception of the creek and river valleys must be terraced for protection. While this land is more subject to erosion than any other section of the state, it can be terraced with small expense. One crop of cowpeas or other legumes, turned into the soil after being terraced, will restore profitable production on such character of soil.

The ease and rapid deterioration of East Texas soils places a greater value upon the individual than in any other section of the state. It may be stated that in general the necessities

of life may be obtained or procured in East Texas with greater ease than in any other section. Consequently, there is less necessity for community cooperation.

Black Land

The black land belt of the state has suffered long under the impression that it is the greatest, most fertile, most enduring section that man has ever settled. This extreme view has blinded the population to such great extent that they have butchered the soil and wasted their wonderful natural resources to such extent that now this section is not only a problem before the people of the section, but is a grave problem confronting the state. The black land section has stood soil robbing for longer than any other section of the state can, yet the process of reconstruction and bringing back the fertility will be longer and more costly than in other sections.

The rolling lands of this section must be terraced. Then there must be a permanent system of crop rotation followed throughout a period of years before soil fertility can be restored.

The problem of rotation in most of this section is grave. It is mostly farmed by tenants, where both landlord and tenants are cotton-minded. It is financed by a banker who is cotton-minded. When rotation is suggested it is met by the argument that it takes all the land to cotton to produce money enough to survive. To change from cotton to balanced farming will cause a readjustment in thinking and financing.

The black land is known as the cotton country. Much of this section has been depleted of its soil fertility to such extent during the past 35 years that its acre yields have been reduced from 30 per cent to 50 per cent. There is but little effort being made to change the system at this time. The question naturally arises, what will happen in the next 35 years?

The black land section has in general, a greater community value than has East Texas. The soil is more enduring. As a consequence, the individual responsibility does not enter into security as great as in the eastern section.

West Texas

All West Texas, comparatively speaking, is new land. From the standpoint of water erosion it differs from East Texas only in the amount of rainfall. Stated another way, water erosion will not be as fast because less water falls. On the other hand heavy rains often fall with such rapidity that soil erosion is great and makes it necessary

that rolling lands be protected by terraces. With time, wind erosion will prove to be the greatest menace to sound security in the Western section. Soil only washes and soil only blows when it does not have organic matter to bind it together. When the people of the West, farm out or use out the organic matter, in many instances the field will blow away. There are many fields today in the "peanut section" of the state that resemble an old lake bed.

Through the entire West there is but one known method to keep farm lands in permanent profitable production. The humus in the soil must continuously be replaced by crop rotation in which vegetation is turned under.

Upon the whole, soil fertility in West Texas is not a vital problem at present. Neither will it become a problem for several years, if rolling land is protected by terraces and the humus content of the soil is maintained. Owing to the fact that the Western section is productive and many of the farms have desirable farm homes and modern and convenient equipment, this section will probably remain for some time safe loans. Yet it must be remembered that as soil fertility decreases in this section, desirable home conditions will decrease in like proportion and securities will eventually be on the same basis as they are now in the other sections of the state. Another thing that should be remembered is that wind erosion can destroy our security in the older fields in this section faster and more completely than can water erosion in the East.

The Plains

The Plains section of our state is now entering into a great stage of development—Kansas, the Dakotas and other sections have gone through a similar period of exploitation through commercialized farming. Farming large areas of fertile land with power and large modern equipment is profitable and fascinating. This method of farming does not build farm homes, desirable communities, nor does it stabilize farm values. In every country, in every state, commercial farm operations have been tried out. It has, up to this time, met the same fate. New and fertile lands—return profit, later, financial disaster. I do not say that this system will fail on the Plains of Texas, but I do say that if it succeeds over a long period of years, it will be the first instance in agricultural history.

Instead of the usual bristles, a toothbrush now on the market has wedged-shaped rubber "fingers" from which foreign matter is easily removed, insuring cleanliness at all times. They will not come out and are also said to have a beneficial effect on the gums.

Proposed Constitutional Amendment—Authorizing Legislature To Exempt From Taxation Parsonages, And Certain Property of Associations For Religious, Educational and Physical Development.

H. J. R. No. 20.

HOUSE JOINT RESOLUTION

Proposing an amendment to Section 2, Article 8 of the Constitution of the State, so as to authorize the Legislature to exempt from taxation any property owned by a church or by a strictly religious society for the exclusive use as a dwelling place for the ministry of such church or religious society, and which yields no revenue whatever to such church or religious society, and property used exclusively and reasonably necessary in conducting any association engaged in promoting the religious, educational and physical development of boys, girls, young men or young women operating under a State or National organization of like character; providing for an election upon such proposed Constitutional Amendment, and making an appropriation therefor.

Be it resolved by the Legislature of the State of Texas:

Section 1. That Section 2, Article 8 of the Constitution be so changed as to read hereafter as follows:

All occupation taxes shall be equal and uniform upon the same class of subjects within the limits of the authority levying the tax; but the legislature may, by general laws, exempt from taxation public property used for public purposes; actual places of religious worship, also any property owned by a church or by a strictly religious society for the exclusive use as a dwelling place for the ministry of such church or religious society, and which yields no revenue whatever to such church or religious society; provided that such exemption shall not extend to property that is reasonably necessary for a dwelling place and in no event more than one acre of land; places of burial not held for private or corporate

profit; all buildings used exclusively and owned by persons or associations of persons for school purposes and the necessary furniture of all schools and property used exclusively and reasonably necessary in conducting any association engaged in promoting the religious, educational and physical development of boys, girls, young men or young women operating under a State or National organization of like character; also the endowment funds of such institutions of learning and religion, not used with a view of profit; and when the same are invested in bonds or mortgages, or in land or other property which has been and shall hereafter be bought in by such institutions under foreclosure sales made to satisfy or protect such bonds or mortgages, that such exemption of such land and property shall continue only for two years after the purchase of the same at such sale by such institutions and no longer, and institutions of purely public charity; and all laws exempting property from taxation other than the property above mentioned shall be null and void.

Section 2. The foregoing Constitutional Amendment shall be submitted to the qualified electors of the State at an election to be held throughout the State on the first Tuesday after the first Monday in November, 1928, at which election all voters favoring said proposed amendment shall write or have printed on their ballots the words "For the Amendment to the Constitution of the State of Texas, exempting from taxes property owned by churches or strictly religious societies for the exclusive use as dwellings for the ministry;" and all those opposed shall write or have printed on their ballots the words "Against the Amendment to the Constitution of the State of Texas, exempting from taxes property owned by churches or strictly religious societies for the exclusive use as dwellings for the ministry."

Section 3. The Governor of the State is hereby directed to

issue the necessary proclamation for said election and have same published as required by the Constitution and existing laws of the State.

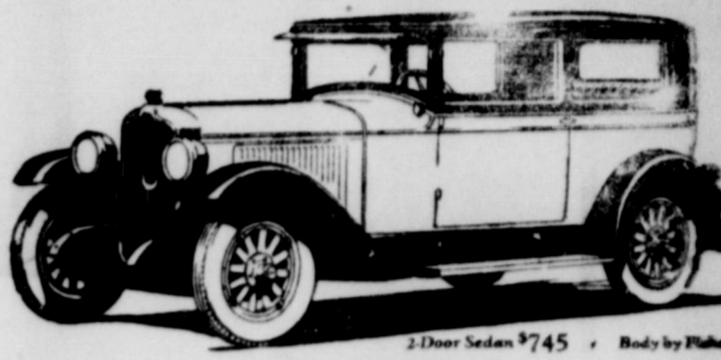

Section 4. The sum of Two Thousand Dollars (\$2,000.00)

or as much thereof as may necessary, is hereby appropriated out of any funds in the Treasury of the State and otherwise appropriated to pay the expenses of said publication and election.

A SUCCESSFUL SIX NOW WINNING EVEN GREATER SUCCESS

QUALITY

that is winning new thousands every week

Pontiac Six has long served as an outstanding example of quality—of materials, design and workmanship. No other six so low in price offers bodies by Fisher—with the high-grade coach-work and materials which Fisher provides. None other offers a 186 cu. in. engine—together with the stamina and long life for which Pontiac is famed. And none other enjoys the advantages of being built in the world's most modern automobile plant.

Why not learn what such high quality of materials, design and construction means to a motor car? Why not drive a Pontiac Six today!

Imper, \$745; Sport Roadster, \$745; Phaeton, \$775; Cabriolet, \$795; Door Sedan, \$825; Sport Landau Sedan, \$875; Oakland, All-American Six, \$1045 to \$1265. All prices at factory. Check Oakland Station delivered, prices—they include lowest handling charges. General Motors Time Payment Plan available at minimum rate.

Let us show you how you can get many beautiful and unusual decorative effects with LOWE BROTHERS MELLTONE—an oil paint for walls and ceilings.

Melltone dries to a smooth, flat finish—without gloss or lustre. Its beauty can easily and quickly be restored time after time, with just soap and water or Lowe Brothers Cleaner. Come in and let us show you the many attractive tints and shades in which Melltone comes.

FREE—"The Art of Color in the Home," a new book containing a chart from which hundreds of color combinations can be chosen. Come in and get a copy.

MUNDAY, TEXAS

PRINTING

Is The Inseperable Companion of Achievement

No business of consequence can be operated without printing. More than 90 per cent of the business of the nation is handled through printed forms, and the business that operates without the necessary forms to keep a detailed account of every transaction is not operating to its fullest degree of efficiency.

Most every business requires printed forms of some kind, and we are prepared to handle any character of commercial printing. We will be glad to assist you in designing form that fill your individual requirements.

The Fall season is approaching, and we urge that you take an inventory of your forms, bill

heads, note heads, and other forms that you use and let us have your order at once. Don't wait until the fall season is on for we cannot give the quick and efficient service then that we are in position to give now, and by placing your order now you will be saving the possible inconvenience of delay in getting them promptly later.

Our plant is equipped to handle all kinds of commercial work, and we appreciate your patronage. Your printing dollars spent in Munday will remain in Munday. Your printing dollars sent elsewhere is gone for keeps. Think it over.
