#### Kracker KrumbC Odd Bits Salvaged At Random

(By Aaron Edgar)

Folks, some of you have been asking for it, so here it is.

It looks like Spring has rounded the corner and is right upon usand that's a rather rash prediction, coming before Easter.

And in Spring a young man's fancy lightly turns . . . You know how it goes, but that's not what we're thinking about.

As the Spring season is approaching, some of you have called to our minds that Kracker Krumbs needs to be plugging along toward a cleanup campaign.

We'll say there never was a better time, and possibly there never was a greater need for a cleanup drive than right at this very moment.

In fact, we'd imagine if Old Man Spring had his way, when he arnived and took one peek at the mess Munday is in, he'd do an "about face" and shy around us like we'd shy around a skunk.

But some cleanup work has already been done. Pruning of trees, plowing of gardens, snatching up loose papers, and the like, have been under way for several days by many citizens.

But the loose papers just blow in from somewhere else with the next shifting of the wind, and within a few hours it doesn't look like you've done anything.

Which is all the more need for a 100 per cent clean up drive, covering the entire town like a blanket of snow.

City officials, business houses, bobby soxers and kiddoes all need to have a mart.

We don't have much alley back of the shop anymore, since the new picture show was erected, but it's as big a mess as it ever was.

It's a sort of "dead end" alley, but it forms a harbor for loose papers, cardboard boxes, etc., that are whipped around by the winds. In fact, it's such a mess that Harvey Lee has threatned to get back there with the little Ford tractor as soon as the Farmall House completes its building pro-

#### Choice In Cage Players Recently Manhattan, Kan., March 18-Particiating in the western N. C.

Howard Shannon Voted Big Seven

A. A. layoffs this week end in Kansas City, Mo., with the Kansas State Wildcats, Big Seven champions, is Howard Shannon, Munday, Texas. A unanimous all-Big-Seven choice he was given honorable mention in the Associated Press all-American poll.

Leading the Wildcat scoring with 239 points on 98 field goals and 43 charity tosses Shannon has averaged 9.56 points per game. Besides his scoring prowess he is a great clutch ball player and does about everything right. One of the smoothest ball handlers and fakers in the game, "Howie" continues to thrill the fans with his spectacular court game. While guarding some of the country's best scorers he has picked up only 50 fouls in his 25 games.

This successful season has seen the K-Staters victorious in their first conference title since 1919. The Cats also copped the pre-season Big Seven Invitational tourney held in Kansas City, Mo., in December. With only one man lost by graduation and this year's freshman squad the strongest yet, prospects for next season appear April 1 Deadline as bright as the gigantic record piled up this season in the 21 victories against only 4 losses which is the best K-State achievement to

house ball teams as Indians, Can- census.

#### Not Satisfied, Smith Wildcat **Drilled Deeper**

NUMBER 35

Many people of this section were disappointed the latter part of last week, when reports got out that the British American No. 1 A. A. Smith wildcat well had "blowed up." She was pumped dry of oil, they said.

But she hasn't "blowed up" according to reports coming from those in charge of operations at the well. Officials just weren't entirely satisfied with the showing of oil, and have decided to drill deeper in an effort to discover

greater pay. Drilling operations are under way this week, with reports coming in Wednesday that drilling is now going on at 5,415 feet. The bit is biting into "lime and churt" which is so hard that an hour of operations yields about a foot in

"Pay dirt" may be reached in the lower Caddo lime, it was said, and drillers expect to hit this when they break through the hard churt.

If this fails to yield production, they still have three more chances, they said. "Black gold" may be found in the Marble Falls strata, For School Census Reports, which are unofficial, are that all three pay sections will be Announcement was made this drilled to unless a stronger yield is week by Merick McGaughey, Co. found higher up than the Ellen-

#### MORE THAN CRUTCH NEEDED

When bad weather damages a food crop, the farmer is the first to feel the impact but he is not the last one to be affected.

The consumer is soon hit by the effect of crop damage. A short corn crop means higher corn prices which in turn increase the cost of feed for beef poultry, and other meat animals. As a result of the shortage in the 1947 corn crop and unfavorable wheat pasture conditions, R. J. Eggert of the Ameri-"Sulfa drugs, overshadowed by the spectacular can Meat Institute points to a 17 per cent cut in achievements of penicillin, are showing a dramatic the number of cattle moving into the corn belt comeback in the animal kingdom," writes Sydney compared to a year ago, as a leading factor affect-

costs through an arrangement with J. B. Hine of Syracuse, N. Y., a former Houstonian, who owns I.a n d adjoining the battleground Mr. Hine agreed to let the contractor pour the silt dredged from the sup on a 219-acre tract, face of charge. There will be about 250,000 cubic yards of silt, and at live cents a cubic yard, the amount usually charged, this would have amounted to \$12,500 but for the generous agreement given by Mr.

Pointing out the need for immediately raising the \$40,000 still needed, Mr. Gregory issued an appeal to civic and patriotic organizations, schools, and all others to help raise the money.

#### **Conservation Costs** Offset By Higher Yields Per Acre

"No matter how you figure," says Emmett Partridge, Chairman of the Knox County Agricultural Conservation Committee, "conservation costs something-usually money. And if we let things go we'll pay for our conservation many times over-and we won't get it. The cost will be greatest if the job is neglected for them it will be paid in high priced food of poorer quality and reduced quanti-

"What many of us forget about conservation," says the chairman, is that it's a national responsibility and that the Nation is one way or another, going to pay for it.

"If we let erosion take our land, we'll soon be paying by having less food and a lower standard of living. And the farmer isn't the only one who will suffer. In fact, the farmer may still be able to

produce enough for his own use. "The longer the Nation waits the more there will be to do and at a considerably higher price. And once the top-soil of a farm gets latives. down into the Gulf of Mexico we won't get it back."

When it comes to ways of getiing the job done, the chairman points out, it costs money and time and energy whether it is left solely to the individual farmer, or done through a publicly supported conservation program. Many of the most needed projects require the

services of people with special engineering skill, Educational helps and the use of costly machinery and equipment also are among the

#### False Earnings

By GEORGE S. BENSON President of Harding College Searcy, Arkansas

WOULD a 3,500 per cent increase in wages or salary interest you? If your income skyrocketed like that, you wouldn't be much worried about the high that. Some of us fail to see the brink of the precipice ahead. We take our increases, and discount the dire results. cost of living, would you? Wait a minute. Are you sure you'd be on easy street? Perhaps you will be surprised to learn that work-Let's Pull WHEN I LEFT Chiers in France have had that amount of increase in their money earnings since 1914, and they still lack the necessities of

A brick layer in Paris worked 48 hours a week in 1914. He took home 45½ francs a week, slightly less than one franc per hour. But today he gets 35 francs per hour. In 1914 he could buy four quarts of milk for his franc or a dozen-and-a-half ergys. But toa dozen-and-a-half eggs. But today for an hour's wages he can buy less than three quarts of milk and barely 7 eggs — if he can find them. Both items, plen-tiful in 1914 are now hard to

THIS MEANS that there are things more important than increases in wages. The consequences of inflation are such that costs of living manage to keep a step ahead of wage boosts. The lesson is this: the average bread-winner cannot hold his own once the inflation spiral gets going. No matter how often wages are increased, he gets farther and farther behind.

Ocsts always outrun increased earnings — unless someone stops the spiral. To stop a runaway team, you have to do more than holler "Whoa!" You have to pull back on the reins, set your heels in the dirt, and maybe make a little sacrifice in terms of direc-

W. C. Taylor of Truscott was

gift, nor a repayment of a loan, nor a sum for investment. It was

Together! na in 1936, a comfortable home could have been purchased there for 10,000 Chinese dollars. Today you'd be lucky to buy a loaf of bread for \$10,000. Matter of fact, a Chinese friend of mine recently enclosed a \$10,000 note to me in a letter. The note was not a gift, nor a repayment of a loan. merely a souvenir, virtually worthless. Oh, this can't happen to America! Anyone who utters that statement is confused, chances are. Actually it has already been

happening to America. The spiral of inflation has cut down buying power, cheapened our money. Today, \$2 are worth what \$1 was worth only a few years ago. This means that if you have insurance or a bank account, the effect of inflation has reduced these by one-half. Loss to savings in this way is very real.

In most lines of industry and in agriculture, our vast produc-tion is doing a fine job of meet-ing unprecedented demand. We must continue to produce, cut costs, and save more. We must do the right thing about these problems. If each of us will act individually and collectively as we know best, the inflation bogey is dead. Remember that the answer is not always to be found wage boosts. Rather, we shall be good citizens if we pull to-gether to bring the cost of living

Mrs. Billy Mitchell spent last here last Monday, visiting with week in McCamey visiting with re- friends and attending to busines

TRY POST-WAR "FASTER ACTING"

The chisel-type cultivation of the Jeoffroy "Soil Control Cultivator" is not new! In fact, the first plows of this type were made over 3,000 years ago by the Egyptians for farming along the Nile River. They used a sharpened stick, while in the Jeoffroy machine, silicanmanganese steel is required to stand present-day speeds and uses. Down through the ages many plows have been used and discarded, but the chisel-type plow has proved to have less draft, control erosion, and conserve moisture more effectively than any other plow invented!

\* Plows and cultivates the natural way. \* Conserves the moisture. \* Prevents blowing. \* Stops erosion. \* Cuts plowing cost in half. \* Constructed to last a lifetime. \* Pre-war prices. \* Made in 4 sizes to fit your power: 7 ft. - 10 ft. - 13 ft. - 16 ft.

FIRST BAPTIST CHURCH

Special Easter services are be-

ing planned for Sunday morning,

with special music, including solos.

The Easter message will be helpful

for the 1848 4-H Club Round-Up,

Photos of both veterans of World War I and II are wanted. Photos Eugenia Butler, and 4-H club spon-

stated the speeches will be few and short this year. That after-copper hanging flower baskets.

The philodendron? I can't benoon will be spent in an education-

demonstration, and Amateur Night comes Tuesday after supper. for the agents to show their boys 4-11 club le. lers. and girls around the campus of

ate that afternoon: there will be a on business. movie for those who plan to stay

#### 3,257 Pacific HOUSEKEEPING War Dead Are On

It all started with a present from the man in my life—a plant that's easier to look at than to spell. "A philodendron," said he, "and it should be able to survive even your yellow thumb!"

"Hrumph" was about the best answer I could dig up on short notice. But mentally I made a vow to nurse that plant with my last strength, if necessary, just to show him. come and help in this special service with your presence and pray-

Confidentially, the reason for my ill-starred luck with growing things

Francisco about March 21. Of the

3,257 bodies which are being re-

turned from Saipan and Honolulu,

203 were returned at instructions

The great majority of the re-

mains were placed aboard the Sch-

wenk at Tanapag, Saipan, on

Feb.uary 26. A brief stop was

made at Honolulu, where an addi-

tional 100 remains were taken

aboard the vessel before its de-

parture March 11 on the final leg

The group aboard the Schwenk

is the largest to be returned from

the Pacific to date. Two other vessels have returned war dead

from the Pacific area and three

from the European battle zones

since the Army's Return of World War II Dead program began last

Army plans call for notification of next-of-kin prior to public an-

nouncement of the identity of

those bodies being returned. The

Army stated that it would also

ask the families to confirm pre-

viously-made plans for final interment of the remains. Under an act

of Congress passed in 1946, survivors of war dead are allowed to decide final disposition of remains,

electing burial overseas or in this country, and choosing a federally-

operated or private cemetery as

It is expected, that from two to six weeks would elapse between

the arrival of the Schwenk and

fixing Up by BURTON WILLIAMS

**Exterminating Rats** 

WITH grain and food conservation a pressing need today, one of the prime considerations of nearly every farmer should be exnearly every farmer should be ex-termination of rats. The annual damage to feed and flocks inflicted by rats amounts to millions of dol-lars. Not only do rats consume and spoil feed, but they kill chicks, spread diseases and damage buildings.

Number 1 on your program of rat extermination should be cleanrat extermination should be cleaning up trash piles and refuse of all kinds, especially in and near farm buildings. Then prepare for the kill by placing unpoisoned bait at locations frequented by rats. Repeat this operation for several nights to coax the rat population out in force. Meat or fish is good bait being a change of page from bait, being a change of pace from the rats' usual grain diet. After of security, place poison on the bait. About a week later repeat

Don't overlook the importance of rat-proofing, however. The illusbe stored on skids and blocks which leave plenty of room underneath

Another effective control measure is to line the walls and floors of cratic primary in July: your farm buildings with asbestos cement board, a mineral product which is impervious to rats. This material, which additionally is weatherproof and fireproof, also comes in the forms of siding and

jective of bettering health condi- the proper disposal of garbage and tions for our citizenship should in- trash and the general cleaning up clude surface cleaning, drainage, of all premises will be, said Dr. the graveling of streets and alleys, Cox, "of inestimable value in helping to keep down summer health hazards such as dysentery, typhoid and poliomyelitis. Good community housekeeping and ordinary sanitary measures equire the prompt removal of all waste matter in and around yards and homes in order to abate the danger of such diseases, and insure good health protection throughout the State."

Dr. Cox stressed the fact that many dangerous diseases are filthborne, and the only possible way to control them is to eliminate the insanitary conditions responsible for their spread.

R. L. Myers returned last Friday night from Dallas where he had spent several days attending to business matters.

GOREE, TEXAS

# Pink Boll Worms

## Can Be Controlled By Kemgas **Delinting and Grading Methods.**

The Kemgas Process is the only Method that can delint and at the same time sterilize Cottonseed to comply with the regulations of the Bureau of Entomology and Plant Quarantine for the shipment of planting cottonseed from Pink Bollworm Quarantine Areas.

Pink Bollworms, their eggs, and larvae are sterilized, and infested cottonseeds culled out by Kemgas delinting and grading Methods.

In Pink Bollworm quarantine areas, Kemgas delinting plants sterilize planting cottonseed at 140 degrees F. instead of the 150 degree temperature required by the USDA of Gins, Oil Mills, and seed breeders who sterilize Cottonseed.

Munday, Texas

I'm always planning and building for the future of West Texas

WHEN the West Texas Utilities Company built the first highvoltage transmission line in West Texas in 1915-the second in the state-it paved the way for the growth and development of this vast area by making low-cost, dependable electric service available to small and large communities alike. Since the building of the first line, the Company has continually planned and built for the future of West Texas until today it operates more miles of transmission line than any other company in the state.

During 1947, the West Texas Utilities Company constructed 121 miles of additional transmission lines; brought electric service to 6,033 more customers, including 514 rural connections. As a result of careful planning there was no curtailment of the use of electric power. In spite of unprecedented demands and despite shortages of materials and equip-

ment, an abundance of electric power was available for all consumers. In fact, 59,879,000 more kilowatt hours of service were provided in 1947 than in the preceding year.

Also, during 1947, more than \$2,800,000.00 in wages were paid to employee citizens of West Texas. During the year \$1,873,000.00 were contributed to local, state, and federal governments.

While supplying the present electric requirements, the people of your service company are devoting full energy to planning and building for the future. During the next four years, the Company will spend \$18,-000,000.00 enlarging plants and existing facilities and constructing transmission and distribution lines in an all-out effort to bring low-cost electric service to more and more people-in their homes, on their farms and ranches, and in their businesses.

# YOUR MONEY BACK IF Super Ecushion tires YOU THE SOFTEST RIDE YOU'VE EVER

Due to the demand for Super-Cushion tires we are able to make this unusual offer for only these few more days. Come in - we'll put a set of Super-Cushion tires and tubes on your car. Drive it for one week. Then, if you don't agree they give you a softer ride than any tire you've ever owned, we'll

replace your old tires and tubes and give your money back. The Super-Cushion is a remarkable new kind of tire. It is bigger and softer than conventional tires and runs on only 24 pounds of air pressure. It is so superior that we can afford to make this amazing offer.

# GOOD YEAR

SUPER-CUSHIONS give you a remarkable new ease in car handling. Your car hugs the road, seems to float through traffic, to flow around curves.

SUPER-CUSHIONS soak up crosswise jolts, soak up vibration. Results: less driving fatigue, less wear and tear on your car, fewer rattles, fewer repair bills.

SUPER-CUSHIONS consistently average more mileage than the best standard tires. More - they make small cars ride like big ones . . . make big cars ride

SUPER-CUSHIONS run cooler; and because they're softer they "roll with the punch", are harder to cut, bruise or blow out.

Arrange for a Super-Cushion trial on your car today.

MILLIONS OF SUPER-CUSHIONS ARE NOW IN USE ON NEW AND OLDER CARS.
