Odd Bits Salvaged
By The Editor

Chief occupation of business people in Munday last Monday morning was waging another war against crickets. The critters were here in large numbers.

Notices in the Stamford paper where the insects paid that town a visit one night, but failed to return. Shucks, we're more hospitable than that! We've kept some of them ever since their first visit — and these sent for reinforcement during the week end.

People have employed various means of combating the insects, but they remain with us. And we guess their appearance is no indication of rain, since we've received none.

And these hot days, minus rainfall, keeps us reminded of the Miller Creek reservoir which will supply area towns with plenty of water. We'll be voting on the bond issue and the water purchase contract come Saturday, September 6.

The water purchase rates remain the same — 30 cents per 1000 gallons — for water treated, filtered and delivered to our overhead storage tank. However, failure of two towns to stay in the water authority has brought the estimated costs down to \$4,800,000, which is the amount to be authorized in the bond election.

The amount of taxes you will pay to the authority, according to consulting engineers, is about 60 per cent of the amount you paid to your city for 1957 — give or take a little — 1959 to 1966; thereafter decreasing to no tax in 1981. However, oil field flooding will probably eliminate the tax in the immediate future.

There'll be savings, too, to the household by the use of pure filtered water — savings on water pipes, appliances, detergents, etc.

We spent a greater part of the Fourth of July having a new water heater installed in our home. The old one failed to last its guarantee period — and we remarked that if manufacturers knew just what this Munday water did to heaters they wouldn't put a 10-year guarantee on them.

So it's not too early to begin thinking about that lake out on the Portwood ranch. As we remarked last week, your vote is needed on these propositions. What will you do with Munday's future?

The moon rocket fizzled out at Cape Canaveral before it got well on its way, and now they're planning a study as to what caused the explosion inside the thing. Guess they've never considered the possibility that a welcoming committee on the moon wasn't quite ready.

Editorial note to Herbert Partridge: It failed to rain between 6 p. m. and midnight Tuesday, Herb. Looks like your promises are not any better than the other fellows.

"A man went crazy over at Goree this morning," said Rev. C. R. Mathis as he solemnly sipped coffee with us Wednesday. "Walter Coffman! He said it would rain today!"

Vera Man Hurt In Wind Storm As Rain Hits County

Electrical storms, accompanied by damaging winds and hail, hit section of North Texas on Wednesday night, and a Vera man was injured in a storm which hit Knox County.

Curtis Watkins, an employee of the A. E. Boyd farm near Vera, was injured when high winds lifted the roof from his house. He was taken to Baylor County Hospital in Seymour with three broken ribs and large welts where hailstones hit him.

The house was reported a complete loss. The storm hit about 5 p. m.

Hail and high wind did \$300 damage to the roof of a modern ranch-style house on the Boyd ranch a half-mile from the Watkins house, according to Lloyd Jones of Seymour, insurance adjuster.

Vera reported between three and four inches of rain on farm-lands of that area. Large hailstones also destroyed cotton and feed crops on several farms of the area.

Lighter rain fell in other portions of the county. An estimated half-inch was reported at Rhineland, .87 at Munday, 1.60 at Goree and 1.25 on the Levi Bowden farm east of Munday. The rain was very light to the west.

Locally, the interest centers around the race for Commissioner of Precinct 4. George Nix of Goree, present incumbent, is opposed by Billy Mitchell of Munday, and the race is expected to draw a large number of voters on Saturday.

One other county precinct, Commissioners Precinct 2, is the only other contest in the county to be decided. Incumbent W. W. Trainham of Benjamin faces Clyde Beck of Vera in this race.

CALLS FOR ASPIRIN

The new and higher mail charges are in effect. To most individuals they won't amount to a great deal — just an extra penny for a stamp now and then.

But to certain kinds of enterprise the cost will be heavy. For instance, as Changing Times, the Kiplinger magazine, puts it: ". . . many a publisher will shortly be calling for more aspirin when he starts calculating his postal bills." One very large magazine operation expects its annual postage budget to increase by \$1,250,000. In many instances, higher subscription rates will go into effect. One way or another the increased postage costs will be passed on to the consumer — as all other overhead costs are and must be passed.

The reason for these and the other increases in postal rates is simple enough. The postoffice deficit has been in the neighborhood of \$700 million a year. Postal employees have been given a deserved wage increase. Thus, something definite had to be done to increase postoffice revenues, test the deficit approach or pass the billion-dollar point.

Unfortunately, however, the increases are confined to three mail categories — first, second and third. This means that a category which has made large contributions to the deficit over the years is still to be operated on a taxpayer-subsidized basis. That category is fourth-class mail, or parcel post. And, to make a bad matter worse, parcel post competes directly with taxpaying private parcel carriers on the national, regional and local levels of business.

In sum, the next needed step is a revised schedule of parcel post charges, which will honestly meet both the direct and indirect costs of providing the service.

Alaska, soon to become the 49th state, is described as the "hottest wildcat oil area in the world today" in an article appearing in the American Petroleum Institute Quarterly. The author says American oil companies have earmarked more than \$100 million for exploration alone over the next two or three years.

Farm Journal points out that farmers stand more to gain than any other group from the repeal of the 3 per cent excise tax on commercial freight transportation. The total saving will be \$50 million, and farmers will reap a third of it.

ALL SET FOR INFLATION

Barring another shooting war, the greatest problem this country must deal with is further depreciation of the dollar.

The stage is all set for a massive new round of inflation. This year's federal deficit is expected to reach \$10 billion. It may be much more.

Inflation can be compared to war in its destructive capabilities. It wipes out savings. If it goes far enough it can lead to internal disorder on a vast scale and even to revolution. It can produce dictatorship and the death of all the freedoms. It can bring on economic collapse — which is what our communist enemies are hoping for.

Labor and business are asked to show restraint in the important matters of wages and prices. This is certainly needed. But the foremost need of all can only be supplied by government. Unbridled government spending, accompanied as it must be by huge deficits, is the most powerful of all inflationary forces. It bears the principal responsibility for the fact that the dollar's value has been cut by half since 1940. A government which attempts to be everything to all its people, and do everything for all its people, is a government that can ruin all its people.

KILLER OF CHILDREN

Burns cause more injury and death among children than any other agent. Every parent should know how to identify and treat them.

This point is stressed by Today's Health, an American Medical Association publication. It then provides some simple but vital rules:

Youngsters will grasp everything within reach, so never allow conditions to exist which can lead to accidents. Keep matches from children; keep pots from edge of the stove, and keep youngsters from fires.

Determine quickly the degree of burn. In a first degree burn the skin is red; in second degree, the skin is blistered; in third degree the skin is charred.

For first or simple second degree burns, coat affected area with antiseptic ointment or olive or baby oil. This relieves pain and prevents skin from cracking and drying out.

For deep second and all third degree burns, call a doctor immediately. Shock and infection may occur. A layman should not attempt to treat burns of these types.

MODERN HOMEMAKING

Recipes . . . Household Helps

By Julia Hunter

HOME ECONOMICS DIRECTOR, LONE STAR GAS CO.

Red ripe tomatoes are so good it is easy to understand why the French once called them love apples and why English swains once presented them as tokens of affection. Because tomatoes are a member of the nightshade family, they were once thought harmful and few Americans ate them before the 1800's. How different are Americans today with tomatoes served at any and all meals.

The current plentiful supply of fresh vine-ripened tomatoes makes it possible to fit this versatile food into any menu. From bright firm slices served with breakfast scrambled eggs to thin slices in a midnight sandwich, tomatoes add color, flavor and food value.

Green bean and tomato salad is more than pleasing served with

barbecue. Drain canned whole green beans thoroughly. Toss them in enough French dressing to coat each bean thoroughly. Let them stand in gas refrigerator several hours. Heap a mound of the beans in a lettuce cup. Top with thick slices of ripe tomato. Sprinkle with minced fresh dill, chives or green onions, part tops.

Make super hamburgers with tomato slices sealed in the meat. Pat seasoned hamburger into thin patties (about half as thick as usual). Put two patties together sandwich-fashion with a tomato slice in between. Pinch edges of patties together to make a seal. Broil 3 inches from full gas flame about 5 to 6 minutes each side for well done. For super cheeseburgers, slip a slice of American process cheese in with the tomato slice.

RECIPE OF THE WEEK

Supreme Stuffed Tomatoes: Cut off tops and scoop out 4 firm ripe tomatoes, saving pulp. Spread tomato hollows with thin covering of anchovy paste or mashed sardines. Combine 3 chopped hard-cooked eggs, 1 minced small onion, tomato pulp, ¼ teaspoon dry mustard and ½ teaspoon salt. Mix well. Fill tomatoes with mixture. Sprinkle with bread crumbs and dab with anchovy paste or mashed sar-

that night as we returned from across the river, we saw the shimmering waters, first a royal purple, then a brilliant green, and then a rich crimson. The fountain was the first of the kind I had ever seen. It cost several thousand dollars.

It was related that a man who had had several drinks in Villa Acuna was returning to Del Rio and when he saw the rapid succession of colors, he figured he was "seeing things" and he exclaimed, "I'll swear off drinking!" Some years later, I was in Del Rio to speak at the high school graduation and the greatest applause of any senior was accorded Dr. Brinkley's son.

CATTLE CONTINUE COMEBACK AS MOVEMENTS BETTER SPACED

Fort Worth, Aug. 18 — The trade was active and cattle and calf prices continued to show some improvement as excessive runs were avoided Monday at Cornbelt terminal markets. It marked the second successive week when cattle feeders around the major market circle had held Monday supplies in check and it paid off in better prices. Actually, supplies last week were about on

par with the previous week but were spread out over five days. This spacing firmed prices and it appeared the same strategy would work again this week on the basis of the opening trade Monday at the major markets.

In Fort Worth the buyers sought supplies in an active manner and strength was evident in the trade from the outset. By the close, fed steers and heifers were around 50 cents higher, while cows were steady to 50 cents up. Bulls were fully steady. Slaughter calves ruled steady to 50 cents higher. Stockers and feeders were strong to 50 cents higher, with lighter weight calves and yearlings in much the better position.

Sales included numerous loads of good to choice fed steers and heifers in the \$22 to \$24.50 bracket. Medium and lower grades sold from \$17.50 to \$22.

Fat cows cleared at \$17 to \$19.50, while canners and cutters drew \$11 to \$17.50. Bulls drew \$17.50 to \$21.50.

To The Voters Of Precinct Four:

I have known Billy Mitchell for 35 years, and I have never known him to start a job he couldn't finish.

He is capable, conscientious and clean.

He is interested in the welfare and interests of others, and truly deserving of the confidence of the public.

In my book, he is tops as a family man, a citizen and a brother. It would make me very happy if you would vote for him and give him an opportunity to serve you as faithfully as he has served those who know him best.

Sue Mitchell Bumpas

(This was written without his knowledge. It is my way of showing my appreciation to him for the time and help he has given me in times when I often call on him.)

calves sold from \$22 to \$25.50 and medium and lower grades sold from \$18 to \$22, while culls sold from \$15 to \$17. Good stocker steer calves cashed at \$27 to \$30 and heifer calves sold from \$27.50 down. Stocker steer yearlings moved at \$25.50 downward. Feeder cattle sold mostly from \$24 down. Choice stockers were scarce.

SHEEP AND GOATS SELL ON STRONGER BASIS MONDAY

Of the some 1,000 sheep and goats on hand at Fort Worth Monday, more than fifty percent of them were goats and kids. The trade on all classes of goats and sheep was active and prices strong, quality considered. Some classes were untested at the ex-

treme top of the price range and strictly choice kinds were lacking.

Good fat lambs cashed at \$21 to \$21.50 and strictly choice kinds were scarce. Cull to medium lambs sold from \$15 to \$20. Stocker and feeder lambs sold from \$19 to \$20. Fat yearlings drew \$18 to \$18.50 and old wethers sold around \$12 to \$12.50. Slaughter ewes drew \$7 to \$8. Aged bucks sold around \$6 for slaughter.

Slaughter goats ranged from hard light canners in the \$5.50 to \$6.50 range, to \$7 to \$8.50 on the meatier kinds. Some goats in the hair sold at \$8.50. Kid goats cashed at \$10 to \$12.

HOGS OPEN STEADY, TOP \$22.50 PAID SPARINGLY

Butcher hogs opened about steady with the low close of last week at Fort Worth Monday. Shippers picked off a few top meat hogs at \$22.50 and the other good and choice hogs sold around \$21.75 to \$22. Mediums sold around \$21 to \$21.50. Sows cashed at \$18 to \$20.

Sharply lower prices on hogs prevailed around Cornbelt markets Monday and market observers expressed the view that Spring pigs were beginning to move to market in sizable numbers. This date is full early for the new crop to be moving to market, however sizable numbers have been reported to be light-weight butchers.

EDWARDS, BONNER INVITED TO JUDGE HEREFORD CALVES

Secretary Henry Elder of the Texas Hereford Association reported from the group's Fort Worth headquarters that Kirk Edwards of Henrietta had accepted the post as one of the judges in the stocker-feeder show and sale at Fort Worth's Stockyards September 4. William Bonner of Gainesville has been tentatively named to serve as a judge but Elder reported he might be unable to serve due to pressure of business.

Both Edwards and Bonner are widely known cattlemen who produce some of Texas best cattle on their respective ranches. Edwards has won the feeder championship at Denver, one of the strongest feeder sales in the nation.

Whitefaced stockers and feeders will show and sell September 4 and Angus commercial stockers and feeders will show and sell on September 5. The sales are jointly sponsored by the Fort Worth Market Institute, the Texas Hereford Association and the Texas Angus Association.

Mr. and Mrs. M. B. Caughran and children of Lubbock visited their mothers, Mrs. J. A. Caughran and Mrs. J. I. Hughes, over the week end.

Last Call — Final Reductions On All Cobb's Goods—

Havana Rises To New Heights

Within five years the skyline of Cuba's capital city has blossomed into one of the world's most impressive examples of modern metropolitan-style architecture. The coastal area shown here had only one building higher than 10 floors in 1953. Today Havana boasts 16 imposing skyscrapers — highlighted by the magnificent new 35-story 600-room Habana Hilton Hotel (right background) and a huge cooperative apartment house (left center). Havana authorities predict the construction boom will continue in high gear since the number of building permits issued so far this year has soared to an all-time high.

Fish Kill Treatment At Possum Kingdom Proves Successful

Recent treatment of Possum Kingdom Lake to kill gizzard shad is proving successful with reports of improved fishing, according to the Director of Inland Fisheries of the Game and Fish Commission.

The 16,500-acre lake was treated August 6 by spraying a synergized rotenone solution from airplanes. This is the first attempt ever made to spray more than 99 per cent of a lake by air application, and the largest volume of water ever treated for a fish kill.

Shoreline counts were made after the spraying operation to determine the number of fish affected. On the basis of preliminary counts, hurried calculations indicate that approximately 40 million gizzard and threadfin shad were killed in the treatment. This figure does not take into account the shad eaten by game fish or by small animals along the shore. Other species of fish were found, but spot checks seem to hold their numbers to the original estimate of one-half of one per cent of the total.

Random shoreline samples were taken at different parts of the lake. Along measured 100-foot sections, Commission biologists found as few as 4 and as many as 84,900 shad. In some sections no fish were found, but this occurred mainly where sheer rock cliffs extended into the water.

By riding the lake of this many shad the game fish food supply has been reduced, making for better fishing over the whole lake, the Director said. Proof of this began showing up as early as Friday morning after the Wednesday spraying when fishermen brought in full strings of large crappie and bass.

Funeral services were held Friday, August 15, in California for Carroll Hunt "Pinky" Benton, 18, who drowned during a swim. He was a former resident of Goree. Among survivors is a sister, Mrs. Idell Montgomery of Van Horn, formerly of Munday.

Let "Experience" Serve You For Another Term!

To Precinct Four Voters:

Should you select me to serve you another term as County Commissioner, it will be greatly appreciated. I feel that I am capable and qualified to serve you in precinct and county affairs.

Our precinct is not broke! As of August 1, 1958, the precinct had a bank balance of over \$30,000, which I am very proud of, and with it in this condition, we can and will improve our county roads in the future.

If I failed to see you during this runoff campaign, I would like to ask for your vote Saturday, August 23. Hoping you will go to the polls and vote, I am,

Very sincerely,

George Nix

IT PAYS TO ADVERTISE

1959 Conservation Reserve Program is Now Available

The 1959 Conservation Reserve Program for Knox County is now available for producers of this county to submit an application for the MAXIMUM ANNUAL FARM PAYMENT RATE on their individual farms, announced H. H. Partridge, Chairman of the Knox ASC County Committee.

Partridge said that in order to be considered for a contract beginning in 1959, certain information is required in the county office prior to September 26, 1958. The annual farm payment rate must be established prior to a Conservation Reserve contract being made. Therefore, it is imperative that producers who are interested in putting cropland under a 5 to 10 year contract beginning in 1959 should make immediate application for the new farm rate. The average payment rate for Knox County is \$14.00 per acre.

A county-wide meeting for all farmers and ranchers will be held in the Knox County Courthouse, District Courtroom, September 8, 1958, for purposes of discussing this program and others, by Jesse T. Gilpin, Knox ASC County Office Manager, Partridge stated. All persons interested are cordially invited to attend this meeting.

Mr. and Mrs. Henry D. Matthews, Sr., enjoyed having their children visit with them during the past two weeks. They are: Mr. and Mrs. L. W. Perrin, Bill and Phil of Austin; Mr. and Mrs. Glen Matthews, Bill and Cindy, of Barboursville, West Va.; Mr. and Mrs. Dorman Followwill, Pamela, Patti and Diana, Denver, Colo.; Mr. and Mrs. G. C. Grand Slam Or Parking Ticket?

By Jeanne Smith, Dodge Safety Consultant

SEVEN SPADES can be a bid for a parking ticket. If you overstay a bridge game. To ignore the sign that says "No Parking from 4 p.m. to 6 p.m." can cost you the price of a new hat!

An illegally parked car can be a safety hazard, and that's why the financial penalties are correspondingly high. Parking in a "no parking" zone impedes the flow of traffic and can cause accidents as other drivers swerve out to avoid the parked car.

Double parking is prohibited for the same reason, and a car parked in front of a fire hydrant is a hindrance in an emergency.

Other areas where parking is both illegal and hazardous are:

- Within an intersection or on a pedestrian crosswalk.
- Blocking a driveway or the view of a traffic sign.
- On a bridge or in an underpass.
- Between a safety zone and the adjacent curb.
- In front of the entrance to a hotel or theater.
- On any narrow street or road where parking might interfere with the regular flow of traffic.
- On the open highway, unless there is clear vision for several hundred feet in both directions.

Parking "just a few minutes" can bring the unwelcome expense of a costly fine and it could cause an accident!

Texas Winners In Soil Conservation Program Announced

Three soil conservation districts and six individuals in Texas have been named winners in a national soil conservation district awards program. Jack Barton, extension soil and water conservation specialist, said the list of winners was released by Good-year Tire and Rubber Company, program sponsor.

The three winning districts were the McLennan County district, representing north central Texas; Marion-Cass district, representing south Texas and the Pedernales district, representing west Texas.

Individual winners were Dave Simons, Rt. 6, Waco, chairman of the governing board of the McLennan district and Carroll Hat-

ter, Sr., Bruceville, outstanding cooperators for the same district. Marion-Cass district selected Dr. Joe D. Nichols, Atlanta, as governing body winner and Ed Rabb, also of Atlanta, as outstanding cooperators.

Orwin A. Ahrens of Sandy and Leonard L. Smith of Blanco were the nominees for the supervisor and outstanding farmer-cooperator awards from the Pedernales district.

Barton said the six Texans, along with other state winners, would be the guests of the sponsor in late November or early December on a trip and vacation to the Goodyear Farms, Litchfield, Arizona.

Too, the districts will be awarded bronze plaques and the individuals framed certificates.

Second place honors in Texas went to the Salt Fork district; Sabine River-Cypress Creek district and the Maverick district.

Outstanding cooperators for the districts were Walter H. Camp, Wellington; Matt Ward, Pittsburg and C. W. Landess, Quemado. These districts and individuals will receive certificates of merit.

TAKING ADVANTAGE OF TEXAS' OPPORTUNITIES

The state of Texas has been recognized by many as the "place to go to" in the industrial expansion of America, and this is logical. We have room, we have climate, and we have resources. And there is a wealth of industry looking for a home.

this situation would be passage by the voters in the November General Election for Senate Joint Resolution Number 4 which would remove these restrictions from the State Constitution which were intended to keep out post-Civil War carpetbaggers — not free-spending tourists and important industries.

Weekly Health LETTER

Issued by Henry A. Holle, M. D., State Health Officer

Is your child starting to school this year for the first time? If so, is he ready for it? There is still some time left before school begins, and now is the time to prepare him for his exciting adventure. He needs to start his school life in good physical health. Have your family physician give him a complete physical examination even though he has periodically examined your child in the last few years. An eye test is very important and teeth should be checked by the family dentist. Now is the time to recheck and correct any defects not found in the past before school begins. Most likely your child has already been immunized against polio, diphtheria, tetanus, whooping cough (pertussis) and small pox, but if he hasn't, have these immunizations started immediately for his own protection and that of his class mates. And by all means don't wait until school starts for those polio shots. Even if all immunizations have been done, be sure to check with your doctor about necessary booster shots. Your child should have escaped these "childhood" diseases by early and correct immunization while he was still in the protective atmosphere of his home, but once he starts school, he will be exposed to conditions that he is unfamiliar with and may not be able to cope with if he is not protected. Be sure and learn how his school handles sudden illness or accidents and your role in avoiding them. He should know how to wash his face and hands, how to comb his hair, and how to use a handkerchief or tissue, not only for blowing his nose, but for covering a cough or sneeze. Perhaps the most important part of your child's preparation for school is his mental and emotional outlook. Learning to give and take, to get along with others, will be necessary at school—and throughout life. If he has felt secure in your affection, has learned to take his place in the family group, shared in small responsibilities and learned to do some things on his own—if he has played with children his own age, the chances are that he will get along well at school. But there are other factors too. Not enough sleep can make him tired and edgy. He may need from ten to 12 hours a night to build up his energy. If you haven't already begun, now is the time to see that your child has plenty of sleep regularly. As parents, you will play the leading role in the development of your child's character and personality. His future depends more than anything else on your support and encouragement in his outside activities. M/Sgt. and Mrs. Jack Hensley and daughters of Fort Sill, Okla., spent the week end with her parents, Mr. and Mrs. Layne Womble. Mr. and Mrs. J. H. Amerson visited in Dallas and Denton over the week end.

Tax-Man Sam Sez:

The Internal Revenue Service questions more tax returns on whether a taxpayer is eligible to claim a dependent than any other item. The allowance of the \$600 dependency exemption on the tax return makes a very important difference in the amount of tax a taxpayer owes. Two taxpayers cannot claim the same dependent, however, children who support their parents as dependents if they have shared the support of one or more of the parents and if they have contributed more than half of the support. Form 2120, Multiple Support Agreement, may be obtained from the District Director of Internal Revenue for this purpose. You may find this worth looking into if the children in your family share the support of your parents.

CONSTITUTIONAL AMENDMENT TO BE VOTED ON AT THE GENERAL ELECTION ON NOVEMBER 4, 1958.

HJR #31—Number Four on the Ballot.

PROPOSED CONSTITUTIONAL AMENDMENT TO BE VOTED ON AT AN ELECTION TO BE HELD ON NOVEMBER 4, 1958. HOUSE JOINT RESOLUTION NO. 31 proposing an Amendment to the Constitution of Texas to provide that all county officials for whom four-year terms of office were authorized in 1954 must resign such office prior to announcing for a different office when more than one (1) year remains unexpired of the term for which they were elected, and providing for the filling of such vacancies in the manner now provided by law. BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF TEXAS: Section 1. White, orange, Parisienne blue, green, gold, black, nutmeg. Sizes 30 to 38. "Each voter shall mark out one of said classes on the ballot, leaving the one expressing his vote on the proposed amendment in counties or other subdivisions using voting machines, the above provision for voting for and against the Constitutional Amendment shall be placed on said machine in such a manner that each voter may vote on such machine for or against the Constitutional Amendment." Editor's note: The Knox Prairie Philosopher on his Johnson grass farm on Miller Creek apparently is making excuses for the way he farms, his letter this week indicates.

Dear editor:
Every once in a while somebody asks me why I don't do a better job of farming.

How come you've got more weeds in your crops, they'll ask me. How come you're always late in breaking your land, late in planting, late in plowing, late in gathering, late in starting over again? How come your fences are down, your gates sagging, etc.?

Well, now, I'll tell you. When a man spends as much time as I do thinking on the international level, he naturally adapts his farming methods to the international plane, and I consider my farm a prefect example of international diplomacy.

For example, say it's time for me to do some plowing and time for the leaders of the world to hold a summit meeting.

Do we jump right in?
Anybody who knows me or the world knows better. Nobody holds a summit meeting until he knows what's going to be discussed and what the answers are and what conclusions can be reached, just like when I start out on a crop, I don't just climb on the tractor and start. I sit down and figure out how much I think I can make, how much plowing it'll take, what the price may be, what I'll do with the money, etc.

To some people this may sound like over-caution, but that's because they don't think in international terms. In the last 15 or 20 years the world has had eight or ten summit meetings, and if the world is any better off than it was before the leaders met, it's hard to tell, and consequently it doesn't matter how long it takes to get ready to meet at the summit. Rushing into a summit meeting is like me rushing into a

farm year. Not going to get anywhere anyway, so me and the world leaders both might as well take our time.

The way I figure it, the world and this farm both are going to be here, whether the statesmen are at the summit or I'm under a shade tree.

Yours faithfully,

DIVISION OF ESTATES EXPLAINED
The death of an intestate person (one who has made no will) may give rise to many problems regarding distribution of his separate estate. In the preceding column we investigated the manner of dividing the community estate upon the death of a husband or wife. Now we shall see that, where separate property is involved, a completely different set of rules applies in determining heirship and apportioning the estate among the rightful claimants.

It may be well to recall that the separate estate of a husband or wife includes property owned by either before marriage, and that which is acquired after marriage by gift or inheritance. Any other property acquired after marriage is presumed by law to be community property until

the contrary is clearly proved.

Now here is a general idea as to how your separate property will be divided if you do not make a will with contrary provisions prior to your death.

If your husband or wife survives and if, in addition, there are surviving children or descendants of previously deceased children, the children and their descendants immediately obtain a full (fee) title in two-thirds of the real estate involved. The surviving spouse receives a life interest in the remaining one-third of the real property, which passes on to the children and their descendants upon the death of the spouse.

The rule for distributing personal property — cash, stocks, bonds, furniture, or any other items not constituting real estate — is different. Here the surviving spouse gets full ownership of one-third, and the children and their descendants inherit the balance.

Now suppose your husband or wife survives, but there are no surviving children or their descendants. In this case the surviving spouse inherits all of the personal property involved.

With regard to real estate, the survivor obtains full title to one-half, and the other half is divided between your mother and father, if both survive you. If only one of them survives, he or she receives only half of this portion, and the other half (or one-fourth of the entire real estate) will be divided among your brothers and sisters (and their descendants) who survive. If there are no surviving brothers and sisters and their descendants, then the one surviving parent inherits the full

one-half.

Where no parent survives, but there are brothers and sisters and descendants, the full one-half is divided among these survivors.

And, if there are no parents or brothers and sisters (and their descendants) surviving, then the surviving husband or wife inherits all of the real estate.
