Number 52.

## Knob Knocker Suspects Here Freed

### Special Events Scheduled Here On Mother's Day

Special services at the Baptist and Methodist churches here and a mother-daughter program to be presented by the Young Women's association of the First Baptist church Monday night had been arranged Thursday as features of the observance of the Mother's Day anniversary in Munday.

During the morning service at the Baptist church, expression pupils of Mrs. H. F. Barnes, pupils from the grade school classes of Miss Maudie Mae Bennett and Mrs. Riley B. Harrell, and a music program under the direction of Mrs. Louise Ingram, will be presented.

At the evening service, a program of special songs, including old favorites, will be given. Those attending either service, and especially the morning service, were urged to wear a flower—red if mother still is living and white if she has passed beyond.

The program to be given by the Young Women's association at the Baptist church Monday night follows:

- Leader, Miss Leona Keel.
- Scripture reading, Anna Mae West.
- Song, "Mother", by Y. W. A.
- "Christ and Mothers of the World", Dossie Hammond.
- Cartet, "Mother's Prayer", Marjorie Harris, Irene Bowden, Orla, and Lela Brock.
- Reading, Lela Brock.
- "Great Sayings About Mothers", Christine Burton.
- "Bible Mothers", Lillian McGlothlin.
- Duet arranged by Vivian Rogers.
- "What I Like Best About My Mother", by members of Y.W.A.
- Sole, Ozella Brock.

### Expect Crop of Wheat To Equal Last Year Wheat

Despite the fact that the wheat and oat crop in portions of the Munday territory likely will be short, the yield for this section as a whole probably will be about as much as last year, according to reports to Jack Mayes, manager of the Munday Mill and Elevator Co.

While the average per acre yield may be somewhat less than a year ago, the acreage has been sufficiently increased to more than make up for the drop. Mr. Mayes does not believe, however, that the per acre harvest, when the section as a whole is considered, will be materially less.

A number of individual farmers, however, reported during the last week that the per acre yield will show a material decrease. John Michalik, who lived on route two, reported that he does not expect to harvest more than a third to a half as much wheat and oats per acre as last year.

Information to Mr. Mayes indicates that wheat in the Vera community is about as good as anywhere in this section.

### Weinert Next Munday Baseball Opponent On Local Grounds Sunday

Some more games of the "crucial" variety which might go far toward deciding the eventual pennant winners are on tap Sunday for followers of the Brazos Valley league.

Munday, with the kind of team that the fans write home about is to play at home, (with Weinert as the invading foe, in the first game to be played on the new field situated in the Jack Wallace pasture a mile west of town. The new field, in the opinion of Manager Howell Burton, will be both more convenient and safer for spectators, and will permit better baseball without any confusion attending ground rules. The game will start at 3 o'clock.

While Weinert thus far has looked to be the weak link of the league, Burton will take no chances. If plans work out right, the locals even may present a strengthened front. Burton is fishing for another infielder, and if he gets him, the hard hitting Wallace will be shifted from third base to the outfield. The Munday-Weinert game is "crucial" only in the sense that

### ARRANGEMENTS COMPLETED FOR FUNCTIONS OF COMMENCEMENT TIME AT MUNDAY HIGH SCHOOL

Details of the arrangements for various of the exercises attending the graduation of this year's class at the Munday High school have been virtually completed, according to information given Thursday by H. H. King, superintendent.

Mr. Riley announced that Miss Eleanor Jungman, daughter of Mr. and Mrs. Lee Jungman, has won valedictory honors of the class and that Miss Maryvonne Reeves, daughter of Mr. and Mrs. M. H. Reeves, is salutatorian.

C. B. Breedlove, superintendent of schools at Haskell, has accepted an invitation to deliver the commencement address and Rev. J. H. Crowe, pastor of the Methodist church here, will deliver the baccalaureate sermon.

Featuring events of the graduation period will include: the annual Senior class over night camping trip to Leuders, leaving on Thursday, afternoon, May 12, and returning the following day; the annual class night program on Saturday night, May 14; the baccalaureate service on May 15; and the commencement exercises on the night of May 17. Final examinations for members of the Senior class will be held next week, while those for the remaining students will be during the week of May 16. Schools will close May 20.

The class night program will be presented in its entirety by members of the Senior class, and each member of the class will have a part in the program. The numbers will include the valedictory and salutatory addresses, the class history and prophecy, and the presentation of the "key of knowledge" to this year's Junior class.

### Munday Trounces Sunset 10-1 To Win Second Game

Munday rung up its second Brazos Valley league victory of the season in most impressive fashion by a 10 to 1 score at Sunset Sunday while Abbott, elongated twirler, was turning in the best pitching performance of the league season thus far.

By its victory, Munday advanced to a tie for second place in the league standing, and demonstrated enough power and polish to establish themselves as being much in the running for championship honors.

While the team as a whole functioned smoothly, the pitching of the tall boy from Truscott completely dominated every other factor. He held the Sunset aggregation to four safe hits, and the rest of the time, had them knocking easy infield rollers. The one run scored off his delivery was unearned.

He fanned seven, issued a single base on ball and contributed toward his own victory by getting two hits, scoring two runs and driving in two others.

Sunset likewise displayed much greater strength than the score might indicate. Munday did all of its scoring in three innings, Sunset helping things along with 11 misplays. After Munday had finished its scoring for the day by counting four runs in the fifth inning, the teams engaged during the final four innings in about as pretty a battle as the most rabid fan could desire. The best Munday could do during those stanzas was two men on base while Sunset was putting on a soft spot, it is due for a surprise.

### CALENDAR

**BRAZOS VALLEY LEAGUE STANDINGS**

Club	Won	Lost	Pct.
Rochester	3	0	1.000
Munday	2	1	.667
Bomarton	2	1	.667
Rhineland	1	1	.500
Sunset	1	1	.500
Goree	0	2	.000
Weinert	0	2	.000
Knox City	0	3	.000

### Results Last Sunday

**Another Victory!**

The box score:

ab	r	h	po	a	e
Munday	4	0	1	3	2
Jennings, 2b	4	0	1	2	0
Mayes, 1b	3	0	0	12	0
McGraw, cf	5	0	0	0	0
Rayburn, ss	2	1	1	3	2
Wallace, 3b	4	2	0	9	2
Pogue, c	3	3	1	7	0
Abbott, p	4	2	2	9	12
Killion, rf	4	1	1	1	0
King, lf	4	1	1	0	0
Totals	36	10	9	27	21

Summary: Three base hit—Smith. Two base hit—King. Sacrifice hit—Mayes. Stolen bases—Rayburn, Wallace 2, Pogue. Struck out by—Abbott 7, Lane 6, Smith 5. Base on balls off—Abbott 1, Lane 3, Smith 1. Pitchers record—10 runs, 3 earned, 8 hits off Lane in five innings. Losing pitcher—Lane. Hit batsman—Jennings by Lane. Double play—Lane, Draper, Yast and Smith. Umpires—Stubblefield and Haney.

Miss Florence Williams, manager of the telephone office here, who has been ill with influenza for more than two weeks, had not made the progress toward recovery which had been hoped for, according to reports this week. Her condition, however, was not regarded as serious. Mrs. Florence Williams, her mother, who also was ill earlier in the week, has recovered.

### Thinking Out Loud

By J. A. K.

President Hoover and TOL spent the week-end fishing. Mr. Hoover going to his Rapidan camp on the Potomac, while TOL contented himself fishing from the banks on the Arkansas point at Lake Kemp.

President Hoover carried with him his secretary of something, Mr. Wilbur and numerous other dignitaries, while TOL enjoyed the company of Dr. and Mrs. Joe Davis, U. R. Houser and the Kennedy kids.

Our camp wasn't anything like as elaborate as the Hoover camp, but we'll bet a tubful of doughnuts the Kennedy kids had just as much pleasure out of the trip as did Mr. Hoover or any member of his party.

That's just one of the things about fishing. The fellows in the Model T can get as much kick out of yanking out crappie and bass as do the fellows with the Rolls-Royce and elaborate camping equipment.

But somehow when TOL goes fishing the Bunker of the finny tribe seems to have been appeased. We tempted them with live, wriggling minnows, of the red horse variety. We offered them beef liver and angle worms, halfpigs and various kinds of bugs, but they refrained from as much as nibbling, and our party was compelled to content themselves with stress-bought steaks.

As a fisherman TOL ranks well especially when we recall the remarks of Chas. Haynie, fisherman deluxe, who contends that in order to be a successful fisherman one must necessarily possess more intelligence than the fish.

Somehow the fish this season seem to have entered into a conspiracy to add to the depression, and if Mr. Hoover's luck wasn't any better than our's he'll likely be doing something about it.

After numerous thrusts, the golf match between the presiding officer of this column and O. C. Harrison, grand goblin of the Baylor County Banner, is to be played on the Munday course Friday afternoon at three o'clock, the loser of the match is to sweep out the winner's printing office, and in either event there will likely be a full gallery present, and numerous suggestions offered.

Following his election as president of the Seymour Golf and Country club O. C. became somewhat "chesty" and hurled his challenge. Along about this time TOL was elected mayor of this municipality and as a consequence also became somewhat afflicted with ego, and under such a spell accepted the challenge, so the contest is on, and we propose to lay on McDuff, with never a white feather.

According to the Stamford Leader, thieves broke into the home of Editor George English and stole his pants during the night. After extracting sixty-five cents from the pockets the trousers were dropped in the front yard. It isn't difficult to understand why the burglar didn't want George's pants, but it's very difficult for us to understand where the sixty-five cents came from.

### FISHERMEN LUCKY

E. Duval is one of those who seems to have the habit of proving his fishing yarns. While editors and others were doing little but yawning the balmy atmosphere at Lake Kemp on the opening day of the fishing season, Duval, Harry Williams Lee Coffman of Goree and the Duval boys were catching big ones at the Seymour crossing, they reported. A crappie weighing nearly two pounds was caught along with the rest. The individuals of the party said they took almost the limit.

### Free Hauling Service In Munday For Clean-up Campaign Next Week

With a view of improving the sanitary condition of the city and to combat the breeding of flies and mosquitoes, which spread disease, every citizen of Munday is urged to clean up around his premises not later than next Tuesday, May 10th.

The city will cooperate in this clean-up movement by removing all cans, scrap iron and such materials that cannot be burned without charge. The only requirement being that it be placed in the alley where it can be loaded, and all cans and other small rubbish should be placed in a container to facilitate easy loading. All rubbish that will burn should be disposed of in this manner.

This movement should prove very helpful in numerous ways. It should provide temporary employment to a number of unemployed in the city, for there are but few homes in the city that does not need some labor expended in putting it in first class condition. Have the weeds cut and burned, gather all cans and rubbish and dispose of it as suggested above, and by so doing we can eliminate much of the danger from various forms of sickness.

This is an ideal time to clean up your premises, and let's get busy and get the job done not later than Tuesday, May 10, as making the rounds of the alleys on that date.

### DEMOCRATS OF COUNTY DUE TO CLIMB ON GARNER BAND WAGON AT PRECINCT MEETS SATURDAY

Democrats of Knox county are scheduled to climb with gusto aboard the John Garner band wagon at precinct conventions to be held Saturday at various of the voting boxes in county. Formal call for the precinct meetings was issued by Charles Moorhouse, of Benjamin, chairman of the county Democratic executive committee.

The conventions for the two Munday voting precincts will be held jointly, starting at 2 p. m., according to R. B. Davy, precinct chairman.

The precinct conventions will be held for the purpose of selecting delegates to the county convention to be held at Benjamin, May 10, and to decide whether precinct delegates are to be instructed as to candidates and platform.

Any Democrat living within either of the Munday voting precincts who possesses a poll tax receipt or exemption certificate, and who will take the required pledge to support nominees of the party will be privileged to take part in the precinct meeting.

While the submission and adoption of resolutions instructing the precinct delegates to vote and work for the nomination of John Garner for president seemed virtually certain, interest developed in the meeting over the possibility that an attempt might be made to secure instructions for Governor Franklin D. Roosevelt as a "second choice" candidate. Opposition was regarded as certain in any attempt to designate any second choice.

### Brief Items Of Local News

#### MORE RAINFALL HERE

Prospects for the crop season in this section were further brightened during the last week by the falling of .38 inches of rain, according to information given by A. E. Whittemore. Heavily clouded skies Thursday gave promise of further moisture which, farmers say, would be beneficial.

The rainfall during the week increased the total for April here to 2.44 inches, Mr. Whittemore said. The rainfall during the last two weeks has caused farmers to center their attention on the planting remaining to be done.

Bounties have been paid in Knox county on nearly 4,000 jackrabbits since the bounty offer was put into effect several weeks ago, according to a note to the Times this week from Marvin Chamberlain, county clerk. A considerable proportion of the number, it was said, have come from the Munday and Goree sections. County officials again reminded that the scalps should be brought in in batches of not fewer than 20.

#### GET BURGLARY SUSPECTS

Two men arrested at Knox City Tuesday night and accused of the burglary of the high school there are being held in the county jail at Benjamin, according to information received here Thursday. The suspects were taken to Wichita Falls by George Harberger, Knox City police chief, to permit a comparison of their finger prints with prints on broken glass of the window through which the school is believed to have been entered, it was added. The finger prints, tallied, officers said. Groceries alleged to have been taken are alleged to have been found in possession of one of the suspects, it was said.

#### FIRE WRECKS CAR

The coupe belonging to Ben Guinn and driven by Earl Bentley at the time was almost completely wrecked by fire which broke out while it was moving along the state highway about three miles south of Munday Saturday afternoon. Mr. Bentley said the first warning he had was when the flames blazed up so suddenly from the engine that he escaped with difficulty. While the cause of the fire remains uncertain, it probably was due to an electric short, it was reported.

Among the fishing parties on Lake Kemp first of the week was a party composed of Art Jungman, H. H. Reed and others, who made a very fine catch of crappie and bass.

### Watchman Tells of Being Drugged By Knob Knockers

Four youths taken into custody late Wednesday for investigation in connection with the knob knockings at the Munday and Seymour postoffices early Wednesday were released Thursday afternoon. Officers said they were cleared of any connection with the occurrences.

Knob knockers who battered open the safe at the Munday postoffice early Wednesday morning obtained about \$28 in stamps and cash. Postmaster J. B. Reneau reported.

Walter Bevers, night watchman, reported that he was made captive, drugged and left helpless, presumably by the crackmen, before the raid on the postoffice was made. After forcing open the large safe, the intruders failed in their effort to open an inside strong box containing several hundred dollars in currency and more than \$5,000 worth of stamps, according to information given by Postmaster Reneau. Damage estimated at about \$100 was done to the safe. Several hours of work were needed Wednesday before the battered box was opened by Grady Beck and it was determined definitely that the crackmen had not looted it.

Sheriff C. R. Elliott of Knox county and Sheriff Arch Holmes of Baylor county, cooperating with a federal agent who arrived here late Wednesday, worked Thursday on the theory that the same group of crackmen had attempted without success earlier in the night to open the safe at the Seymour postoffice. The knob was knocked from the safe at Seymour but it was not opened, according to reports received here. The lock was so badly damaged, however, that postal employees were unable to get into it at office opening time Wednesday to obtain such supplies as stamps and money order blanks needed in routine business.

The abandonment by the knob knockers here of the attempt to break into the strong box after the safe had been opened was attributed to the fact that they were discovered while at work by Raymond Franklin, Roy Hicks and N. J. Loffer, who chanced to be downtown at the time. Unsuccessful in locating Mr. Bevers, Mr. Franklin went to the home of Frank Trammell and reported that the burglary was in progress. Hicks and Loffer remained within sight of the front of the postoffice. The crackmen, however, apparently having taken fright when Franklin started the engine of his car, had fled through the rear exit of the postoffice when Mr. Trammell and Constable Grady Blake reached the scene.

To gain entrance to the postoffice, the knob knockers had first forced open the door from the sidewalk to the lobby, and then tore a panel so as to reach and turn the lock on the door between the lobby and the interior of the office. They then attacked the safe with heavy hammers after having stretched a sheeting across the large window opening upon the sidewalk.

It was the noise of the pounding on the safe that attracted the attention of Franklin, Hicks and Loffer. Ascertaining that the knob knockers had fled, Mr. Trammell went in search of Mr. Bevers and found the watchman in his quarters in the city hall and in a stupor from which he could not be fully aroused.

It was late Wednesday afternoon before Mr. Bevers had fully recovered his faculties, he related. "I was making my rounds at about 2 o'clock, when a stranger walked up to me from a car parked nearby," Mr. Bevers related. "When he reached me, he grasped me by the arm, pressed what I took to be a pistol against my side and ordered me to the car. I was ordered into the machine, which was driven into a dark alley and stopped. One of the men poured something into a cup and told me to drink it. When I protested, one of the four men in the machine remarked, 'You will drink this and like it; we aren't going to hurt you but if we hadn't thought you were a pretty good fellow, you would be

SUBSCRIPTION PRICE \$1.50 PER YEAR

R. B. DAVY.

The Munday Chamber of Commerce is to be congratulated upon being secured as its president for next year a man so well qualified as Mr. R. B. Davy.

The responsibility of being a member of the Chamber of Commerce is a pleasant one even in the best of times. The demands of the office are not good. It carries no operation except the knowledge of the individual himself that he is helping to contribute his part toward his community welfare. As an asset, the place is more of business liability than an asset, because the occupant of the position is likely to be cussed if he does not cussed if he doesn't.

Mr. Davy exemplifies to a supradegree the qualities most needed during times like these. He is a conservatively progressive, of a naturally optimistic disposition, enjoys the greatest confidence of his workers and has a wide circle of friends among influential people of other communities.

Mr. Davy succeeds to the place which John Spann has filled with distinction during the last year. Obviously no other president of a Munday Chamber of Commerce has had such trying problems as Mr. Spann. The very fact that he has led the organization together in chambers of commerce are generally by the wayside in many communities is, to our way of thinking, one of the outstanding accomplishments in the whole history of Munday.

Now that Mr. Davy has accepted leadership, the least that other citizens can do is to be ready when he calls upon them, and to contribute their small share of moral and financial support without being led upon.

SUNDAY BASEBALL.

The agitation against Sunday baseball in the Brazos Valley league seems to have subsided quickly without leaving bitterness, and for our part, we are glad.

We do not believe there has been choice between Sunday baseball at week day baseball. Our opinion is that the choice must be made between Sunday baseball and no baseball at all.

MORE INDUSTRIES.

An item of news in this week's issue of The Times relative to the plans of the West Texas Utilities Company to seek more industries on the territory it serves is one which should demand the attention of citizens of Munday.

zens. But for many types of plants, Munday offers as many advantages as any other town in this section. One immediately think of, as possible needs for this section, such things as a laundry, ice cream manufacturing plant, bottling works.

However, regardless what the opportunities here may be, the community can't lose by working with the utilities company in the matter. An aggressive cooperation might return big dividends.

LOWER COUNTY VALUATIONS

While we are trying to find some way of lowering taxes, we would like to suggest that our county commissioners lower valuations of all land and homes in the county. We would not wish to suggest just exactly how much of a reduction could be made, but we see no reason why a 20 to 25 per cent reduction could not be made.

Our state taxes are based on the values as assessed in the county. If we have a 75-cent state tax rate, and our valuations are lowered 25 per cent, the land and home owners would only pay 75 per cent as much state tax as they are now paying.

Many of the salaries of the county officers are based upon county property valuations. With a lowering of county valuations, the officers would receive lower salaries. This would offset the lowered tax collected by the county.

We have heard quite a little talk to the effect that the county commissioners should lower their own salaries. We want to say in defense of the commissioners that their salaries are set by statute and cannot be changed by the commissioners. However, should the tax values be lowered, so that the total valuation for the county is below \$6,500,000, the commissioners' salaries would be lowered from \$100 per month to \$75 per month.

The county collector and county tax assessor are both paid commissions and their salaries would be lowered. With the lowered salaries and a cutting of expenses where possible, it appears to us that the county could well meet its expenses with a 25 per cent lowering of tax values on all lands and homes in the county.

We believe that the commissioners of Knox county would do well to make a very close study of the county's revenues and try to give the tax payers some relief in the coming year. Most people want to pay their taxes, but under present conditions many are finding it impossible to pay. This is a time when everything possible should be done to enable the property owners to hold their property until general conditions improve. Lower taxes will help.—Gorce Advocate.

WHY WORRY ABOUT IT?

Either you are successful or you are not successful. If you are successful there is nothing to worry about. If you are not successful, there are only two things to worry about. Your health is either good or you are sick. If your health is good, there is nothing to worry about. If you are sick there are two things to worry about. You are either going to get well or you are going to die. If you are going to get well, there is nothing to worry about. If you are going to die, there are only two things to worry about. You are either going to heaven, or you are not going to heaven. If you are going to heaven,

there is nothing to worry about. If you are going to the other place, you will be so busy shaking hands with old friends and acquaintances that you won't have anything to worry about. So why worry?—Fort Worth Rotagraph.

THE HON. BANANA

The banana are a remarkable fruit. He are constructed in same architectural style as Hon. Sausage. Difference being skin of sausage are habitually consumed, while it are not advisable to eat rapping of banana.

Perhaps are also intrusting the following difference between the two subjects. Bananas are held aloft while consuming. Sausage usually left in reclining position. Banana first green in culler, then gradual turn yellowish. Sausage start out with indefinable culter (resemble terrier cotta) and retain same hue indefinitely.

Sausage depend for creation, etc. upon human being or stuffing machine, while banana are pristin product of Hon. Mother Nature. Both article resemble the other in that neither have pit or colonel of any kind.

In case of sausage, both conclusions are attached to other sausage. Hon. Banana, on other hand, are joined on one end to stem; other terminatio are entirely loose.

And finally, banana are strictly member of vagabond kingdom, while affiliation of sausage are often undecided.—Essay by a Japanese schoolboy, in The Texas Outlook.

I LIKE THE DEPRESSION

(Note.—The following, reprinted from West Texas Today, official organ of the West Texas Chamber of Commerce, is an address delivered with hilarious success by Henry Ansley, Amarillo newspaper man, on recent occasions.)

following the Biblical admonition, "Love your neighbors". One of my neighbors has one of the best looking wives I have ever seen. She is a dandy. I am getting acquainted with my neighbors and learning to love them.

Three years ago I ordered my clothes from a merchant tailor—two and three suits at a time. All my clothes were good ones. I was always dressed up. But now, I haven't bought a suit in two years. I am mighty proud of my Sunday-go-to-meeting clothes. When I dress up, I am dressed up, and I don't mean maybe. I like the depression.

Three years ago I was so busy and my wife was so busy that we didn't see much of each other, consequently we sort of lost interest in each other. I never went home for dinner—at 6:30 o'clock, I never had time to go anywhere with her. If I did go on a party, I could never locate her, since there was always a blond or a red-head available. I didn't worry about it.

My wife belonged to all the clubs in town. She even joined the young mother's club. We don't have any children, but she was studying—and between playing bridge and going to clubs, she was never at home.

We got stuck up and hifalutin. We even took down the old family bed and bought a set of twin beds on the installment plan.

When I would come home at night, if my wife was at home, she would already be in her bed and I would crawl into mine. If she came in first it would be vice versa.

We like the depression. We have come down off our pedestal and are really living in my house now. The twin beds are stored in the garage and the old family affair is being used now. We are enjoying life. Instead of taking a hot water bottle to bed these cold nights, she sticks her heels in my back just like she did before Hoover was elected.

I haven't been out on a party in 18 months. I have lost my book of telephone numbers. My wife has dropped all the clubs. I love all over again. I am pretty well satisfied with my wife. Think I will keep her, at least until she is 40 and then if I feel like I do now, I may trade her for two 20's.

I am feeling better since the depression. I take more exercise. I walk to town and a lot of folks who used to ride Cadillac are walking with me. I like the depression.

My digestion is better. I haven't been to see a doctor in a year. I can eat anything I want to.

I am getting real honest-to-goodness food. Three years ago we had flat mignon once a week. Now we have round steak with flour gravy. Then, we had roast guinea hen. Now we are glad to get sow bosom with the buttons on it.

I like the depression. My salary has been cut to where I can't afford to buy lettuce and spinach and parsley, and we can't afford to have sandwiches and frozen desserts and all that damfoolishness which has killed more good men than the World war.

I like the depression. Three years ago I never had time to go to church. I played golf all day and besides I was so darned smart that there wasn't a preacher in West Texas who could tell me anything.

Now I go to church regularly—never miss a Sunday.

Losses Caused By Cattle Tick In Feed Tests

College Station, Texas.—Cattle ticks cost 111 pounds of beef per cow and calf during a 160-day period in a cooperative feeding experiment to test creep feeding of spring calves on the ranch of the Callaghan Land and Pastoral company in Webb county, it was disclosed recently when ranchers gathered for a field meeting there.

This startling fact was entirely apart from the object of the experiment, the preliminary results of which showed that calves creep fed for 160 days in a 2,000-acre pasture to supplement their mother's milk gained twice as much as those getting only pasturage and mother's milk in a special 1500-acre pasture, and more than three times as much as a third lot turned into the main herd with their mothers.

This is the first experimental evidence of the value of creep feeding which has spread rapidly in Texas as a result of two years of demonstrations begun on small ranches and livestock farms by county agents and bears out enthusiasts for the practice who brand it the greatest improvement in cattle feeding in a generation.

The experiment was conducted jointly by the Texas agricultural experiment station and the U. S. bureau of animal industry, with the aid of the Texas A. and M. College extension service.

Calves dipped twice for ticks during the period weighed 65 pounds more per head than those dipped only at the start, and cows dipped twice outweighted those dipped once by 46 pounds per head. Cows dipped once and put on clean pasture gained 28 pounds while those dipped and put on infested range lost 21 pounds per head during the period.

The creep fed calves gained 210 pounds each, or 1.31 pounds per day at a feed cost of 2 1/2 cents per pound; the second lot in a special pasture without supplemental feed gained 111 pounds apiece or .69 pounds daily; and the third lot turned into the main herd gained only 49 pounds or .43 pounds per head per day. The calves weighed about 275 each last Aug. 17 when the test began.

calves were creep fed at \$5 more per head than the cows in the other groups at the end of the period, due to better fleshing condition.

Guadalupe county farmers apparently believe that prosperity will "be riding six white horses when she comes", for they have organized a stallion circle and bought two Percheron stallions from A. and M. College as a start toward farm-raised farm power.

A Canyon dealer was persuaded by the county agent to stock a ton of limestone flour and sold out before having time to secure another shipment. Feeders bought it as a result of demonstrations showing that limestone fed to cattle and sheep gives better gains and prevents certain diseases.

By swapping popcorn to members of her club for curtain material, upholstery, wall paper, and other things she needed in her room, Mrs. Oscar Smith, bedroom

demonstrator of the Brad community in Palo Pinto County, has been able to continue improving her bedroom. She also has two white rabbits which she expects to exchange for furnishings needed.

In spite of the fact that nearly half the turnips froze while Mr. and Mrs. J. H. Harrell of the Pleasant Valley community were busy with an almost worthless cotton crop, a profit of \$96.25 was realized on one-half acre of turnips, reports Miss Ruby Matshburn, Lamb county home demonstration agent. From this small plot, 16 truck loads of turnips not tops were sold to buyers who came from a nearby town. The total cost of raising the crop was \$9.70.

Thirty-two of the 38 baby beefs fed by San Saba county 4-H boys and girls last winter made an average of \$7.08 profit above feed, which was all home grown except the cottonseed meal.

## Utilities Firm Plans Industrial Survey In Area

Ablene, Texas, May 5.—To encourage the industrial growth and development of cities and towns served from its widespread transmission lines, the West Texas Utilities company has reorganized its industrial development department and promoted Harold D. Austin, former assistant commercial manager, to the management of the project, according to word received here from the company's office. Austin will continue to make his headquarters in Abilene.

Similar work has been done in the past, according to company officials, but the new program contemplates a definite and aggressive plan pointed toward the industrial development of the 125 progressive cities and towns served by the company.

The importance of the work planned by the new development is declared to have been shown by an imposing array of facts assembled from opinions and surveys of noted industrialists and economists. The past decade, it was pointed out, has been marked by an important decentralization of industry. Data on file show that progressive small cities and towns are becoming more and more the favored locations of factories and industries. Economists contend that manufacturers are realizing that the big city's industrial leadership. Smaller cities, they have found, are more pleasant places in which to work. They are less crowded and less falling. Productive work is more efficiently handled in the small town, it has been shown, for less human energy is consumed in getting to and from the job. Also more economical factory operation is possible, due to the fact that neither land costs nor living costs are so likely to be inflated.

An announcing the objective of his department, Austin said: "The former concentration of power supply districts the layout of American industry for many years. It drew manufacturing from the small towns and the countryside into the large crowded cities. "But the electric power supply of today is widely distributed. It spreads itself over the countryside providing the small communities with a power supply equivalent in quantity, quality, accessibility and price to that of the largest metropolitan centers. "And because the small city is not hampered with metropolitan overhead costs, it is proving itself a better location for manufacturing than the metropolis.

"To take advantage of this economic shift, we plan to disseminate important information in regard to the industrial supremacy of West Texas towns and cities. We plan to devote considerable time, energy and money in determining the various advantages of the various towns we serve and in bringing this information to the attention of factories and industries throughout the United States. "Our facilities will be available to chambers of commerce, civic organizations, industries, and all bodies working, as we are for the growth and development of West Texas.

"Events on file at the company's office show that the West Texas Utilities company has been instrumental in influencing manufacturing to locate in West Texas. The result of new construction of national resources in West Texas makes the natural and logical location of numerous industries, and company executives believe that the operation of the new industrial development department, in cooperation with established local organizations, will be productive of benefits and results for the company and the West Texas, it was declared.

## Knob Knocking

(Continued from front page.)  
"I don't think it was a mixture of whisky and something else. It knocked me out almost immediately. With exception of occasional fits of unconsciousness, I recall nothing that happened for at least several hours. I have a dim recollection of having finally pushed from a car near the city hall and having received the marshal's office in the city hall. The last I remember was trying to get to the office building to call for help. I feel over a bench trying to get to the phone and remember that I couldn't get up. The next I recall was when Mr. Trammell roused me. My time checks had not been pushed for three hours and I suppose I was still hopelessly that length of time. My mind still had not fully cleared until well in the afternoon. "In being pushed out of the car, I remember having fallen, striking my head and hearing my hip severely."

# Society

### Miss Eiland Hostess

Miss Hazel Dean Eiland was hostess at the Munday Hotel last Friday afternoon to the weekly assembly of the Just Us Girls club. Bridge was the diversion and Miss Maxine Pendleton won high score. Cut flowers added their charm to the appointments of the entertaining suite.

### Hectic Days-Sleepless Nights

TOO MUCH work, too much mental strain, too much worry... then "NERVES". How they torture you, tire you, leave you awake nights! "NERVES" make you irritable, restless, give you headache, indigestion. "NERVES" make you look and feel old... want resistance and pave the way for serious nervous or organic trouble. J. M. Foster, a druggist, suffered tortures from Over-wrought Nerves. He had dozens of so-called "Nerve Remedies" in his store. One by one he tried them without relief until... But let Mr. Foster tell his experience in his own words. "I think Dr. Miles' Nerveine is the best nerve medicine made, and that a better one couldn't be made. Dr. Miles' Nerveine was the only medicine on the shelf or in the prescription case that put me on my feet." J. M. Foster, Druggist, Marysville, Ohio.

### DR. MILES' NERVEINE LIQUID
