**Workshop Date Set For Sept. 3**

September 3 has been the date set for the Haskell-Knox Baptist Association Workshop. The meeting will be held at the First Baptist Church in Rochester at 9:30 a.m., announced H. B. Graves Jr., moderator for the association.

The calendar of activities for 1970-71 will be completed, check up on slate of officers for the new year and a study of the proposed budget will be discussed. Also, final plans will be made on the program for the Annual Associational Meeting.

A general discussion on "How can your association serve your church better?" and a testimony will close the meeting.

The meeting is open to all Haskell-Knox Associational Officers and Pastors.

Mr. and Mrs. Frank King and Mrs. Beatrice King of San Antonio visited in the Claude Hill home last week. They also visited their brother, Andrew Hill, who is a patient in the Hendrick Hospital in Abilene.

**ASC Election Ballots To Be Mailed Soon**

On September 1, ASC community committee election ballots will be mailed to all known eligible farm voters, according to A. J. Navratil, chairman of the Knox County Agricultural Stabilization and Conservation Committee.

Farm voters may vote for up to five of the candidates listed, or they may write in their choices on lines provided at the bottom of the ballot. To be counted, all ballots must be properly signed and mailed or returned to the County ASCS Office by September 11. Votes will be tabulated September 15, in the ASCS Office.

In each of the 3 ASC communities in this county, three community committeemen and two alternates will be elected. The candidate receiving the largest number of votes becomes chairman; the second largest vote-getter, vice-chairman; third-high, regular member; fourth and fifth highest become first and second alternates who may serve on the committee if regular members are temporarily absent or if a permanent vacancy occurs.

ASC community committees are elected for one-year terms, beginning October 1.

Navratil said, "It's very important that farmers elect their most qualified farm-neighbors for community committee posts. These community committees elect the County ASC Committee and choose its officers. They also assist the County ASC Committee in local administration of Government farm programs and help keep farmers informed on how the programs affect individual farm operations."

Any farm owner, tenant, or sharecropper who is of legal voting age may vote if he has an interest in a farm and is eligible to participate in any ASCS program administered in

his community. Others who may vote are: spouses of eligible voters; a minor who supervises and conducts the farming operation of an entire farm; a legal guardian who manages a farm for a child; and a person representing a legal entity such as a partnership or corporation.

The ASC committee chairman pointed out that producers who have farm interests in more than one community may select the community in which to vote, but may vote in only one community in the county.

Voting by proxy is not allowed. Voters who certify their ballots with an "X" for a signature must do so before a witness and obtain the signature of the witness in order for the ballot to be counted.

A list of known eligible voters is open for inspection at the County ASCS Office. Any person who believes he is an eligible voter but who is not listed should get in touch with the County ASCS Office as soon as possible, Navratil said.

He concluded that any voter who has not received a ballot in the mail within a few days after September 1 should call the County ASCS Office to arrange to receive a duplicate ballot if necessary.

GOVERNOR PRESTON SMITH (left) believes in buying and using Texas Agricultural Products and believes in promoting those products. Here he affixes a TAP (Texas Agricultural Products) sticker to his official state car while Bill Pieratt, deputy commissioner of the Texas Department of Agriculture, looks on. The Texas Department of Agriculture initiated TAP in 1968 to promote Texas foods and fibers.

**TAP Program Supported By Gov. Preston Smith**

Austin - The TAP (Texas Agricultural Products) program has the support of Texas' top citizen.

Governor Preston Smith has again affirmed his support by affixing the bright black and green TAP bumper sticker next to his No. 1 license plate on his official state car.

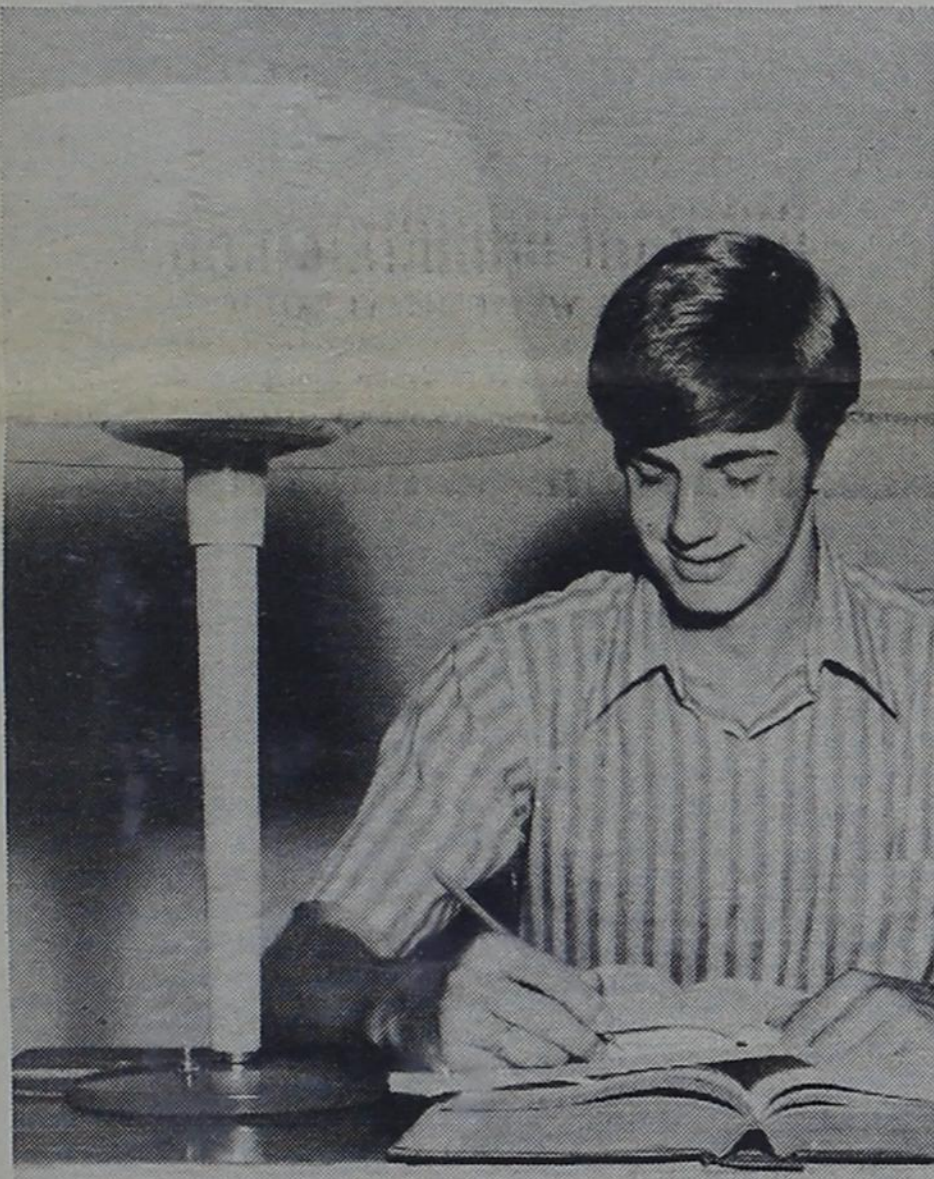

Texas Agriculture Commissioner John C. White originated the idea of TAP in November of 1968. The primary goal of the program is to inform Texans of the limitless abundance and high quality of foods and fibers produced within the state.

Now nearly two years old, TAP has made great strides in the marketing and promotion of homegrown products. Specific items are chosen for promotion by the Texas Department of Agriculture's marketing division every two months.

A key to the success of the venture has been the cooperation of various commodity groups with TDA and with each other. Also of immeasurable aid have been grocers, radio and television stations, newspapers, banks, utility companies, legislators, and advertising associations for allowing TAP representatives to use their facilities without charge. Governor Smith has twice signed proclamations support-

ing the efforts of Commissioner White and the TDA in the TAP program. It has been the steadfast support of Governor Smith and legislative leaders that has helped TAP with financial support.

Still another phase of the multi-faceted TAP program has been the TOT dinners, TDA marketing specialists recruited more than 20 sponsors to finance these gourmet meals, composed solely of Texas foods - shrimp to rice pudding.

### Drug Abuse News No. 7

#### HOW DOES LSD ("ACID") ACT? ITS "TRIPS" ARE SCARY.

LSD is so powerful that an amount covering a pinhead can turn a person into a monster. It enters the brain and confuses the senses. A sound may appear as a color. A fire seems to be a fragrant flower, so that the user reaches for it or put his face to it and suffers a severe burn....

A feeling of lightness can influence an LSD user so that he thinks he can fly and he does, right out of the window to his death. He is out of touch with reality. If he has a "good trip," he can recover. But, months later, he can get the LSD effects without taking another dose.

LSD does not improve the personality or increase one's creativity. A "good trip" just gives you some new experiences. A "bad trip" can make you mentally unstable. Your brain might not be able to take it. Keep away from LSD.

The next of these Public Service messages will discuss Marijuana or "Grass."

## ABUNDANCE

It is said that we do not value what we have until we have lost it. Most Americans have many luxuries far in excess of their needs — not just the bare necessities of life. Where else in the world could one have so much? Millions of people throughout the world would be so very thankful just to have sufficient rice or bread to fill their stomachs. Here in America we not only have rice and bread but every variety and type of food possible to procure. One may purchase as much of any one thing as he or she is able. All anyone has to do is to leave this great country and visit some of the less fortunate countries and then return to be so very thankful for the abundance of everything we have in America.

LIBERTY AND JUSTICE FOR ALL

Our priceless heritage embodied in the flag of the United States, is as alive today as it was when written for the ages in the Declaration of Independence and the Constitution. It stands for all the world to see and for all Americans to cherish. And in the tradition of Washington, Jefferson, and Hamilton, we, too, have a privilege, a right, and a duty. While we may disagree as to the methods, we should not disagree as to the goal — that of preserving the greatest democratic society the world has ever known.

Our flag is a symbol, not of sentiment, but of history, the history of men and women willing to live and die for it. Surely this willingness is with us still, because daily we experience more of the blessings that are ours — ours because we are Americans.

### Words Of Wisdom

When a trout rising to a fly gets hooked on a line and finds himself unable to swim about freely, he begins with a fight which results in struggles and splashes and sometimes an escape. Often, of course, the situation is too tough for him.

In the same way the human being struggles with his environment and with the hooks that catch him. Sometimes he masters his difficulties; sometimes they are too much for him. His struggles are all that the world sees and it naturally misunderstands them.

It is hard for a free fish to understand what is happening to a hooked one.  
Dr. Karl A. Menninger
