Odd Bits Salvaged
By The Editor

We've found out why so many of those 50-mile walkers didn't make it. They just don't know how to walk!

—k—
The president of the Texas State Chiropractic Association put us wise. To take part in President Kennedy's walkathon, make the most of this healthful exercise by doing it properly. That's his admonition to you—not us—because we don't intend to go in with Kennedy on the idea.

—k—
"You'll find that you can walk farther with less tiring if you maintain a steady, measured pace," the man said, "with your weight balanced evenly on both hips and your shoulders back."

—k—
"It's important, too, that you wear proper shoes. Be sure you know your limits. Walking is good for your health, but not if you overtax your strength. On your first venture take in only a few blocks, then build up the distance gradually in ensuring hikes. Take a 10-minute break at least once per hour."

—k—
We'd like to add, too: Have a purpose in mind. Don't just set out to see how far you can walk. We've noticed time and again that a fellow's step is lighter, more brisk, more springy when he's walking towards his favorite fishing hole—now away from it!

—k—
We've learned another thing, too, by glancing at one of those free public relations releases instead of tossing it casually into "File 13." P. R. people, you know, are those who try to come up with something unique enough to get free advertising in a newspaper, rather than having to pay for it. Here's the clincher:

—k—
A leading pen-maker predicts that men, women and children in Texas will buy 51,717,200 fountain pens and ballpoints this year. This total represents an average of about five pens per person—and if you see a man with more than five pens in his shirt pocket or shirt front, then he has more than his quota.

—k—
More than 68 per cent of all fountain pens sold in the Lone Star State will be cartridge-fill models, compared with 39 per cent just five years ago. And the inventor of the lever-fill pen is coming out with a cartridge pen this year that will be guaranteed for the lifetime of the owner.

—k—
You know—like that first ball point that was guaranteed to write under water, and that muffler that is guaranteed for the life of your car! We tried that type of muffler once, and within a year we were burning away on our third one. Same car, third muffler!

—k—
The noisiest place about town the first of this week has been in the area of the First National Bank. In order to fix the bank's basement so it could be of service, it became necessary to tear up a portion of the sidewalk where the basement is located. That air-hammer, drill (or whatever it was) was going all day Tuesday, and attracted lots of sightseers.

—k—
The bank's basement extended clear out underneath the sidewalk. They've sealed it off at the building's foundation, then had the job of filling that hole with dirt before rebuilding the sidewalk. "That's a bigger hole than I thought," said W. E. Braly, as he surveyed the situation late Tuesday.

—k—
We've seen them pumping water out of that basement after a big rain or rainy spell, and when that happened there was a big mess in that hole under the bank. The basement has been almost useless for a long time, and the folks at the bank hope to remedy this situation. There's not a much bigger nuisance than needed space that can't be used.

—k—
Tonight is banquet time! There'll be big doings at the school gym—and Chamber of Commerce officials hope you will be in on it. Come and join in the fun!

TO BE HERE TUESDAY

A representative of the Social Security Administration will be in Munday at the City Hall on Tuesday, March 19 from 10:00 a.m. until 12:00 noon. You are invited to meet with the representative to file your claim or obtain information or assistance concerning Social Security.

Small Growers With 15 Acres Or Less Have Special Interest In Wheat Vote

Small wheat farmers will have a special interest in the vote coming up this spring on the 1964 wheat program, T. W. Russell, Chairman, Agricultural Stabilization and Conservation County Committee, said today.

The special interest results from the fact that wheat operators with 15 acres or less of wheat will be eligible to vote in the referendum if they indicate their intention to participate in the 1964 wheat program prior to the time the vote is held. About 17% of the wheat farms in Knox County are in the "15 acres or less" class. Throughout the country, these small farms comprise from 6.7 to 97.7 per cent of the wheat farms within particular States.

The Chairman reminded growers that the upcoming referendum on the kind of wheat program they want for 1964 and suc-

T. S. T. A. Speaker

George W. Ewing, above, minister and teacher in Abilene Christian College, will be the principal speaker for a meeting of the Knox County unit of Texas State Teachers Association next Monday night.

The meeting will be held at Garrison's Cafe in Knox City, beginning at 7:30 p.m.

Dr. Ewing's wide interests have led him to make studies in such diverse fields as frontier preaching in Texas, weightlifting, church music, and the verse of the temperance movement (his dissertation subject), besides the necessary preparation for his preaching, teaching and public speaking.

Tidwell Rites Held At Tulia

Otis D. "Dutch" Tidwell, 59, former Knox County resident, passed away at 4:30 a.m. Tuesday, March 5, in Tulia Hospital, where he had been a patient for about ten days. He had been ill of cancer for several weeks.

Mr. Tidwell was born on March 24, 1903, in Parker County and moved to Knox County with his parents, the late Mr. and Mrs. Joe Tidwell, in 1907.

He lived on the farm in the Hood community until 1926 when he moved to his farm near Silverton. He lived in and near Silverton until he moved to Tulia in 1953.

For the past few years he was owner and operator of Cash Hardware in Tulia. He had recently retired from business in order to devote more time to his farming when he became ill.

Funeral services were held from the First Methodist Church in Tulia with the pastor, Rev. Coggins, officiating. Burial was in Silverton Cemetery under the direction of Wallace Funeral Home of Tulia.

Survivors include his wife, a stepson, Tommy Childress of Tulia, who is a student at Texas Tech; three brothers, John of Lubbock, Buck and Jack of Munday; two sisters, Mrs. D. Hoyt Davis of Olney and Mrs. Cliff Moorman of Munday.

Seven Filed For Trustee At Goree

A total of seven persons have filed for places on the ballot in the school trustee election at Goree, it was announced Tuesday. The election will be on Saturday, April 6.

Filing for re-election were John Broach and Jack Nuckols. Others whose names will be on the ballot are: Dewitt Green, John Lloyd Lambeth, Arnold Land, Tom Cloud and Gerald Myers.

ceeding years will be held within 60 days after proclamation of the national wheat marketing quota, which will not likely be announced until late March or early April. The program will become effective if at least two-thirds of the growers voting in the referendum approve the program.

While technical details of the 1964 wheat program are still in the development stage, it is now known that the referendum will give wheat growers a choice of two programs. The first would limit production of wheat to market and export needs, provide price support at an average of \$2 per bushel for most wheat marketed, and offer payments for wheat acreage diverted to conservation use. It would maintain the farmer's income from wheat at the average of recent years. Marketing quota penalties would continue to apply to "excess" wheat.

The alternative program would provide no limits on production or marketing, and price support—only to growers who stay within their allotments—would be available at 50 per cent of parity, about \$1.20 per bushel national average. It would result in increased wheat production and a sharp decrease in income for wheat growers.

"It is most important that small wheat operators of 15 acres or less understand that only those operators who register their intention to participate in the 1964 wheat program will be eligible to vote in the referendum," Chairman Russell declared. "The deadline for such registration will be set later, but it will be some time prior to the wheat vote."

Through the program for 1964 and following years, farms on which "excess" wheat was not subject to marketing quotas because of the 15-acre or feed wheat exemption will get an allotment based on their average acreage for 1959, 1960 and 1961, but not in excess of 15 acres. If these operators participate in the wheat program, they will receive marketing certificates and price support just as larger producers do. They will also earn diversion payments.

Operators of such "small allotment" farms who do not wish to participate in the wheat program may—without penalty—plant an acreage of wheat based on their 1959, 1960, 1961 average wheat acreage but not over 15 acres. However, growers on these farms will not be eligible for price support, wheat certificates, land diversion payments, or to vote in the referendum.

Last Rites For Mrs. Ida Scott Held On Tuesday

Mrs. Ida Scott, 88, resident of the Munday area for 50 years, passed away at 9:30 p.m. Sunday at the Knox County Hospital following an illness of about a month.

She was born Sarah Ida Brooks on October 16, 1874, in Pickens County, Ala., and was married to Harvey A. Scott on December 2, 1894, in Athens, Texas. They came to Munday in 1912 and Mrs. Scott had resided here since that time. Her husband preceded her in death in 1933.

Funeral services were held at 10 a.m. Tuesday from the First Methodist Church in Munday with the pastor, Rev. Rex L. Mauldin, officiating. Burial was at 4 p.m. Tuesday in Carnish Cemetery in Ringling, Okla. The McCauley Funeral Home was in charge of arrangements.

Grandsons who served as pallbearers included Gaylon Allred, Wayland Floyd, Richard Shaw, Buddy Pearce, Joe Lynn Phillips and Audrey Harrison.

Survivors include four daughters, Mrs. Ninnie Shaw of Tipton, Okla., Mrs. Bonnie Glenn of Mesa, Ariz., Mrs. Annie Floyd and Mrs. Opal Allred, both of Munday; five sons, W. W. Scott of Mesa, Ariz., Archie Scott of Kingsman, Ariz., Earl Scott of Oklahoma City, Lavell and Harvey Scott, both of Englewood, Colo.; 31 grandchildren and 35 great-grandchildren.

Munday To Name Two Trustees

More than usual interest is being shown in the school trustee election, which is slated for Saturday, April 6, as a total of five persons are seeking the two posts to be filled.

The terms of A. A. Smith, Jr., and Charles Baker expire, and only Baker has filed for re-election. Others who have filed are: Bob Brown, Lee Roy Leflar, H. D. Matthews, Jr., and Mrs. Bruce Burnett.

Carryover members of the board are Russell Penick, Tommy Harper, John Phillips, W. R. Moore, Jr., and Harold Partridge.

Volleyball Games Set Friday, Saturday

A volleyball tournament for both women and men will be held Friday and Saturday, March 15 and 16 at the Munday School gym. Games will begin at 7 p.m. both nights.

Four games will be played Friday night according to Wayne Bingham, coach, and finals will be held Saturday night. In the men's finals Munday will play Rhineland, who are already the winner of two tournaments.

Holiday women, who are rated as one of the best women's teams in North Texas, will meet some opponent on Saturday night.

Arledge Introduces Two Bills In House

State Representative Roy Arledge of Stamford released the fact this week that he has introduced two bills in the Texas House of Representatives.

House bill 684, authored by Arledge, would require state agencies to dispose of any "executive type aircraft" which they might own, within a period of a year. The measure would also prohibit future acquisition by state agencies of such plush aircraft. This act would require specific reports, records, and requests for appropriations by state agencies for operation of any type aircraft, and would restrict the use of such aircraft strictly to official business.

"This measure should save the taxpayers of Texas a great deal of money in the next few years," Arledge stated in describing this bill as an "economy measure."

The second measure to be introduced by the Stamford legislator is a bill designed to aid local independent school districts in the collection of delinquent taxes.

House bill 733 would give school districts the same rights and powers as cities and towns now have with reference to the collection of delinquent taxes assessed against both real and personal property.

Arledge stated: "It has been brought to my attention that a recent Texas supreme court case held that school districts did not have the same powers which cities have concerning liens on personal property against which taxes have been assessed. Thus, I have been requested to sponsor a bill to correct this inequity. All this measure does is to equalize the powers of the school districts with those presently granted cities and towns."

Representative Arledge said that he was pleased to be of service to his constituents by sponsoring both of these measures.

SOVIET OIL—AND SOVIET MIGHT

The Soviet Union is building her economic might through the sale of oil.

Back of this lies a story of increasing concern to the oilmen of this country. The volume of Soviet sales has steadily increased in Germany, Italy, France, and elsewhere. What troubles them, as an oil company publication phrases it, "is not the mere fact of Soviet competition, for that is a normal business risk. Their real concern is the system of state-controlled pricing and barter that Russia uses to penetrate free world oil markets."

The point is that in the Soviet system the word "cost" is likely to mean something entirely different from what it does outside the communist empire. The state determines all prices, just as it determines all wages. Thus, costs are whatever the state says they are—even though the figure may be totally unrealistic by Western standards.

The importance of this oil offensive can hardly be exaggerated. Russia is buying huge quantities of industrial equipment—including complete factories and processing plants of the most advanced, automated type—from the West. And oil is the one commodity in general demand which she can export, and use for barter and exchange, without unduly affecting her ambitious domestic development program. These exports of Russian oil to the free world have reached 500,000 barrels a day and are expected to swiftly increase.

There is no simple solution to the problem. American oilmen, and their equivalents elsewhere in the West, are dealing with it with all the wealth of imagination and resources which they command. Meanwhile, to say the obvious, the American government should pursue wise policies—in taxation and other matters—which will help, not hamper, the oil industry's ability to meet the Soviet offensive.

"I know of no more encouraging fact than the unquestionable ability of a man to elevate his life by a conscious endeavor."—Thoreau.

Over \$2.4 billion of new issues of school bonds for public, elementary, and secondary schools were sold in 1962, the Investment Bankers Association of America announced, on the basis of incomplete tabulations. This total is second only to the record total in 1961 when sales of such bonds exceeded \$2.5 billion.

The nation's gas industry, which includes pipeline companies, expects to spend \$1.8 billion on construction during 1963 according to American Gas Association. By 1965 construction necessary to keep pace with customer demands will exceed \$2 billion annually.

It is reported that as much as one-fifth of American industry's capital spending for new plant and equipment this year may be earmarked for automation and instrumentation.

THE LEAST WE CAN ASK

We're now paying more to mail our letters, regular and airmail. And newspapers and magazines are paying increased charges on their mailings to readers. This is a result of the effort to do something about the \$700 million a year post office deficit.

But there are further steps that need to be taken. One of them is to get rid of the parcel post deficit, and make this purely tax-exempt commercial service pay its own way—and that means meeting both direct and indirect costs. The Interstate Commerce Commission must authorize rate increases in this instance.

Private express companies, notably REA Express, have been doing an outstanding job in expanding and improving their services. They are taking full advantage of modern technological developments in the package and freight carrying fields, and that goes for overseas as well as domestic traffic. The least we can ask of parcel post, which is a direct competitor, is that it operate on an efficient, non-deficit business basis.

YES—IT'S TAXPAYERS' MONEY!

Writing in the Cleveland Plain Dealer, columnist Howard Preston makes one of the best suggestions that come along in quite a while.

He simply suggests that, when we write or talk about government spending, we use the phrase "taxpayers' money" rather than "federal funds."

It is unfortunate, but true, that there is a need to emphasize this distinction. Numbers of people, seemingly, don't relate government money to the money that is taken from them through taxation. Consciously or not, they assume that government has some other and magical means of obtaining funds.

Government doesn't earn money, and it doesn't create wealth. It isn't supposed to. Government can spend only what it first seizes from the people—and this includes the as-yet-unborn taxpayers who will be paying the bills of the past for ages to come.

So—don't just think of federal funds. Think of taxpayers' money—your money.

From the New York Times: "The airlines, like the railroads, have been suffering from rising costs and declining earnings. They spent a great deal to equip themselves for the jet age, which has brought a vast increase in capacity. But the growth in passengers has slowed down, so that planes are flying half empty . . . Competition has been excessive . . . The airlines . . . have not been able to maintain adequate earnings under such conditions."

"Today, American working men and women are safest when they are at their jobs. The Insurance Information Institute . . . is authority for the statement."

CHURCH OF CHRIST

GOREE, TEXAS

The Power Of God's Word

Many today teach that people are converted and brought unto salvation by a direct operation of the Holy Spirit, separate and apart from the word of God, of the gospel of Christ. However, the scriptures teach that the Holy Spirit operates upon sinners in their conversion by means of the word of truth, and not directly, or in a miraculous, or irresistible manner.

There is no controversy as to whether sinners are converted by the Holy Spirit. But the question is, how does the Spirit convert sinners? Does he do it directly, or indirectly? Does he do it through the word of truth, or by a direct operation upon the sinner?

The gospel was first preached "With the Holy Ghost sent down from heaven." (1 Pet. 1:12.) Sinners were convicted of their sins by the message of the Spirit spoken by the apostles. (Acts 2:36-37.) The Spirit came to the apostles to convert the world. (Jno. 16:7-13; Acts 2:14; 2:14-38.) Hence, the apostle Paul said "I am not ashamed of the gospel of Christ, for it is the power of God unto salvation." (Rom. 1:16.) This is why the Lord authorized the gospel to be preached unto all the world. (Mk. 16:15-16.)

The gospel is, therefore, the power of God to draw sinners unto Christ, and therefore must be taught unto all before they can come to Christ. Christ said "No man can come to me, except the Father which hath sent me draw him: and I will raise him up at the last day. It is written in the prophets, and they shall be all taught of God. Every man therefore that hath heard, and hath learned of the Father, cometh unto me."

Advantages of Soil Testing

With one crop year just behind us, Texas farmers are already planning steps for starting the circle all over again.

One important step that can be taken now is to send soil samples to laboratories for analysis. This early sampling helps assure the farmer of getting the best results from their soil during 1963. And early testing gives plenty of time to place orders for the proper types of fertilizer which the soil may need.

A number of state and federally-operated laboratories, as well as private concerns, offer this service to the farmer. Those who want to get a diagnosis of their soil needs can consult their county agent for the location of the nearest laboratory. The test can pay off in richer yields on less land this year.

Instruction sheets may be obtained from local branches of the Soil Conservation Service or direct from the testing laboratories. The practice varies in different areas but a composite sample from cores or slices of soil taken from 15 to 20 different spots of a field is usually the rule. Small areas that differ in color, texture or drainage should be avoided or sampled separately.

Soil testing should be considered on a crop rotation basis where it is possible. Sampling soils every three to five years, or once during a rotation cycle is sufficient to maintain an adequate mineral level and make necessary

adjustments in fertilization practices.

The value of maintaining a healthy soil cannot be overestimated. Just like humans, soil can get "sick" due to deficiencies in its "diet." When planning crops for a certain plot of land, the farmer should know what that soil needs in the way of proper fertilizers. The initial cost will be returned in better yields.

Women's Institute W. T. U. Personnel Slated For Friday At Abilene Office

More than 150 WTU women personnel from the 50 county service area will be in Abilene on March 15, to attend the ninth Annual West Texas Utilities Women's Institute. "Look of Freedom" will be the theme of the 1963 Institute.

This event is attended each year by women employees of WTU, employed as secretaries, stenographers, cashiers, bookkeepers and clerks. Reba Redder and Noraline Willoughby from this office will attend.

Mary Jo Craig, Secretary to Vice President J. F. Longley, is General Chairman of this year's meeting. Morning Session Chairman is Mildred Williams, bookkeeper from Stamford. Afternoon session chairman is Helen Hampton, cashier and bookkeeper from Marfa. Evening Session Chairman is Alice Bracy, clerk-secretary, Childress.

The morning session will begin with registration at 8:30 at Lytle Shores Auditorium. Appearing on the morning program will be Marie Tidwell, Cashier and Bookkeeper from McCombs; Ann Hawks, secretary to Vice-President; Mary Stover, Engineering Department; Ruth Clappitt, Home Economist from Ballinger; Billie Dean Morris, Treasury Department; Geraldene Black, Clerk & PBX Operator, San Angelo; The Freedomaires; Emma Barnard and Doyle Gray, Safety Department; Frances Weatherbee, Cashier and bookkeeper from Childress.

Appearing on the program during the afternoon session will be Maragret Holder, cashier and bookkeeper from Spur; Mary Jo Craig, General Office; a demonstration will be given by Glenna Frame, former City Recreation Director, The Shadows, Carol Smith, Bobbie Newcomb and Mary Stover.

The evening session will be held in the ballroom of the Starlite Motel, at 7:00 p.m. Following an invocation by Ruth Tipton, cashier at the Merkel Office, dinner will be served. Special music will be provided by Gwen Averitt, at the organ. Following dinner, special guests will be intro-

duced and a message by WTU's President, Cal Young, will be presented. Entertainment for the evening will be Waurene Cannon, former WTU employee and R. E. "Bob" Nail, Director from Albany.

Motorists Face Long Waiting Lines On Auto Inspection

Many motorists in Texas are going to be faced with long lines and waiting periods in order to have their cars inspected prior to the April 15 deadline. Only 39 per cent of the 586,270 registered vehicles in Region 5 of the Texas Department of Public Safety have visited safety inspection stations and obtained their 1963 safety inspection sticker, according to Captain Alan Johnson, Motor Vehicle Inspection Service of the DPS.

"All registered vehicles in Texas must be inspected by April 15 and have a 1963 inspection sticker on the windshield," Captain Johnson said. He stated that there would be no extension of the April 15 deadline and advised motorists who have not had their cars inspected to do so now, before the long lines start forming. "In the past, many people wait until the last few days of the inspection period to have their vehicles inspected and have had to wait for a long period of time at the inspection station," Captain Johnson stated.

According to the records of the Motor Vehicle Inspection Service of the DPS there are 4,982 vehicles registered in Knox County and only 924 or 22 per cent of the vehicles have been inspected to date. Due to this low number the Captain suggested that all motorists check their vehicle and see if they have a current 1963 inspection sticker on the windshield and if not to have their vehicle inspected today in order to avoid the last minute rush.

Mr. and Mrs. Everett Thompson were visitors in Wichita Falls last Friday.

Farm Facts

Kentucky statesman Henry Clay imported the first Herefords to America in 1817. In 1840, the first breeding herd of Whitefaces was established near Albany, N. Y.

Henry Clay introduced Hereford cattle to the U.S.

The Hereford line began with a white-faced cow named Silver in the county of Herefordshire, England. Silver was given to Benjamin Tomkins at the time of his father's death.

Several years later, one of Silver's sons was bred to two cows, Pigeon and Mottle. From this union the Hereford breed emerged in 1742.

The Hereford fame for early fleshing and early maturity spread to the United States where cattlemen were looking for a beef animal that would rustle for itself on America's plains, hills, and mountains.

In the hard winters of 1855-56, the Hereford became known because of its ability to withstand such weather and survive to replenish the

decimated herds of the North and Southwest.

According to the American Hereford Association, Herefords, or cattle carrying Hereford blood, provide more than 75% of our beef supply.

Dr. Kay Speaks To 800 People

"The Battle Ahead" was the subject of the lecture given by Dr. C. L. Kay of Lubbock Christian College to more than 800 youth and adults in Knox County last week. Dr. Kay spoke at Benjamin, Knox City and Munday. Students from Gilliland, Rhineland and Weibert also attended the meeting at Munday. These three programs were sponsored by the Knox County Home Demonstration Council with Mrs. O. R. Miller in charge of arrangements.

Dr. Kay compared The Two Worlds. The World of Freedom and The World of Regimentation and asked the question Whose Century will this be? Will it be Russia's? Will it be Europe's? Or, will it be America's? He noted the expansion of Communism from the 16 or 17 disciples of Lenin in 1906 to the present when they have under their control more than one-half the land areas of the world and over 1 billion people, which is more than 40% of all people of the earth.

He reviewed the Communist economic platform and the structure of the American way of life. In challenging his audiences to face the future with confidence, he stated that this can be done if we understand the foundation of our American way of life, if we maintain a high quality education with an understanding of the world situation and if we maintain the free press.

If you want a truck that does its work without yelling for attention all the time, buy a "new reliable" Chevrolet.

You have to take care of it; it's a machine. But this isn't a full-time activity. The clear idea is that the truck works for you, not vice versa.

The way to build such a truck is to put more quality into it. For example, Chevrolet doesn't build one type of suspension system for all sizes of trucks. Chevrolet designs suspension systems to

fit your need. The light-duty type is strong on comfort. Another kind for heavier trucks stiffens up as you increase your load and vice versa. Make sense? Conventional pickups have double-wall construction in cabs, doors, lower side panels. Roofs are insulated. Body floors are select wood, not metal. Tailgate chains are wrapped in rubber. If you'd like to examine or drive a new '63 Chevrolet truck, just call us. We'll be right over.

Knox Prairie Philosopher Comes Out In Favor Of The Beauties Of This Country, Plus The Light Poles

Editor's note: The Knox Prairie Philosopher on his Johnson grass farm on Miller Creek gets his mind off the international situation this week, for a change.

Dear editor:
You hear so much about Cuba these days you'd think it was the only problem facing this country, but I read about a problem last night that will get your mind off international affairs.

J. A.

According to it, a bunch of fox hunters in the horsey country in Virginia are up in arms over the plans of a utility company to run transmission lines across their fox hunting territory. The utility company says it's the most economical route to run the lines, and the fox hunters say they aren't interested in economy, they don't want the light poles ruining the scenery.

I don't know anything about the particulars, I'm in the same shape about the fox hunting country as I am about whether there are any missiles in caves in Cuba, the same as the military experts, but I am interested in the theory that an electric light pole mars the scenery.

Understand, I'm in favor of country scenery, got more of it out here than I have crops; there's nothing prettier than the sun coming up across an expanse of open territory on a crisp, crystal-clear spring morning, especially if you can see it through a window while you're under a warm blanket, but it's not a bit prettier than a string of electric light poles marching across a pasture on this Johnson grass farm bringing energy for my electric water pump and television set.

There's nothing more soul-satisfying than getting a drink out of a gurgling spring on a hot summer's afternoon, but I tell you turning a handle and getting a glass of water out of a hydrant inside your own house is hard to beat, summer or winter.

Hauling a horse to a fox hunt in a man-made trailer pulled down a man-made road by a man-made car and complaining because their are some man-made electric light poles in the area, is a little out of my field of comprehension.

Me, I'm all in favor of electric light poles in the country. They

the gum tissue becomes irritated. This can lead to serious disturbances in the gums and supporting tooth structure.

Dentists emphasize the importance of correct toothbrushing procedures to minimize injury to the gum tissues. Often, vigorous or improper brushing may cause the gums to bleed, but dentists say that there is no harm if this condition continues only a few days.

The tissues covering the gums will become toughened and thickened, just as calluses form on a hand doing hard labor. If, however, the bleeding persists from brushing, the condition should be checked by a dentist.

Brushing correctly is important. Equally important is regular brushing. It is the responsibility of parents to develop the habit of regular brushing after meals in each child so that regular brushing will become a natural pattern of his life. Check with your dentist concerning the proper size toothbrush and grade of bristle. Also change toothbrushes when they become too soft.

Let's face it we don't eat the coarse, raw or abrading foods of primitive man, so we have to brush our teeth.

Mr. and Mrs. Coy Phillips and daughters of Levelland visited relatives here over the week end.

NEW GRANULAR INSECT CONTROL FOR COTTON

Thimet® 10% granular protects young cotton up to six weeks or longer . . . one soil application replaces three or more foliage sprays.

Thimet 10 G, applied at planting, protects young cotton against damaging insects during the first critical weeks of growth.
Thimet gives outstanding control of thrips, aphids, mites, leafminers. . . protects the young plant against leafhoppers, white flies, black cutworms. And by killing insects such as leafhoppers, Thimet controls virus diseases carried by these insects.

Easy to use
Thimet granules are distributed in the furrow at planting time. Rates range from 5 to 15 lbs. per acre depending on the length of control desired and soil type.
For further details on the use of Thimet to cotton, contact your local pesticides supplier or write: Pesticides Dept., address below.

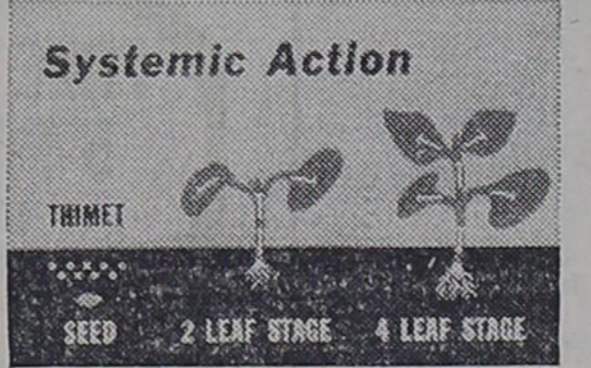

Diagram of how Thimet is picked up by roots and carried to all parts of the plant.

Thimet 10% granular comes packed in handy 10 lb. bags for easy measuring.

Continuous protection
As the young cotton plant emerges and starts to grow, the Thimet in the soil is taken up through the roots. Immediately, it is carried by the sap stream to all growing stems and leaves (see diagram). The plant itself becomes toxic to insects which try to attack it.

Because Thimet is in every growing part of the plant, insect control is steady and continuous. It eliminates those danger periods when an insect infestation may go unnoticed until the crop is damaged. And, since Thimet is inside the plant, it cannot be weathered away by wind and rain.

Notes From Knox Farms, Ranches

By Joe W. Doby, Knox County Agent

Young people and adults from all over the county are urged to enter the Knox County Vegetable Festival to be held June 22 in Munday. There will be a junior and an adult division in each of the five categories of the show. These are fresh vegetables, Canned Foods, Baked Foods, Fresh Fruit and Flowers.

In the vegetable show, the following constitute a class: 12 green beans, 12 pods peas, 3 tomatoes, 3 cucumbers, 3 cantaloupes, 1 watermelon. In the flower show, any three of the same flowers will constitute a class.

An instruction class in growing vegetables and exhibiting them will be held, Thursday, March 14 at 4 p.m., in the lunchroom of the Munday grade school. Tips will be given on growing vegetables, selecting prize winners and preparing for shows. A class on growing flowers and canning food will also be given.

Any boy or girl in the county is eligible to enter this show whether or not he or she is a member of an organization or not. Parents are urged to attend this meeting and bring their children.

I wonder if some of you cotton farmers are thinking about some way to control grass and weeds in cotton without having to hoe. I would suggest you give lateral oiling a try. Naphtha is sprayed laterally across the row after the cotton is 7 to 10 days old. Special oiling shoes are used that are attached to a cultivator. Costs are approximately \$1.00 per acre using five gallons which is the amount recommended. A naphtha with an aromatic content of 18 to 25% gives good results so be sure you know what you are buying. We have a bulletin that gives more details, you may have by writing or visiting my office or the bulletin racks in each of the banks. I will have available before too long, a drawing of oiling shoes that can be made easi-

ly and inexpensively.

The 1963 Share-the-Fun Festival and King and Queen Contest will be held Thursday, March 21 at the Gilliland school. All clubs are urged to enter a share the fun act and the King and Queen Contest. Half the proceeds entered by each club as votes for their candidates will be returned to them. The other half goes into the County Council fund for use on the county level for 4-H work. A share-the-fun act is any act of entertainment with 1-9 4-H members, and the act lasting not over 6 minutes.

A number of new and revised bulletins have been placed on the bulletin racks in each bank. "Cotton Insect Guide for 1963," "Performance of Sorghum Varieties and Hybrids at 19 Test Locations in Texas," "Guide for Controlling Household Insects" are but a sample of bulletins available.

Mother Of Local Woman Dies At Newcastle Sat.

Mrs. Mary E. Williams, 83, one of the real pioneer women of the Newcastle area, passed away at the hospital in Olney at 1:05 p.m. Saturday, March 2, after an illness of about three weeks.

Funeral services were held at 2 p.m. Monday from the First Methodist Church in Newcastle with Rev. Ernest Copeland of Breckenridge officiating, assisted by Rev. E. R. Pool, pastor of the Newcastle Assembly of God Church and Rev. R. D. Williams, pastor of the Newcastle Baptist Church.

Burial was in Newcastle Cemetery with Lunn Funeral Home of Olney in charge of arrangements. Mary E. Johnston was born May 11, 1879, in Lone Mountain, Tenn., and moved with her family to Graham when 11 years of age. She was married at Graham in 1900 to Roger Q. Williams, who passed away in 1938.

Aunt Mary, as she was familiarly known, had lived in her community for the past 63 years, being widely known and held in

Texas 4-H'ers Capture Honors, Including Trips

For two teen-agers from southern Texas, 1962 will be long remembered as the year they captured high 4-H Club honors including all-expense trips to Chicago.

Townsend Lowe

Jimmy Lowe Jr., 18, of Raymondville, and Joe Townsend, 17, of McAllen, went to Chicago to attend the National 4-H Club Congress, considered the top 4-H event of the year. They were among 1,500 official delegates.

Townsend was a guest of the Allis-Chalmers Manufacturing Company, Farm Equipment Division. He was awarded the trip after placing first in the state's garden competition for 4-H'ers.

The youth, a son of Mr. and Mrs. C. E. Townsend, won the sweepstakes award in 1962 in the All-Valley Vegetable Show. He also raises hogs and cattle. Lowe was awarded a trip by the Humble Oil & Refining Company after winning the Texas 4-H tractor program award. He excelled in driving a tractor and in maintaining it. He is a student at Southwest Texas State.

esteemed by all her friends and acquaintances. She was a member of the First Christian Church, a good christian woman and mother and will be sadly missed by all who knew her.

Survivors are four sons, Bill Williams, R. Q. Williams, Jim Williams and Virgil Williams, all of Newcastle; one daughter, Mrs. Laura Joe Jarvis of Munday; six grandchildren and seven great-grandchildren. Also two brothers, John Johnston of Fort Worth and Ben Johnston of California.

Pallbearers were Howard Thompson, Jodie Renick, Tommy Cooper, Horace Williams, Wade Fikes and Joe Brooks.
