Oil Test Near Thalia Spuds in Wednesday; Will Drill to 2,100 Feet

The new oil test located on the Thalia land about 2 1/2 miles west of Thalia was spudded yesterday. The well will be drilled by O. P. Burnham of Altus, Okla., and will reach a depth of 2,100 feet.

Equipment for the well was made up by operators, A. J. Pepper and J. H. Graves, of Vernon and is a block of approximately 10 acres two and one-half miles east of the producers north of Thalia and is 330 feet east and 400 feet north of the southwest corner of northwest one-fourth section 21, block 8, H. & T. C. survey.

The Thalia oil field was opened in 1928 when both the Shell and McGaha oil companies drilled wells which are still producing oil and gas sands entered beginning at 840 feet.

According to operators of the area, production in the Thalia field has shown high gasoline carbon black properties. Wells producing in that field range from 1,490 to 2,020 feet.

Will Preach Here Sunday

Rev. O. L. Savage of Coleman, former pastor of the First Baptist Church of Crowell, will preach at both the morning and evening services of the Baptist Church here Sunday.

The new grammar school building is expected to be completed and ready for the opening of school next fall, barring complications and bad weather conditions, according to L. I. Saunders, sponsor superintendent.

By June 30 the building is expected to be completely closed in. The outside windows and doors, walls and roof will be completed. On the inside the walls will be plastered and the Celotex ceiling will be finished by that date which will give two months to complete the trimmings, Mr. Saunders stated.

Approximately half of the brick laying has been completed. The walls have reached window sill height and the east wall is half way up. All of the window sills will be laid by this afternoon and two-thirds of the windows have been set. It is expected that all of the window frames will be completed and set by the latter part of this week. All of the door frames are in place.

A WPA bronze placard was placed in the front wall of the building Tuesday.

OVER 900 CARS REGISTERED IN FOARD COUNTY

Totals Show Increase of 112 Over Same Period in 1935

Automobiles registered in the office of the tax assessor-collector reached a total of 924 by Wednesday night, March 31, which was the deadline for driving cars without new 1937 license plates on them.

The number registered before April 1 this year shows an increase of 113 over the number registered during the same period last year. There were 93 commercial trucks registered in Foard County this year and this is the same number that was registered in the first three months of 1935. In comparing the farm trucks, the list this year shows an increase of 35 with a total of 83 for 1937.

Automobiles registered now are subject to a penalty of 20 percent of the cost of the license added to the cost of a full year's license. If the car has not been driven since April 1 and the owner will sign an affidavit to that effect a license may be obtained at the collector's office without having the penalty added.

NOBODY'S BUSINESS

BY JULIAN CAPERS JR.

Austin.—The battle between Gov. Allred and the legislature, smoldering ever since the 45th legislature convened, broke into the open with the definite indication from the senate, through J.

Redditt, chairman of its finance committee, that the upper body will not pass any radically increased tax measures, because, as Redditt pointed out in a lengthy technical statement, there is "no need for new taxes."

"It is my opinion that we would be better off if no new taxes were levied at this session," he said. "Why the necessity of levying and collecting many taxes unless there are needs for the adequate maintenance of proper agencies of government? Texas has the greatest opportunity of any state in the union by continuing its policies of economical administration of government and fair and equitable tax problems."

The actual needs, Redditt said, will be determined by the fate of the many tax remission bills. Gov. Allred has already plainly said he would not sign tax remission bills unless provision is made to replace the revenues thus diverted from the state. He backed this up with a veto of the Harris County flood control remission bill. If he continues this policy, and vetoes other tax remissions, and the senate sticks to Redditt's policy, it is fairly obvious that Allred's ambitious plan of raising \$13,000,000 a year new revenue is definitely dead.

Confidence Shaken

Observers here agree that Allred's handling of the legislature has been far below the governor's usual skillful diplomacy. His first message, advocating enormous new tax measures, after he had stamped the state during the summer declaring there was no need for new revenues, was a shock to the legislature.

The governor's candidate for speaker, Bob Calvert, won without opposition, and he apparently had a dominant position in the house, and, with new blood in the senate, a good chance to control there, too. But he forced his luck too strongly. His early messages, many here believe, were couched in rather harsh and undiplomatic language. Many members resented his flat declarations that he would veto certain measures, before they were passed. His house control cracked when he fell out with the pension liberalization block. The senate resented his unusual course in appearing on the floor and at committee meetings to force action on the race-betting repeal bill, although a heavy majority favored repeal. The lobbyists took skillful advantage of the situation, and fanned the fires of resentment. The net result is the regular session will probably not solve what Allred has described as a financial crisis, little actually will be accomplished, and one or more special sessions are strongly in prospect. Whether the state is better or worse off for this session is, of course, a highly controversial question. But a good many sound thinkers believe the less the session does, the better off the state will be, and the better opportunity it will have to complete economic recovery, without burdensome new taxes of debatable necessity.

Joe Owens went to Qanah Saturday for medical treatment.

The W. M. S. will meet with Mrs. R. L. Morris April 12. Visitors are welcome.

Mart Owens, who has been sick for several weeks, is slowly improving.

Mrs. Maye Gardenhire of Rockwall visited her brother, G. M. Canup, and family over the week-end.

Mrs. George Owens of Big Spring is visiting Mr. and Mrs. Joe Owens.

F. U. Powell and Mrs. Jesse Russell entertained their pupils April 1 with a picnic.

THE CHOKES ON YOU

—it drains your gas tank 5 to 15 times faster than normal

Watch out for this pickpocket! The choke is guilty, say automotive scientists, of stealing your mileage and your money.

In laboratory and road tests, they have actually measured your loss and proved that every time you pull out the choke, the gasoline consumption of your motor is increased five to fifteen times.

This explains why Phillips 66 Poly Gas gives such amazing economy. Being higher test, it requires the least possible choke. And it is higher test without higher price, because Phillips is the world's largest producer of natural high test gasoline.

Cool days, warm days, snowy or rainy days; in any weather you get remarkable economy with this 100% custom-

tailored gasoline. Besides, every gallon has the extra energy units supplied by patented POLYMERIZATION process.

So if you want more pep and power want faster response to the throttle, want speed and added mileage—the gasoline you want is Phillips 66 Poly Gas.

It costs nothing extra and it's earned. Just keep an eye out for the Orange and black 66 Shield. Stop... fill up... your very first trial tankful will prove it's a difference.

CHANGE YOUR OIL... NOW! Drain and refill with Phillips 66 Motor Oil... for summer lubrication, because it is the finest lubricant refined by Phillips, we recommend it as "the world's finest oil for your motor."

Phill-up with Phillips for Greater Mileage

from auto licenses, keep all this revenue, while sums over \$50,000 go, on a graduated scale, partly to the highway funds. Diversion of registration from large counties to small counties obviously cuts down the department's road building funds, which amounted last year to about \$5,770,000 from this source. The highway department took steps to curb the registration of cars in counties other than those in which the owners actually lived. Meanwhile, the house permitted introduction of a bill to legalize registrations in counties other than those in which the cars are actually owned. Friends of good roads are preparing vigorously to contest the bill, pointing out that such a plan would endanger a fund almost equal to the state's share of the \$15,000,000 of federal-state highway now being built each year; that it would endanger federal aid, because federal authorities are becoming impatient with states that divert motorists' tax money to purposes other than highway building; and that it would take a substantial part of all the funds now available for building strictly state roads, on which no federal aid is obtain-

are at a special session, if it dies this time.

Notes

Sen. Claude Westervelt, of Dallas, gets tired of hotel food, so his charming wife, Nell, installed a tiny electric grill, on which she cooks biscuit "like mother used to make," broils bacon and scrambles eggs, in their hotel room. An invitation to breakfast with the Westervelts is highly prized by Austin gourmets. Rep. "Red" Harris, of Dallas, is celebrating the arrival of a fine new son, his first-born, and as red-haired as his dad... Members of the house appropriations committee put Major J. R. Parton, Houston oil operator and Texas U. regent "on the spot" when he appeared to urge more liberal appropriations for the university. Parton frequently heads the independent oil men who appear to protest against higher oil taxes, and the committee professed wonder that he would favor more spending of state money... The board of control is in a stew, trying to iron out a conflict regarding dedication of the \$500,000 San Jacinto memorial at Houston. It seems that through somebody's mistake, both Jesse Jones and the Texas Mason-

ie Grand Lodge were both asked to lay the cornerstone. Jones controls the federal monument is being built with the Masonic brothers cast a vote, so the board of control doesn't want to offend either party... The fate of the race-repeal bill now depends entirely upon the parliamentary skill of its backers. It has a low place in the senate calendar. If they get it up, it will pass overwhelmingly. If its opponents can't get it off the senate floor, the bill is dead for this session. The error is reported to have been he will resubmit the repeal

SHERIFF'S SALE

The State of Texas, County of Foard. Notice is hereby given that by virtue of a certain Order of Sale issued out of the Honorable District Court of Foard County, of the 20th day of March, 1937, by J. A. Stovall, Clerk of said Court, for the sum of Three Hundred Ninety-Four and 63-100 Dollars, and costs of suit, under a Judgment, in favor of Thomas H. Dunn in a certain cause in said Court, No. 2523 and styled Thomas H. Dunn vs. S. H. Ross, Mary Davis-Ross, J. C. Ross, Mary Helen Ross, placed in my hands for service, I, A. W. Lilly, Sheriff of Foard County, Texas, did, on the 20th day of March, 1937, levy on certain Real Estate, situated in Foard County, Texas, described as follows, to-wit: Lot No. 10 in Block 92, situated in the original town of Crowell, in Foard County, Texas, and levied upon as the property of S. H. Ross, Mary Davis-Ross, J. C. Ross and Mary Helen Ross and that on the first Tuesday in May, 1937, the same being the 4th day of said month, at the Court House door, of Foard County, in the City of Crowell, Texas, between the hours of 10 A. M. and 4 P. M., by virtue of said levy and said Order of Sale I will sell said above described Real Estate at public vendue, for cash, to the highest bidder, as the property of said S. H. Ross, Mary Davis-Ross, J. C. Ross and Mary Helen Ross. And in compliance with law, I give notice by publication, in the English language, once a week for three consecutive weeks immediately preceding said day of sale, in The Foard County News, a newspaper published in Foard County. Witness my hand, this 22nd day of March, 1937. A. W. LILLY, Sheriff, Foard County, Texas.

Local Farm Debt Committee Members Will Assist Farmers

Texas farmers whose land has been actually sold under foreclosure proceedings have no way to redeem it under the Frazier-Lemke Act, upheld by the Supreme Court this week, according to C. P. Sandifer, chairman of the Farm Debt Adjustment Committee of this county. News dispatches from Washington carried by the larger dailies stated that the decision would help farmers whose land had been foreclosed. The Debt Adjustment committee stated that this is true in states where there is a period of redemption provided by the state laws, but that no such redemption period is provided in Texas. He urged farmers who were threatened with foreclosure to take prompt action as they must avail themselves of the moratorium privileges provided in the Frazier-Lemke Amendment before actual foreclosure has taken place. Farmers interested were invited to get in touch with the county supervisor of the Resettlement Administration, or directly with the Farm Debt Adjustment committee, which is composed of volunteer, unpaid workers. This committee will endeavor to bring about an agreement between the debtor and the creditor, under which the debt will be adjusted and possibly refinanced. If a voluntary agreement cannot be reached, the Debt Adjustment committee will assist the farmer in placing his case with the Conciliation Commissioner. Such commissioners have been appointed in every county of the state that has as many as 500 farmers. The Conciliation Commissioner holds a hearing with the farmer and his creditors in further effort to bring about an agreement which will provide a composition of debts and a further extension of time. If this fails, the farmer is allowed to amend his petition and ask that he be left in possession of all or any part of his property, and that appraisers be appointed to fix a reasonable rental for the property left in his hands. This rental must be paid into the Conciliation Commissioner for the account of mortgage holders, and distributed according to priority of claims. The farmer is allowed to continue payment of this rental for a period of three years, at the

VIVIAN (By Rosalie Fish)

Egbert Fish and son, Herbert, and daughters, Rosalie and Bernita, spent Saturday night and Sunday with their daughter and sister, Mrs. Marvin Sosebee, of Anson. They were accompanied home by Mrs. Fish, who has been visiting there the past three weeks. Mrs. A. L. Walling and daughter, Bernice, returned home Wednesday after spending several days in the homes of their son and brother, Jess Walling of Wichita Falls, and their daughter and sister, Mrs. George Benham, of Bowie. Miss Neoma Fish spent Saturday night and Sunday with her sister, Miss Bessie Fish, of Anson. Lee Allen Sosebee of Anson returned home Saturday after spending a few weeks in the home of his grandfather, Egbert Fish. W. O. Fish, who has been ill the past week, was carried to Paducah Saturday where he remained at the home of his brother, H. H. Fish, in order to receive medical treatment. Miss Bernita Fish is visiting with her sister, Mrs. Martin Sosebee, of Anson.

end of which time an agreement must have been reached for final settlement. In the meanwhile, if the mortgage holder feels that his rights are not being protected, he has the right to ask that the property be sold immediately. Hundreds of farms in the state are on the verge of being foreclosed because their owners do not understand that the Frazier-Lemke act gives them the privilege of a three-year moratorium, the committee asserted. The price of farm land has recently advanced and some creditors who formerly were willing to let matters rock along are now showing a tendency to seek possession, he said.

Stars of Film Hits at the Rialto Theatre This Week

Crowell movie-goers will have their last chance to see Dick Powell and Madeline Carroll in Irving Berlin's "On the Avenue" tonight. Fred McMurray and Gladys Swarthout are co-starred in "Champagne Waltz," which starts with the Saturday night preview and continues through the week-end, except Sunday night. Will Rogers returns to the local screen in his biggest hit, "Dr. Bull," next Wednesday and Thursday.

The programs at the Rialto will start at 7:30 o'clock on every week-day night, instead of 7 o'clock, according to an announcement by Dwight Moody, theatre manager, this week.

Antimony One Raw Material Not Native To Texas, Yet Lone Star Supplies U. S.

Laredo, Texas. (Special)—Texas, sometimes chided by her own economists for alleged prodigality in exportations of native raw material and too few processing and manufacturing industries, nevertheless boasts one unique distinction in the latter field—the United States' only antimony smeltery.

The big plant here of the Texas Mining and Smelting Co., established in 1930 and doubled in capacity in 1935, not only has put Texas on the antimony map, but has given the nation an industry theretofore missing and one that is a vital contribution to national defense, says a report of the All-South Development Council. Started during the depression, it has given substantial employment steadily since its inception, without taking away any employment elsewhere in the nation.

Antimony, a silver-white crystalline element used as a stiffener and hardener for lead alloys having many industrial, chemical and military uses, is not a Texas raw material, and in fact antimony-bearing ores are not found in commercially important quantities anywhere in the United States.

Yet the Laredo enterprise has been responsible for a radical and desirable change in the import situation in both ore and metal, the report says. Although China has long dominated the world market, the Texas smeltery has looked to Mexico and to a less degree Bolivia, for its ore. The result is that whereas China furnished 75 per cent of the United States requirements in the period 1913-30, in 1931-35 that figure dropped to 40 per cent, while imports from Mexico increased from 8 to 51 per cent, nearly all in ore, processed at Laredo.

From the standpoint of national defense, this shift in antimony supply is regarded as particularly important, improving the accessibility of both ore and metal from Pan-America instead of from across the Pacific, and making practical the utilization of certain small domestic stores of ore, principally in Idaho. The Laredo smelter, since 1931, has produced as much metal, lacking only 11 per cent, as has been imported during that time.

Storage battery plates, bearing metals, and type metal are the three biggest uses for antimony as lead alloy, taking 28, 18 and 12 per cent of the total, respectively. Its uses in ammunition and for

Operated by Fingers

Puppets are operated by the fingers (marionettes by strings) and sometimes require large staffs of operators for there can be as many as 40 "actors." The operator sits underneath the stage and holds the puppets above his head. The stage sets are often as elaborate and complicated as in a theatre and the operator has to be careful to judge his distances correctly. It is also no easy matter to keep the voices and the action consistent.

A. Something on the bulletin board that I wish I could forget.

Q. Can you repeat the words of the school song?
A. I can hum the tune.

Q. Are you guilty of something that your best friend won't tell you about?
A. My best friends also eat onions on their hamburgers.

Q. Which vegetable should one eat with one's knife?
A. Spaghetti, if one is quick on the draw.

Q. A red headed boy should wear a tie of what color?
A. Purple with orange dots.

Q. What is the technique of becoming the most popular girl in high school?
A. Step out like Oleta Faye Zeibig.

Q. What is a touchdown?
A. What we didn't make enough of last fall.

Q. What is a quarterback?
A. One-fourth of a fullback.

WHY WORRY?

The legs of the duck are short, the legs of the stork are long. We cannot make the duck's legs long, nor the stork's legs short, so why worry? A tremendous amount of time and energy is wasted in worrying about things that cannot be changed. It does absolutely no good. The sensible thing to do is to accept the things that can't be helped and go on. Turn your back on past mistakes—face the sun and the shadows will fall behind you.

EDITORIAL

It is true that age makes it hard for older people to see things the way young people see them. We aren't going to scold the parents for forgetting what it is like to be young, although they do need it, and we shouldn't try to defend them either.

However, years are not the only things that lend misunderstandings among parents and children. The relation between parents and children is, so to speak, a one-way street, with all the privileges and gifts moving in one direction. There is nothing more irritating to children than to have their parents always complaining of the sacrifices they have made for their offspring. Yet on the other hand, there is nothing more tragic to parents than to feel that their children are critical of them for not being able to provide a more luxurious scale of living. It is one of the tragedies of life that the hard work and economy that the parents experience come at a time in life when children cannot appreciate them. Young people should use a little more imagination for their parents' difficulties, then there would be less of this useless martyrdom.

High school students should be mature enough to put themselves in other's places. Study your parents. Find out about their accomplishments, their troubles, their special interests, the interesting and exciting adventures which (you may be sure) have happened to them some time. If you do, you'll learn to appreciate their solid qualities of character and purpose and affection which are worth more than the smoothest "line" you know.

FFA DEBATERS

Garrett Middlebrook representing the affirmative side of the F. F. A. debate question won over Marion and Franklin last Wednesday morning.

The Chemistry class decided in favor of Garrett, 6 to 3. Garrett had been teamed with Bernice Fitzgerald before and had lost two decisions. Bernice refused to debate again so Garrett took both speeches, both rebuttals, and rejoinder and really demonstrated that he had been doing his part. These three boys, Garrett, Franklin and Marion, will go to Lubbock Friday for the Area debate contest.

David Solis, who has been working on extemporaneous speaking subjects and Hughes Fish, the chapter reporter and news writer, will represent the chapter in their capacities.

Mink Is a Wanderer
 The male mink is a wanderer. He will often travel 10 to 15 miles in a night, says Successful Farming. The female, on the other hand, rarely leaves her den more than a quarter of a mile. The female skins are of finer quality than the male, but rarely grade more than medium. The weather is never too cold for the mink to travel.
