### Thalia School to Open 1941-42 Term Monday Morning

#### Congressman Ed Gossett Will Speak at 9 o'Clock

The Thalia Consolidated School will start its 1941-42 term of school next Monday morning, Sept. 1, at 9:00, according to an announcement released from Thalia yesterday by Supt. Bailey Rennels. Plans are going forward to have everything in readiness for the opening date. The superintendent pointed out that perhaps the most important feature of the opening of school would be the appearance of Congressman Ed Gossett at the general assembly in the auditorium at 9 o'clock. Gossett has recently returned from Washington, and he will discuss the war situation in Europe and the relation of the United States to it. The appearance of Congressman Gossett at Thalia affords the people of this section a rare opportunity to hear a good discussion of the situation, as his visit to Thalia marks his first appearance in this county for some time. Supt. Rennels stated that the program in the auditorium will start promptly at 9 o'clock. Mr. Gossett has to leave shortly after his address.

The faculty, according to Mr. Rennels, is as yet incomplete, but elections to vacancies will be made by the start of school. The day will be given over to registration, classification, and issuance of books to students.

Bus drivers for the coming school year are Ed Payne, Frank Cook, and Buster Lindsay. Mr. Cook is also caretaker of the school buildings. Trustees of the school are W. J. Long, president; Willie Cato, secretary; L. Swan, W. A. Johnson, John Thompson Jr., Jim Moore, and H. Hammonds.

The public is invited to attend the opening program of school.

#### Three Quanah Men Killed in Car-Truck Collision Tuesday

Three Quanah men were fatally injured at 10:45 Tuesday morning when a gasoline truck and a car met in a head-on collision at the intersection of Highway 287, just inside the city limits of West Quanah.

The dead are: J. C. Clements, 60, employee of the Q. A. & P. railroad shops; J. M. Drake, 70, retired from services of the Certain-Teed plant of Acme; S. B. Wells, 73, pioneer Quanah plumber. The former two were dead when received at the hospital and Mr. Wells died about 2:30 Tuesday afternoon.

The three men were returning to Quanah from a fishing trip when the accident occurred. The driver of the truck, Delmo Mitchell, of Chillicothe, was uninjured except for minor bruises and scratches. Both the truck and car were demolished.

#### Gambleville School to Open Monday

The Gambleville School will open for the 1941-42 term on Monday, Sept. 1, next Monday.

### Work on \$35,000 Structure Delayed by Heavy Rains

#### First Car Passes Over New Concrete Bridge August 10

Work on the new concrete bridge supported with concrete caps on wooden piling, 862 feet long on the Wichita River between Foard and Knox Counties on State Highway 283, was finished Saturday, Aug. 15. The new structure was opened to traffic on Sunday, Aug. 10, when the first car passed over. It is 23 feet wide with 21 feet and six inches traffic way.

Erection of the new bridge was a WPA project sponsored by the State Highway Department with C. H. McClellan of Wichita Falls having the contract. John Goeking was the resident engineer for the Highway Department, Walter Thomson, superintendent for WPA, and E. W. Gray, superintendent for Mr. McClellan.

An average of 40 WPA workers and four skilled workmen furnished by the contractor were employed on this project during the construction period. The amount of Highway Department funds used in the new structure was \$25,000, and approximately \$9,000 WPA funds were used.

When work on the new bridge was started Feb. 20, it was expected to be completed within four months, but on account of the heavy rains in April and May, about six months were required for completion.

### School Lunch Projects to be Operated in Foard County; Sewing Room Project Will Be Suspended Sept. 12

In a meeting held Wednesday afternoon in the office of County Judge Leslie Thomas attended by the Commissioners of Foard County and Mrs. Edna E. Hardwicke, district supervisor, Professional and Service Projects, Work Projects Administration, and Mrs. Mary Boles, supervisor of the division of school lunch projects, plans and preparations were laid for the continuation of the school lunch project in the Crowell Schools and the inauguration of the project into the Thalia, Margaret and Riverside Schools in the county.

Mrs. Hardwicke expressed to the Court the necessity of stressing the public health program under the present National Emergency as outlined by the Washington office and informed the Court that the lunch project had been classed as a vital portion thereof. Both branches of the service, the Army and Navy, have informed the Washington office that the reason underlying the vast number of rejections in the service has been malnutrition of the selectees.

Under present conditions, due to the great decrease in quotas for the entire district of which Foard County is a part, the number of workers allotted to Foard County by the Federal Administration is not sufficient for the operation of both the sewing room and the lunch projects and, due to the emphasis placed upon the Public Health programs, Mrs. Hardwicke explained that it would be absolutely essential for the sewing room project in Foard County to be suspended in order that the lunch projects could be

### Riverside School Will Open Fall Term Monday

The Riverside School will open for the 1941-42 session on Monday, Sept. 1, at 9 o'clock. After a short assembly, students will be registered and books issued. It is planned to dismiss all students by 11:30 o'clock on Monday.

As usual, the cafeteria will be operated this year by the Parent-Teacher Association. Because of the early dismissal on Monday, there will be no lunch served that day, but there will be lunches available on Tuesday. The P. T. A. will meet at the school building on Thursday, August 28, to move the cafeteria into the school building.

A faculty meeting is to be held on Saturday of this week at one o'clock. The faculty will be Sam Billingsley, principal; Miss Arlene Rice, grades five and six; Mrs. Linnie Fisher, grades three and four; and Mrs. Howard Bursley, primary.

### Rex Traweck Exhibits Fine Stalk of Cotton

Rex Traweck brought a fine stalk of cotton to town Monday which was taken from his field of 73 acres on the J. F. Long farm in the Claytonville community, 14 miles southwest of Crowell.

The stalk that Mr. Traweck brought in contained 30 practically grown bolls, 30 small bolls, 38 squares and 4 blooms.

Cotton over the county is very fine at this time with the good season now in the ground is expected to make a bumper yield.

#### Army Morale Head

Frederick H. Osborn of New York who was nominated by President Roosevelt to be brigadier general in command of the army's morale branch. He succeeds Brig. Gen. James A. Ulio. Osborn is well known in financial and industrial circles.

#### People Urged to Bring Anything They want to Sell; No Expense

The first of a series of free auction sales expected to be held in Crowell on Saturday of each week, will be held Saturday, Aug. 30, under the auspices of the Farmers & Business Men's Association and co-operating Crowell merchants, who will also feature special values for that day.

The auction sale will be held on the vacant lot south of the postoffice, and will be conducted by Col. T. C. Bowden as auctioneer. The sale will begin at 1:30 p. m. Col. Bowden has conducted a number of successful sales throughout West Texas during the past several years.

Farmers of this section and, for that matter, residents of all the towns in the county as well, will have an opportunity to sell surplus products, livestock, articles of furniture that are not needed, implements — in fact, there is no restriction—any usable article of value brought to the sale grounds, will be sold without the owner having to pay the auctioneer a single penny, and with no charges of any kind. Col. Bowden urges everyone to take advantage of the free auction, and bring everything and anything which they have to sell, and guarantees it will be sold.

"In saying anything, I mean exactly that," the auctioneer declared. "Anything from a setting of hatching eggs to a farm tractor, used car, or prize livestock, can be brought to this sale and will be auctioned absolutely free," he explained.

Not only is the sale an advantage to sellers, but it is of real value to buyers, affording an opportunity to secure something they want or need at their own price.

#### GETS DEGREE AT TECH

Douglas Adkins, son of Mr. and Mrs. Cap Adkins, of the Riverside community, received his B. S. degree from Texas Tech at Lubbock in graduation exercises held at the college last Friday evening. Wichita River was running bank full Thursday morning.

### Farmers Co-Op. Gins Being Repaired

The Farmers Co-Op. Gins of Crowell are being repaired and will probably be repaired before the ginning season opens, it was announced this week by T. V. Rascoe, manager. Local men are being employed to do the repair work.

the commodities distributed by the Administration. The outlook on receiving commodities by the various schools participating in the program is very bright. In fact, it is highly probable that more and better commodities will be received this year by the schools than ever before. This, of course, is attributed to the very high regard by the Government placed upon the health program.

Workers are to be prorated to (Continued on page four)

State-Wide Cotton Committee Will Meet at Hillsboro Aug. 30

Hillsboro—Next Saturday, the 30th, is Hillsboro's big day for 1941. Week-end capital of Texas will be this homey little city in the pulsing heart of the black land cotton belt.

Once a year Hillsboro claims the Texas spot, occasion being the annual gathering of the State-Wide Cotton committee, followed by the barbecue given by Burris C. Jackson, Hillsboro postmaster and cotton factor, and a group of associates. The party honors five Texans who have, in the past year, performed conspicuously faithful and valuable service to the state.

Co-nests with Jackson are H. E. Chiles, Pat E. Hooks, C. S. Morgan, Clyde Tomlinson and S. J. Vaughn Jr., all business men of Hill County. And the year's quintet of Texans to wear the accolade are:

J. Thos. Davis, Stephenville, president, West Texas chamber of commerce; John W. Carpenter, Dallas, secretary, Texas Power & Light Company; J. N. Edens, Corsicana, president, East Texas chamber of commerce; Dewitt C. Greer, Austin, state highway engineer; and Brig. Gen. J. Watt Page, Austin, the adjutant general of Texas.

The five outstanding Texans have been selected largely by an advisory group of prominent men. Many nominees are put forward before final selection is made. The barbecue was originated by Burris Jackson and his late father, Maj. Gen. Will B. Jackson. The affair is strictly invitational, stag, and is never blocked by bad weather, for, in that event, the barbecue is moved from outdoors into the large gymnasium adjoining the athletic field.

Jackson is chairman of the State-Wide Cotton committee. Saturday's events will start with a meeting of agricultural leaders from West, East and South Texas under the sponsorship of the state's three regional chambers of commerce. The session will get under way at 10 a. m. Elmore Torn, agricultural director of the

East Texas chamber, will preside. The address will be given by D. A. Barden, West Texas chamber of commerce general manager. Barden will speak on Texas' cotton economy, the movement of Texas goods in transportation, and the problem of discriminatory freight rates against Texas.

All attending Saturday's morning meeting will be Jackson's luncheon guests. The annual session of the State-Wide Cotton committee will get under way at 2:30. Then will follow the barbecue at 6:30 honoring West Texas J. Thos. Davis and the four other Texans.

If the seed of redbud trees are gathered and planted as soon as they have ripened, they will come up next spring and produce plants two to three feet high in one season.

Straw mulched into surface soil leaves it spongy and capable of absorbing greater quantities of water.

There are seasons when to be still demands immensely higher strength than to act.—Cainning.

Seed Wheat

We have in our Crowell Elevator around 5,000 bushels Foard County combined mixed wheat, testing from 56 to 60 pounds, and this mixed wheat, when sold just as it come in from the combines, will be sold at slightly above the local price from day to day.

We have around 1,000 bushels of 98 per cent pure Turkey Red wheat testing around 56 and prices will be made on this wheat on application.

There is a few granaries that have seed wheat and we will be glad to refer you to them for seed.

We have around 5,000 bushels Early Black Hull wheat testing from 56 to 60 pounds, all harvested with binder, threshed; every load tested perfectly dry; all placed in one bin, run through our oat machine and cleaners; small berries and trash removed. Subject to change without notice this wheat is priced at \$1.25 per bushel basis No. 1.

We are not in the seed wheat business and if we can help you find the seed you want in granaries or elsewhere at better prices we will gladly do so.

We do not assume any risk on any wheat sold, and when delivered to you at our scales the risk is all yours.

BUY YOUR BUTANE SYSTEMS AND APPLIANCES NOW! Before they take Further Advances

There are two very satisfactory ways for using Butane. Best way is to install an UNDERGROUND TANK of proper size, pipe your home for it, and use it exactly like Natural Gas, for COOKING, HEATING and to run Hot Water Heater and Electrolux Refrigerator. Gas comes quite a bit cheaper, and all runs off of one gas supply (Tank). One knows all the time just what it is costing and no utility can present a bill each month. Second best way is to use one or more "100 Pound Cylinders," or Drums (bottles) which is very satisfactory for running a Cooking Range, and Refrigerator, but is not hardly economical enough for Heating, besides you have to bring in your cylinders when empty for refills, and the gas is some higher, too.

Appliances we have to go with Butane Underground Systems:

BUTANE GAS COOKING RANGES: The Grand at various prices, styles and features; the NORGE, \$79.95 to \$89.95; Kitchen Queen, \$59.95 to \$82.95; Pan-American, \$79.95; Chambers, \$114.50 to \$228.50; and many others available.

Rheems and "U. S." Hot Water Space Heaters:

THE FAMOUS "DEARBORN." The kind that never gets hot enough on top and ends to scorch or burn anything, but gives intense heat from the front and circulates all the air throughout the whole room—many others, including The Thompson, The Acme, the Bu-Pro-Fire, made to use exclusively the BUTANE-PROPANE GAS.

SAVE ON REFRIGERATION

College Station.—By observing a few simple rules, homemakers can economize considerably on the cost of refrigeration whether their ice boxes are cooled by electricity, ice or gas. These tips are offered by Bernice Claytor, Extension Service specialist in home improvement.

Don't open your refrigerator any oftener or any longer than is actually necessary.

Don't put hot food or dishes into the refrigerator. Let the left-over foods and the dishes they are in cool to room temperature before putting them in the box.

See that your refrigerator is properly placed in your kitchen. A refrigerator should be placed in the coolest part of the room, not near the stove or where it would be in the sun. Even more important than that, it should be placed so that air will circulate freely about it.

Keep your refrigerator clean—all of it. If you have a mechanical refrigerator, clean the coils well two or three times a year. If they are allowed to gather a covering of dirt, this covering keeps the coils hot.

Don't pack your refrigerator full of food, packages, and cans, for free circulation inside the box is necessary to good refrigeration. Remove all paper wrappings and bags and the tops of vegetables such as carrots when putting them in the refrigerator.

Be sure the outside door, hinges and catch work properly.

A wood-charcoal filter for gas masks said to have a special capacity for absorbing poisonous gases has been developed in the government's Division of Forest Products.

13,398 MILES ON 5-QUART FILL OF OIL in the Certified DEATH VALLEY DESTRUCTION TEST

Revolutionary New Oil tested against 5 other big brands. 6 new cars Destroyed to prove Economy and Protection.

The oil that reeled off an amazing 13,398 miles on one regular fill, in blazing Death Valley, was proved to be an oil of the Nth degree—an oil of new high character...Hence its name:

CONOCO Nth MOTOR OIL

This dramatic test, supervised impartially and Officially Certified, was simple, yet harsh. 6 identical new cars were taken to Death Valley—where the heat hits record highs. 5 of these cars were each assigned a different widely-known, highly advertised motor oil. The sixth car used new Conoco Nth motor oil.

Each car was broken-in on a brand assigned by lot. Then, one 5-quart fill of this same oil went into the crankcase—kept under lock. The cars were driven 57 miles an hour until oil failure cracked up each engine—utterly wrecked it! All of this under impartial official scrutiny, as was every step in the test, right on through the dramatic finish.

Here is what happened

New Conoco Nth oil went 13,398.8 miles. Not another oil came within 5,683 miles of this. One outstanding oil failed 8,268.5 miles sooner than new Conoco Nth motor oil. So it outdistanced the five competing oils by 74% to 161%.

Why this Astounding result was possible

New Conoco Nth motor oil contains a Conoco-originated synthetic (U. S. Patent 2,218,132) called Thiakene inhibitor. An inhibitor in motor oil acts

pretty much as an inhibition acts on you. Inhibitions hold you back; police many actions. And so Conoco's Thiakene inhibitor polices Conoco Nth oil...arrests pollution that otherwise comes from normal operation. And that's your aid against a dirty engine with inferior lubrication.

Are you an OIL-PLATING "fan"?

If you are, more power to you! Don't for a minute feel let down, for Conoco Nth also contains the famous synthetic that OIL-PLATES engines. OIL-PLATING comes from the magnet-like attraction that keeps it bonded to inner engine parts, so that it can't all quickly drain down to the crankcase—not while you're using Conoco Nth oil. This same famed OIL-PLATING is still yours to guard against wear.

Because of OIL-PLATING and Thiakene inhibitor, one 5-quart fill of new Conoco Nth oil went an astounding 13,398.8 miles. Of course, you'll never Death-Test your Conoco Nth oil in sinister Death Valley, nor repeat any other proving-ground tortures. You'll still drain and refill at the intervals recommended by qualified authorities. But how you'll expect to stretch the distance before you ever add a quart, judging by this big fact:

5 heavily advertised oils in the Certified Death Valley Test were out-miledged 74% to 161% by Conoco Nth oil. Economy like that counts up into dollars! Change to Nth oil today at Your Mileage Merchant's Conoco station. Continental Oil Co.—Pioneers in Bettering America's oil with Synthetics

HEY, LOOK BEHIND YOU!

What We Think (By Frank Dixon)

The past week I talked with two business men, one was engaged in a small industry and the other in a small mail order business.

Both are considerably above the average in intelligence and energy. Both are deeply discouraged. The cause of their discouragement and doubt as to the future is due to the fact that for the past several years government restrictions and government interference and taxes have increased to the degree that they can see no way in which they can make a profit from their business commensurate with their efforts and investments.

They have put into effect in their business every possible economy and have driven its promotion to the limit of their ability, but every economy and every additional effort has been checked by further restrictions and new and heavier taxes.

The sales tax, the social security taxes and the drastic requirements of the wage hour law have in many instances wiped out all the profits of the small business concerns that employ labor and must meet a payroll.

The party operating the mail order business told me that on a business grossing \$200,000 dollars a year, a small gross for a mail order business, he paid in taxes of various kinds over \$50,000 a year.

Both men feel that this is just the beginning. They expect to see restrictions made more drastic and taxes increased as time goes on.

A vast army of federal employees has been built up and is being added to daily. They are being put on by thousands, inspectors and investigators until even the problem of furnishing them office room has become acute.

Both of these men believe that this army will grow bigger and bigger and its demands will become greater and greater, necessitating heavier and still heavier taxes.

The stock answer to those who know nothing of business and its problems, whose business experience is limited to that of being on the receiving end of a salary check, is that business will have to take less profit, raise prices and adopt more efficient business methods.

The pressure is not upon the small business man alone. In the capital city of my state a most interesting and an evening newspaper consolidated their mechanical departments, preserving their individual news and editorial identity, but producing the two papers on the same press and with the same equipment.

These business men, like many others, are disturbed. They have come to feel that the danger that they face is not one of invasion by a foreign foe or a foreign foe, but the unsympathetic and indifferent attitude of those in authority toward the problems of small business.

They feel deeply that at the present time small business has no friend in court.

The continuation of the lunch schools in the county on the basis of one to every forty lunches served by a school. Last year the basis of distribution was one less but this may be accounted for by the lack of quota this coming school year.

One Variety Cotton Program Announced

College Station.—Texas is given four areas in the one-variety cotton improvement and marketing program for cotton grown in the United States, which the Department of Agriculture announced recently.

The areas, with the varieties being grown, are: Wharton County—Delta and Pine Land variety; Red River County—Rowden variety; Delta-Lamar area—Rowden variety; and South Plains area—Faymaster variety.

Government classing offices will be set up at El Campo, Clarksville, Paris and Floydada to serve each of the four areas, and growers should receive quick classing," said M. C. Jaynes, cotton work specialist of the A. & M. College Extension Service.

Under the plan, up to 225,000 bales produced in 1941 in selected one-variety areas, will be made available to domestic and foreign spinners in even running lots composed wholly of cotton from the same areas.

The marketing division of the Department of Agriculture will make an agreement with a shipper designated by the growers, who will act as buyer, to take over a portion of the cotton from each area, Jaynes said. The present plan of the department is to purchase between 7,500 and 10,000 bales in Wharton County; 10,000 bales in Red River; 15,000 in Delta-Lamar, and 10,000 in the South Plains.

The program provides federal payments of \$2.35 a bale for un-compressed cotton and \$2.75 for compressed to co-operating agencies which assemble the staple and deliver it to domestic or foreign spinners. These payments are to compensate handlers for the extra cost involved in employing the new and improved marketing methods required under the program.

According to the Department's announcement the cotton will be handled from grower to spinner in accordance with the latest approved practices. These practices include grading, special wrapping, compressing, official sampling and classification. Bales must be completely covered and undamaged by the compress.

Officials of the marketing division expect the program to demonstrate to spinners that one-variety cotton properly handled is more desirable for spinning and more economical to use than cotton assembled and handled under usual commercial conditions. Under the 1940 program, 106,475 bales were assembled.

The inauguration of the program in the Crowell Schools and the inauguration of the program into the Thalia, Margaret and Riverside Schools insures to each and every underprivileged and underserved child in the county a well balanced, nourishing lunch each school day which is assuredly a remarkable and laudable work.

Sweet corn is likely to become a major commercial crop in the Lower Rio Grande Valley for early spring markets, says a Texas magazine. The Lona hybrid, planted to some 3,000 acres, has done excellently in that section.

Last year the basis of distribution was one less but this may be accounted for by the lack of quota this coming school year. The limited number of workers allotted to the county may result in the necessity of volunteer workers being needed to assist in the proper administration of the program and it is sincerely hoped by Judge Thomas and the Court that each and every citizen of the County will cooperate to the full extent with the schools in a marked effort to secure to the schools the best programs possible.

Canada Is Building Tanks

CANADIAN industry performed a miracle when it fashioned its first heavy infantry tank. At the outbreak of war, the Dominion had no facilities for the manufacture of such military monsters as tanks and no means of making armor plate such as tank specifications call for. But brains, perseverance and expediency combined to make possible the overcoming of these serious obstacles and today, not only is Canada producing tanks at the rate of three per day but Canadian engineers have introduced improvements which are said to make these tanks faster to build than any of the size yet produced on this continent or in Great Britain.

Recently added to the library is "The White Cliffs," one of the most popular love stories and war stories of the year. It was written by Alice Duer Miller, whose many talents are too well known to need cataloging. Written in the "White Cliffs" is a long poem which expresses completely and beautifully what Americans feel about England in this dark hour. The story is concerned with a young American girl of good Yankee stock who marries an Englishman, loses him in the Great War, bears his son, and finds herself facing, with her indomitable mother-in-law, the new peril. This book is found in the list of best sellers. CHRISTIAN ENDEAVOR The meeting was called to order by the temporary chairman, Roy Joe Cates, and new business was discussed. It was decided that the Endeavor would pledge five dollars to the Texas Christian Endeavor Union for the year 1942. The meeting was then turned over to the program leader. Wayne Greening had charge of the program. The main theme and topic for discussion was, "Gambling." Those who took part on the program were: Winifred Greening, Roy Joe Cates, Kenneth Greening, Orval Holt and Ann Favor. Kenneth Greening will be leader next Sunday.

HEART THAT BEATS FOREVER

Have heard of Dr. Carman's chicken heart. It is really a whole heart—only a piece of a heart. Carman's minute piece out back...

He and his assistants are in black to avoid reflection. The room is windowless. Windows are cast by the light.

Under a microscope Carman's bit of heart is a tiny, tiny, tiny piece of heart. It is a drop of embryonic juice.

of the spread of the war, supply from the far east might be cut off. This could easily happen should Japan enter the war in support of the Axis and against the United States. The other sources of supply of rubber include Brazil which produces annually about 16,000 tons a year, rubber substitutes from which with present facilities only 65,000 tons a year can be produced, and re-claimed rubber from which source 400,000 tons or 500,000 tons might be secured. Extensive efforts are being made to set out plantations of rubber trees in Bra-

The fall months have become the recruiting season for the churches. During the summer months people are interested in vacations and the weather is too hot, or a half dozen other things take precedence over the church. It is now time to give some reasons why you should be found in church each Sunday for the services.

The very fact that so many people belong to the church is an indication that folks want to do the right thing. There are just too many who fail to get around to doing the thing they know is right. Well, snap out of that feeling next Sunday morning and meet your friends at Sunday School. Bring the children and stay with them for Sunday School and they will stay with you for church and the cause of righteousness.

The year thus far has been a high average in all the departments but less than three months remain for the finishing of the task. September is a month of re-organization; October is the time to finish paying all bills for the year; and November the anxious month, especially so with the preachers.

Whatever these months have in store for us will depend very largely on what we are willing to put into them in the way of consecration, prayers, and good hard work. The church needs the support of all of its members but there is not a single member who does not need the spiritual values the church may supply by way of pointing one to God. Give your "Better-self" a chance to lead you to a richer life. Services: 11 a. m. and 7:45 p. m. Sunday School, 9:45 a. m. League, 7 p. m. and Woman's Society of Christian Service, Monday, 4 p. m. H. "Christ Jesus" is the subject of the Lesson-Sermon which will be read in all Churches of Christ, Scientist, on Sunday, August 31. The Golden Text is: "I am not ashamed of the gospel of Christ: for in it the power of God unto salvation to every one that believeth" (Romans 1:16).

Among the citations which comprise the Lesson-Sermon is the following from the Bible: "Come unto me, all ye that labour and are heavy laden, and I will give you rest. Take my yoke upon you, and learn of me; for I am meek and lowly in heart: and ye shall find rest unto your souls" (Matthew 11:28, 29). The Lesson-Sermon also includes the following passage from the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy: "When Christ changes a belief of sin or of sickness into a better belief, then belief melts into spiritual understanding, and sin, disease, and death disappear" (page 442).

Our Weekly Sermon

Naomi: The Mother-in-Law

Text: "And Ruth said, Intreat me not to leave thee, or to return from following after thee: for whither thou goest, I will go; and where thou lodgest, I will lodge: thy people shall be my people, and thy God my God; where thou diest, will I die, and there will I be buried: the Lord do so to me, and more also, if I ought not to do this thing."—Ruth 1:16, 17. Sarcastic darts have been cast promiscuously at mothers-in-law. But one of the sweetest stories in the Old Testament is that of mother-in-law Naomi and daughter-in-law, Ruth. Why should not Naomi have endeared herself in the life of Ruth? Why should not Naomi have endeared herself in the life of Ruth? When our lives are possessed by God, they are made lovely because of His indwelling—and what a difference it makes in our daily lives when we are indwelt by Him! Then it is not surprising that even daughters-in-law fall in love with the God-imbued loveliness of a mother-in-law.

Little did Naomi dream that her reward for godliness would be the coveted wish of many. She was the means of having Ruth play an important part in the ancestry of the Lord Jesus, who brought blessing to souls in captivity—the captivity and bondage of sin. Little do we know what God has for us to accomplish by our godly and lovable lives. We may become stepping stones, if nothing else, not only for our near or distant relatives, but for our friends and neighbors, so that they may perform exploits in His name—things for which we are not equipped. Are they saying to you as Ruth said

Arms Abrasives Plant Destroyed by Fire

The FBI has started an investigation of the fire which totally destroyed the Exolon company abrasives plant at Bladell, N. Y., which was engaged in manufacturing defense materials. The fire caused damage estimated at more than a million dollars. Fire apparatus from Buffalo and surrounding suburbs helped fight the flames. Above is view of the ruins.

Two Minute Sermon (By Thomas Hastwell)

The Religion of Happiness: I have visited with people about their religion and their beliefs and their faith, who, as soon as they began to talk about religion become very solemn and long faced as though religion were a thing that one shouldn't be happy about. I have even been made to feel by some on such occasions that with religion was a sin. I have no faith in this type of religion. I think that the end and aim of religion is human happiness. The cry of every human heart everywhere is for human sympathy,

and understanding, and the uplift that comes from an encouraging word and a cheering smile. Christ lived and died that mankind might and happiness and peace. His followers should preach and teach and live the religion of happiness. The world needs it today.
