Two couples were double dating, and one of the boys was so overcome by the charm of his girl that he didn't realize that it was time for the other girl to be home. After he had remarked at his date's beauty and personality, the irritated girl said, "I know your date is beautiful and charming, but this old hag has got to go home."

IOWA PARK SLIPS BY CROWELL IN DUAL MEET

The Iowa Park track team slip-ped past the Crowell Wildcats in a dual track meet at Iowa Park last Friday winning by 2 points, 641/2 to 621/2.

The inexperienced Wildcats battled the Hawks to a standstill until the high jump event. The Hawks all but swept this event, allowing Crowell only ½ point. This one-half point was Jon Sander's tie for fourth.

In the first race, the 100 yard dash, Crowell won first, second, and fourth, with Rouse Todd win-ning it in 10.5 seconds. In the next contest, the Hawks just about evened it up winning 1, 2 and 4 in the discus throw. Jimmy Rasperry won third place for Crowell. Iowa Park then went ahead by winning 1 and 3 in the 440 yard dash. Then in swift succession, Crowell won the 220 yard dash, and the 880 yard dash to again regain the lead.

In the 220 yard dash, Jimmy Rasberry and Rouse Todd won first and second, respectively, for the Wildcats. After about 400 yards the 880 wasn't even close with Ginger Johnson leading. Robert Brock finished fourth.

With four men from each school entered in the mile run, F. L. Ballard and an Iowa Park miler ended in a dead heat for first place.

Going in to the high jump event Crowell was leading by 2 points, but as already mentioned the Hawks all but swept this event to go 9-up on Crowell. However, in the final event, the shot put, the Wildcats managed to take 2, 3 and 4 places. Crowell's weight men— Hack Norman, Jimmy Rasberry and Gordon Bell-looked exceptionally well in this field with only the more experienced Johny Wor-rell of Iowa Park besting their heaves.

So far this year Crowell is the only team in the district to give the Hawks a battle in track meets. Jimmy Rasberry and Rouse Todd were high point men of the meet with 15 and 14 points each.

What We Think

(By Frank Dixon)

I have done a good deal of where are we headed for. The matter has been emphasized by April 1, 1950—This has been an lot of propaganda put out by Drew tlement the fact that it is going o be and even is at the present ime followed by a number of

I do not propose to go into the matter of the several contentions presented by the strikers. Whethr they are all justified, I do not now, and, for the point I desire discuss, are not pertinent.

Prices are already high which
heans that we have inflation. The

emands made and secured by the coal miners are going to result in another round of strikes and wage ncreases and another boost in in-

When these wage increases ake the rounds and coal and el and other items largely used, ave been affected by them, prices are going to go up. There is no way out of it—no escape from it. According to the pattern set in the ces affects the cost of living her round of strikes-another ave of price increases and so on ere is no stopping place that I ut some serious and drastic erup-

It is conceivable that beefsteak ill one day cost three dollars a ed dollars, a common type autoobile five thousand dollars, and that wages will be from twenty-five to thirty dollars a day. Asuming that such is the fact, where as anyone been benefited? What there to be gained in earning week's wages in one day if one has to spend it all to pay the day's xpenses? What has it profited the worker? True he handles more noney and writes bigger checks, but he doesn't live any better than he did when things were operating at a more moderate level.

On the other hand the individual with a fixed income—the retired person who has managed to save a few thousand dollars during a long period of years and has finally been forced to retire because he is no longer physically able to carry on, is going to find himself gradually ground between the lower mill stone of fixed income and the upper millstone of radically advancing costs. Those who subsist on pensions, Social Security, old age payments and the like are going to find their income pitifully inadequate to meet the sky-rocketing costs of a crazy world. There may be some who sin-

cerely believe that this thing can go on and on indefinitely without damage or injury. I do not share this belief. I think the idea that it can is wholly untenable. I think a day of reckoning is coming. The first sign of it will be growing unampleyment and reduced extended. employment and reduced retail

Washington Newsletter

(By Congressman Ed Gossett)

exceedingly busy week in the House of Representatives. The leadership has been driving hard to get a number of items finished pefore the Easter recess which begins April 6 and lasts until April

The most important bills passed in the House this week were the ECA (European Cooperation Administration) and the so-called Kerr Gas Bill, the "Kerr" being Senator Bob Kerr of Oklahoma.

When the Gas Bill and the ECA Bill were finally voted upon yesterday, all Texas members voted for both bills. This is a most unusual occurence. I recall the fall of 1941 when the Selective Service Act was extended by a margin of vote. At that time all Texans voted for the extension. As a matter of fact, most all Southern members voted for the extension. While they make some mistakes, Southerners have always been in the forefront in trying to protect

and defend the Nation not limited to the Marshall Plan, ations go. or any other particular plan. Under it we will send technicians to the the Federal Government should go backward areas of the earth to in the regulation of business, and help teach modern methods of farming, new industrial tech- fere with State regulations. niques, etc. The part of this program which I especially distrust is the one which would guarantee certain foreign investments of Americans in such countries. In my opinion we should not guarantee John Doe that he would not lose money when he builds a re-finery in Pakistan. We certainly sales. As the volume of sales of against such loss on a building of a refinery in the United States. What We Think

(By Frank Dixon)

be and even is at the present

I do not propose to go into the matter of the several contentions presented by the strikers. Wheththey are all justified, I do not now, and, for the point I desire discuss, are not pertinent.

Prices are already high which eans that we have inflation. The emands made and secured by the cal miners are going to result in nother round of strikes and wage

ke the rounds and coal and

wages will be from twenty-to thirty dollars a day. As-True he handles more On the other hand the individual

with a fixed income—the retired person who has managed to save a few thousand dollars during a long period of years and has finally been forced to retire because he is no longer physically able to carry on, is going to find himself gradually ground between the lowr mill stone of fixed income and the upper millstone of radically advancing costs. Those who subon pensions, Social Security, ld age payments and the like are find their income pitifully inadequate to meet the sky-

ocketing costs of a crazy world. There may be some who sincerely believe that this thing can go on and on indefinitely without damage or injury. I do not share this belief. I think the idea that t can is wholly untenable. I think a day of reckoning is coming. The first sign of it will be growing unemployment and reduced retail

ment will increase and once that creeping paralysis sets in it will spread through our entire economslowly to a standstill.

I may lack the degree of optimism that some have. Perhaps I do. I have read widely in search of an opinion that offers a plausible solution or answer to the broad road we are following, but I have found none. I can't close my eyes and ears and lull myself to sleep with the idea that we are going to come back to normalcy smoothly and orderly and

Washington Newsletter

(By Congressman Ed Gossett)

has been emphasized by April 1, 1950-This has been an lot of propaganda put out by Drew

exceedingly busy week in the House of Representatives. The leadership has been driving hard to get a number of items finished before the Easter recess which pegins April 6 and lasts until April

The most important bills passed in the House this week were the ECA (European Cooperation Administration) and the so-called Kerr Gas Bill, the "Kerr" being Senator Bob Kerr of Oklahoma.

When the Gas Bill and the ECA Bill were finally voted upon yes terday, all Texas members voted for both bills. This is a most unusual occurence. I recall the fall of 1941 when the Selective Service Act was extended by a margin of 1 vote. At that time all Texans oted for the extension. As a matter of fact, most all Southern members voted for the extension. While they make some mistakes,

five hundred million dollars. We the production and distribution of were defeated on this amendment gas. The FPC has long had authorby 12 votes. I then voted to cut ity to regulate interstate transporwith several other Texans, voted to strike from the bill Title 3. We were again defeated. Title 3 is the until it is sold in the market. The 4 is a program designed to aid backward countries. Point 4 is not limited to the Marshall Plan, or any other particular plan. Under It's another question of how far it we will send technicians to the the Federal Government should go backward areas of the earth to in the regulation of business, and help teach modern methods of to what extent they should interfarming, new industrial tech- fere with State regulations. niques, etc. The part of this program which I especially distrust the one which would guarantee certain foreign investments of Americans in such countries. In my opinion we should not guarantee John Doe that he would not lose money when he builds a re finery in Pakistan. We certainly would not guarantee John Do sales. As the volume of sales of against such loss on a building of the week-end with relatives here. sales. As the volume of sales of a refinery in the United States. While not a pessimist, I feel that our country could be destroyed

through dissipation and infiltrasystem and cause it to grind tion, i. e., the dissipation of our resources and the infiltration of our country by political refugees. A few minutes ago a Colonel the Army Air Forces came by to see me. He was telling me of the outrageous imposition upon American tolerance of the so-called DP program. He knew of a number of cases of criminals who have ome here under the DP program. He gave me the name of an Hungarian doctor who was a notoriou bortionist, but who came in with DP papers. Dozens of American officers and officials have called on me with similar reports. However, their names cannot be used

Girl of the Month" for March.

An "A" student at Clovis High by the chaplain, the degree team took the floor for practice.

School where she is a senior, Wilda competed with 43 other girls in the state of New Mexico for the coveted DAR award, given on the basis of dependability, service, On Thursday, March 23rd, the leadership and patriotism. On April 8 she will be given the latter honor by the American Association of building, its new meeting place, University Women at a luncheon

COMMON SENSE

We learn in grade school physiology that the book is made up of a bony framework, enclosing organs, and controlled by the energy from the brain through the nervous system.

Peculiarly, many forget this fundamental fact, and as time goes on, and when sickness is present in on bodies, we may think of the affected area as a le structure in the body, rather than connected with the nervous system.

For example, in a case of heart trouble, the hear fails to function normally; consequently, symptoms of pain, shortness of breath, dizziness, et cetera, result

It is only common sense to locate the CAUSE rather than to try to care for the heart as a separate part of the body.

When one stops to think that the heart has hookup or nerve connection in two ways-one set of nerves act as an accelerator to speed up function, and the other as an inhibitor to slow down function, it he comes clear why the "machinery" must all be in order to receive perfect results. How much better it is to rstore the mental impulse supply for normal function

It should be remembered that when any organ fail to receive its normal mental impulse supply from the brain through the nervous system, it will cease to function normally.

This, then, is the basis for sickness or disease,

EMINENT MEDICAL SCIENTISTS STATE .

"After practicing medicine for 15 years, and spinal orthopedy for 10 years, I am daily astonished at the remedial power of spinal adjustments as a cure of disease."-Dr. Lee Forrest Potter, orthopedist, New

"Becoming convinced that many ailments were due to misalignment of the vertebral column, I decided to learn more about correcting these abnormalities. I frankly confess that I obtained this information from a Chiropractic college . . . I now examine the spine of all my patients."—Dr. H. W. Scott, in the American Journal of Clinical Medicine.
