Every qualified voter in Foard County is eligible to vote in the Justice of the Peace Precinct No. 1 race since it covers the entire county. County Chairman Leon

The county clerk's office will accommodate the voters of Precinct No. 1; Precinct No. 2 will

Ant Insect Situation in Foard County

The following information received by Joe Burkett, County Agent of Foard County, and George Davis, Extension Entomologist.

The fine rains of the last week given us the much needed moisture to keep our cotton growing and fruiting vigorously for us. While the cotton is doing well, we want to set as much as possible and as soon as possible, in order to get full benefit from this moisture. If the insects are kept below a damaging level, this heavy quick rain will take place.

There are three insects that should be especially concerned about at this time. They are the fleahoppers, bollworms and boll weevils. Fleahoppers knock off very young squares while bollworms and boll weevils work primarily on the larger squares and

probably the fleahopper will do most damage for the next three weeks. They are already pretty well established in the fields, and should certainly be under present weather conditions. This insect is especially destructive because it damages small squares about the size of a pinhead and they cannot be seen when they fall to the ground. Field inspections for the insect itself is the only way to get up with his pest.

Bollworms are moving into the fields somewhat at the present time but we hope the beneficial insects can control them without artificial aid. This is the critical time for bollworms, as they have moved into the fields about three weeks earlier than usual, because of the feed and corn has been up. If the friendly insects take care of the present situation, they will continue to prosper, but if we have reason now to knock them out, they will destroy our beneficial insects, and usually have to follow with more applications of poison. As long as there is a chance of the beneficial insects taking care of the bollworms without too much damage, let them do it. In infestation counts in each field indicate which is winning the battle, the friendly insects or the destructive.

Boll weevils are rather heavily infesting many fields at the present time, while others have very few. In any event, weather conditions have been ideal for weevil infestation lately and considerable damage is expected before the season is over, if they are not properly controlled. Control measures should begin when 25 per cent of the green squares are infested with three or four apertures of a weevil poison, applied at five-day intervals.

For materials to use and the proper application for the various insects, consult your "Guide for Controlling Cotton Insects in Texas for 1952." Demonstrations on how to take these insect infestation counts are being held each week. Visit the one nearest you for detailed information on keeping up with out insect pests and any questions you might have. Demonstrations are held in Foard County each Tuesday. If you are interested in attending one of these, see your County Agent.

Fire Chief Requests That Cars Not Follow Fire Truck

Horace Phelps, Chief of the Crowell Volunteer Fire Department, this week issued the following statement concerning the problem of cars following the fire truck to a fire:

"Why is it a serious offense to follow the fire truck to a fire? Fines are not given to reimburse the city's treasury, but simply for safety's sake. Let's look at some important reasons why cars and pedestrians should not follow the fire truck.

"Often the crew is just given general directions to a fire, and oftentimes must retrace their tracks to the closest fire hydrant. If cars were in the way, this is next to impossible, and valuable time is lost in getting the cars out of the truck's way.

"Though the truck goes as close to the fire location as possible, the hose is dropped from the truck at the fire hydrant and is unrolled from that point to the fire. Should cars be in back of the truck, they run over the hose and thus damage it seriously as well as delay the efficiency of the crew.

"Too many cars and too many people around the fire handicap the firemen. They must have space to set up their ladders and other necessary equipment, and crowds and crowded conditions prohibit this.

"The firemen do not have safety straps to maintain their position on the truck. Should the truck have to dodge traffic or turn a corner sharply, one of these crewmen could easily fall from the truck. Cars following the truck would unavoidably run over the fireman, which certainly would be a tragedy. The fireboys think of this every time they are hanging on the back of that truck and see unofficial cars racing to beat them to the fire.

"Lastly, but certainly not least, the firemen wish the crowds to stay away, for walls of the burning building may unexpectedly give away, or sudden gusts of wind may send cinders flying everywhere. Many uncalculated injuries are sustained this way, when crowds wander too closely.

"These are just a few of the many common-sense reasons why not to follow a fire truck. When you hear the whistle while out driving, the law states that you should pull to the side of the road and remain there until the truck passes.

"Let's let our firemen do the efficient job they are trained to do. Let's keep their lives and limbs intact. Don't follow the fire truck."

JUDGE JOE S. MOSS

You Can Help Prevent A Monopoly

On April 3, 1911, Governor O. B. Colquitt signed a bill creating
the Court of Civil Appeals at Am-
arillo, which decides appeals in
civil cases tried in the courts of
Foard County and 45 other pan-
handle and south plains counties.
In its history, there have been
17 judges serve the court, all of
whom came from one of 8 coun-
ties in the 46 county district.
There are 38 counties which never
had a judge on the court. Foard
County never had one. Garza
county never had one. A vote for
Judge Joe S. Moss of Garza
county for Associate Justice is a
vote for Foard county and 37
other counties which never had a
judge on the court. Vote for
Moss. A Civil Judge for a Civil
Court.

VOTE FOR DAN E. (COOT) CALLAWAY FOR SHERIFF, TAX ASSESSOR-COLLECTOR

I am taking this method to remind you again that I will appreciate your vote and influence in the primary next Saturday. In asking you to vote for me as your Sheriff, Tax Assessor, Collector, I want to assure you that I feel that I am fully qualified for the office that I am seeking. I served three years with the exception of 35 days as Chief Deputy to the Sheriff of Foard County working with R. R. Magee in the office in the day time and with the Sheriff in the evenings and at night, working from ten to eighteen hours per day, and I was happy to do this.

The question has arisen a number of times during this campaign why I would run against Mr. Gobin when I worked for him until the 26th day of December, 1951, and then announced for the office after January 1st. I feel that the people of Foard County are entitled to know the answer to that question. Before I commenced working for Mr. Gobin, he knew that I intended to run for this office, but he agreed at the time that if I would work for him and let him have the office for the second term that he would not run for the third term, and relying upon that agreement, I did work for him and he did not tell me until the early part of December 1951 that he was not going to live up to his agreement but that he was going to run for the third term. After he told me I handed in my resignation right then, but he asked me to work through Christmas which I did because I felt that the people of the county needed service during that time, and on the 26th of December, I resigned. If Mr. Gobin had told me back in January of 1951 that he was backing out of the agreement, I would have resigned right then as I am not the kind of a person who would work for a man and then run against him unless we had an agreement like we did.

I am making this campaign on my own record and if you feel that good service entitles one to a promotion, I certainly will appreciate you going to the voting place of your precinct Saturday and casting your ballot for me.

I assure you if elected that I will enforce the laws of this State without malice or favor to any one, and I shall ever be grateful for your support, and if elected, I will be your humble servant.

Very Sincerely,

Dan E. (Coot) Callaway.

For A Second Term ALLAN SHIVERS FOR GOVERNOR

The Truth About Old Age Assistance

Governor Allan Shivers wrote and helped pass the first Old-Age Assistance Law in Texas.

He stands for equitable distribution of funds for the needy.

Two years ago he was one of the leaders who tried to get more money for the aged, a cause that failed because the voters disapproved a constitutional amendment.

Governor Shivers has, in the past and will in the future, advocate making available to our deserving aged citizens not merely enough for a meager existence, but sufficient funds to carry them through the evening years of life as proud, dignified citizens.

An increase of \$5 in each pension check is due next October.

The Truth About County Road Funds

Farm-to-market road building has been the greatest in history during the Shivers administration.

During Governor Shivers' administration, Foard County has received \$397,066 road bond benefits from state highway user taxes as follows:

License fees \$95,492, road bond surplus \$44,687, bonds paid \$49,226, construction of farm-to-market roads \$147,860, authorized but not under construction \$59,800.

In this county, 10 miles of farm-to-market roads have been built, and an additional 5 miles have been authorized for construction, for a total of 15 miles.

Governor Shivers' administration has consistently supported the Foard county road building program and will continue to do so in the future.

Together we will continue to build a greater Texas **Allan Shivers**

Governor Shivers Lauds Farm-to-Market Road Program

Governor Allan Shivers this week accused his opposition of making "fantastic" charges in a last-minute effort to minimize the greatest farm-to-market road building program in Texas' history.

Governor Shivers said that a tabulation of the distribution of state highway use tax money to counties revealed that \$397,066 had been channeled to Foard County for road building purposes in the county during the Shivers administration.

The figures show that since Shivers became the state's chief executive, a total of \$187,860 had been spent or is being spent in Foard county for the construction of 10 miles of farm-to-market roads. In addition, the expenditure of \$59,800 for 5 more miles of paved rural roads has been authorized for this county and construction will begin in the immediate future.

A breakdown of benefits received during Governor Shivers' administration by this county from highway use tax money further shows that the county has received \$95,492 in license fees, \$44,687 has been paid this county in road bond funds, and \$49,226 paid by the state to retire bonds for this county.

The figures were compiled and statement issued before Governor Shivers left for Chicago to attend the National Democratic convention.

SHIVERS AGIN AUTO INSPECTION LAW; "SHALL CHANGE IT OR REPEAL IT" He Says

By Ben Kaplan, Press Staff Writer

Governor Allan Shivers today said that the new auto inspection law should either be modified or repealed.

The Governor told the Press before he left Austin for Houston to make a campaign appearance that he had some ideas for the changing the controversial law.

His idea is to take the red tape and confusion out of the law.

"The law was intended to bring about real safety and not inconvenience," said Governor Shivers.

"We need to stop killings on the highways. Texas has become the number one State in the United States for murder on the highways.

"The Legislature passed this inspection law by a vote of 117 to 12 in the House of Representatives and 19 to 9 in the State Senate, with the thought that it would save more than 200 Texas lives each year. If the law fails to do this and instead causes confusion and inconvenience, it ought to be changed or repealed."

The Governor said that he would recommend to the next session of the Legislature that it re-study and examine this law in view of the experience and either modify it or repeal it.

(Several months ago, when it became apparent that the new law was causing inconvenience and confusion, Governor Shivers ordered it suspended until it can be reviewed by the Legislature.)

WORLD WIDE CONTRIBUTION

International Nickel's develop-
ment and research, conducted on
a very small scale in the years
following the organization of the
company in 1902, has expanded
considerably and is now carried
on in some 13 countries. This work
has made a distinct contribution
to the technological advance in
these countries. In Canada, where
Inco's metals are mined, it has
also contributed to that country's
export trade.

Miss Anna Rea Owens, daughter of Mrs. Thea Byler of Trona, Calif., and Leo Owens of Crowell, was married to Charles L. Johnson on July 12 at high noon in the presence of a few relatives and friends. The bride is in the Waves and the groom, who is a first class petty officer in the Navy, are both stationed in San Diego.

The marriage took place in the Little Chapel of the Roses in Chula Vista, Calif., with Rev. Lloyd Purser, Baptist minister of San Diego, officiating with the double ring ceremony.

The matron of honor was Mrs.

The matron of honor wore a blue linen dress and the bride's mother was dressed in black. Both wore white accessories and corsages of white rosebuds.

At the reception, which followed in the home of Mr. and Mrs. Tampkins, Miss Arlene Scott of San Diego cut the wedding cake.
