Do you really want to live in the good old days — or is it just a dream?

THIS IS A GOOD DREAM
In homes served by WTU, the average cost of a KWH of service is 20% less than it was 10 years ago.

"What program did you watch when you were little, Mama?"

It's easy for us to forget the comforts we have today. If we don't watch ourselves, all we think of is the hurry and bustle of the day. The "good old days" to the little girl pictured above are just a few years ago to some of us. We forget that TV's so new. Yet most of our wonderful electric servants have been developed in just a generation!

As still more new ones come along, it's good to know that there will be plenty of electricity—from companies like this one—to run them. And the more new appliances you use, the less your electricity will cost per average kilowatt-hour.

Now think about it for just a minute—do you really want to live in the "good old days" without your electric servants—or is it just a dream?

Here's a bargain for Mama!

For less than 3¢ the average family, served by WTU, can cook a complete meal the modern electric way . . . and enjoy the cleanliness and convenience of Flameless Electric Living.
