

Applications for Public Deer Hunt Now Being Accepted in Austin

Applications now are being received by the Game & Fish Commission for free deer hunts on management areas in Texas. There will be 1520 permits issued this year, according to E. A. Walker, director of wildlife restoration. Requests for application blanks for the hunt should be sent immediately to the commission office in Austin. All applications must be on file by 8 a. m. Oct. 10 when a public drawing will

be held. Gus Engeling area in Anderson County, Nov. 16-25 inclusive, with 240 permits for both buck and doe. Kerr Area, in Kerr County, for 250 permits, Nov. 16-25 and Nov. 29-30, both buck and doe. These permits will be for two days of hunting for each permit holder. Angelina Area, Angelina-Sabine-Tyler Counties, Nov. 17-21, Dec. 1-5 and Dec. 17-21, 552 permits for buck only. Black Gap area in Brewster County, Dec. 1-8, with 400 permits, both buck and doe. Each permit holder will be permitted two days of hunting. Sierra Diablo area in Culberson

County, Dec. 1-8, 80 permits for buck and doe. Two days hunting allowed for each permit holder. Only persons 17 years or older will be permitted to hunt on these areas. Applications can be filed on a party system, with not more than four persons in the party.

'Unloaded' Gun in Home Is Dangerous Killer

"It's not necessarily the itchy-fingered hunter in the field who mistakenly kills someone. The 'unloaded' gun in the home is an even more dangerous killer, according to the National Safety Council."—Stanberry, Mo., Headlight.

Thalia

MRS. C. H. WOOD

Mr. and Mrs. Bill Mixon and sons, Tommy and David, of Fritch recently visited her parents, Mr. and Mrs. C. C. Wisdom.

Mr. and Mrs. Jim Moore visited her brother, Red Hudgens, and family Tuesday night of last week.

Mrs. Merle Moore and Mrs. LeRoy Henry visited at Floydada last week end and their mother, Mrs. L. H. Hammonds, returned home with them after she spent last week visiting her children, the

The new amendments to the social security law make it possible for the first time for dependents of disabled workers to get social security benefits.

Disability insurance benefits have been payable to disabled workers 50 to 65 years of age since July 1957. These disability insurance payments are equal in amount to the monthly old-age insurance benefit the worker would receive if he were already 65 years of age.

Under the new amendments, the disabled person's dependents will also be paid the same benefits they would receive if he were 65 and drawing benefits as a retired worker. Payments can be made to any of his children who are under age 18, or who have been totally disabled since before their 18th birthdays; and to his wife, regardless of her age, if she has in her care children who are eligible for these dependents' benefits. If there is no child in the family eligible for benefits, the wife of a disabled person can qualify for benefits when she reaches 62.

More than 200,000 disabled workers aged 50 to 65 are now receiving monthly disability insurance benefits. It is estimated that about 180,000 dependents of disabled workers will be eligible for the new dependents' payments beginning with the month of September 1958. Before these payments can start, however, applications for the dependents' benefits must be filed with the social security district office. The Wichita Falls social security office is located at 432 Post Office building.

Integrity Adequate If Not Convicted of Crime

In Walter Lippmann's view: "The ultimate power of the state cannot be entrusted to men whose conception of public virtue is that their integrity is adequate if they cannot be convicted of crime. It is not asking too much that in the highest places men must be an example of what ought to be the general practice. They cannot excuse themselves by saying that in fact they have done only as many others have done."

3 TO 1—TAXES OVER PROFIT

For every dollar the Class I railroads paid to their stockholders in dividends during the 1950-56 period, they paid \$3.02 in taxes to Federal, state and local governments.

Henry Bradford of Labbock visited Mr. and Mrs. C. T. Murphy Saturday.

Mr. and Mrs. Hardin Russell of Vernon visited Mrs. Dink Russell here and his brother, Dink Russell, in the Crowell hospital Sunday afternoon.

Mrs. Laura Choate and Mrs. Gilbert Choate visited in Crowell Saturday.

In the News . . . 30 YEARS AGO

News items below were taken from the issue of The Foard County News of Friday, October 5, 1928:

Highway work in the county is progressing as rapidly as could be expected. Details of the right-of-way for the 10 miles west of Crowell have been worked out and the papers sent to the Highway Department.

Raymond Burrow as quarterback has led Wayland College of Plainview to a victory over A. C. C. of Abilene, 12 to 0.

John Morris was here from Memphis Saturday and Sunday visiting his parents at Thalia.

A. E. Stillwell, builder of the Orient Railroad, died in New York City Wednesday of last week.

An unusual thing has happened at the Thalia School. There are fourteen in the senior class and 13 of them are boys. It usually is the reverse, more girls than boys.

Three bridges on the Margaret road have been completed and the road will be open for traffic in about ten days. About three weeks are required for the concrete to harden.

In the first cotton report Foard County had 104 bales. In the first report in 1927, 1,050 bales had been ginned.

Mr. and Mrs. J. T. King are visiting their son, Clyde, in Big Spring.

Lawns Need Special Fall Attention

Now is the time to start thinking about the fall care of lawns, reminds Joe Burkett, county agent.

Fertilization should be emphasized, points out Burkett. Properly fertilized lawn grasses will go into winter in a vigorous condition and will remain green longer in the fall and will grow off earlier next spring.

Fertilizer should be applied about a month before the first expected frost, advises Burkett. If summer grass is pushed into lush growth by late fertilization, it may be damaged by a hard freeze. Applying fertilizer too late prevents grass from getting the most out of it before going dormant.

Apply a complete fertilizer with a 2-1-1 or 1-1-1 ratio at a rate to supply two pounds of actual nitrogen per 1,000 square feet of lawn, recommends the agent. This amount of nitrogen would be found in 20 pounds of 10-5-5 or 10-10-10, or in 25 pounds of 8-8-8. On tight clay soils, 10 pounds of 16-20-0 per 1,000 square feet of lawn will do a good job.

After fertilizer has been spread, Burkett advises watering it down. Soak the soil at least six inches deep. Plenty of moisture is necessary, for plants can't use fertilizer until it is dissolved. If the soil is already wet, just wash the fertilizer off the grass and onto the soil.

Ryegrass is sometimes overseeded on Bermuda to give green color during the winter, but Burkett says this is sometimes harmful to the Bermuda. Ryegrass is usually growing in the spring when Bermuda should start and unless the ryegrass is kept closely clipped, it often gives Bermuda serious competition for light, moisture and plant food. If ryegrass is seeded on a Bermuda lawn, Italian or annual ryegrass should be used for they die in the spring. Ryegrass should not be overseeded on grasses other than Bermuda.

Decisions Affecting Economy Being Made in Politics

Today when many decisions which affect the economy are made in politics, every voter needs some economic education so that he can determine what candidates make sense on the subjects of taxes, business regulation, labor, and related subjects.

Inflationary Measure on Part of Government

How much the government now has tied up in building loan credits we have no idea beyond the fact that it runs into countless billions. However, we do know that like the billions that the government borrows from the banks, it is straight money and credit expansion of the highest inflationary degree. Santa Paula, Calif., Daily Chronicle.

Horse Race Attendance at All-Time High

Last year, says Oregon Voter, attendance at horse racing tracks reached 41,400,000, and pari-mutuel wagering came to \$2,000,000,000. Both figures are all-time records so far.

Special Magazine Gives Statistics on Crime in Texas

Every 3.4 minutes a major crime is committed in Texas. Every six minutes a theft takes place. Every 13.6 minutes a burglary is committed. Every 35 minutes an automobile is stolen. Every 49.77 minutes a murder, homicide, rape or aggravated assault is recorded. Every day the state's tribute to crime includes 2.96 murders and homicides, 3.25 rapes and 7.42 robberies. These are some of the statistics incorporated in CRIME, a special magazine prepared for distribution to guests attending a Law Enforcement Appreciation Week dinner Oct. 10 in Fort Worth, sponsored by the Texas Law Enforcement Foundation as a tribute to the Texas Rangers.

The 12-page, illustrated magazine was published by Chance Vought Aircraft, Dallas, to further the objectives of the Foundation, dedicated to "enlisting the aid of good citizens in support of good law enforcement."

13-1tc

Card of Thanks

My sincere, grateful thanks to the friends who were so kind and thoughtful in sending cards, letters, flowers, and for the visits while I was in the Foard County Hospital. Also, my thanks for the kind attention given to me.
Mrs. T. B. Klepper.

Miss Sandra Campbell, who is attending college in Oklahoma City, spent the week end here visiting her parents, Mr. and Mrs. Archie Campbell.

How to Help Your Child in School

The best ally your child has in coping with school is you, say the editors of *Changing Times*, the Kiplinger Magazine. Whether he's going for the first time, or leaving home for college, you've got to help him get through the difficult periods. According to the editors, here is the best way to do it.

In the early grades. Best way to help him is to learn what his pace is. Some kids learn to read faster than others. Don't pressure him needlessly. You can stimulate him, however, by talking with him about nature, games, books; by taking him on trips to museums; by reading to him; by helping him build a library.

In the middle grades. Conferences with the teacher should begin early. Some things you'll want to know: Is he working at his full capacity? How does he measure up to the standards of his grade? How does he get along with others? Does the teacher have any suggestions about how you can help him?

In junior high school. By the eighth grade the child has had a good chance to demonstrate his academic potential. Batteries of tests help spot his aptitudes and vocational interests. This is the time for talk about high school curriculum, education after high school and career.

By now your boy or girl should be able to study effectively on his own. Don't hound him to get down to work. Help him understand the importance of setting a definite schedule and adhering to it. See that he has a study place. Help him with his homework only when necessary and only by helping him find the way toward a solution, never by doing the work.

In high school. More understanding than ever of his strengths and weaknesses, and of his need to do what other teenagers are doing. Keep in touch with what he's studying and with his teachers and friends.

Don't wait too long to discuss the choice of college. Suggest that he visit the schools he has in mind. Talk over finances with him early.

In college. He's on his own. Your job is to be proud of him, and to be available when needed.

You Can't Dabble with Socialism and Cut It Off Like a Hydrant

"The people of Australia and Great Britain have learned to their great sorrow that you can't dabble with Socialism and cut it on and off like a hydrant."
"Knowing this, that we are fighting the hard fight for Liberals as well as Conservatives, it is a disheartening and discouraging fight... particularly when it is a losing one. But we who believe in conservatism and our free enterprise system cannot give up, even though it may appear hopeless. For once we do quit, the flood gates will be opened. Our opposition, ineffective as it may now seem, at least delays what appears to be the inevitable. But in delaying, there is always the hope of a sudden change of heart and a swing back to the principles on which our nation was founded."
Carthage, Texas, Panole Watchman.

ECONOMY ON UPTURN

Fortune says that the upturn in the American economy is underway, and forecasts that within a year's time we will establish new records both in total output and industrial production. It expects the gross national product to rise about \$20 billion in the next six months, followed by a further rise of nearly \$20 billion during 1959.

Foundation Needs Funds

Money given to the March for Warm Springs stays in Texas to care for Texans. Join the March and give courage a chance. Send your contribution to Box 58, Gonzales.

by Vern Sanford

People in Texas are very migratory in their fishing habits. Fishermen from west Texas quite often go into the eastern part of the state to do their fishing. Those from the north, south, east and west frequently go fishing in the Gulf. Gulf fishermen go to the still-lake area. Those in the eastern portion of Texas try the other sections, for a change of pace.

A check of car tags around Texas' rivers, lakes and streams proves these facts to be true. Editors of Texas newspapers learned long ago that their readers have varied interests... and that the outdoorsman is no exception.

That's why you will find articles on golf fishing in the *Panhandle* newspapers, and still-lake fishing stories in the valley and gulf coast press.

All of which accounts for the many boats you see trailing Texas highways in every direction.

That's why this column, which deals with all phases of fishing, hunting and boating, appears in newspapers in all areas of the state. Not in all newspapers, of course, but in more than 200 weeklies and dailies in widely scattered sections of Texas.

It is indicative of great interest in the outdoors—and of the tremendous appeal that fishing, hunt-

ing and boating have in this great state of ours.

Light Tackle Grows Popular
Many fishermen in the past few years have been weaned away from stiff casting rods and conventional reels and have turned to spin-fishing with light tackle. They are finding much more fun. If you still want more enjoyment, try fishing with a fly rod.

Make up your mind first which you want, pan fish or bass. Of course in fishing for either you will very likely come up with the other. But that is one of the many surprises of fishing.

Our first choice is the popping bug—for bass. These bugs are made by most of the major manufacturers. They are just about the size of your thumb. A neat little bauble with multi-colored hackle.

Personally we use a 7 1/2 foot Montague glass rod and Ocean City No. 90 reel. Most other fishermen we know use 8 or 8 1/2 foot rods. Some use automatic reels, while others use just plain fly reels.

We use a six foot leader on a shooting head, tapered Cortland line. The idea is to put that popping bug up close to the bank, near a brush pile, or beneath trees where insects or plant life may be falling into the water, or a spot where the flies are working.

Let it rest there a few seconds, then give it a mighty pop. Retrieve

Farmers to Gain from Repeal of Transportation Tax

Farm Journal points out that farmers stand more to gain than any other group from the repeal of the 3 per cent excise tax on commercial freight transportation. The total saving will be \$450 million, and farmers will reap a third of it.

Economical Nuclear Power Over a Decade Away

Delegates to a Geneva conference on the peaceful uses of atomic energy believe that nuclear power as an economical and practical competitor to conventional power is at least a decade away. Speaker after speaker said research has shown that economical nuclear power is going to be more difficult to achieve than was originally supposed.

Chevrolet Task-Force 59 arrives!

New might! New models! New money-saving power!

Never before have trucks brought such ironclad assurance of reliability and economy to hauling jobs. Chevy's '59 line rolls in with new ways to ride high costs right out of your operation!

Ways to save in every weight class! You'll find a big variety of both Stepside and Fleetside pickups. You'll see spacious Step-Vans. Four-wheel drive models. Medium-duty jobs with a cab-to-axle dimension specially designed for trailer application. Series 50H and 60H mid-weights outfitted to handle heavier loads at lower cost. And a whole lineup of heavy-duty haulers, including tougher-than-ever big-tonnage tandems!

A new Thriftmaster 6! Standard in all Series 30 and 40 models. Steps lively on the job and delivers up to 10% greater gas economy!

New V8 advances! Featuring Chevy's new Workmaster Special V8 for Series 70 and 80 heavyweights! It's teamed with either fully automatic Powermatic, or a new close-ratio 5-speed Synchro-Mesh transmission*.

New muscle in models throughout the line! Bigger brakes for safer stops in all Series 31 and 32 light-duty models! New Positraction rear axle in the same Series as an extra-traction, extra-cost option! Greater structural durability has been built into all Chevrolet cabs.

The best sellers are better than ever! With new advances, new Task-Force advantages beneath that bold '59 design, Chevy trucks are surer than ever of saving on your job. See your Chevrolet dealer soon—he's got a model that's bound to fill your bill!

*Optional at extra cost.

See the best yet of the best sellers... CHEVROLET Chevrolet Task-Force 59 Trucks!

STATE CAPITAL Highlights AND Sidelights

by Vern Sanford
TEXAS PRESS ASSOCIATION

Austin, Tex.—Into and out of the State Supreme Court flow many of the most controversial issues of the day. Public officials, large corporations and important persons often are involved in the cases, and the lives of many less-celebrated persons frequently are affected by the decisions.

After a two-months summer recess the high court reconvened this month and waded into a stack of disputes. Among interesting cases either decided or due to be decided are these:

Water rights are involved in a case filed by Southern Canal Co. of Houston against the State Water Board. Southern Canal wanted a permit to take 280,110 acre feet of water per year from the Trinity River for industrial use in the Houston area. Water Board refused the request, and the company appealed to the courts.

Upstream cities such as Dallas and Fort Worth had opposed the Houston company's request when it was before the Board. Oral arguments were centered on whether the courts have the right to review Water Board decisions. Supreme Court's ruling will have implications for every person interested in the course of Texas' water development.

Keeping roomers and setting up a church in a residential area were the cause of contention in two cases from Houston. In both cases certain property owners in university neighborhoods argued that other property owners were violating deed restrictions.

Lower courts ruled in favor of the room renters and church builders. Supreme Court agreed to review the roomers' case and denied a motion to force the lower court judge to move the student religious center.

Office seekers had their inning in the usual contests arising out of the year's elections. George Parr, a familiar figure in the courts, won the right to a new trial in his effort to be certified winner in a 1956 election for Duval County sheriff.

Laredo Attorney William Wright lost out in an attempt to force Sec'y. of State Zollie Steakley to place his name on the general election ballot as a Constitution Party candidate for district judge. Steakley had refused on grounds Wright voted in the Democratic primary.

Myron Love, choice of Houston liberals, won out in a dispute over the legality of his selection as Democratic nominee for district judge. Harris County Executive Committee had ruled that no candidate filed in time for this office, and Love was nominated by the one-man District Executive Committee. Conservative forces had contested this method.

Damage suits, labor-management controversy also commanded judicial attention. A gas explosion in the basement of Dallas Baker Hotel, back in 1946, is the basis for one suit in which 83 petitioners ask some \$1,000,000 for deaths and injuries. High court sent it back to district court for new trial.

In Houston 311 workers of the AFL-CIO Office Employees Union picketed a construction project to protest the firing of one man. A lower court granted an injunction against the picketers, and the Supreme Court refused to interfere.

BETTER TRAVELING DAYS AHEAD—Holding promise of better traveling days ahead is the 1961-62 interstate advance planning program announced by the State Highway Commission. Commission authorized the preliminary engineering studies for 285 miles of new interstate highways, consisting of 45 projects in 22 counties. Included in the advance planning will be completion of the gaps in the interstate highways between Dallas and Houston, Dallas and Texarkana and from Denton to Fort Worth to Hillsboro.

Cost of the program is foreseen as \$36,500,000 for land purchases and \$166,500,000 for construction.

WATER SAFETY LAW DUE—Some 280,000 Texas boat owners will have to obtain licenses for their craft if a proposed Uniform Water Safety Act is enacted by the 1959 Legislature.

Representatives of sportsmen's organizations, trade associations and safety groups drafted the measure. It is to be introduced by Rep. Ben Atwell of Dallas.

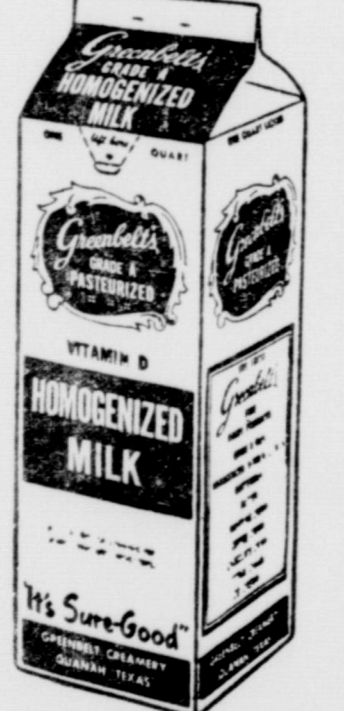

State Highway Department would have responsibility for registering boats. Enforcement of safety regulations would be the job of the state's various peace officers and game wardens.

REPUBLICANS JOCKEY FOR POSITION—Texas Republicans got no help from Secretary of State Steakley in their efforts to break into the first column on the general election ballot.

In the past the Secretary of State's Office has sent out the list of certified nominees, to counties, with the Democrats listed in the first column. GOP protested, demanded a drawing for position. Steakley said he was not authorized to set up such a procedure. His office mailed out ballot forms this year, without comment. Democrats were in the first column on the forms.

Provocative Editorials
"Once in a while one reads an editorial column which, while it certainly isn't aimed to please everyone, is at least provocative and leads to thinking about other things than Nasser, et al."—Cortland, N. Y., The Democrat.

Chevrolet Featuring Fuel Savings in 1959 Model Truck Line

Substantial fuel savings in the light-duty range, larger brakes on the half-ton series, a new optional power train for 14 heavy-duty models, and durability improvements from engines through axles are top developments in the expanded Chevrolet truck line for 1959.

The model lineup is increased to 139—three more than last year—

on 22 different wheelbases. Gross vehicle weight ratings range from 4,000 to 36,000 pounds, with the sedan delivery increased to 4,900 pounds from 4,100. The 1959 line includes 96 conventional, 22 low-cab-forward, 8 forward-control, 6 tandem-axle, and 5 school bus chassis models in addition to the sedan delivery and a new luxury pickup to be announced later.

Light-duty feature for 1959 is a cylinder engine of improved design which has shown substantially better gas mileage in on-the-job tests. Fuel savings, plus an increase in torque at low and medium speeds, comes from a camshaft design that reduces loss of fresh fuel mixture during the combustion cycle. On the half-ton models even further fuel economy is attained from a special carburetor-rear axle combination, optional with the economy six.

Rear brake shoes and linings are widened on 1959 half-ton units.

The new optional power train for 14 of the 70 and 80 Series 2½-ton trucks results in up to 12 per cent greater pulling power and greater efficiency in a wide range of hauling operations. Team-

ed together are a 185-horsepower 348 cubic inch V8, heavier clutch, a close ratio five-speed or Powermatic transmission, and a 16,000-pound single or a 30,000-pound tandem rear suspension.

Added to Chevrolet optional offerings this year is a manual five-speed close ratio transmission. Its closely stepped shift pattern gives top performance in highway hauling.

Among important mechanical revisions contributing to durability and performance in Chevy's 1959 trucks are:

A new thermostatically-controlled by-pass cooling system for heavy-duty truck engines, providing a more rapid warmup, uniform temperature distribution, and constant circulation.

Refinements in engine pistons, valves, oil filters, bearing seals and distributors.

Oil sealing and bearing seat improvements in the 15,000-pound rear axles.

Greater driveline efficiency and reduced wear with a design that affords maximum protection against water, dust and other foreign matter.
