AND CROWELL INDEX

OLUME XXXIV NO. 22

CROWELL, FOARD COUNTY, TEXAS, FRIDAY, NOVEMBER 21, 1924

82.00 A YEAR

r. S. M. Johnson Here Tuesday in Interest of Lee Highway Assn.

my standpoints, some of which the thing every one can do.

oned by Dr. Johnson is that Lee knifing people. Highway literature is being studied in the public schools of the country and that the demand for it is far greater than the supply or the possibility at present of furnishing. This has become an important feature of Eastern sections so much pride in Lee pound, delivered in that city. Highway had been manifested as that steps were being taken to plant trees Fish boys. They have been shipping

and flowers along the route, making nearly every ear, either to the East a memorial to the great character for always realized better profits than whom it is named. General Robert E. they sold on foot. Lee, and that the aim was to make it such from one end to the other. It would thus become the most fitting Chillicothe Men Here memorial that could be erected to his Dr. Johnson told of the growth of the organization from a handful of men to one of a national character and said that it is now get-ting the recognition of leading men of the Nation, including the president. These men are among the big who all of which meant more for the high- farmers of Hardeman County, having

YOUTH TAKES HIS OWN LIFE

Vernon, Nov. 17.—Clifton Emmett, 20, son of P. M. Emmett, farmer of Doans, 20 miles north of Vernon, ended his life early today by shooting himself through the heart with a 32caliber pistol. The tragedy occurred in the front

yard of his father's home. A note left in his room declared that he was ending his life because of trouble, the nature of which would come out later, and warning his brothers and sisters and friends not to do as he had done. Members of the family and acquaintances were mystified as to the

hinted trouble.

Merobers of the household, attracted by the shooting, rushed to the boy's

Edison and Brunswick Phonographs & Records

Brunswick Radiola

Portophones--Portable Phonographs

This cut represents one of the sensations of the day-A fine Radio and Brunswick Phonograph. Built-in lour speaker, dry cell batteries, no charging of batteries-just replace with new ones.

This cut represents the type of Brunswick Radio that requires the Antenna poles and wiring.

The No. 160 featured a few weeks ago is so powerful it does not require such wiring. It takes the messages right out of the air although in closed room.

This machine is as powerful as No. 160, but requires the wiring to make it effective. All Brunswick-Radiolas also play all types of phonographs records. One can have a program any time. If "static" is too bad, or, for any reason radio is out of commission, just palce any type disc record of any make on your Brunswick-Radiola and listen until you are tired or till your radio program hour has arrived. Turn off the phonograph switch exactly as you would your (any model) phonograph -tune in any desired station you wish-your radio side of Brunswick Radiola begins to give clear and loud, or low and soft, as you desire, anything spoken, sung or played. Noth ing to take off, nothing to put on, nothing to change.

Built by the "RCA" Radio Corporation of America and the Brunswick, Balke, Collender Company, two of the largest corporations in the whole world. What more do you want?

A CHANCE FOR THRIFT

Ornortunity for the practice of genuine thrift, absolutely apart from arsimony, is pointed to by fire loss

It is a national maxim of China that that which is burned up is lost

It is shown that in one year there was a fire loss of \$500,000,000 of property in the United States. By far the great majority of fires are preventable.

Half a billion of perfectly good dollars is a handsome enough sum to command anybody's attention, and it a deplorable thing to think of its being wasted in fire loss. That sort

of loss is absolute. Nor is the situation made better by the reflection that property losses are so frequently accompanied by grievous and costly loss of life; as well as suffering caused by inevitable accidents and burns that stop short of taking life outright.

What is happening every day in the fire menace and waste, shows clearly enough that we are still a very long way from indulgence in ver cautiousness against fire.

There are opportunities in the situation for all to contribute towards reducing these calamitous losses, and practicing a kind of thrift that is indeed worth while.

That half billion could be put to infinitely better use; but not to worse.

TEARING DOWN VS. BUILDING

Bickering fault finding and back ning will retard the growth of any town or city. There can never be any tors are uppermost in the minds of a considerable portion of the people.

Consideration and energetic cooperation will materially advance the interests of any community. These form the groundwork of all great municipalities.

Natural advantages have much to do with community achievement, but natural advantages alone will not suffice. Co-operation is an essential element, but it never marches side by side with fault finding and bickering. The latter are destroyers, not builders; they tear down instead of building up.

Possibly we are not overburdened with the destroying element in this community, but such as we have is entirely too much.

Community advancement means personal security to the individual and this is best achieved through energetic and persistent co-operation.

Tearing down or building up-which side are you identified with?

H. D. POLAND

That fifty-pound scuttle of coal-how long is your wife going to carry it?

It isn't that you wish her to carry it, but it probably never occurred to you that you can save her the strain of this load.

You know yourself what it means to lug a heavy load, especially on a hot summer day.

Give her a Florence Oil Range. It will make her kitchen cooler. It will preserve her health and youth. She will have no coal to lug or ashes to handle. And you can soon pay for the cost of a Florence out of the difference in cost between kerosene and coal.

Bring your wife in and have us demonstrate and explain to both of you the good-looking, quick-cooking Florence.

134 STAR OWNERS AVERAGE 24 9-10 MILES PER GALLON

One hundred thirty four Star owners, driving an aggregate of one and a half million miles, averaged 24 9-10 miles per gallon of gas.

This record was made in Georgia and Alabama mud, in Texas and Idaho sand, in Maine and Vermont snow and in the high altitudes of the Rocky Mountains. It was made by ordinary Star cars, driven by ordinary drivers. It represents Star performance unedr average conditions as they exist today throughout the United States and Canada.

True, many Star owners get more than 24 9-0 miles from a gallon of gas. In sections where good roads predominate, many Star owners report 28 to 38 miles. If you are seeking a car sparing in the use of gas you will find that the unusual power of the Star motor is not developed by the extravagant us of fuel.

The small gas consumption of the Star car is another reason why those who seek reliable transportation at a minimum of expense should consider the Star first. Ask for demonstration.

KIND TO CORN GROWERS The weather man has been kind to

corn growers this fall. He has kept the temperature up above normal and closed up the clouds. The result is that the abnormally warm weather in October evaporated the surplus moisture from the corn, and as there was no rain to offset the effective work of a bright autumn sun, the corn crop has thrived and the pessimists are dismayed because their predictions did not come true.

Well can you remember hearing a month or so ago that the corn crop was a dismal failure, because it was too full of moisture, lacked this, that and the other thing, and that the frost was going to get it in October

Up to early November no killing frosts had been reported in the corn states of Iowa, Illonois, Nebraska, Kansas, Missouri, Indiana or Ohio, and experts estimated November 1 that eighty percent of the crop in the United States was sufe

that eighty percent of the crop in the United States was safe.

Due to the favorable weather, it is now believed that the total value of the corn crop will reach \$3,000,-000,000, which is \$300,000,000 more than the September 15 estimate. An increase of 50,000,000 bushels is also seen as the result of the favorable

All of which goes to prove that there is no use crying over spilled milk until it has actually been spilled. Crops are failures now and then, but a kindly providence generally intervenes at the right time and overcomes adverse conditions that nature has imposed.

A grouch is just liver complaint

The older a man gets, the vounger the young people seem to be.

Heiskell's Ointment

Part Vitamins Play in Human Organism

the body, the editor of the Journal of the American Medical Association says it has been discovered that they are stored up in the liver. The conclusion that vitamins are highly essential to the welfare of the living organism, he says, as so many recent investigations seem to indicate beyond peradventure, is based on the observation of nutritive failure and the appearance of socalled deficiency diseases when some of the food factors referred to are

missing from the diet.

"It may almost be regarded as a corollary," he continues, "that, under conditions of a deficit in vitamin-bearing products, the body itself will become impoverished in these physiologically potent factors. For several types of vitamins evidence is now available that this is actually the case. It has been found by Steenbock, Sell and Nelson that the liver is an important center of fat-soluble vitamin storage, varying in its content of this substance with the ration fed. When the dlet of the animal becomes poor in vitamin A, however, the liver becomes correspondingly depleted. The depletion of the same organ in vitamin B when the animal is deprived of au adequate supply of this factor has been demonstrated by Osborne and Mendell."

Lumber Satisfaction

It is essential that you take many factors into consideration in order to get lumber satisfaction, because you don't buy lumber every day. You buy it for a certain need and you know what you want. First you want to know that the QUALITY is there and that the PRICE is right. Satisfied as to these primary considerations, you desire to know whether you can buy exactly what you want for your particular purpose.

We have been satisfying a growing number of customers for many years and we are confident that we can give you satisfaction.
