THE LAW'S FAILURE

. Antonio de la construcción de la co There are thousands of laws, but still one has been overlooked. Its ***** lack permitted the licensing in Illinois of an irresponsible man as a physician and the operation of a school, by means of which he conducted an illegal traffic in germs.

Charles C. Faiman, who admitted giving three test tubes of typhus baccilli to William D. Shepherd to be used in causing the fatal illness of William H. McClintock, "millionaire orphan," is not a physician and had no legal right to pose as the head of the National University of Science or use the letters; Ph. D., M. D. and LL. D. after his name,

It is unbelievable that a state would permit a man who never attended a reputable medical school and never was licensed to practice in any state, to prey upon guiless people. Those who patronize phsicians have a right to expect that when they use an M. D. after their name, they are fully qualified to practice medicine.

place the attractive school building 'The purpose of the writer is to men- they were grouped together and placthis poster and that it was construct-

Next, our attention was called to the tiny bed room suites of the first grade, made out of light weight construction paper and to the parlor and dining room suites of the third and fourth grades, made out of heavy construction paper. This work was exceptionally good and had many characteristics of the ability and skill of a real designer, and very interesting for the fact that it was done by boys of ten years old. Another interesting part of this exhibit was the enamelac work. In this work glasses and bottles of various descriptions were changed into beautiful vases. This is another way of teaching practical things early in life. This exhibit came as near being complete as could possibly be for a one teacher school.

Next, we were directed to the exhibit of Gambleville school. We were informed that the teacher of this school decided after ten o'clock of that morning to arrange an exhibit. This exhibit did not consist of such a great number of things, but it had many useful things. There were some exceptionally good reading charts, but the thing that attracted our attention most was the splendid transportation chart. Due to the fact that we are living in an automobile age, transportation is a very important subject and should be stressed more and we are confident that many teachers got some very helpful suggestions from this chart.

We were passed next to the exhibit of Crowell school and to enumerate one-half of this would require too much space. It was complete from the first grade all the way up through high school. One of the prettiest pieces of work that attracted our attention in the exhibit was the flower chart

We guarantee Devoe Lead and Zinc Paint to be absolutely pure. When you paint with Devoe you save paint-money-fewer gallons to buy; you save labor-money-fewer gallons to spread; you get a better looking paint-job-pure paint; and it will be a longer time before you need another paint-job.

Why have a shabby house when it will cost you so little to make it attractive with Devoe? Stop in to-day and let us give you a color card and show you several harmonious combinations

Pay for It After Painting

We have a new plan whereby home owners can paint their houses and get 10 months in which to pay for it.

Why allow your property to deteriorate because you may not have the ready cash? See us and get our plan. We shall be glad to explain it to you.

Dr. Hines Clark

Two-Row Cultivators

It is about time for you to begin to think about buying that cultivator.

There is nothing like getting a line on the machinery you will need. You can't commence too soon to think about it.

Of course you are going to want a P. & O. McCormick cultivator, and we want to sell you. We have one of the best cultivators on the market at a price that will interest you.

We can merely call your attention to it in this space, but we want you to come to our store and see this implement for yourself and let us show you what it is and what it will do.

When you have bought one of these and used it you will be glad that your attention was called to it before buying. You can make no mistake in buying this cultivator.

books showed marks of excellent work Hand Cutting and Draw- in this department. As a matter of

of this exhibit deserve fact, this school's exhibit showed that mention, also "Still Life Margaret school is doing work of Next our attention was at- high quality

tracted by the "Art and Craft Dethis exhibit, where we le jars had been turned

ing Charts"

particularly interesting. We saw table runners, pot lifters, etc., that the pupils had designed, cut the block stencil and applied it. Another very noticeable thing in this division was the dull furniture made out of turkey feathers and bits of old velvet, also the ironing boards made by small children, a very useful thing. There were many advertising posters, which proved to be inviting, another subject of importance that should be stressed in early life. Of the many interesting things in Crowell's exhibit there was one that you could spend hours viewing and that was the vocabulary chart of the Spanish department, and the souvenir chart from Mexico City.

Next our attention was directed to the exhibit of Thalia school. First, the splendid chart of the "Three Bears" deserves special mention, while there were a number of other attractive things in the primary department. The original drawings of the

fifth grade were of a high quality and the health chart, prepared by Miss Carter's pupils could not be surpassed. There were many useful things in Thalia's exhibit, such as rug and basket making, backs to band chairs. We understood that the second and third grades did this work. The English department was ably represented by many excellent themes and short stories.

Next we passed to the attractive exhibit of Foard City school, which was complete from the first grade all the way through high school. Here our attention was called to the excellent "thrift charts," and "thrift books," prepared by the pupils. It was explained to us that these charts and books were used to a good advantage in teaching thrift in the lower grades. Many useful maps prepared by the intermediate grades were included in this exhibit. Paper cutting in the primary grades deserve special mention, while one of the important things was the charts used in teaching that there should be more good Physician and Surgeon

It Soon Rolls into Wealth

Begin Saving Today

Money picks up more money, just like a snowball. And saving is like a snowball in another way-the more you push to save, the bigger the results.

If you save money this month, next month and every month, in a few years you will realize the wisdom of such a policy. It's the steady every-day pull that counts.

And when you save, select a strong service-giving bank such as this bank, where your savings are protected by an ample reserve.

defendants, and a brief statement of showing how you have executed the (Seal) plaintiff's action being as follows: That on the first day of January same. A. D. 1925, plaintiffs were lawfully seized and possessed of the following described property, situated in Foard County, Texas, holding and claiming the same in fee simple, to-wit; Six hundred forty acres of land the William Richardson Survey and described by metes and bounds as follows: Beinning at the N. E. corner of the

William Richardson Survey; thence south 1900 varas; thence west 1900 vrs.; thence north 1900 varas; thence east 1900 vrs.; to the place of begin-

That on the day and year aforesaid defendants unlawfully entered upon said premises and ejected plaintiffs therefrom, and unlawfully withhold from them the possession thereof.

That the plaintiffs have had and held peaceable, continuous and adverse possession under title of color of title, from and under the State of Texas, of the lands and tenements laimed and described in this petition for more than three years, and this they are ready to verify.

That plaintiffs further plead in their behalf and say that they should have possession of the herein described land and premises, because they say that they and those under whom they are claiming, claim the same under deeds registered, have had peace-ful, continuous and adverse possession of the lands and tenements herein described, and have been enjoying the same, and paying all taxes due there-on, for a period of more than five years before the commencement of this suit, and this they are ready to

verify. Alleging further plaintiffs allege that they have had and held peaceably the lands described herein, and ad-verse possession of same, cultivating, using and enjoying the same for a period of more than ten years before the commencement of this suit, and this they are ready to verify.

Plaintiffs pray judgment of the court, that defendants be cited to appear and answer this petition, that plaintiffs have judgment for title and possession of said above described

Wind Storms Are Coming

Although windstorms may occur at any time, records show

that they are particularly likely to come during the spring and summer months. It is impossible to tell where or when a devastating storm will strike and it pays to be prepared. Remember that windstorm Insurance adds but a relatively small amount to your regular Fire Insurance premium.

Call this agency and order a tornado policy.
