Not by Bread Alone

Although man cannot live by bread alone, bread—and the basic requirements of life—are essential. The only way, unless you have a fairy godmother or a wealthy benefactor, to obtain these essentials of life is to provide them for yourself. This usually means one thing—work.

It is one thing to work and earn money and another thing to be happy in your work. We are told that being happy and well-adjusted in your chosen vocation is an important step toward being happy. With this in mind, we asked some CHS students how they would select their vocation, and they responded with these answers:

If you do not know what you want to do, it would be best to go to school and look for a vocation there, rather than to try different jobs. To me, picking a vocation is one of the hardest things in the world and one of the most important. It is very important that you make the right decision when you pick your work. I am not sure that there is any certain way to pick a vocation. — Don To.

Personally, I want to do one of two things—teach home economics or go into the business world. The summer between my senior year in high school and my freshman year in college, I plan to work as a typist, secretary, etc. Then I want to take general freshman courses in college that fall and decide there what I want to do.—Barbara Goodwin.

It has been redecorated throughout, and new equipment added. Nurses will be on duty 24 hours a day. Excellent meals and special diets will be served. The best of care will be given to convalescents, or any one requiring long term nursing care. The physician of your choice will be called when needed. A few vacancies are now available.

from CHS. This is your old friend Madge Ichin' again. I've just come back from the favorite teen age mall shop where I have met a very interesting character named Charles Carroll.

Charles is 17 years old, 6 feet tall, and has black hair and green eyes. He has a long list of favorites which include the color blue, the singing group the Kingston Trio, and the sport, basketball. His favorite subject is P. E. and his hardest is, of course, English. When food is being served, he enjoys just "any old kind." When he goes to the movies, he enjoys watching Marilyn Monroe and Rock Hudson. Now there's a combination! During his spare moments, he likes to hunt and to fish.

In his opinion, his parents are the most important people in the world because they are very dependable.

After he graduates, Charles, who is a 4-H Junior leader, plans to be a rancher. All of us here at CHS would like to wish him all of the success that he deserves with his future plans.

Representatives

Attend FHA Meeting

Joyce Latimer, Wanda Moore and Virginia Hudgens, accompanied by Mrs. Doyle Kenner, attended the Area IV FHA meeting in Stephenville last Friday night and Saturday.

Joyce was a voting delegate; Virginia was candidate for an office, and Wanda went along to get new ideas for the chapter. The part of the program best liked by the girls was Ron Parker's talk on "Developing Your Potentialities." The meeting was an inspiration to all, and they brought home new ideas for the local chapter.

CHS Students Get Glimpse of India

William S. Willet presented CHS with a Southern Assembly program entitled "A Bazaar in India" on Monday, March 7. He exhibited rugs, native weaving, knives, articles of clothing, dishes, weapons of war, opium pipes, fruits, tom-toms, temple bells and the skin of a man devouring a tiger. Each article had a fascinating story behind it which Mr. Willet presented to his audience.

Mr. Willet has spent six years in India on the construction of gigantic steel mills which employ thousands of natives. His program gave CHS students a chance to become acquainted with the people as well as the products of the mysterious country. One of the CHS students, Jo Frances Long, assisted him in showing the articles.

United Youth Meeting Set

The United Christian Youth will meet Sunday night, March 13, at the Bethel Church. The meeting will begin at about 8:30 after evening services. All high school youth are urged to attend.

CHS Boys See State Cage Play-Offs

I'm Going to . . .

1. I'm going to do something with my hair . . . which might mean trying a new style—such as the bubble—or just improving your present hairdo by trimming the ends perhaps for more shape. A first step to newness: a permanent to give hair the body it needs for easy styling, easy setting, and long-lasting curl.
2. I'm going to groom my hair more carefully . . . and never say, "I can't do anything with it" again. To help, you may try a hair dressing after shampooing. Between times, too, to keep hair shiny and manageable.
3. I'm going to shampoo regularly . . . not the day after my hair needs washing, but the day before.
4. I'm going to brush for beauty . . . a hundred strokes a night—every night.
5. I'm going to keep my hair clean, clean, clean . . . between regular shampoos, or when you're ill and can't shampoo, clean hair and scalp with a dry shampoo.
6. I'm going to wear a night-cap for sheer fun . . . a pretty way to keep your hair set neat, too.

News and Nonsense.

THIS WEEK

-In Washington

With Clinton Davidson

The nation's top farm economists agree that if production controls were removed and price supports lowered to the free market level over the next 5 years farmers would be out of the frying pan and into the fire.

That is the conclusion reached by U. S. Department of Agriculture and Land Grant College economists in separate surveys made in response to a request by Sen. Allen Ellender, chairman of the Senate Agriculture Committee.

INSURANCE OF ALL KINDS

Hughston Insurance Agency

Results of the studies are published in a 30-page report entitled Senate Document No. 77, free copies of which are available through the U. S. Printing Office, Washington, D. C.

Both reports emphasize that the studies are the independent conclusions reached by the economists, and not necessarily the view of policy officials, in response to this question:

What would the effect be on farm production, prices and income if government production controls were eliminated and price supports lowered to the free market level over the next five years?

Production Up, Prices Down
 Both surveys are in agreement that removal of production controls and lowering of price supports, as advocated by Agriculture Secretary Ezra Taft Benson, would result in an increase in production along with lower prices and reduced income for farmers.

Department of Agriculture economists think total farm production would increase at an average of 2 per cent a year, somewhere near the average of the past 10 years. They think that by 1965 farm prices would decline another 14 per cent, but that cash income would drop only 9 per cent because of increased marketing.

They estimate that by 1965 beef cattle would average \$15 (down 25 per cent), hogs \$11.50 (down 20 per cent), milk \$3.60 (down 20 per cent), corn 80¢ a bu. (down 25 per cent), wheat 90¢ a bushel (down 50 per cent), cotton 25¢ (down 30 per cent), eggs 28¢ (down 20 per cent), broilers 15¢ (down 25 per cent), and soybeans \$1.60 (down 25 per cent).

Other estimates included: The report does not show how the 14 per cent average decline is arrived at in view of much larger decline predicted for commodities which make up a per cent of all farm market. The college economists expressed the belief that USDA's prediction of probable 1965 price income were "somewhat less than justified by the expected increase in volume of farm earnings."

They estimated net farm income would drop from about \$10 billion last year to about \$7 billion in 1965, a decline of 40 per cent, including both marketing receipts and government payments.

Other estimates included: The reduction in realized income (40 per cent) would be borne largely by the 21 million farms which market 90 per cent of all farm products," the economists figure.

The college study group included George Brandow of Pennsylvania, Willard Cochrane of Nebraska, Harlow Halvorson of Wisconsin, Maurice Kello of Arizona, James Plaxico of Oklahoma, and John Schnitker of Kansas.

HOW PATRIOTIC ARE WE?

Once more we are called upon to exercise our religious and patriotic duty to our God and country. First to our God who gave us this great country in which we live, and second, to our form of government that was handed down to us by our ancestors. Words alone can not fulfill our duty to either God or country, yet many of us try to live with that intention. We have had War and prosperity under one party, and Peace and prosperity under another. Taxes are high from both parties as war costs money and lives, and enforced peace costs money. Our Lord in His time speaking of tribute money, said, "Render therefore unto Caesar the things which are Caesar's; and unto God the things that are God's." If we love our government, we should, in some way, support our government. If we like wartime, let us support that party. If we like peacetime, let us support that party. The money you give speaks for your desire, or choice, be it large or small. We have been assessed over \$200.00 for Foard County for this election. If I stand alone, it will be hard for me to pay; but pay I will if others don't respect their God and Country as I do. All donations confidentially accepted.

Retirement Age for Women Lowered for Social Security

Friday afternoon again and the social security office was slowly, gradually grinding to a halt for the week end rest. On any other afternoon, the office is buzzing with hustle and bustle of people coming and going. But Friday's work just tapers off, drags along to a finish.

At the front desk was a woman with her own special problem. Ever since the social security law was changed lowering the retirement age for women, we've been receiving questions like the one Ella was asking. She wanted to know if she should take her social security now or wait until she is 65.

It turned out Ella was nearly 63 years old, had never worked under social security. Her husband retired two years ago at 65 and was drawing \$100 monthly social security benefits. Ella said her friends and neighbors were giving her conflicting advice. Some telling her to take it now while others thought she should wait. Finally, she reached a point where she didn't know what to do, so decided to come to the social security office to find out.

In the social security office, we do not advise you whether to take or forego your benefit at an earlier age. We can only give you the facts and let you decide when to file. No one should make the decision about early filing until they have all the facts.

Ella was advised she could apply now and receive wife's benefits back to January 1959 when she reached 62. She could make her application effective for payments beginning this month or wait to apply and start her benefits in any future month.

For each month that she draws a benefit before age 65, she will take a slight reduction in the amount she receives. The reduction is less than one per cent for each month that she draws before she is 65.

Her full wife's benefit is one-half the amount her husband is drawing. If she waits until she is 65, she will get \$50 a month. If she takes it back to January, 1959, at age 62, she would get \$37.50. Beginning this month, it would be about \$40.70 or if she waited until she was 64, it would be \$45.90.

By taking it at full age 62, she could receive 36 monthly payments at \$37.50 or a total of \$1,350 before she is 65. If she takes this, her check is reduced by \$12.50. If she starts the checks this month she'll receive a total of \$1,698.90 and her check is reduced by the amount of \$9.30. At 64, she'd receive a total of \$550.80 and take a reduction of \$1.10 in her monthly check.

The reduced check continues after Ella reaches 65. By taking the early benefit, she will be ahead in total security income for over 10 years beyond her 65th birthday. This means both she and her husband must live past her 75th birthday before she would lose because she took her benefit at an age before 65. If her husband dies she would get her full widow's benefit which is three-fourths the amount her husband is drawing or \$75. There is no reduction in a widow's payment even though a wife draws reduced benefits before her husband dies.

Stock Ponds Questions and Answers

Q. Who is eligible for a stock pond?
A. Any farmer or rancher having a need for an adequate livestock water supply.

Q. What assistance is available?
A. Assistance in selecting a suitable location, layout, supervision of installation, and check for completion is available through the local Soil Conservation Service. Financial assistance may be provided through the local Agricultural Stabilization Conservation office.

Q. Can the pond be used for other than stock water?
A. The need for stock water is the principal purpose for the pond. However, added recreation and natural wildlife areas often result.

Q. If I am eligible, what is my next step?
A. Select one or more sites that you think would be suitable and then make application to your local S. C. office. A copy of your application will be forwarded to the Soil Conservation Service. You should then contact the Soil Conservation Service for a date to determine a suitable location.

Q. Who will build the pond?
A. Any one of a number of vendors or contractors who are approved by the local ASC county committee.

Q. What is the normal life expectancy of a pond?
A. By maintaining a good grass cover within the drainage area and in the spillway, the average pond can be expected to supply adequate stock water for 15 or more years.

Cub Scout Pack 49 Has Monthly Meeting Monday Night

Cub Scout Pack No. 49 held a regularly monthly meeting in the basement of the Methodist Church Monday evening. The theme was "Cub Scout Scientists." Den II conducted the opening ceremony which was a salute to the United States flag and the singing of "God Bless America." Den I then presented the program skit. They set up a scientific table and each Cub in the den demonstrated one of the scientific experiments that the dens have done during the month.

In the award ceremony that followed, Bobby Mike Bird was awarded a Silver arrow; Junior Carroll his Bear badge and a Gold Arrow; Carl Wayne Hudson a silver arrow; Bob Shirley his Lion badge and a gold arrow; Rudy Magee a gold arrow; and Paul Stapp, a gold arrow.

Several of the boys were presented badges and arrows that came too late for presentation at the last pack meeting but whose names appeared last month as having received them. The six boys in the Webelos Den lacked only two more items finishing their Webelos badge, and both requirements have been postponed because of the bad weather, but will be completed this month. Buddy Myers had earned a silver arrow, but it could not be presented because of the absence of both his parents.

Den III presented the closing ceremony which was a rope knot pantomime of the points of the Cub Scout promise. Following the closing ceremony, the adults registered with the pack for another year and Cubmaster Hudson instructed the boys for their re-registration next week at the den meeting.

Mrs. Fleisher served a tempting refreshment plate to those present.

Featherbedding Costs Jobs

"It is true that featherbedding 'makes jobs' but it can cost more jobs than it makes. The cost of featherbedding is to be found in prices. When product or service prices go up there are fewer customers. Fewer customers mean fewer jobs."—Nogales, Ariz., Herald.

Here's A Good Value

For less than 3¢ the average family served by WTU can cook a complete meal the modern electric way . . . and enjoy the cleanliness and convenience of Electric Living.

"Who owns the electric company?"

"Here's who--"

The answer is that thousands of people own it. People like you, people who invest money in the electric company and help it grow. They become an investor . . . this is the reason we are known as an investor-owned company.

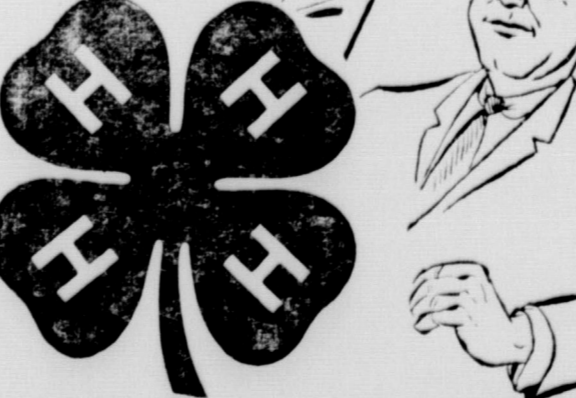

This electric company is not owned by the city. It is not owned by the state. It is not owned by any kind of government agency or co-op. It is owned by investors.

This is one of the reasons why we can give you the best possible service and just about the best bargain you can buy.

It is a good question—especially since surveys show a lot of our own customers don't know the answer.

Austin, Tex.—We may have a muddy spring this year . . . but will there be enough water for Texans in 2019?
This is not a fantastic question, but one that Texas' state and local officials, engineers and water planners are grappling with now. Out of their efforts come these items of news and views:
1. Gov. Price Daniel told a farm convention in Austin that Texas has made great progress in statewide water management in the past three years. But, he said, "much more remains to be done."
Water planning and development, said the governor, is essential to the state's growth and prosperity in the years ahead.
2. A series of three meetings evening.
Rev. and Mrs. H. C. Payne of Floydada visited his parents, Mr. and Mrs. Coy Payne, from Thursday until Saturday.
Mr. and Mrs. Louis Rettig of Crowell visited their grandparents, Mr. and Mrs. Coy Payne, Wednesday evening.

Mr. and Mrs. L. B. Robertson visited W. F. Bradford and Mr. and Mrs. Paul Carron of Five-in-One Sunday evening.
Mr. and Mrs. Frank Halenecak, Mr. and Mrs. B. J. Halenecak and sons, Billy Dean and Myron, visited their daughter and sister, Mrs. Anton Kubicek, and family at Quannah Sunday.

Mr. and Mrs. Frank Halenecak visited their nephew, Henry Joe Kubicek, and family Monday.
Mr. and Mrs. Joe Orr visited their daughter, Mrs. Karl Streit, and family at Lockett Monday.
R. L. Hudgens was dismissed from the Crowell hospital Friday.
Mr. and Mrs. L. B. Robertson and son, Johnny, were dinner guests of his mother, Mrs. G. W. Neel, at Five-in-One Sunday.
Mr. and Mrs. Garland Taylor and children of Vernon and Mr. and Mrs. Gordon Taylor of Dallas visited their aunt, Mrs. J. H. Taylor, and cousin, Sharon Wharton, Saturday evening.
A. L. McGinnis Jr. was a business visitor in Vernon Monday.
Mr. and Mrs. Frankie Halenecak and children were Vernon visitors Friday.
Mr. and Mrs. Henry Bradford and daughter of Lubbock spent the week end with their parents, Mr. and Mrs. C. T. Murphy.
Mr. and Mrs. Joe Orr visited their son, Earl Orr, who is ill at the home of his sister, Mrs. Bud Mynard, in Crowell.

will be held during March along the Colorado River and its tributaries to discuss water needs of those areas for the next 50 years.
Meetings will be held in conjunction with the U. S. Commission studying Texas' major river basins. They will be in Wharton March 8; Big Spring, March 15; and Austin, March 17. Colorado River Industrial Development Association (CRIDA) will sponsor the Austin and Wharton meetings, and the West Texas Chamber of Commerce the Big Spring meeting.

3. State Board of Water Engineers called for a "time out" until March 8 on the longest-ever water hearing. At issue in the hearings which began Nov. 2 is whether the Trinity River Authority and City of Houston shall be granted permits to build two downstream reservoirs on the Trinity.
Water Board, apparently getting short on patience, advised opponents to get together and solve their problems cooperatively. Hearing has been given to long, bitter arguments and frequent flare-ups among participants.
San Jacinto River Authority has been chief objector to granting of the permits. SJRA contends that Houston will shortly need more water for domestic use but that Trinity water, because it contains sewage from Dallas and Fort Worth, is not suitable. San Jacinto officials say Houston should work with SJRA to meet the city's domestic water needs.

In the far-ranging testimony, water engineers discussed the probable water needs of Houston, Dallas and Fort Worth in 2010, and the possibility that Texas might be subjected before 2010 to a drought worse than that of 1950-57.
4. Texas is losing the battle for industry because of inadequate water supply, the director of UT's Balcones Research Center told an Austin meeting.

"Central Texas is in good shape," said Dr. J. Neils Thompson, "but the rest of the state is in sorry shape."
Texas has an average annual rainfall of 27 inches compared to an average of 30 inches for the U. S. as a whole, said Dr. Walter Moore, also a UT engineer. But he said Texas has a special problem—an evaporation rate 50 to 100 per cent higher than for the U. S. as a whole.

AUTO DEATHS DROP—Texas had an "almost sensational" 28 per cent drop in traffic deaths in the first seven weeks of the year, Governor Daniel announced.
This is the period since the new Safe Driving Auto Insurance Plan went into effect.
There were 69 fewer deaths during the first seven weeks of this year than during the same period in 1959. Drop was from 243 deaths in 1959 to 174 this year.

Board of Insurance Chairman Penn J. Jackson said he felt the new insurance rates, which are higher for careless drivers, were due at least a portion of the credit for the improved safety record.
Conclusive evidence, both the governor and insurance board chairman agree, would have to await more time and statistics.

INDUSTRY SEEKERS NAMED—Nine men have been named by Governor Daniel to the new, enlarged Texas Industrial Commission.
