# **OLD WAVE NOW** ITS FOURTH VEEK IN TEXAS

ailed Report of Weather **Conditions Furnished** by John Ray

The weather in Foard County and ost of the state, for that matter, ntinues to be the most talked of m of the day. All activity has been ight to almost a stop for the past w weeks and naturally when activ-comes nearly to a standstill, there little news to be found for the Crowell easily outclassed the vis-Crowell easily outclassed the vis-

any importance is happening.

In asking or searching for news at least ninety per cent of those seen have informed the reporter with the startling news that it has snowed, and Margaret's that he might say something about

being cold. Nevertheless the cold weather is now on its fourth week and may set a record by lasting a month. A small of the stiffest northers of the cold spell came with the snowfall on that points each.

day and Tuesday night. Most every Malone as fternoon this week, with the excep-

John Ray's Letter
John Ray of Rayland, one of the
ld timers in this section, has
onsiderable light upon the cold eather subject. It seems to be the popular pastime now for everyone to try and recall spells as bad as this and to tell of days that have been lder than any of this spell. Mr Ray has kept a close tab on weather tions and his letter to the News ould set a number of people aight on this matter. The letter To the Editor of the News:-

"In a recent issue of the News I where Jim Self, Bill Rasor and Jim Gribble have been giving some statistics on Foard County weather. Like most Republicans handing out information in Democratic territory their information is vague and un-

I came to this county in Septemtab on the weather since that date. and it was impressed on my mind by the fact that I had sold my skates en leaving Kentucky thinking that I was coming to the Sunny South. I could have skated to Ver-non that winter on Pease River sev-eral different times.

"The winter of 1885-86 was a cold winter though the mercury did not each zero.
"1886-87 was just another winter.

"1887-88 was a real cold one, the mercury going to 12 degrees below zero the 12th day of January, 1888. -"1888-89 was nothing out of the usual for this country and for the next ten years the weather as regards cold was just West Texas. On December 2nd, 1898, there was an awful blizzard, the snow blowing into drifts that remained until after the Margaret junic 24 to 12 in the grant junic 24 to 12 in the grant junic 24 to 12 in the grant junic 24 to 12 in the Margaret junic 24 to 12 in the Margaret junic 24 to 12 in the Margaret junic 24 to 12 in the grant junic 24 to 12 in the

1899, the mercury went to 12 degrees below zero. State Press claims this spell was in 1898, but whether he wrong or just exercising the privi-lege of a member of a minority party, I know not; however he is wrong about the date.
"In 1905, on the 14th of February

there began to fall, as regards depth the record snow of this part of Tex

"It fell for about three days and reached a depth of eighteen inches there being no wind to drift it. I stayed on the ground for two weeks out we had no unusual temperatures

that winter.
"In 1906 the mercury went to 12 degrees below zero on the 11th and 12th of February.

"For six more years nothing but West Texas weather until February 20th, 1912. On that day beginning about 1 o'clock in the afternoon we blizzard that would have made not that they could have been seen as snow was so fiercely driven by wind that a person could not see

en feet.
"Again we had a rest from reme cold until the winter of 1918-19 when we had a real hard one, the omforts of which were aded to by w mixed with it.

The last eleven years have not so bad with the exception of the three weeks, during which time as snowed six times, sleeted twice the mercery below freezing every ht that it has not been below zero. As I write this it is snowing again let it snow as that is our only nce for farm relief.

JOHN RAY."

#### FORMAL OPENING

#### World War Veteran Here for First Time In Thirteen Years

Leon E. Owen, ex-service man who went to the World War from Crowell, was in this city for the first time in thirteen years Tuesday while on his way from Birmingham, Alabama, to Paducah to visit a sister. He left Crowell with a number of other Foard boys in 1917.

He had a great time here renew-ing friendships with former buddies who were just as delighted to meet him. Since the signing of the Armisfact that we had a lot of rain and tice he has spent about one-half of his time in government hospitals. having received a severe leg wound from machine gun fire during the Meuse-Argonne offensive. His right leg is now entirely stiff. At the time he was wounded he spent about two days in a dug-out until he forced a German prisoner to carry him to a

hospital.

He was enlisted in Company I of the 142nd Infantry, the company in which most Foard County boys served during the war. He was with the 36th division when wounded.

He is now making his home in Birmingham and is in the watch repairing business. Mr. Owen was affectionately known by his friends as "Six-Shooter" Owen.

The American pioneer may have had a lot of lonesome evenings, but he didn't have a lot of static to interfere with lis lonesomeness.

#### Josef Coufal Dies At His Home Near Thalia Wednesday

Josef Coufal, 75, died at his home. seriously ill for about four days pre-vious to his death. He had lived on the farm where he died since 1910.

Mr. Coufal was born in Bohemia on April 8, 1855, and came to America about 57 years ago, settling in Washington County, Texas. He had been married one year at the time of his arrival in the United States. He lived in various parts of Texas and came to this section in 1905 from Texarkana and settled in Wilbarger County, and then moved to the place

where he died in 1910. He is survived by his wife, to whom he had been married for 53 years, and eight children: R. J. and Joe Coufal, and Misses Frances and Mollie Coufal, who lived with Mr. Coufal; Mrs. Ben Wise, Eastland; Mrs. Joe Cerveny, Haskell; Mrs. Josie Richter, Floyd, N. M.; and Mrs. Chas. Machae, Margaret.

Funeral services are to be held at the Thalia Cemetery Friday at 2 p. m. Mr. Coufal had been a member of the Lutheran Church for many years.

#### T. S. Patton Candidate Commissioner No. 4

Mr. Patton needs no introduction

to the people of this section, having him one month's leave of absence that lived in Foard County since 1890. he might reconsider and come back. "I still want to be commissioner of Precinct 4 and will do the best I can for the people if elected," said Mr. Patton. "In running for this office again this term calls to my mind a piece of poetry I learned in school, 'If at first you don't succeed,

20 years ago and was in that office at the time the court house was Texas in pioneer days, settling in built. He made an efficient official Hood County and moved from there at that time and feels that he can to Crowell in 1906. It takes half a ton of coal to start render even better service for the people now than he did then.

# SATURDAY AND MONDAY TO BE DOLLAR DAYS

Money-Saving Values Offered by Many Crowell Firms on These Days

Saturday and Monday have been All of the women of the county set aside by Crowell merchants as are urged to attend the meeting and Dollar Days and practically every each is requested to bring a covermerchant of this city will have spec-ial money-saving values to offer the public on these days. Monday, be- will spread the lunch, the women ing the first Monday of February, are requested to not but their plate, imple reason that nothing much of my importance is happening.

#### SCOUTS ANNIVERSARY

Early in February the Boy Scouts of America will hold a celebration in honor of their twentieth year movement, and more than 25,000 troops with a membership of a million boys will participate in the event.

Scouting teaches devotion to church, home, school, patriotism, community service and health. little wonder that an organization with such ideals should be gaining strength as it is and has done in the last 20 year period.

Any organization with such worthy objects as these is deserving of the widest support. Teaching boys the ideal of service through honoring those who have lived a life of service is good insurance for the future. The greatest problem that Scouting

has is to find enough adult leaders. It offers an opportunity for men who are adapted for it and have some spare hours, to perform a community service that will be productive of splendid results for the public good and a large portion of personal satis-

A power site of more than 20,000 horse power has been discovered in the Hongass national forest in southeastern Alaska.

Rubber automobile tires are only about half rubber; the remainder zinc oxide, sulphur, and carbon black

adding, top-cutting, and care in

can orchards, isn't it?

The Floresville Chronicle-Journal tells the story of F. F. Kolenda's di-versification success in 1929. He har-vested \$833 worth of onions from 10 acres, planting cotton between the onion rows that yielded \$370 worth of lint cotton. He sold 294 turkeys for \$963, besides selling 127 cases of eggs and a considerable amount of butter from his cows.

Texas industrial development continues. The Texas Sugar Refining Co. plant at Texas City has reopened. Paris Candy Co. will build and operate a peanut factory if it can get 1,500 acres planted to peanuts in its section. Beaumont's port facilities gave it the recent addition of a \$250,-000 paper factory which ambitiously plans "to manufacture enough paper products to supply the state." Alamo Iron Works and Aransas Compress Co. will spend \$500,000 at Corpus Christi on improvements and enlargements. Grapefruit juice plant near Donna is nearing completion, helping to solve the problem of off-sized fruits.

The biggest kicker in almost every community is also the biggest loafer.

THE STATE OF TEXAS To the Sheriff or any Constable of Foard County-Greeting: You are hereby commanded to summon G. T. Oliver, D. W. Odell,

R. S. Phillips, their heirs and legal representatives, and each and all persons owning or claiming an interest in the hereinafter described land, by making publication of this citation once in each week for four consecutive weeks previous to the return day hereof, in some newspaper published in your county, if there ed in your county, if there be a newspaper published there-in, but if not, then in the nearest county where a newspaper is published, to appear at the next regular term of the District Court of Foard County, to be holden at the court house thereof, in Crowell, Texas, on the third Monday in February, A. D. 1930, the same being the 17th day of February, A. D. 1930, then and there to answer a petition filed in said court on the 21st day of January, A. D. 1930, in a suit num-bered on the docket of said court No. 2122, wherein Foard County, Texas, is plaintiff, and G. T. Oliver, D. W. Odell, R. S. Phillips, their legal heirs and representatives, and each and all persons owning or claiming an interest in the hereinafter described land are defendants, and a brief state-ment of plaintiff's cause of action, being as follows: That on or about the 10th day of September, A. D. 1909, G. T. Oliver made, executed and delivered to plaintiff his certain promissory note for the sum of \$1,-327.50, and due on 10th day of Sep-tember, 1929, payable to the order tember, 1929, payable to the order of Foard County, Texas, bearing in-terest at the rate of 5% per annum from date until paid, and stipulating for 10% on principal and interest as attorney's fees if placed in the hands of an attorney for collection. Said note was given in part payment for a certain lot or parcel of land in Bailey County, Texas, and being Subdivision No. 13 out of League No. 195 of the Foard County school lands, and containing 177 1 erges of land. and containing 177.1 acres of land. And that in the conveyance of said land by plaintiff herein, to G. T. Oliver a lien was reserved to secure the payment of said note, and that said note is due and unpaid and the interest thereon is due and unpaid, and defendants, though often request-ed, have failed and refused to pay said note or any part thereof. That the land above mentioned

was connveyed by warranty deed, on the 20th day of November, 1921, to D. W. Odell and R. S. Phillips, who are now the last record owners of said above described land and premis-

es.

That said note has been placed in the hands of O. D. Beauchamp, an at-

torney, for collection, and plaintiff has contracted to pay him the usual and customary 10% attorney's fee. Wherefore, plaintiff prays the court that defendants be cited to apcourt that defendants be cited to appear and answer this petition, that he have judgment for his debt, interest, attorney's fees and costs of suit, and for the foreclosure of his lien on the above described land and premises, and the same be decreed to be sold according to law; that the sheriff or other officer, executing said order of sale, shall place the purchaser in possession thereof, and for such other and further-relief, special and general, either at law or in equity.

Herein fail not but have before said court, at its next regular term, this writ with your return thereon, showing how you have executed the

# New Beauty for the New Ford

#### THE NEW FORD TOWN SEDAN

In the Town Sedan you see a distinguished example of the unbroken sweep of line which adds so much charm to all the new, roomy Ford bodies. Radiator, hood, cond, lower roof line, fenders, wheels - every point of design reflects the new style and beauty that have been placed within the means of every one. All of the new Ford cars are finished in a variety of colors.

THE introduction of the new Ford bodies has set a high standard of motor car value. From the new deep radiator to the tip of the curving rear fender, there is an unbroken sweep of line-a flowing grace of contour gaining added charm from the rich and attractive colors.

You will take a real pride in the smart style and fresh new beauty of the Ford just as you will find an ever-growing satisfaction in its safety, comfort, speed, acceleration, ease of control, reliability and economy. In appearance, as in mechanical construction, craftsmanship has been put into mass production. New beauty has been added to outstanding performance.

A feature of unusual interest is the use of Rustless Steel for the radiator shell, head lamps, cowl finish strip, hub caps, tail lamp and other exposed metal parts. This steel will not rust, corrode or tarnish and will retain its bright brilliance for the life of the car. Here, as in so many other important details, you see evidence of the enduring quality that has been built into the new Ford.

We are sorry not to have gotten our report in last week, but the roads were so bad that the mail failed to

tween here and Crowell were lined with cars stuck in the mud, and to-ward night the roads became almost impassable.

Sunday School was not held last Sunday on account of the bad weather, but as soon as the weather is favorable we want to have more interest in the work.

Sunday is our regular singing day at the school house. Everybody come and bring your books and help us to make the school house ring.

The school here is doing fine work

in spite of the bad weather for the last three weeks.

#### **Poultry Nets More** For Farmers of the U. S. Than Wheat

Hens on American farms in 1929 produced eggs at the rate of 45,000 a minute, U. S. Government statistics shows, while poultry as a whole created a net income of more than \$1,181,000,000 for the farmers of the nation. This places poultry well above wheat, oats, fruit, potatoes, and a long list of other farm products in rank as money makers for farm-

taking in the old hen coop. Once the chickens were left to "the womenfolks" by the farmer, who felt that poultry was a "pin money" proposition. Now, with farm poultry in the less than she is spending for food to day.

Interest the lattle careful figuring will enable twentieth anniversary of the founding of the Boy Scouts of America.

The Scout oath and Law are worth knowing. The fact that more than 800,000 men and boys are subscribing to their tenets has a great bearing up-"big money" class, the head of the house is beginning to take upon him-self a large share of the work neces-

sary to successful poultry raising. This greatly awakened interest in poultry as a major farm product has resulted in constant improvement of farm flocks during the past few years, particularly since leading hatcheries of the countries banded to-gether under the slogan, "Hatchery Chicks for Greater profits," to pledge improved stock to farmers. In spite of this effort to make farm

flocks sure-fire profit producers many farmers have failed to realize the importance of good stock and of improved methods in obtaining best results from their hens. The old-fashioned hen coop is no longer satisfactory. New-type brooding and laying houses, sanitation and scientic management are replacing the old hitor-miss methods.

Increased egg production is the first step to great profits from the poultry flock. Hens must lay from 140 to 170 eggs a year to return a good profit to their owners, while the average for American farms is only 70 eggs per hen per year. Replace ment of law-grade stock, and improve ed methods of caring for hens offe the two quickest methods of securing best results from the poultry flock. poultry experts advise.

### IMPROPER DIETING MAKES BUSINESS GIRLS CRANKY

One reason why so many business girls and women develop a case of "nerves" before closing time is be-cause the fad for reducing has taken hold of them when they know little or nothing about the dangers of wrong

Dieting is a good thing for many, provided it is undertaken under a killed physician or dietitian, or after lengthy study of foods and their value. Hit and miss dieting, however, is a dangerous practice.

The elimination of needed energy -sugars and starches-is re garded by many as one of the reasons for these tattered tempers possessed by girls and women in business. The head of a large employment agency said. "My theory is that excessive dieting weakens a girl's resistance to the petty trials and annoyances that are inseparable from business. She's too prone to fly off the handle or to break down and weep if anyone finds the slightest fault with her work."

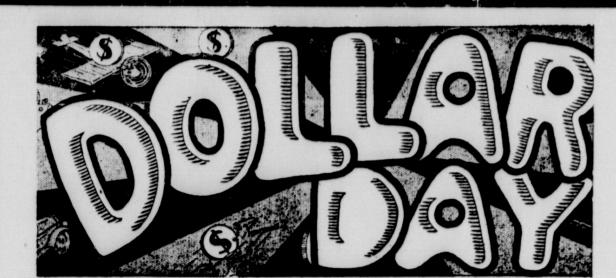

A quick energy food is often need ed before lunch or late in the afternoon, particularly if the business girl is attempting to deprive herself of needed food. A little candy when energy runs low can overcome or prevent fatigue—so the stenographer with her chocolate bar or bag of pea-nut brittle is after all much wiser than the one with her chew of gum.

#### POUNDS, DOZENS AND PECKS

Very often the housewife will get a better idea of the actual cost of a certain food, by figuring it in some other form. For instance, oranges at sixty cents a dozen may seem very high, but if you weigh a dozen and find they are costing about fifteen cents a pound, they appear very low-priced indeed—particularly when you consider that you are paying several times the much how a paying several times the much paying several times the much how a paying several times the much paying several times the much how a paying several times the much paying several times the paying several times the much paying several times the paying

times this much per pound for such foods as butter, steak and cheese.

As most of us eat too much of the acid-producing foods like meat, fish, bread and eggs, and not enough of the alkaline foods like oranges, apples, cabbage, carrots, celery and spinach, it is well to know this little trick of figruing prices. The money

We invite you to come to our store at all times, but especially next Saturday and Monday as we have some special bargains that day that should be interesting to you.

We will not make a list of the merchandise that is specially priced as space will not permit, but come in and look them over. We think this will be a splendid time for you to replenish your medicine chest, and to buy any other merchandise you might need.

So we thank you in advance for your patronage. We are at all times looking forward to the best interest of our community.

Respectfully,

# Fergeson Brothers

# Industry Stimulator

Lord Ghurston, British financier, on his recent trip to West Texas said:

"There's no chance of comparing America and England. You have the cheapest power possible. Everybody can use it, whereas in England it can't be done. I pay 25 cents a kilowatt hour for electric service. It is impossible for all classes to have this convenience. For instance in the agriclutural areas, where laborers are paid 31 shillings a week, they could not afford to buy electric service.

"West Texas should be very thankful for cheap power and for its availability to all. Big power companies certainly are of great stimulation to Texas Industry."

## THE NEW ART OF DIAMOND CUTTING

For centuries the art of the diamond cutter was considered a talent which must be developed by years of County Head Light Test Station, training. Today, diamonds are cut with the aid of ingenious mechanism which has greatlf speeded up the work, while producing the most brilliant gems in history. The machinery which is revolutionising the ancient art is for the most part, the cre- shon's pasture. Offenders will be over the radio, would happen to take ation of American ingenuity.

It no longer requires a diamond to cut a diamond. Formerly there was no way of dividing a diamond except by splitting it along the cleavage. Diamonds are now sawed into pieces at any desired angle. The hardest of stones are sawed by means of a very thin disc of phosphor-bronze, revolving at a very high speed. It takes a day to cut through a single carat. Mangum, Okla., were here Sunday One worker directs a dozen such visiting their daughter, Mrs. J. F. saws. It is very delicate work, for a stone may be shattered and ruined if Grady Blake of Munday has re- the saw strikes a flaw in the gem. The danger is anticipated by listencently accepted a position as used-car salesman for the Allen Chevrolet the saw, which sounds a signal of ing intently to the humming note of John Carter is again back on danger when a flaw is approached.

Diamonds are now reduced in size by turning them in a lathe like a Mexico City is having June piece of wood. The tool used in turnweather, according to Garland Shults ing is tipped with a diamond. In this way skillful workmen can reduce the Shults, of this city. He stated that size of the stone quickly and accuabout the only difference between rately, saving the slow and laborious the weather there now and in June is that there was much less rain now. George Moore of Thalia was of diamond chips and dust is very

One of the most important laborfor a year to his brother, Henry saving devices used in diamond-cut-Moore, of Midland. We don't know ting is the mechanism which deterwhether George is an optimist or a pessimist. He says all this bad weather is good for is to make the weather is good for is to make the past cut the facets by slowly rubbing old cow kick the milk bucket out of two diamonds together. Later the Mr. and Mrs. J. R. Beverly have returned from Mineral Wells where Mrs. Beverly has been for several weeks for the benefit of her health. They were accompanied home by the solution work was done by holding the stone against a rapidly revolving disk. The angle of the facet was determined by the judgment of the diamond cutter who became expert from long experience. The new tool is possibe to cut the facet with scientific accuracy. The diamond cut by the new methods reveal all the latent beauties of the stone and are, doubtless, the most beautiful ever cut in the long history of the art.

#### ART CONTESTS

The art contest is probably being arried on at present in a number of schools in Foard County. In those schools which have not begun the work, it should be started in the near ture study.

As in previous years in this county, the contest will be given in the difmum of ten pictures, giving the name picture and artist; the interme-Sunday School begins promptly at diate department will study a minimum of fifteen pictures, giving the name of the picture and artist and the nationality, and spelling of each and yet not be narrow minded. It is correctly; high school will study a this thing we seek for our cellege stuminimum of twenty pictures with dents.' the same requirements as the interediate department.

All pupils in the departments are equired to study the pictures and take part in the contest.

The lists of pictures to be studied may be selected by the teachers in each individual school, or by the teacher who has the art contest in charge in that school, as the case may be. The pictures may be selected from the fifty pictures listed in the Interscholastic League Bulletin, or they may be taken from any good graded list found in the State Course of Study Art Handbooks, Teacher's Magazines or catalogues. They may secured from Perry Picture Malden, Mass.; T. A. Owen Co., Dansville, Ohio; Hoover Bros., Kansas City, Mo.; Practical Drawing Co., Dallas and other companies furnish-

ing supplies. The contest must be closed at least by one week preceding the county meet, and all reports, department averages, and number of individuals making one hundred per cent, should sent to the Director immediately llowing its close.

The art contest has become an established feature of school and interscholastic work in the county. This year it has been added as a state event in the Interscholastic League. applying, however, only to the fifth

and sixth grades. The county director of the contest will be glad to give any further in-formation, or offer any assistance possible on request from any teacher or school in the county.

LOTTIE WOODS. Director Art Contest, Interscholastic League, Foard County.

#### DON'T FLIRT WITH A COLD

A "little cold" is a dangerous thing. You may neglect one, two or a dozen of them, but sooner or later find that

one has gotten the better of you.
One of the most important things you can do, both to prevent and to correct colds, is to take action against acidosis—which merely means that the body is less alkaline than it should

At the first sign of a cold, go home as quickly as possible. Take a hot bath and get into a warm bed at once. Then drink a full glass of hot lemonade. The "sweat-out" that follows will eliminate poisons. In the morning, pourt the juice of one lemon into a half-glass of water. Stir in a half-teaspoon of baking soda. Drink it while it effervesces. Repeat three while it effervesces. Repeat three times a day until all cold symptoms disappear. Also, see your doctor be-fore colds become serious.

Fifty years ago ninety out of every 100 Texans lived on a ranch or farm; but the next census is expected to show that at least fifty-five out of every 100 live in towns.

It is estimated that the anartic region is about 30 degrees colder than the arctic.

# "Penetrative Lubricity" MEANS

- 1. Freedom from Friction.
- 2. A "Carry-Over" Film by Metal Penetration.

To lubricate, an oil must decrease friction between metal surfaces. A motor oil does this by separating the metal surfaces, and theoretically keeping them separated under all operating conditions. It may amaze you to know that many oils frequently fail to do this.

Think how this "separation" of moving parts is accomplished. The oil forms a wall or "film" between opposing surfaces . . . and it is upon this film that the reputation of every oil must rest. The film is thin, of course, for it must ride in the tight crevices of bearings, eylinder-walls, etc... But it must also be of extraordinary strength... it must cling tenaciously... or the pressure of your motor will squeeze and hurl it from the vital points that must be kept separated.

Penetrative Lubricity . . . The New Gauge of Motor Oil Merit

Penetrative lubricity is the outstanding characteristic of the new Conoco Germ-Processed Motor Oils. This characteristic is the direct result of Germ-Processing.

You must know this story of Germ-Process. Briefly, it is the patented result of 16 years' experimentation by the British scientists, Wells and Southcombe. Back in 1901, when everything of fundamental importance was known about the refining of mineral oils... these two scientists foresaw that additional improvements must be made, in order to keep lubricants abreast of the future development of the "gasoline buggy."

They knew that animal and vegetable oils

were "oilier" than mineral oils could ever be, but were impractical for use in internal combustion motors which operated at high tem-

Finally the Germ-Essence, containing the "oily" property lacking in mineral oils, was isolated. And a method was devised for combining this essence with highly refined mineral

Only Conoco Oils Are Germ-Processed . . . This Gives Them Penetrative Lubricity

Continental Oil Company now owns the exclusive right to Germ-Processing for North America. Only with these new oils can you secure a fracture-proof film which actually penetrates the metal surfaces of your motor! What does this mean? . . . It means that the all-important film no longer may be hurled and squeezed from moving parts. The Germ-Essence carries the oil into every miaute erevice . . . into the very metal itself. And there it clings—clings when the heat of high speeds seeks to seorch and drive it away . . . clings when bearings try to squeeze it out . . . clings, too, when you stop your motor. And this is most important . . . for the oils you are now using drain away as the motor stops, and require 5 to 15 minutes to resume their guard duty when you next tread on the starter. That's why 40% to 60% of your motor wear occurs in those first minutes of operation.

Save your motor by the use of this new oil. Introduce it to Conoco Germ-Processed oils today at the sign of the Red Triangle.

### THE PLEA OF THE UNBUILT HOUSE

I am the unbuilt house-build me therfore into a home.

Build me with loving hands, with eager heart. Build me for eternity. For as you build, so shall I stand ever over you, eve protecting, day after day, under the sun and rain, in the long night of cold and whirling wind.

Build me to last. For I shall be your haven and your children haven. Build me strong—and beautiful. Let me sit back from the road, a figure of repose, reflecting character without presumption dignity without restraint. Let me express the good taste and intedrity united in you who dwell inside.

Clothe me in color. Let nature breathe its goodness whereve it may reach. The protection of trees, the affection of vines and the warm smile of flowers-these things I need in abundance.

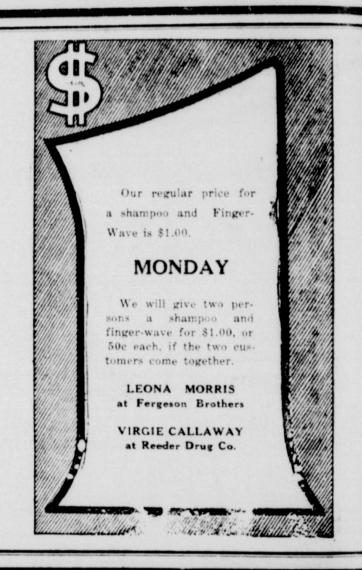

And let the friendly welcome of the latchstring trace its joy ous way through the lines and colors of every room. Let me have sunshine and laughter. Build me now, while the years are young, while we can bot

be happy and useful. Yours truly,

SPLINTERS.
