There was a number of Crowell people who attended church here last Sunday morning and Sunday after-The afternoon services were enjoyed by all.

FIRST NO PARKING SIGN WAS MADE BY CAESAR

Julius Caesar is accredited by the City Builder with originating the "no parking" rule. He issued an edict forbidding vehicles to enter Rome during business hours because he saw that parking of chariots and other vehicles of that era tended to injure business in Rome. Similar regulations were put into effect in other large Roman cities.

We Thank You

In discontinuing our implement business, we wish to take this method of thanking our many friends of this section with whom we have dealt with for their patronage.

We are sure that you will find our successor in the implement department of our business, Mr. J. C. Self, an ideal man to deal with. He knows the implement business thoroughly and has a record of square dealing that should make your business with him a genuine pleasure.

We are also confident that he handles as fine a line of implements as can be found anywhere.

DON'T FORGET

-That we still want your hardware trade and from now on we shall devote our entire time to this business.

COMPARE VALUES BEFORE YOU BUY AN AUTOMOBILE

Low charges for distribution of the new Ford save you at least \$50 to \$75 in addition to the many savings in making the car

THESE are days when every dollar counts. The period of reckless spending is over. People are going back to the good old-fashioned principles of thrift and economy. Value is again being carefully considered.

Nowhere is this more important than in the selection of an automobile. For the purchase of a car represents a considerable investment. It should not be decided on hurriedly, but only after analyzing every important factor that concerns cost, value and performance. The time to do this is before buying not afterward when it is too late.

On THE basis of cost, performance and the actual comparative worth of every part, the new Ford is a value far above the price you pay. It is made of better materials and with greater care and accuracy because of the recognized efficiency and economy of Ford manufacturing methods.

The value of these methods is known and understood by millions of people. It is not generally realized, however, that these same principles of efficiency and economy are applied also to every step in the distribution of the Ford car. The low cost of selling, financing time payments, etc., means a direct saving to you of at least \$50 to \$75 in addition to the money saved by Ford economies in making the car. Here are three reasons why this is so.

(1) The Ford dealer does business on a smaller margin of profit because of the greater number of cars he sells. His discount or commission is the lowest of any automobile dealer. The difference in your favor, ranging from 25% to nearly 50%, comes right off the price you pay for the car.

- (2) The Ford charges for financing are low.
- (3) No expensive extra equipment is needed when you buy a Ford. The car leaves the factory ready for use. The f.o.b. price includes a Triplex shatter-proof glass windshield and an extra steel-spoke wheel, in addition to four Houdaille double-acting shock absorbers and fully enclosed four-wheel brakes. Any accessories you may wish for your individual taste are sold considerably below the usual prices. None of these charges for selling, financing or accessories is marked up or increased to cover a high trade-in allowance on a used car.

Get all the facts, therefore, before you buy and figure out just what you are getting for your automobile dollars. Go beyond the f.o.b. price and find out how much more you pay the dealer than the dealer pays at the factory. Analyze the used-car allowance. Compare all charges—item for item value for value.

WHEN you do this you will have a new appreciation of what the Ford Motor Company and Ford dealers are doing to keep down the cost of Ford cars. You will also know why it is possible to put so much real value into the new Ford and still retain the low price. The money you pay goes for value in the car. It is not wasted in excessive costs in manufacturing or selling.

Great Changes In Highway Building

Writer Tells of Immense Advance Which Has Been Made.

Research Fostered by Material Men Has Helped Greatly.

Dallas, Texas .- The "science of road-building" has undergone such radical changes in recent years, in response to ever growing demands for economical highways capable of bearing the constantly increasing traffic, that it may be said to have been newly created. And in embarking on its big highway building program during the past three years, Texas is having the benefit and will continue to have the benefit of all this progress.

Such is the conclusion of P. J. R. MacIntosh in his second article in The Texas Monthly, surveying the highway situation in Texas. "Better and Straighter Roads" is the title of the article, and he declares that such is the present object of everybody connected with the business of building

"That the highway department is determined to carry forward Texas' construction program under condi-tions which shall embody the best practice in the light of fully tested experience," writes MacIntosh, "is shown by the fact that at the present time a committee of leading engineers is completely revising the department's standard specifications. This committee, which was chosen to perform this important task by Chief Engineer Gibb Gilchrist, and which is headed by A. P. Rollins of Dallas, has been at work for several months, and already has submitted three drafts of the new specifications to all interested parties, including engineers, material manufacturers, contractors and others, for suggested revision."

MacIntosh points out that the com-mittee has had the active co-opera-tion of material manufacturers, contractors, and all others concerned with road building. The new specifications, he says, will embody the collective experience of all of these, and they will measure up with the best in the country.

Research Has Helped "It is a fact," he writes, "that the various interests concerned with road building have vied with each other since the rise of motor traffic to contribute toward the solution of the va-rious problems which have been encountered. The manufacturers of the major materials in the United States—cement, asphalt, brick, sand and gravel, crushed stone—all have national organizations which have fostered constant research which have tered constant research which has been richly productive of results and which has been one of the chief driv-ing forces toward the goal of better and more economical highways. The motive has been selfish, it may be said, and the primary object in each case has been to promote the interests of the particular industry involved. But the public, nevertheless, has been the chief beneficiary of this progress, and Texas will be the beneficiary of it in carrying forward its great highway construction program.

Some Important Changes Enumerating some of the changes which have taken place, MacIntosh

writes as follows:
"First of all the increased traffic and the greater distances habitually traveled have made the location of the road—the course of the right-of-way. so to speak-of much greater importance than it was in the past; then the necessity of roads of uniform strength to bear certain volumes of traffic, up to a maximum, has made absolutely essential a uniformity of the materials going into the building of every foot of a given road, and this need has been may be a production of the materials. need has been met by a revolutionary change in the character of aggregates -the sand, gravel, and crushed stone which go into the base of any high type road. Today aggregates are

graded as carefully as cotton, and any given quantity of a certain grade will run uniform throughout.

"There is a better knowledge of the character and use of all materials today than ten years ago, or even five years ago, an improvement which the manufacturers of those materials have done most to achieve. For example, practically nothing was known of the physical properties of asphalt, whereas today it is an accurately known and controlled product. Moreover, practically in the past ten years we have developed in Texas a natural asphalt product, the limestone rock asphalt mined in Uvalde county. Concrete today is immeasurably superior, and the methods of road construction with this material have been revolutionized, largely due to the re-search fostered by the cement manu-facturers through the Portland Cement Association.

Straighter Roads Needed "Ten years ago one-way bridges were universally regarded as adequate in Texas, whereas today the highway department has established a minimum requirement of 24 feet width of roadway on all bridges. Wider right-of-ways for highways are now insisted upon by the department, the minimum being fixed at 100 feet, whereas until recently 60 feet was regarded as ample. Ten years ago we built roads so that the surface sloped upward to the middle to an elevation of six inches new the force. vation of six inches, now the 'crown' is only one and a half inches high."

MacIntosh enumerates other im-proved practices. He emphasizes, however, that straighter roads, following the shortest route between main points, will be one of the greatest advances if they can be obtained through the co-operation of the peo-ple. They will save millions of dollars a year to Texas motor traffic, he

MacIntosh's next article will be on the highway situation in the lower Rio Grande Valley.

There were 42 robberies and holdups in London in 1925, whereas in Chicago there were 1,702.

Because of the sugar content of honey, bacteria harmful to health do not multiply in it.

Chevrolet announces

ANEW

SERVICE POLICY

The Chevrolet Motor Company and its dealers are pleased to announce a new service policy—one of the most liberal ever offered on a low-priced automobile.

Put into force as a written agreement given to the purchaser by the Chevrolet dealer when the car is delivered—it offers the following provisions:

I Every Chevrolet owner receives his car from the dealer in perfect condition -thoroughly lubricated, properly adjusted, and ready to operate efficiently from the first mile of ownership.

2 Every Chevrolet owner is entitled to free inspection and adjustment of his car at the end of the first 500 miles of usage.

Bevery Chevrolet owner is entitled to free inspection of his car every 1000 miles thereafter, so long as the car is in operation.

4 Every Chevrolet owner is entitled to free replacement of any part which may prove defective in workmanship or material, within the terms of Chevrolet's standard warranty. This includes both parts and labor.

Provision number 4 will be carried out by any Chevrolet dealer in the United States. As a result, the Chevrolet owner may travel to any part of the country, with assurance that the guarantee on materials and workmanship will remain in force.

This new policy constitutes proof of Chevrolet's high quality—for such liberal provisions could only be made in connection with a car built of fine materials to exacting standards of workmanship.

Back of this policy, and assuring its successful operation, is one of the most complete and efficient service organizations in the world.

There are more than 10,000 Authorized Chevrolet Dealer Service Stations in the United States alone. Each employs skilled mechanics thoroughly trained at Chevrolet Service Schools. Each has specially designed tools and machinery developed exclusively for Chevrolet service work. And each has on hand, at all times, an adequate stock of genuine Chevrolet replacement parts.

Chevrolet's flat-rate charges, including both parts and labor, are the lowest in the industry on many service operations!

In considering the purchase of a lowpriced automobile, think what this service means-in terms of lasting satisfaction, as well as in increased economy.

TEACHERS! PARENTS!

Rumors are being circulated that DUBBLE BUBBLE Chewing Gum is harmful and injurious. These stories are utterly ridiculous and untrue.

DUBBLE BUBBLE contains pure cane sugar, com syrup, natural gums (treesap), finest of flavor and vegetable color-nothing more. Everything in it is good for children and the best that money can buy.

TO YOU, THE ADVISORS OF CHILDREN vitally interested in their health and welfare, we pledge that DUBBLE BUBBLE always has been, and always will be, pure and wholesome. DUBBLE BUBBLE is made in compliance with Federal Pure Food Laws in a sanitary, daylight factory and is machine-wrapped for cleanliness.

We agree with teachers and parents that chewing gum should not be used in the classroom. We do hope, however, that teachers in enforcing class discipline will not forbid children to use DUBBLE BUBBLE outside of the school, and that they will not, by inference or otherwise, seek to frighten children by giving further circulation to "poison stories" which are so obviously untrue, and which were originated solely for the purpose of injuring the sale of this popular product.

No other chewing gum has become so popular in so short a time. Such popularity must be deserved. DUBBLE BUBBLE is the kind of chewing gum the children really like.

As responsible manufacturers for more than 15 years, jealous of our good reputation, and making a pure product that is sold internationally as well as nationally, we resent the circulation of tales and rumors that DUBBLE BUBBLE GUM is harmful or injurious in any way.

We rely upon YOUR sense of fair play to assist us in refuting this "Poison Propaganda," should any of these stories be called to your attention.

The Sex Question in the Government Census

In 1920 there were 104 men to every 100 women in the United States. Whether this ration has risen or fallen will be one of the most important facts to be determined by the 1930 census, according to Dr. Joseph A. Hill, acting director of the census, who has pointed out that the relative number of males to females is one of the most fundamental factors to be considered in any analysis of

The sex question has always had an important place among the list of questions asked by the enumerators at each decennial census of the Unit-ed States, Dr. Hill said. Even in the first very simple census taken in 1790, when only four questions were on the census schedule, one of them concerned the sex of white persons enumerated. The sex of negroes was not considered important enough to be recorded until the census of 1840, when members of the colored race were registered according to sex for the first time by the census bureau.

As far back as the records go, there have always been more males than females in the United States. In 1790, the sex ratio for the white population was 103.8 to 100. The early frontier days of our history called for men more strongly than

The continued excess of males in the United States is accounted for mainly by immigration, since males immigrate in larger numbers than females. This explains the fact that the excess of males reached its maximum in 1910, at the end of a decade of the heaviest immigration this country had ever known. The sex ratio then went to 106 to 100. In 1920 it had dropped to 104 to 100, due largely to the restricted immigration during the war, and to the number of American men who remained in Flanders Fields.
In the European countries from

which our immigrants came there is, as one would expect, a deficiency of males. The present deficiency in European countries, however, is not solely the result of emigration. It reflects also the depletion of males through the World War, in which eight million or more soldiers were killed or fatally wounded. As a con-sequence the number of males per 100 females fell off from 93.7 to 91.2 in England, from 97.4 to 91.0 in Germany, and from 96.6 to 90.6 in

Within the United States the sex to 100 females. In New England, datings, we will try it again soon. on the other hand, there is a slight deficiency of males—98.5 to 100 speaks a good word for the Rialto. When this is done, business in Crowless largely accounted for by the ell will be much better for the migration of people from one part Crowell merchants. of the country to another. In the westward migration that has long been going on within the United States, as well as in the immigration from Europe, there is a majority of basket without being read.

The state having the largest excess of males in 1920 was Nevada, 148 males to 100 females, Wyoming ranking next with a ratio of 131 to 100.

***** There is a wide range of variation also in the sex ratio for different cities. Taking the cities that had a population of over 100,000 in 1920, the excess of males was greatest in Akron, Ohio, 140 males to 100 females; while the most marked deficiency of males was in Washington, D. C., where there were only 87 males to 100 of the opposite sex. The proportion of males in the population of any community is affected in some degree by the nature of the principal industries. It is noteworthy that in Detroit the number of males per 100 females increased from 107 in 1910 to 119 in 1920. This no doubt reflects the increasing em-ployment of men in the manufacture

It is of interest to inquire what the ratio of males to females is or would be if not affected by immigra-tion. It is a statistically established fact that the number of male births is slightly greater than the number of female. But for some reason, which biologists apparently have not yet fathomed, the female infant is more tenacious of life than her baby brother, who consequently does not maintain the numerical superiority which he had at the outset. By the time the rising generation reaches maturity the two sexes are very nearly equal in numbers.

The information obtained through the census as to the number of males and females in the population is in-dispensable in the calculation of life tables, in the determination of mortality rates, and in studying the incidence of disease. It is knowledge that is needed in business, in legis-lation, and in other connections.

BAPTIST W. M. S.

The Baptist Woman's Missionary Society is growing in active mem-

bership and enthusiasm.

The Week of Prayer program observed during March was well attended and an interesting program on Home Missions was rendered, led by Mrs. Dunagan and Mrs. Poland. There were special features through out the program.

Last Monday the first lesson in our new mission book, "Challenge to Missions," was conducted by Mrs.

The 5th Monday we are to send eggs to the Buckner Orphans Home. We have found preparing these special boxes to be one of our greatest pleasures for the highest form of spending is spending oneself for others. "Love is the key that fits all locks."

By virtue of your membership you are a member of the society and we covet that you shall take your place as an active member. In union there

is strength. May we count on you?
Those present last Monday were:
Mesdames A. Wright, Rucker, A. G.
Bell, W. W. Smith, C. C. McLaughlin, Dunagan, Daniels, Crawford, Womack, L. G. Andrews, Self, Miller, Poland, Edgin, Harrell and McBurnett.—Pub. Chairman.

Fruit and Vegetable Loadings in Texas in February Lower

Austin, Texas, March 19.—Daily loading of fruits and vegetables in Texas during February were considerably below those of last year at this time, according to Bervard Nichols, editor of the Texas Business Review, issued monthly by the Bureau of Business Research at the University of Texas.

'During the month, 5,200 cars of fruits and vegetables were loaded in Texas, against 5,066 in January and 5,843 cars in February, 1929, Mr. Nichols said. "Further seasonal gains are expected during the next two or three months. Spinach accounted for nearly a third of the volume, with loadings amounting to one each Sunday morning at the 1,747 cars, whereas 1,493 cars were church. The habit of staying away loaded in February last year. There from church on Sunday will tend to were 1,410 carloads of mixed vege-

False Rumors Are Circulated About Dubble Bubble Gum

Rumors that "Dubble Bubble" Chewing Gum is harmful and injurous are being circulated freely by competitors and unscrupulous persons and the Frank H. Fleer Corporation of Philadelphia, makers of this popular gum, brand this malicious propaganda as utterly false and ridic-

They point out the fact that a poor product would have never surived, because City and State Health Departments in other sections, where similar rumors spread, were prompt to investigate and analyze it in their laboratories, and had there been the least suspicion that this gum was harmful, its sale would have been banned immediately by every state in the Union.

The persistent popularity and ever-increasing sale of "Dubble Bub-ble," in the very cities where rumors were the most vicious, must and does indicate it is a thoroughly wholesome and satisfactory product.

The Fleer Corporation also state that they have been makers of good gum for more than thirty years that they never have and never wil their laboratory makes a thorough analysis of all products used in the manufacture of their chewing gum.

Shall We Cut Our Own Throats?

-By continuing to let Crowell money leave Crowell

What will Crowell ever amount to if we do not patronize our local institutions?

Why should we help other cities to grow and prosper at our own expense? That is exactly what we are doing and unless conditions change Crowell is going to follow the trend of towns in other parts of the state, where the small towns become smaller and the large towns get larger. We are at the crossroads and if we do not show an interest in our town, we cannot expect others to.

YOUR LOCAL LAUNDRY

BY GORDON K. SHEARER United Press Staff Correspondent

Austin, Texas, March 19. (UP).-Ross Sterling of Houston is again bein- discussed as a possible candidate for governor of Texas.

The Sterling movement started with a bang more than a year ago. He was present at many banquets

more poor people than rich people, and they vote that way, too. That this division has become less marked the Department of Agric in recent years is apparent. Sterling ture reports that a pamphlet on enthusiasts declare that the belief heating, prepared for the information that a rich man cannot be a good of home owners, has been in candidate is exploded by the vote great demand that the supply i Lynch Davidson received in perhaps hausted and a new edition is of the hottest campaign for governor press. All of which goes to show that ever was waged in the state.

For Sterling the biggest argument lightens household drudgery and is his record at the head of the state to the comfort and convenience operated more nearly like a success- popular, provided it does not in ful private enterprise than perhaps too great an increase in the fa any other department of the state budget. Heating the house with can scarcely be disputed. It is the oil burner automatically control. piggest department of the state, nandles most funds, and comes in Government home economists, closer contact with the people every no more, and often less, than the day than any other department, ex- er methods of coal heating. cept perhaps the department of edu-

In the early days of the Sterling commission there was much unrest. Some of it could be directly traceable to Sterling personally. Accustomed to rigid business methods, he found it difficult to adjust himself to the difference that exists in handling the public's business with the public and handling his own affairs. Probably the highest compliment that could be paid the Houstonian is that he did not get peved and throw up the job. He faced the situation as he found it. Today he is most genial in dealing with the contesting delegations with whom the highway commisison deals.

launched against Investigations \$1994.90 the business operations of the commission in handling contracts bounded in praise for the commission

and apology for the charges. Now the chief complaint against and then stored in the moist air the body is the exercise of its power over routing highways. Towns complain that highways are being built The moisture-laden cold makes around them. As a higway proposition the more direct the routes and 6.6776 the less communities through which to pass the better. But from the hostess as a highly valuable town standpoint, it is both an affront her job of entertaining, but and a loss of possible tourist busi- fair to accomplish a highly ness to have a highway miss it by a task every other day of the week mile or two. Here lies the chief obacceptance by the City of the improvement in such District, such deferred payments shall bear interest from the date of the completion and acceptance stacle Sterling will have to overcome of such improvements until paid at the rate of 8 per cent per annum; the if he runs for governor. Towns feel- their original degree of interest shall be payable annually as it accrues, and the Contractor, Jordan-Section 1. That the said estimate of the cost of such improvements and the said report of said Byron Reese, Engineer of the City, is accepted and is in all things approved as the estimated cost of the improvements, prepared and caused to be prepared by the City Council, and shall be used by the City in making advertisement and giving notice in regard to the City assignable certificates of special assessments evidencing the several ing aggrieved in this matter form over indefinite periods of time. centers of opposition that can be used very effectively against him. home economics authorities where a politician might give way in demonstrated that the hydrator. confirmed the belief that they were the youngest to receive such distinc-tion. Sixteen years is the earliest age at which aviators are eligible for student licenses. Less than two weeks after their sixteenth birthday, the

twins were granted theirs. No relatives witnessed the initial

solo hops.
Ralph and Richard are members of the junior class of the Gainesville high school.

TEXON TALES (Prohibition and everything)

Well, we never was so embarrassed in my life as we was when everybody run to the postmaster to see how is the best way to vote in the Literary Digest Prohibition Poll. Well, shucks, we told them the way to vote and now we want to see if everybody thinks we told them right. We told them we didn't know how. Just everybody vote like they want to. We figured they would anyway. That's the way they have always done and everybody's getting along alright. They was a lot of discussing took place and then even cussing but no fights we could speak of. Nobody favored saloons like we used to have very much. The guys who liked lickker didn't want light wines and beer and can you blame them? Those who don't like lickker could not work up any enthusiasm over light wine and beer neither. Some said the only thing bad about our present prohibition was the bootleg-gers and some of them wasn't so bad. Maybe the reason you don't like our prohibition is because you never have tried it yet. Prohibition may not be so bad if it only don't get any worse. Some bootleggers are paying income Some bootleggers are paying income tax so if the government would make them pay a license maybe we can get on a paying basis. We tried the country wet and we tried it dry and it is still wet so think up something else and we'll try it. You can check a man's hat but you can't check his drinking. Passing laws don't change a man's appetite so maybe this bad lickker will ruin his stomach and make a dry. It takes two to make a bootlegger anyway. If our prohibition is alright it is here to stay or come back, we've tried it. If it isn't come back, we've tried it. If it isn't alright why it will run its course for alright why it will run its course for you can't fool all the people all the time. So far as telling anybody how to vote that is easy. Everybody vote like they want to. Solving this prohibition, if it needs it, is everybody's business. You find the guy who knows what this country needs and that's the boy we are looking for.

Yours for a 'solution,'

TEXON TATTLER.

And all this glorious change is due to Konjola. For ten years I endured awful agonies. At times the pain in my limbs was so severe that I could not get around Every pickt. I was the only way to regulate and control monopolies is by direct attack.

"I especially want it understood that I am radically in favor of stringent legislation to protect and advice that proved to be. In four farmer's hands." weeks I was without a sign of rheumatism, and my kidneys were as good as ever. No wonder Konjola is the most talked of medicine in America. It should be in every home throughout the land."

Konjola is sold in Crowell at Fergeson Bros. Drug Store, and by all the best druggists in all towns throughout this entire section.

(Adv.)

RURAL ELECTRIFICATION URGED FOR RARM RELIEF

"My own study of this (farm reto Become Pilots lief) question has convinced me that the activities of the farm is almost invariably followed by improved home conditions as well as increased profits," said Representative F. S. Purnell of Indiana in an address be-

fore the rural electric conference at Purdue University.

Declaring that more is involved than the mere sale of current to the farmers, Mr. Purnell said:

"For the past ten years we have been seeking a way to put agricul-ture on an equality with industry. Electricity is the universal power for industry and has made possible the marvelous development we have witnessed in manufacture in this country. Agriculture must follow the lead of industry in this regard as well as others if it is to succeed."

Come to Crowell and See One of America's

Largest Airplanes

Arrangements have been made for the Kenyon Transportation Co. to fly their giant trimotor Ford plane from the Self wheat field, 3 miles east of Crowell. This is a 16-passenger airplane and is flown by one the world's renowned pilots, Thunder Johnson.

A MAGNIFICENT TRIP

Whether or not you have experienced the thrill of human flight—this great all-metal ship will be at your disposal for any possible type of trip desired.

Stout airplanes operating commercial lines between large Eastern Cities have used Ford transportation for two and one-half years flying passengers over eleven million miles without an accident. It's the safest transportation in the world and most enjoyable.
