PRACTICAL HEALTH HINT.

Protect Your Eyes.

"Take care of your eyes; they are your breadwinners," is the advice of the national committee for the prevention of blindness in its latest bulletin. The bulletin says poor eyesight means poor wages, discomfort, diseases, and is often due to lack of care or to improper care of the eyes. Good eyesight, on the other hand, means a fair chance to earn a living, to enjoy life healthfully, and demands good care of the eyes.

It is stated that 50 per cent of all blindness is preventable and that half of this, or 25 per cent, is preventable through babies' sore eyes known as ophthalmia neonatorum. The other half is due to accidents, diseases, defects and negligence. Neglect in getting glasses when needed or having glasses properly fitted is an important cause of eye trouble. The most important symptoms or warnings of eye trouble are headaches, eyeaches, blurred vision, watery eyes, sore eyes or puffiness of the lids. Any one of these symptoms should demand the services of an oculist.

UGH! CALOMEL MAKES YOU DEATHLY SICK

Stop using dangerous drug before it salivates you! It's horrible!

You're bilious, sluggish, constipated and believe you need vile, dangerous calomel to start your liver and clean your bowels.

Here's my guarantee! Ask your druggist for a 50 cent bottle of Dodson's Liver Tone and take a spoonful tonight. If it doesn't start your liver and straighten you right up better than calomel and without griping or making you sick I want you to go back to the store and get your money.

Take calomel today and tomorrow you will feel weak and sick and nauseated. Don't lose a day's work. Take a spoonful of harmless, vegetable Dodson's Liver Tone tonight and wake up feeling great. It's perfectly harmless, so give it to your children any time. It can't salivate, so let them eat anything afterwards.

Are You Living on Credit?

Don't

We guarantee to save you at least 10 per cent, and frequently more, on credit prices.

YOU MUST PAY FOR CREDIT

Common sense will tell you that no merchant can carry large accounts on his books month after month without charging the customer for the use of his money.

Your money talks here, and gets the very rock-bottom prices. We buy for cash, sell for cash, have no bad accounts to apportion among the good paying customers, and hence can afford to, and DO, sell you goods cheaper than any merchant can afford to sell on credit.

With The News Paragapher

The United States has severed diplomatic relations with Germany. That may mean war with Germany, but not necessarily. In any event we ought to stay with the President, and if he needs us we'll just hike right to Washington. Of course, interests at home would suffer, but any one ought to be patriotic enough to sacrifice these for the good of his country. We'd stay right inside the fence in the daytime, and if they were crowded for bed room we would be willing to sleep in the dog house at night.

The price of sugar has dropped about half a cent on the pound. Unfortunately it was not flour instead of sugar. We learned to get along without sugar in early childhood when we sweetened our coffee with molasses. But it has been a hard matter for us to get accustomed to getting along without biscuits ever since we used to have them at our house when the preacher would come.

We are destined to remain poor all our lives. And it's just because we can't buy bargains. Only the other day we had an opportunity to buy a horse for \$9 and we did not have a cent of money. We had just bought a second-hand buggy for \$3.75, and it took all we had.

Shoes are just twice as high today as they were a year ago. But there is nearly always some way out of a difficult situation, and this is no exception. The problem is to make one pair of shoes last as long as two pair used to last. Here it is already solved: wear one shoe at a time.

Our contemporary, the estimable Chillicothe News, says that in securing the big oil mill they landed a whale without any bait. Here's congratulations to both Chillicothe and to the "whale," and hopes that the "whale" may never have cause to feel like a "sucker."

Ordinarily surgical operations are a great thing when they are the last resort for the cure of disease, but when it comes to diseases of the head we would draw the line. If it were necessary to have our head amputated we would prefer to die.

The President has signed the bill recently passed by Congress opening to settlement and sale 40,000 acres of land in Arizona. But what's it worth? The only thing that can be raised there is sand, and the wind has a monopoly on that.

A man by the name of Mr. Stocking up in Pennsylvania got his foot shot off. That's nothing. Our Mr. Sox down here in Texas got both of his feet wore off and still goes about in that condition.

It may reasonably be expected that the sentiment will favor this season the drop-skirt. But we hope not altogether.

When somebody tells you that he believes you are an honest man, right at that time you really wish you were.

We had always rather ride in the back seat of an auto, if by so doing, we could look like we owned the car.

There comes a time once in a while when we should like to have a recipe for raising an emergency fund.

Some folks plant their garden on the moon. That may be all right when we have a "wet" moon.

It's really provoking when one performs a good deed and nobody ever says anything about it.

Work of the Chemists.

A chemist was employed at a large salary by a well known concern which had formerly employed none. The very first day he made a suggestion which saved the firm enough to pay his salary for a year.

Out in Hawaii they discovered that 10,000 acres of fine pineapple lands were useless because of too much manganese in the soil. A chemist showed the growers how to paint the leaves of the pineapple stalk with a certain iron preparation which exactly counteracts the ill effects of the manganese.

A Philadelphia chemist told how he was asked to give an expert opinion to a woolen manufacturer about the use of soap.

"I saved that man \$20,000 in a year," said he, "and I didn't even ask for a fee—it was too simple." Commercially speaking, chemists are all MacGregors—they sit at the head of the table.—Philadelphia Ledger.

You Might Like to Try It.

Old English cookery was astonishingly lavish. Yorkshire cooks, for instance, seemed to fling about dozens of eggs and pints of cream. A favorite pie to send to one's friends at Christmas was made like this: Take a turkey and bone it; take a goose and bone it, and so on with a chicken, a pheasant, a partridge, a pigeon and a lark; then put the lark in the pigeon, the pigeon in the partridge, the partridge in the pheasant, the pheasant in the chicken, the chicken in the goose and the goose in the turkey. The turkey should then be placed in a dish with a couple of hares to fill up the crevices and six pounds of fresh butter, covered and cooked. The recipe said this was "an agreeable pie to eat cold."—London Tit-Bits.

Concise Information.

A broker was about to write a note to a man whose initials he had forgotten. Rather than look it up he picked up the phone (he did know the number) and asked the man's stenographer to give him her employer's initials.

"C. D." was the answer, but the broker wasn't certain.

"C. C., did you say?"

"No," she snapped. "C. D.—understand? D. for dog."

And rang off.

WONDERFUL STUFF! LIFT OUT YOUR CORNS

Apply a few drops then lift corns or calluses off with fingers - no pain.

No humbug! Any corn, whether hard, soft or between the toes, will loosen right up and lift out, without a particle of pain or soreness.

This drug is called freezone and is a compound of ether discovered by a Cincinnati man.

Ask at any drug store for a small bottle of freezone, which will cost but a trifle, but is sufficient to rid one's feet of every corn or callus.

Put a few drops directly upon any tender, aching corn or callus. Instantly the soreness disappears and shortly the corn or callus will loosen and can be lifted off with the fingers.

This drug freezone doesn't eat out the corns or calluses but shrivels them without even irritating the surrounding skin.

Just think! No pain at all; no soreness or smarting when applying it or afterwards. If your druggist don't have freezone have him order it for you.

Sparks from the Exciter

There has been a lot of things I have wanted to tell you for a long time but no one would translate my language into your lingo.

I am a little dynamo at the the power-house and furnish current to make the big generator do the work. You know your muscles do the work because your mind and nerves make 'em do it. Well, I'm the nerves part.

You may wonder how I find out all the things I know but please remember the electric wires go into about all the best homes in town.

My connection with the telephone office puts me next to what "central" knows and if she didn't have sense enough to keep her mouth shut about some of that, a lot of folks would lose sleep o' nights.

Say, do you know there is really only one way to sell electricity? Yep, you guessed it, sell it thru meters and my new boss says he will be able to lower the rates a little and give longer hours of service when he gets all the customers on meters and gets some more customers.

The boss and I both like boys and girls and we want to get acquainted. Either of us will be glad to help out boys and girls who want to learn about electrical things.

Sanitary.

"It's indeed a sanitary age."
"How now?"
"I notice that the electrician who installed our phone never touched the wires with his bare hands. He wore rubber gloves."—Kansas City Journal.

A Coin Lost

A 50 cent silver coin which I have been keeping as a family relic has been spent by mistake and I will pay a reasonable premium for its return. The description of the coin is as follows: The words "Fifty cents or half dollar" are stamped on edge, an eagle is on one side under bar bearing the words, "E Pluribus Unum," woman's head and 13 stars on other side, date 1824. The coin is valuable to me only because it is a family relic.—Mrs. G. A. Burks. 39p.
