The closing exercises of the Crowell High School were held in the school auditorium Monday night, opening at

for the exercises to begin that torium was filled to its capacity and standing room was at a premium. The exercises of the evening con-sisted of several pieces of music by the orchestra, followed by a short class program and then by a play, en-titled "Mrs. Briggs of the Poultry Yard." This play was rendered in a manner highly creditable to the pupils representing the various characters, all of whom deserve mention, but we think special mention should be given Miss Charlcie Ribble, who represent ed Mrs. Briggs, the chief character of the play. The closest observer could the play. The closest observer could

TOO MUCH RETROSPECT Rhetoricians are constantly reminding us of what George Washington said about entangling alliances. He urged this country to keep aloof from the problems with which European politics were interwoven.

As a rule we associate Washington with Fourth of July celebration with commencement exercises, and mellifluous oratory. We think of brass bands and streaming banners. At the mention of his name we visualize marble statues perpetuating his image, and oil paintings preserving his features and the cut of his uniform.

We rarely conceive him as being intensely human, and abundantly endowed with horse sense. We have hung so many frills upon him that in these encumbering vestments he seems to voice pontificial utterances. So that his remark about entangling alliances has established a religion, very much as certain texts in the Epistles have established the tenets of conflicting denominations. Washington was no hierarch. He

is especially prepared to meet the most exacting requirements on Automobiles, Carriages, Fine Wagons, Sleighs, Porch and Lawn Furniture, Engines, Dynamos, Motors, Separators, in fact any exterior surfaces on which a durable, high-gloss finish is desired.

Auto Gloss is made of finely ground, durable colors in good varnish, and will spread smoothly and evenly, and dry quickly with a brilliant lustre.

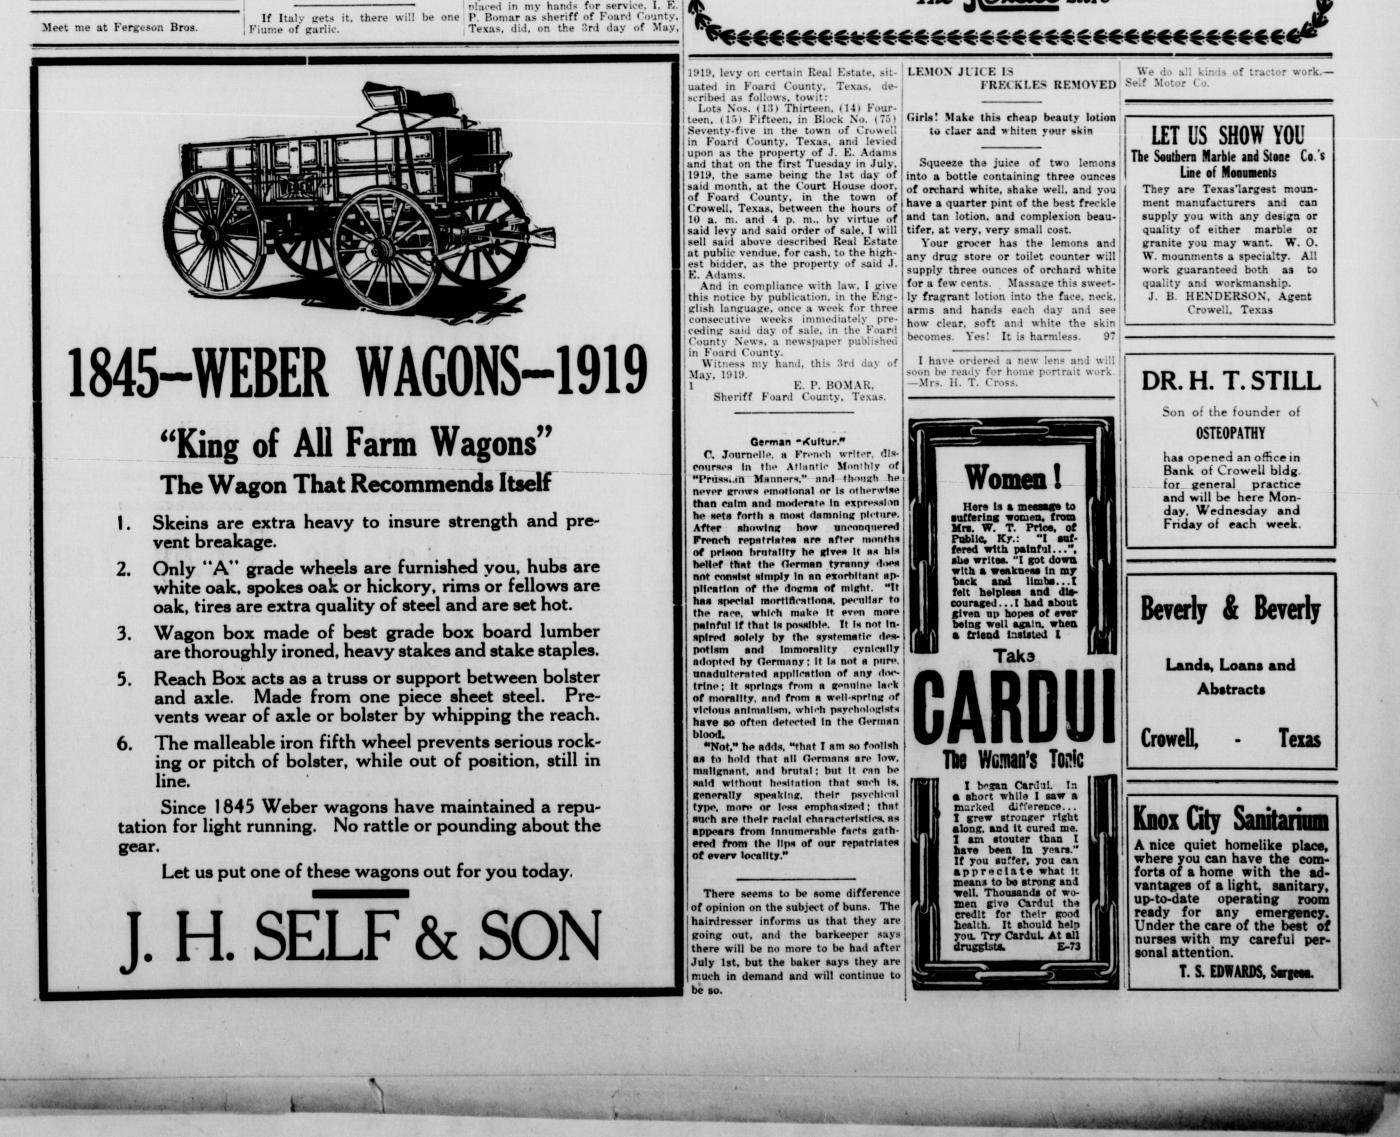

Auto Gloss is easily applied, and, as it sets slowly, may be brushed evenly, leaving a perfect, smooth, brilliant finish.

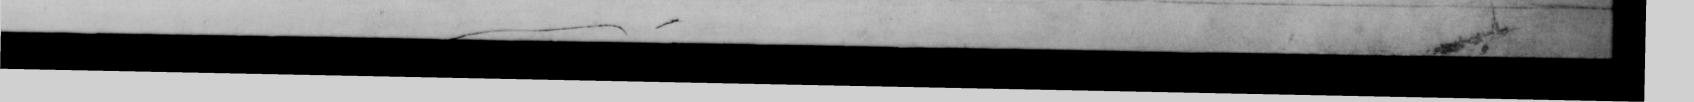

A machine may be retouched in spots or it may be entirely refinished in much less time than has heretofore been required. A minimum of time-loss is assured the owner.

No varnish is required over the Auto Gloss Colors, as the liquid portion is a high-class Auto Varnish; a particularly fine finish, however, may be secured with a final coat of the Clear.

Travis, Tex., are much interested in a new game of mass athletics which is the invention of Lu Ringsmuth, an Army Y. M. C. A. secretary. The game combines much of the science of rugby football, soccer ball, volley ball and basket ball, and games have been played at Camp Travis with as many as 300 men on a side. Using five ordinary footballs and an

ordinary football field, with goal posts at the ends, the game brings into play a "skirmish" line and a "defense" line of players. The balls are placed on a line at the center of the field, and at a given signal the "skirmish-

ers" race up to be the first to kick the ball. It is then kept in play by kicking, throwing as in forward pass in football or passing in basket ball-is in truth an investment, that brings the very best of returns to the invest-or. Some of us, per-haps, don't know that. And very few of us have a provise idea of their event of us have a precise idea of their exact political status.

It is perplexing to be confronted with the question whether a certain race is or is not a classified subdivision of a larger race. And, if so, whether it ought to be cut loose or not. And if not, why. The Koreans have just put in a

Nearly every uated in Foard County, Texas, dethey remove the poisons from the blood and purify it. When the kidneys are diseased, the poisons are spread every-where, and one of these poisons is uric acid. The uric acid is carried all through the system and deposited in through the system and deposited in various places, in the form of urate salts — in the feet, ankles, wrists and back — often forming bags under the eyes. GERMAN PARTIES JOIN IN OPPOSING TREATY

Berlin, Saturday, May 10 .- The protests that came from various quarters in Germany over the peace terms, as they were reported before the official terms became known, are as nothing in comparison with the wave of remonstrance - angry, bitter, disappointed in tone-that is sweeping over Germany now that the treaty has been presented. States, municipalities, districts, organizations of various sorts, business men's and women's clubs and the political parties through their spokesmen are vying with each other in finding words in which to express scorn and condemnation for the document.

For perhaps the first time in history all the German parties are united in opinion, each of them assailing the terms Germany is asked to sign, for the body of the independent Socialist party does not appear to agree with its organ, Die Freiheit, that Germany should sign the peace on the terms presented. The newspapers are utterly swamped with protests, being able to print but a fraction of them. They are urged to this by the Tageblatt, which says the unfriendly attitude toward the treaty taken by the Socialists of other countries will not be of assistance, because they are in the minority in their countries, and the Germans must protest for themselves.

Government Grateful

The Government likewise is being overwhelmed with telegrams which it is utterly unable to answer save by public announcement of its gratitude. In the criticisms President Wilson is only mildly assailed here and there, ince word has gone to the press from official quarters that he is not to be taken to task. The assertions upon which stress are laid are that the proposed peace lacks all elements of justice and conforms in no way to the President's fourteen points, while indignation is expressed over terms characterized as unbearable and as spelling slavery for the German peo-ple. Some of the protestants declare they are deeply moved and outraged by the provisions of the treaty, while others express deep contempt for what they call a "brutal peace of force." The expressions, "a verdict of death," is one frequently used.

There are many more luxuries in France than in this country. Where anthracite coal is \$80.00 a ton, butter \$1.40 a pound, beefsteak \$1.00 and up, eggs \$1.60 a dozen and milk 20 cents a quart, these must all be reckoned as luxuries.

PLANNED KINGDOM IN DESERT

Adventurous Youths Had Great Scheme to Make Fertile Region of the Waste of Sahara.

Governmental authority, co-operating with parental authority, has thwarted a romance of youthful adventure at Denver which reads like a Stevenson or a Poe. Two boys, sixteen and fifteen years old, had planned the establishment of the kingdom of Sahara. They had studied maps and devised engineering plans, delved into finance and perused the military art, until the fund of their information was astonishing to those whose duty compelled them to step across the adven-

turers' path. The Denver youths were planning soon to invade the Sahara and set up their kingdom, over which they were to rule as joint kings. The natives were to be organized into a powerful army of 7,000,000 men. This army was to dig great artesian wells, water from which was to form two lakes with an area of 250,000 square miles. The Senegal and Nile were to be flooded, shutting the new kingdom safely in against hostile incursion. Portugal was to be coerced into ceding Portuguese East Africa to the new kingdom; in return for which Portugal was to be helped to take British and French Gulana and the former German pos-

sessions in Africa. Each of the joint kings had figured out an income of \$14,500,000 for himself.

A dream, born of a disordered fancy Sure, but-

No more of a dream than that of the German military party which started out four years ago to drive the British lion to his den, to clip the wings of Liberty and tie America to their chariot wheels. Building a powerful kingdom in a desert would be no greater task than that assumed by the Germans of laying civilization by the

Henceforth, if anyone proposes to fly to the moon or to build a spiral stairway to the earth's center, he may cite the example of the ruler of a once great people who assumed a task similar in its elements of romantic adven-

ture and similarly impossible of achievement. A new standard for foolish effort has been set for all time .---Cleveland Plain Dealer.
