Rites Read For Wiley Phillips Here

Funeral services were held here at Methodist Church Saturday at 2 p. m. for Willie B. Phillips, 80, who died Thursday morning in a Lamesa hospital. He was carried there Tuesday morning after falling on ice at his home here and breaking a leg.

Mr. Phillips came with his parents to this area in 1909 when his father filed on land near here.

"Uncle Wiley" as he was lovingly known by all, was an early day carpenter here building a number of the early day houses and business buildings. His father owned one of the first general trading stores here and fitted out wagons and pioneers in the westward land movement before World War 1. Much of Uncle Wiley's later years was spent in the cafe business here and his chill was known far and wide. A big, strong, nice looking man, he was young for his age and active until about three years ago when his health broke. A sincerely religious man, he never sold tobacco in his firm nor had "music boxes".

His Irish humor, his twinkling eyes, his ready smile and his love of children set Uncle Wiley apart.

He was a member of the Church of the Nazarene and his pastor, the Rev. Paul Orndoff read the service and all that was mortal was put to rest in the local cemetery under the direction of Higginbotham Funeral home.

Survivors include his wife, Alice, two stepsons, Ira Hodge of Hobbs and Bill Hodge of here, two sisters, Mrs. Fannie Marks, Salem, Ore., Mrs. Buleuh Spencer, San Francisco three brothers, Lester of Oregon, Jay of San Francisco and Willie of Medina.

V. A. Quiz

Q—My wife and I are both veterans, eligible for GI loans. If we go in together on a real-estate loan for business purposes, would the amount of VA's guarantee be doubled?
 A—Yes. On a real-estate loan for a business, the maximum VA guarantee for an individual veteran is \$4,000; so you and your wife could get an \$8,000 maximum guarantee. However, VA's guarantee may not exceed 50-percent of the total loan.
 Q—I want to take a college course under the War Orphans Education Act, but cannot complete it by age 23 since I did not even become eli-

gible until I was 21, when my father died. May schooling continue beyond age 23 in my case?
 A—Yes. In cases where the veteran-parent dies after a son or daughter is 18 but not yet 23, the eligible orphan has until five years after the death of the parent to complete school, in no case may schooling extend beyond the 31st birthday.
 Q—Can the proceeds of a GI insurance policy paid to a beneficiary be attached by creditors?
 A—No. Such proceeds are exempted by law from the claims of creditors. They may not be seized or attached to pay debts.
 Q—I'm a Korea veteran, with an "RS"-type GI term insurance pol-

icy, which I am going to convert to one of VA's permanent plans. Can I borrow against my permanent plan insurance as soon as it is issued?
 A—No. You must hold your new permanent plan insurance one year before you have the right to borrow on it.

SCHOOL ELECTION NOTICE

Requirements for candidates to have their names printed on the official ballot:

Candidates must be qualified resident voters of the O'Donnell School District, must sign application in person, or, if by petition must be signed by at least ten qualified resident voters of said School District, applications for names to be placed on Ballot must be filed not later than March the 5th, 1959, 5 o'clock p. m. of said date.

Application may be filed with the Secretary at the School Tax Office, or with the president of the Board, J. W. Gardenhire, Mrs. J. M. Noble was appointed to act as presiding Judge of said election. She will select two assistants to help hold said election.

The polls shall be opened at 8 a. m. and close at 7 p. m. Said election to be held at the School Tax Office in O'Donnell, Texas.

Deadline Set

January 31, 1959, is the deadline for reporting the cash wages paid in 1958 to farm employees, John G. Hutton, Social Security Administration, and Howard Nichols, Internal Revenue Service, stated recently, Farm operators or farm owners who have paid as much as \$150 in cash wages to any farm worker in their employ during 1958 must file an employer's tax and information return for such farm employees. They must also report each farm employee who worked for them on 20 or more days during 1958 regardless of the amount of those wages if they were figured on a time rather than a piece rate basis.

For 1958, the social security tax rate is 4 1-2 per-cent (2 1-4 each for employer and employee.) This tax applies to cash wages paid to a farm worker up to a total of \$4200 in the year. The tax amount must be entered on Form 943 (Employer's Annual Tax Return for Agricultural Employees) together with the total amount of cash wages paid to the farm worker. It is required that the farm employer do this and file the return with the District Director of Internal Revenue at Dallas on or before the due date mentioned above. For 1959, the social security tax rate will be 5 per-cent (2 1-2 per-cent each for employer and employee.) For 1959 and years thereafter this tax will apply to cash wages paid to a farm worker up to a total of \$4800 in the year.

"Should I follow Plan A or B?" This is a big question in the minds of many cotton farmers. Those who do not completely understand the plans or can not decide which to follow are advised to see their local county agents or other authorities who can explain the plans.

Texas cotton producers saved an estimated \$64 million plus in 1958 in labor costs by using machine harvesters and machines and chemicals for grass and weed control.

Feed grain prices in the 1958-59 marketing year are expected to average a little less below the 1957-58 level, principally as a result of large supplies.

The use of starter solutions to stimulate freshly transplanted vegetables in cold soil is perhaps one of the cheapest and easiest methods of obtaining an extra 20 to 30 percent increase in yields.

Over two and one half million dollars have now been obligated to landowners in the Plains area of Texas thru the Great Plains Conservation Program. For a thorough explanation of the program, obtain L-410 from county agents or the Agricultural Information office in College Station, Texas.

Morning—Chevy panel hustles over causeway to St. Petersburg.

Chevy panel steps lively in Florida...runs day and night, delivers 19.3 miles per gallon!

This '59 Chevy panel is on the go, morning, noon and night; it covers as much as 587 miles a day... runs so constantly that its engine never cools off completely. Yet Mr. Clark Farber, the Tampa Tribune's circulation manager, reports that the truck is delivering 19.3 miles per gallon!

This year, the light-, medium- and heavy-duty trucks of the 1959 Chevrolet Task-Force fleet are out to whip anything that comes their way—and they've got what it takes to do it!

Take the panel pictured above, for example. Powered by the '59 Thriftmaster 6 with new economy-contoured camshaft, it's building a sensational economy record, despite the sizzling pace of its work. That's typical of the way Chevies of all sizes are turning-to on the most challenging jobs in America. The way they're made, with tough-built truck components, they make the hardest hauls look easy! If you have a job that puts a truck on its mettle, see your Chevrolet dealer!

No job's too tough for a Chevrolet truck!

Texans Pay Too Much For Auto Insurance

If you think your automobile insurance costs too much, you will be interested in a proposal that has been introduced in the Texas Legislature.

It is a bill that would probably cut the cost of your car insurance about \$15 to \$50 a year — the exact amount depending mainly on how careful a driver you are.

What this bill would do is this: Establish a "flexible rate" system in Texas like those used in other states to replace the present uniform rate system that prevents safe drivers from being rewarded with lower insurance costs.

Under the uniform system, a fixed rate is set by the State. You pay the same price for your insurance as does a reckless driver who perhaps has been in four or five recent accidents. What this amounts to is that you are actually footing the bill for the accidents of the reckless driver.

A flexible system would change this unjust situation. This system would allow insurance companies to compete for the business of good risks by offering lower rates — something they cannot do under the present uniform law.

The uniform rating system is nothing more than a type of "fair trade," the only difference being the State tells you what you must pay for your insurance (instead of the manufacturer as in the case of fair trade). A flexible system permits an open market where you can shop around and get the best bargain.

The proposed legislation has plenty of safeguards against trick or confusing policies and would require all policies to have basic protection provisions.

The flexible rate system has been used successfully in most of the other states. If you know of a person who recently moved to Texas from out-of-state, ask him if his automobile insurance costs aren't much higher than he had been accustomed to paying.
