

Country Editor

We had a most enjoyable vacation, our first in a year, visiting relatives in Giddings and Dallas. Mother accompanied us as far as Dallas visiting sisters there.

Our home country of Dime Box, Giddings and Lexington, all in historic Lee County, southeast of Austin, has changed greatly for the better. Wealthy persons from Houston and Austin have bought up worn out farms, seeded the soil to pasture grasses, built beautiful weekend ranch homes and generally made the county a show place. Land selling at \$25 an acre in 1940 is now readily sold at \$125 per acre often unimproved. So many of the folks have moved from the cities for high paying jobs in the cities. Dime Box faces the loss of its high school due to lack of students. We understand the rich men use their "hobby" farms for income losses—and make money by losing money. **A Dog That Counts**—

It was our pleasure to go quail hunting with our side-kick, Anton, down at Dime Box. He has an old black and tan dog. Anton took us to a field north of his house and told us there were quail in a certain brush pile. About 100 yards away another covey and yet a third covey another 150 yards away.

At the first site the dog sniffed but didn't point. At the second site she sniffed and marched on. At the third site one bird flew up and was bagged. Another bird was up and on until we had our limit of ten each. Then a whole passel of birds filled the winter sky.

We asked Anton why no birds at site 1 and site 2. He grinned and said that Old Belle hurred the birds from the earlier sites into a gopher hole at site 3, put her paw over the hole and let the birds out one at a time. When Belle counted ten birds for each of us she just naturally let the rest out of the hole.

Dime Box dogs may have their faults but they won't break the game laws. With that yarn, we wish our cash customers a MOST HAPPY 1960.

Know Your Law —

You have read of someone's "taking the Fifth".

Why does our constitution let people — some involved in crimes — keep on refusing to answer questions put to them in our courts, investigating committees, and government agencies?

Because no man can be called on to accuse himself or give evidence against himself.

Where did this rule come from? From the church canons of old.

Long ago under common law, witnesses or parties took an oath and talked a lot or a little as their consciences bade.

Later an English law put witnesses under an oath somewhat like the Church's oath; but the judge could subject them to sharp questioning, even torture. The king, for example, punished "heresy and sedition" this way.

England at last changed the law: Before any one had to take an "inquisitional" oath, someone had to accuse him of a crime or show that he was "notoriously suspicious". No more "fishing expeditions". No man had to accuse himself.

If by 1700 no man had to testify to do so could bring on his own punishment. The American colonies adopted this rule, and as the Fifth Amendment wrote it into our constitution as the Bill of Rights.

1959 Moisture Over 16 Inches

Big O recorded 16.31 inches of moisture during 1959, according to Ben Moore, Jr., local weather recorder. Following is a breakdown by the months.

January	0.93
February	0.07
March	0.02
April	1.05
May	2.38
June	2.34
July	4.57
August	4.5
September	1.30
October	2.33
November	1.47
December	1.30

January, February and March were very dry with only 12 inches of moisture in three months. Our crop this year was due to rains of May, June and July and had normal rain of August fell the crop would have been far above average.

Mrs. Todd has returned home after several weeks visiting in Ft. Worth and Trenton. Mr and Mrs. L. R. Todd and Curtis of Earlmont, Calif. visited his mother during the holidays.

Commander and Mrs. Hogan and daughters of Pensacola, Fla. and mother visited Mrs. Irvin Street, Mrs. Celsor and Mrs. Maude Shaw Sunday.

Mr and Mrs. E. T. Wells spent the holidays with their daughter Mr and Mrs. W. G. McKnight and attended the National Finals Rodeo in Dallas.

Good Winter Rain --

Over 1-2 inches of rain had fallen by Tuesday noon and it was snowing briskly with promise of a good snow. January already has more moisture than the first three months last year. 1960 could well be a wet year as winters during wet years are traditionally very cold and muggy. The Plains are due a wet year by law of averages. Early winter seasoning is bringing big smiles to all West Texans.

A LETTER FROM MAMIE

V. A. Quiz

Q—Is every service-disabled Korea veteran entitled to special vocational rehabilitation training?

A—No. A veteran must need the training to help him overcome the handicap of his disability. However, a disabled veteran who does not meet this qualification still may be eligible for training under the Korean GI Bill.

Q—Is the War Orphans Education training program only a college program?

A—No. The War Orphans Education program, besides providing college and university training, offers opportunities in a wide variety of schools below the college level as well. Training is permitted in technical institutes, business schools, some vocational or trade schools, normal schools, institutions offering courses in medical and related fields, and in junior colleges.

Q—I am planning to convert my World War II GI term insurance to a permanent plan. Do I have to convert the entire amount of my insurance, or can I convert just a part of it?

A—You may convert a part of your GI term insurance, if you wish. The amount converted must be in multiples of \$500, but not less than \$1,000.

McCracken Asks For Tax Office

George McCracken announces this week that he is a candidate for the office of Tax Assessor and Collector of Lynn county.

He says he expects to make the race on his own merits and will appreciate the careful consideration of all voters. He hopes to see every one possible between now and the primary election on May 7th.

Mr. McCracken has had nearly 15 years' experience in meeting and serving the public during his years in Tahoka in book-keeping and office management and feels he is thoroughly qualified for the office.

He came to Lynn County from Haskell county in 1923 with his parents, Mrs. Kitty McCracken and her late husband, C. M. McCracken, who passed away in 1936 at O'Donnell. The family first lived on the Jack White farm at Petty, ran the Petty store a couple of years and moved to O'Donnell in 1933. He and his mother moved to Tahoka in 1941 and he has resided here ever since except for a little over four years he spent in the Army during World War 2, most of the time overseas in the Pacific Theatre.

George attended school at Petty and later graduated from O'Donnell High School. After that war he worked about a year for Gibson Motor Freight, more than 12 years for Lynn County Tractor Co. and the past year has been with Forrester Insurance Agency.

He says he has received much encouragement from friends over the county to make the race for this office of which he appreciates very much. If elected he says he will give his entire time to the duties of the office.

Mrs. LaVerne Gardenhire and son and her mother visited at Austin over holidays and Mrs. Tyler remained for a longer visit.

Child Care Important

In all nature there is an elementary truism: The mother always protects her young. The truism applies fourfold in human civilization.

In our complex society there are so many things for parents to do to protect their young that they are apt to let certain aspects of child protection slide.

One of these is seeing that their children have the entire battery of protective inoculations against po.

This is especially important for small children — the pre-schooler.

Last year there were 1,618 cases of paralytic polio up to the middle of September. This year, by September 19, there were 3,407 cases in the United States.

The largest percentage of victims were under five years of age. In Texas there have already been 257 cases of paralytic polio, a slight rise over last year.

The overwhelming majority of paralytic polio victims have been persons who have not completed the entire series of three shots.

Immunization programs are in effect in many schools, so that large numbers of school children have been polio-protected.

However, that still leaves huge numbers of adults and small children unprotected.

Parents have a responsibility to themselves to start and finish the series of three Salk shots.

Local Bank Increases Surplus

At a recent meeting of directors of First National Bank here, authorization was given increasing the surplus of the local bank \$20,000.00. This brings the Capital structure of the bank to a Capital of \$75,000.00 and a surplus of \$75,000.00. This is the second time during the year of 1959 that the capital structure has been increased.

Also a 10 percent dividend was declared on par value which was the first dividend declared in many years.

It is felt that the bank is stronger than in many years and with this increase in lending capacity, can better serve the needs of the community. J. T. Forbes, president, said "The officers and directors of the bank will welcome an opportunity to discuss local problems with all concerned."

About 2-3rds of all hunting accidents can be traced to three causes, according to Ed Cooder, extension wildlife specialist. They are: humans in line of fire, mistaking humans for game, and careless handling of firearms, which includes hunting with the safety catch off.

Know Your Law ---

Whether it's the nomination of a presidential candidate at one of the national political conventions, or the monthly meeting of your neighborhood P.T.A. a set of procedural rules compiled 80 years ago by an almost-forgotten Army General usually has much to do with the way the business is conducted. You have probably heard of "Robert's Rules of Order" which was published in 1876. General Henry M. Robert ordered only 4,000 of his original edition, but since that time almost 1,500,000 copies have been printed. The rules have been modernized from time to time, but the revisions have been slight.

Actually the rules for conducting a meeting go back to the early days of the English Parliament, although General Robert based his upon the rules and practice of the U. S. Congress.

Robert's Rules come close to being "law of the land". They are given added legal status by the fact that the charter, constitution, or by-laws of almost every organization you can name—your wife's literary society, your labor union, or the corporation you work for (large or small)—ordinarily state somewhere that all meetings will be "conducted in accordance with Robert's Rules of Order". Special rules may be made by any organization contrary to Robert, but if such provisions are not in the by-laws his little book—incorporated in such by-laws—remains the "bible" to be followed strictly.

All this means, in effect, that if a serious question arises over the legality of action taken by an organization, a court might have to consider General Robert's rules with the same care as it does the law to determine whether the action in question was proper.

If you take an active part in church, school, civic or fraternal organizations, some knowledge of Robert's Rules is important. At your lodge meeting, for example, things go much smoother if both the chairman and the members on the floor follow Robert and stick to the business at hand. That way you'll get home before wee small hours, and still have time for some relaxation after the business session.

There are many simple guides to Robert that will help, and unless you are chairman of a large or important meeting it probably isn't necessary to know all the details in the whole book.

Now we move to adjourn until next week—a motion which General Robert says take precedence over everything else.

"The Great Plains Conservation Program—What is It?" is the title of a new leaflet released by the Texas Agricultural Extension Service. In Texas 98 counties are eligible to participate in the program which is set up to provide cost-share assistance for up to 80 percent of the established rates for applying or installing approved conservation practices.

The 1960 wheat crop may exceed the 1959 crop, even with minimum allotment in effect, says John G. McHaney, extension economist. It has been estimated that 53 million acres may be harvested, he adds. If yields based upon 1958-59 average are obtained, a crop of about 1.2 billion bushels would be produced, 8 percent larger than the 1959 crop.

Where lime is needed, economic returns may range from two to five dollars for each dollar spent for limestone. Some farmers, points out W. F. Bennett, extension soil chemist, have received even higher returns. To more accurately determine limestone needs and whether or not an application would prove profitable, Bennett suggests that a soil sample be taken from areas where a lime deficiency is suspected. If fertilizer has not been giving the response expected, the lack of limestone could be the limiting factor.

Tennessee Bear Ruins Revenuers' Evidence

NASHVILLE—In the Tennessee hills there lives a bear which seems to know bad whisky when he tastes it. While Alcohol Tax Unit agents were waiting to trap the owner of a still they had just found, the bear lumbered out of the forest and decided to sample the product. He rolled it around his tongue and then smashed the still to pieces.

International Kids' Village Peace Inspired

TROGEN, Switzerland—In the Swiss canton of Appenzell, overlooking the Boden See (Lake of Constance) and the German shore across the lake, is a new kind of village, an experiment in bettering international relations through the minds of children.

The International Pestalozzi Children's Village, on the outskirts of the modest village of Trogen, is the temporary home of some 200 children of varying European nationalities. All of them were in need of help when they arrived, and many were war orphans.

The village is the outgrowth of the idealism and compassion of Walter Corti, an Italian-speaking Swiss, who not only deplored the ravages of war upon children in belligerent nations, but who did something about it.

Popular Subscription
Corti first suggested a children's village in neutral Switzerland in 1944, while the war was still raging. The suggestion was received with enthusiasm by the Swiss.

Thus French children live in French homes, English children in English, and so on. They live much as they would in normal homes in their own countries, speaking their mother tongues and studying the subjects they would in their native schools, with teachers of their own nationality.

Joint Activities
There is a difference, however. In some classes the entire group works together. Recreation and community duties are international. Italian, Greek, German and English children may be playing soccer together while French children teach Finns the French words to a German tune.

Mutual suspicion and distrust were problems when the school first opened. In the immediate postwar days Polish children refused to play with Germans and the Finns had a tendency to keep to themselves.

**Commuter Snags Train
But Can't Hold It**

EUREKA, Calif.—Loafers around
the railroad station here tell this
for the truth. Seems the station
agent heard a loud crash on the
platform. He ran out and saw the
rear end of a train disappearing
around a curve. A disheveled gent
lay prone on the ground, surround-
ed by the contents of his banged-up
suitcases.

An owlish youngster stared at the
gent, but made no effort to assist
him. "Was he trying to catch the
train?" the station agent asked
the youngster.
"He did catch it," replied the
youngster, "but it got away."

Homeowning Can
Be Hazardous Too!

Just as the bullfighter may be-
come overconfident with success,
so may the homeowner not stop
to think of hazards he faces in
owning a home.
A fire, windstorm, or explosion
could destroy his home. An injury
on his property could result in
a crippling lawsuit.
If you are a homeowner, don't
let trouble take you by surprise.
Call your local independent in-
surance agent and let him protect
your property with insurance
placed in a Capital Stock Insur-
ance Company, the standard
bearer of reliable protection for
more than a century.
