By Boyce House A Texas classic is the "Babe of the Alamo" speech, made many years ago by Guy M. Bryan in the House of Representatives:

House of Representatives:
I intended, Mr. Speaker to be slient on this occasion, but silence now be a reproach, when to speak is a duty. No one has raised a voice in behalf of this orphan child; severally the state of the stat their flight to another fortress not made with hands Texas would have been desolated to the Sabine. Sir. Well do I remember the constern ation which sperad thruout the land when the sad tidings reached our ears that the Alamo had fallen! It was here that a galiant few, the bravest of the brave, threw themselves between the enemy and the settlements, determined not to surrender nor retreat. They redeemed that pledge with the forfeit of their lives — they fell, the chosen sacrifice to Texas freedom!

Texas, unapprised of the approach of the invader, was sleeping in fancied security, when the gun of the Alamo first announced that the Attila of the South was near. No one knows just why Saturn is the only planet to have rings around it. We do know, however, that mighty forces of gravitational attraction hold them there. Through extensive research into the forces of attraction between molecules of liquids and solids, Conoco scientists are able to bring America's motorists the benefits of new and better oils.

Using the force of molecular attraction (basic force that holds things together), a special ingredient in Conoco Nth motor oil is attracted to working surfaces of your engine. In fact, so strong is this attraction that cylinder walls are OIL-PLATED.
