**'39 Line Ford Cars Showed Here**

**Better Business Conditions Forecast '39**

**FARM PRICES MAY NOT MOVE MUCH HIGHER**

**Agricultural Economics Unit Sees Better Times**  
WASHINGTON, — The bureau of agricultural economics, predicts that business will be better for farmers and industrialists next year, but it said farm prices may not rise much.

**WHERE NEW LINE OF 1939 FORDS WILL BE DISPLAYED**

ABOVE is pictured the home of the Lynn County Motor company, local distributors for the Ford automobile and the new Mercury 8. First showing of the new models will be made Friday, according to Oil D. Harris, manager.

**INTRODUCES A NEW MERCURY 8 TO PRESENT LINE**

**Full Line of All Models To Be Shown by Motor Co.**  
First showing of the new line of motor cars manufactured by the Ford Motor company will be made here Friday, according to Oil D. Harris, manager.

Included in the showing will be the new Ford V-8, DeLuxe Ford V-8, entirely new Mercury 8 and Ford trucks and commercial cars. Three New Cars  
For 1939 Ford offers three new cars: A New Ford V-8, New De Luxe Ford V-8, an Entirely New Car—The Mercury 8, New Trucks, Commercial Cars and Station Wagons.  
All V-8 Engines  
60 HP "Economy" Engine for Ford V-8 Cars; Improved 85 HP Engine for Ford V-8 and De Luxe Ford V-8 Cars; New 95 HP Engine for the Mercury 8.  
1939 Ford V-8  
The utility car in the Ford line. Built for the millions of motorists who insist upon economical transportation, yet want extra personal conveniences, plus more luxury and style than offered in Ford V-8 cars. The De Luxe V-8 sets a "new high" for quality in low-price motor cars.  
1939 Mercury 8  
An entirely new car that fits into the line between the De Luxe Ford V-8 and the Lincoln-Zephyr. It has a larger engine than the Ford V-8, a heavier frame and in body dimensions compares favorably with the Lincoln-Zephyr. Wheelbase is 116 inches. Overall length is 16 1/2 feet. It brings many Lincoln-Zephyr advantages at lower price.

**Lynn Leads In Area Ginnings**

**Report Oct. 18 Totals 21,758**  
Ginnings Over Area Exceed Totals of Last Year Here

Lynn county leads the entire South Plains region in ginnings for 1938 up to October 18 with 21,758 bales as tabulated by the bureau of census report.  
Lynn county, however, is behind 1937 ginnings. Over 24,000 bales had been ginned up to the same time last year.  
Ginnings over the area, the report also shows, are ahead of 1937 totals. Up to the above mentioned date 145,475 bales ginned compared with 128,369 up to the same time last year.  
Due to good picking weather, a new census would probably show that the entire crop is being gathered at a swift rate and will not last as long as in 1937.  
Totals of other nearby counties were given as follows: Crosby, 21,732; Dawson, 19,920; Lubbock, 17,837; Scurry, 15,080.  
Sincerely,  
C. H. CAIN,  
Chairman, Dem. Executive Com.

**Funeral Services For Mrs. Hanes**

Funeral services were held Sunday afternoon at 4 o'clock at the Ridge school house for Mrs. Joyce Hanes, wife of Mr. C. D. Hanes, long-time resident of this place, who passed away early Sunday morning from the effects of a long illness, having been bed-ridden for some four years. The deceased was 61 years of age, and had resided in this county for 19 years.  
Mrs. Hanes was born in Comanche county in 1877. She was well known and leaves a large number of friends and acquaintances in this section. She had been a member of the Church of Christ for 42 years.  
Following funeral services in charge of Elder J. W. Allen Wingate, Texas, the body was carried to the Priddy cemetery for burial.  
There were friends from O'Donnell, Lamesa, Brownfield, Dora, S.M., and a great host of friends from this community in attendance.  
Survivors are the husband and four children. Mrs. Alice Cathy of Wingate; Mrs. Maude McChesney and son of Indahome, Oklahoma; Mrs. Alice Ottwell of Snyder, Okla.; and Mrs. Fannie Cox of McAllen, Tex.  
Two brothers and one sister of Mrs. Hanes were present; Mrs. Willie Brown and son of Lubbock, Mr. Tom Hanes of Wingate and Mr. Edd Hanes, and family of New Moore; and Mr. and Mrs. Leonard Moore of Lamesa.

**Bank to Observe Two Holidays Here Next Week**

Banking holidays will be observed twice here next week by the First National Bank.  
Tuesday, the bank will close for the general election, and again on Friday for Armistice Day.  
Customers are urged to make arrangements for change prior to both days.

**H. Kempner To Use New Method Handling Cotton**

A new method for the handling of cotton for the benefit of the producer has been inaugurated by H. Kempner, according to Charles N. Hoffman, local representative.  
Effective at once, to those who so desire, and who sign the loan papers and send their cotton to that firm in Galveston, K. Kempner will not put the notes with Commodity Credit Corp. until the final date of April 30, 1939. If, at the market advances, the producer could then instruct to

**Lynn County Girls Attending TSCW**

(Special to O'Donnell Press)  
DENYON.—Four Lynn County girls, Misses Georgia Lometa Robinson, Merle Koeninger and Ellen Mercedes Suddarth from O'Donnell and Reba Harris from Tahoka, are among the 2700 now enrolled at Texas State College for Women. Final tabulations show that the school is again the largest residential special college in the United States with students from 220 Texas counties, 26 states, and 7 foreign countries.  
With opening activities completed, the students are now in the midst of a full schedule of work and entertainment, including classes all day, college and club picnics, dances, teas and other social affairs, and an unusually crowded calendar of drama series and Artists Course attractions.  
TSCW students will have their new Midway Nov. 6 for the A.&M.-S.M.U. game in Dallas, other holidays being scheduled for Thanksgiving, Nov. 23-28; Christmas, Dec. 13-Jan. 2, and Spring, April 1-12.  
From Lubbock  
Mrs. Paul Morris and young daughter, Carolyn, of Lubbock, are visiting in the home of Mrs. J. P. Bowlin this week.

**Mesquite School Reopened Monday**

The Mesquite school re-opened last Monday following a temporary closing for cotton picking.  
Teachers are Mr. and Mrs. Jack Jagers, Mrs. Reed and Miss Crockett.  
To Attend Home-coming Game At Canyon  
Miss Madelin Morrison, who attended the West Texas State college, Canyon, will be in the city Saturday for the home-comin football game with Sul Ross.

**Dan R. Hayes**

Dan R. Hayes, aged 72 years, passed away Thursday morning October 27th, in his home at Wells. Funeral services were held in the First Baptist Church in Tahoka Saturday morning, Oct. 29, at 11 o'clock.  
The children who were present were: John Hayes of Brownfield, Mrs. C. E. Waldrop of Donna, Niece Hayes of Donna, Mrs. Anna McMillion of Three Lakes, Mrs. W. A. Ledbetter of O'Donnell, Bill Hayes of O'Donnell; Mrs. Albert Cause of Donna was unable to attend.  
Will Visit In Noble  
Mrs. J. Mack Noble and two sons, accompanied by her mother, Mrs. J. E. Garland of Lamesa, departed Thursday for Lubbock where they will visit Mrs. Roy A. Smith, and in Boscoe where they will visit Mrs. Barney Haney. Both are aunts of Mrs. Noble.  
J. A. Barnes of Wells was in town Tuesday on business.

**Formal Opening Hospital Success**

Over 100 people were attracted at the formal opening of the new O'Donnell Hospital and Dr. Davis Clinic last Friday, with even greater numbers visiting Saturday and Sunday.  
Dr. Julian W. Davis, assisted by Miss Susie Mae Mote, R. N., superintendent, escorted the guests through the rooms, including laboratory and x-ray rooms.

Published Every Friday—Form. Close Thursday Noon

Entered at the postoffice at O'Donnell, Texas, as second-class mail matter, under the Act of March 3, 1879.

WILLIAM G. FORGY, Editor and Owner

Devoted to the Best Interests of O'Donnell and Lynn Counties—One of the best agricultural sections of Texas.

SUBSCRIPTION PRICE—In Lynn and Adjoining Counties \$1.00 per annum; elsewhere \$1.50 per annum. Payable in advance.

In case of error or omission in advertisements the publishers do not hold themselves liable for damages further than the amount received by them for such advertising.

Any erroneous reflection upon the character, standing or reputation of any person, firm or corporation will be gladly and fully corrected upon being brought to the publishers' attention.

## NOBODY'S BUSINESS

AUSTIN.—Legislators who made their campaign this summer on a platform of "economy in the State government," will get an opportunity to make good on that campaign promise when the new Legislature starts in to make appropriations for the fiscal year beginning Sept. 1, 1933.

Sen. John S. Redditt, of Lufkin, chairman of the special senate economy committee, and his aides, have about completed their long task of looking into all the State departments, and writing an appropriation bill that will cut out unnecessary employes, do away with overlapping and duplicating functions of government, and save some money. But they will not recommend any pay cuts for state employes, because they have found Texas does not pay any higher average salaries to its workers than other Southern states. Redditt hopes and believes his committee can present a bill that will roll off about \$3,500,000 from departmental appropriations each year of the biennium, and that additional reductions of about \$1,500,000 can be made in the eleemosynary, educational and judiciary appropriations. The total result is a total saving of around \$10,000,000 for the biennium, or a cut of \$5,000,000 a year—the maximum figure which has been suggested by those who know anything at all about State government. Redditt and his committee feel this can be done—if the Legislature will do it—without any material reduction in the quality and scope of necessary governmental functions. It would be sufficient to take care of the State's share of the national security program not yet financed, and possibly the teachers' retirement obligation. Whether the affected departments can stand the enough strength to keep the legislature from making the reductions remains to be seen.

**Power Agreement Reported Near**  
Negotiations between officials of the Colorado River Authority and the Texas Power & Light Co. for the sale of the latter's plants and facilities in 14 Central Texas counties to the CRA are reported progressing favorably, and informed sources expect to see the deal completed. John Carpenter, head of TP&L, who has always believed in a policy of compromise and negotiation instead of fighting when interests conflict, offered to sell the properties of TP&L in the natural territory of CRA to the latter, and withdraw from the field, as a better plan than a costly war between CRA and TP&L in the area. The policy which Carpenter has found so successful in maintaining good relations between his concern and the public is also being adopted nationally by some of the larger utility concerns, notably Electric Bond & Share Co., which according to Washington dispatches, has worked out a plan under the Federal holding company act voluntarily to break up its holdings of integrated companies, through the efforts of C. E. Grobeck, chairman of Electric Bond & Share.

**Washington Interested**  
Rumors that some solution of the problem of "dumping" of Mexican expropriated oil into the Texas market, and seizure without payment of American and British oil properties by the Mexican government, may be nearing in Washington, were current here this week, following the visit of Ernest O. Thompson, Chairman of the Railroad Commission and Chairman of the Interstate Compact Commission, with President Roosevelt at Hyde Park. Roosevelt, it is said, summoned Thompson, whom he regards as the best informed oil administrator official in the nation, and the red-headed Texan is said to have discussed both problems fully with the President. If a commission to arbitrate the oil property seizure is named by

**Constipated?**  
For 30 years I had constipation, awful gas, bloating, headaches and back pain. Adlerika helped right away. Now I eat, breathe, bathe, go, anything I want.

**ADLERIKA**  
CORNER DRUG STORE

Roosevelt, best informed sources here regard Thompson as almost certain to represent this country. Meanwhile, Mexican "dumping" was one of the chief topics of discussion among oil men who gathered at San Antonio for the Mid-continent Oil and Gas Association's convention, and officials of the North Texas Oil and Gas Association announced they would vigorously press their charge of violation of the Federal Anti-Dumping Act, in an effort to halt imports of confiscated Mexican oil.

**Aged Judges Problem**  
From several lawyer-legislators this week came a suggestion that may result in an effort by the next Legislature to provide a retirement act for Texas high court judges, similar to the Federal judges' retirement act passed by the last congress. They pointed out that the Texas Supreme Court and the Court of Criminal Appeals are both handicapped at present by the prolonged illness of one judge on each court, which has prevented either performing the duties of office for many months. The same situation frequently arises in the Courts of Civil Appeals, but a state law permits the Governor to appoint a special commissioner when a judge on the latter courts is incapacitated. The judges apparently never feel like resigning until death calls them, and the work of the courts suffers as a consequence. A retirement provision, carrying a lifetime pay arrangement for judges after a certain age limit is reached, would prove an economy in the long run, the legislators point out, through saving in operation of the courts.

**Capital Punishment Row**  
Gov. Nominee W. Lee O'Daniel picked one of the most highly controversial issues in Texas, when he told San Antonio reporters he favored abolition of capital punishment in Texas, but didn't know whether he would recommend such action to the Legislature or not. Members of the Board of Pardons and Pardon immediately replied with a statement, declaring capital punishment is a real deterrent to criminals, and prevents lynching. They pointed out that so long as criminal assault cases occur in Texas, there will be capital punishment, whether by law or by mob rule, and asserted abolition of capital punishment would be a big boost for a Federal anti-lynching law, which Southern congressmen and senators have fought off successfully for years.

**A REAL LINIMENT**  
For fifty years Ballard's Snow Liniment has been the favorite for easing the muscles made sore by over-work or too much exertion, strains, sprains, and bruises. Get a 30c or 60c bottle and keep it handy.

Alice Nell Walker  
Aldie Pearl McKibben  
Billie Jane Johnson  
L. D. Frazier  
Christine Etter  
Joy Anne Campbell

The Sixth Grade enjoyed a party Friday evening at 6:30 at the home of their room mother, Mrs. Shumaker.

**SEVENTH GRADE**  
The Seventh Grade class is glad to have the following on the Honor Roll in spelling for last week: Roy Gibson, Jr., Willie Lee Gooding, Dwaine Mires, Juanita Cargal, Myrtle, Daniel and Jaycee Edwards, Alvilda Golightly, and Tonic Lago.

We had a Hallowe'en party Friday night at the home of Mrs. Gibbs, the mother of our hostess, Margaret Gibbs. We first went in and shook hands with the "Witch," then went to the "Fortune Teller" and had our fortunes told. We were sorry Mrs. Gibson, one of our room mothers, couldn't come. Mrs. Tine and Mrs. Beach were there; they gave us very nice things. Our mascot, Don Fritz, was there dressed as a clown. We had very nice refreshments, and all enjoyed the party. Stanley Cathey won the prize for having the best costume. Margaret played the piano for us. There were several mothers there. We hope to be able to thank Mrs. Gibbs for letting us have her nice home.

## TEAM WORK!

We had a new girl in our room. Her name is Claudina Cashion.

We felt sorry for the editor of the Press on the way he lost on all of his bets, and came by to let him have his pick, but to our sorrow he was not to be found; we found, however, that he was looking for

us to pay off his bet—he had mentioned to the Press certain day that there drawing. . . . Funny how can always bet against you and still be good friends. "Easy."

# The Fords Tell Their Plans for 1939

**IF WE KNEW** anything better we could do for the country than make good motor cars, we would do it.  
By every one doing his thinks most useful, this country is at its moment. We have our job.  
When business was suffering more than a year ago, should keep going anyway motor car production, the greater motor car values production.

**EXPANDING FOR**  
We began to build 34 million new plants and equipment could not employ all our men we would employ as many better production facilities.  
We were told, of course for expansion, that a wise be to "hold everything" everything. But no one standing still.  
Besides, we are not before this country has seen its best country is yet in the infancy. We believe America and our People will never have our People. Never yet have we seen as. But we shall see it! That which we have built.  
Business is not just coming to be brought back. That is understood in this country; will be a co-operative year. Men and buyers will co-operate to see that it is waiting to be brought back.

**MORE VALUE**  
provided a new tire part of our tire requirement that will help a steel-press plant of our own auto-ation to the plants glass, iron, steel, needs, of course, engine is one thing

Edsel Ford, on the occasion of the 35th anniversary of the founding of the Ford Motor Company, June 16, 1908.

one's hand touches but ours. Of nearly else we use we build some quantity to find, if possible, better and more ways of doing it. The experience edge we gain are freely shared with other industries.  
no profit on anything we make for and sell to ourselves. Every operation, Ford ships which first bring iron ore to be figured at accurate cost. The only the finished result—the car or truck of the line. Some years, there is no us. But we see to it that our customers fit. A basic article of our business credit is economically constructive unless it buyer as much as or more than the seller.  
Our new plants have helped us build more value into all our cars for 1939. That means more profit on the purchase to the purchaser. We have not cut quality to reduce costs.  
We simply will not build anything inferior.

**NEW TESTING EQUIPMENT**  
While we were putting up new plants to produce cars, we constructed new equipment to test them. The first weather tunnel of its kind ever built for automobile research went into operation at our laboratories this year.

It makes any kind of weather to order. The weather it delivers every day would take more to find in Nature. Our cars are weather-tested give you good service in any climate anywhere.  
In other tests, every part of the car is pushed unmercifully. Then our engineers tear down to see if they can find abnormal wear any sign of weakness.  
The money we spend on tests saves you money on repairs. And your family car is safer and more dependable when we put it in your hands.

**THE NEW CARS**  
We have two new Ford cars for 1939—better and better looking—but we also have an entirely new car.  
It's called the Mercury 8. It fits into our line between the De Luxe Ford and the Lincoln Zephyr. It is larger than the Ford, with 116-horsepower, hydraulic brakes, and a new 95-horsepower V-type 8-cylinder engine.  
We know that our 1939 cars are cars of good quality. We think they're fine values in the price class.  
With new cars, new plants, new equipment, the whole Ford organization is geared to go forward.

# COTTON MARKET

## ... TO ADVANCE!

Says H. KEMPNER

**W**e are adopting another method for the handling of cotton for the benefit of the producer.

Effective at once, to all those who so desire, and who sign the loan papers and send their cotton to H. Kempner just as if it were going into the loan,— **WE WILL AGREE NOT TO PUT THE NOTES WITH THE COMMODITY CREDIT CORPORATION UNTIL THE FINAL DATE, APRIL 30.**

And if in the meanwhile, the market advances, which it now looks as if it might do as there is going to be quite a scarcity of free cotton, the producer could then instruct us to sell the cotton and get the advance in the market without his cotton going into the loan.

### Copper and Brass Exhibit At New York World's Fair

INDUBITABLY the copper and brass industry exhibit will be one of the most spectacular at the forthcoming New York World's Fair. It will be housed in the Metals Building, which is adjacent to the Theme Tower.

Above is depicted a rough architectural drawing of how the exhibit will look when completed. This sketch shows only a part of the entire exhibit, which will be one of the two largest in the Metals Building. The story of copper, from its discovery by prehistoric man down through the flight of centuries, will be illustrated through animated dioramas, murals and exhibits of present day uses of man's most useful metal—the oldest metal of commerce.

In the circular lobby or entrance to the exhibit will be shown an animated copper tree which will be the most spectacular feature of

the industry's exhibit. In the center, the proton (nucleus) is represented by a powerful light, surrounded by orbiting electrons. Six floodlights will be on, while the lights in the walls go out. If a single gram of copper were expanded to scale so that single atoms were as large as a grain of sand (1 cu. mm.) the mass of the material so obtained would cover the United States to a depth of about 4 feet.

Among other interesting features of the copper and brass exhibit will be that showing a scene in which a primitive man with his family will be shown in animated diorama, working on the first use of copper, as a first line of defense in war and for building animals whose meat was his main subsistence. This is when the first

shown of the casting of the doors of the Temple of Karnak; Cellini's workshop showing the hammering of gold for a beautiful bronze statue; the Pearl Street Station of New York, which was the first electrical generating unit in the world; and the landing of the first English rollers of sheet copper who were smuggled into this country in barrels.

There will be shown in this exhibit in animated form both open and underground methods of mining, portraying the removal of the ore from the earth. In animation will also be depicted steam shovels, trains of cars and other interesting scenes.

The use of copper for electricity, particularly for conveying electric energy through high tension transmission lines to urban and rural sections, will be graphically illustrated.

Odesa we stopped at a "pig stand" to eat a few bites. When we walked in whom should I see but June (Gibson) and Nolan Hill. They seem to be doing fairly well. June has her same old figure.

While visiting in New Orleans whom should I happen to see but an old classmate — Betty Lou Pierce. She was with a fairly nice looking young man. They have been going together for nearly three years. If you do not know Betty Lou's propose. But who can blame him!

Last week while we were in Hindman we happened to see a little old man and little old woman wobbling across the street. Hindman is a fairly large town by now and at first we didn't recognize Mr. and Mrs. Fletcher Johnson. However, when we did we stopped and talked for some time. He is still a school teacher but isn't getting but \$5.00 a week. He certainly must have lost a lot of his good old horse sense.

About four weeks ago Red and I took Jean and Jeanette to see the sights at Coney Island. We saw many people we knew. The most important ones were Mr. and Mrs. Al Akins and Mr. and Mrs. Turner Rodgers (Mollie Hatris and Shan Ganti). They were still Ft. Worth bound. Do you remember back in the days of '38 how they used to talk of going to Ft. Worth?

Have you heard from Doris Nell Gates and John Garner since January? I heard that he was still begging her to marry him. I hope she keeps her head! If you get what I mean.

Yesterday while I was in Ackery I happened to see Christine (Daffen) and Max Harris. She finally won him. Do you remember how hard she used to try? She even sang Spanish songs to him. Jo Ann Clayton and Wanda Zell Millman visited me early this afternoon. They were going to Houston to meet Bill Mac and ODean.

Norman Fuson and Margaret Walker were in town together last week and told me that they had just gotten married.

Katherine Allen is working in Houston for the Shell Petroleum Oil Co. She goes with a pretty young man. But what a man! Tall, dark and handsome. Some say he is Wayne Coffee of Tahoka — I wouldn't know! I haven't heard from Helen Bolech in about three years. But at that time she had lost a lot of weight and was fairly nice looking.

Since Red is out of the bath tub I simply must close and find his "job-jobs" — so—I wish you and J. V. and Jr. the best of luck in your new business with the "Dance Hall."

Loads of Love from an old Pal.  
Nita Rae Maxwell.

**Sophomores**

The Sophomores have already started on their program for chapel so as to have it down real well. We have a fine bunch of talent in the Sophomore class and we tell all the upperclassmen (and the

Freshmen, too) to look to their laurels as they are liable to wake up and find the Sophomores have bested them in their program.

We have a very ready, willing, and able sponsor (in other words, "HE'S SWELL"), and he is the kind that can make these Sophomores die in and work to attain a high name in this school.

#### Freshmen

We are very sorry that our sponsor, Mrs. Cathey, is ill. We hope she can return soon. We don't know yet who the football queen is to be, but we are all hoping it is to be Margaret Sue.

#### THE CIVICS CLUB

The Civics Club met Monday and finished its organization. Dues were decided to be twenty-five cents a semester.

The Program Committee will put on a short program Monday morning, Nov. 7, with members of the class taking part.

#### The Snooter

Jr. Pierce seems to enjoy looking in the commercial room at his 5th period study hall. Could it be because of Christine Daffen?

Everyone is wondering why Lena Mae won't speak to Jo Ann since she found out that Jo Ann knew the lowdown on Elmer Dillard.

Lena Mae, Frances, and June seem to be having quite a few arguments over Pete, a Tahoka boy. Lena Mae says that Katherine gets a letter from Pete every day but June says he doesn't have enough energy to write to her and Katherine both in one day.

### BREAD SUPPLIED ENERGY TO THE VIKINGS

In the days of Viking exploration, around 600 A.D., bread played a vital role in the lives of the Norsemen. They cultivated and ground their own grain, and developed several different kinds of bread.

In the writings of Bartholinus, an old Danish physician, we are told that the Norsemen developed a type of bread that would keep for forty years or more, and that ac-

quired increased flavor with age. Doubtless such a bread accompanied the Vikings on their long and hazardous sea voyages, in which they are said to have reached the North American continent.

Bread continues to play its part as the staff of life today. It contains valuable proteins, and serves as our most economical and best source of food-energy.

#### Seniors

The Seniors have received the last shipment of plugs and we are very proud of them.

The football captains were elected from the Senior class: Doc Thompson, captain, and Max Harris and L. E. Robinson co-captains.

We wish to thank everyone who helped us in the Queen's race.

1-9-6-3  
My dearest Wilda Gene Burdett,  
Since you ask me to, I at last found a few moments to drop a line or so and tell you all the news. I have been trying to find

time all day but Jean and Jeanette have kept me busy running after them. Now, since I have Red in the bath tub, I suppose I had better get started before I have to quit.

To begin with—the other day while I was doing some shopping at Kress, whom should I see but Margaret Lucille (Johnson) Shelton. Having lunch together she told me all about she and Trahis. They have been married only 10 months and have an argument every time they get together.

While leaving the lunch room whom should we happen to spy but Mrs. Nadine (Westmoreland) Robinson. Although she has lost her "schoolgirl complexion" she still has a little figure. She told us with tears in her eyes that she was now working with the Bangs Bros. Circus in a sideshow.

As Red travels a good deal, the children and I often go with him. While passing through Shacktown we saw sitting on the porch of a lumbered down shack near the railroad tracks my old Algebra teacher, Mr. Conger. He and his wife still get along fairly well. They say she still calls her "sugar."

Not long ago while we were in

## Prepare Your Car for WINTER HEAT

THE chief cause of all winter driving troubles—one least likely to be suspected by the average car owner—has at last been identified. Heat, not cold, is the real winter villain under the hood, automotive experts find.

Excess heat is so much the insidious winter factor that practical in all cases of freeze-up are traceable to it. The answer is that engine temperatures get so high that they cause unseen boiling in the engine. This unseen boiling occurs around "hot spots" which are to be found in every motor. The boiling generates steam, and this steam, to escape, pushes the anti-freeze solution out of the overflow pipe. At the same time, excess heat in the engine will evaporate any anti-freeze solution containing alcohol, robbing it of its protective properties.

So long as a car which has lost much of its anti-freeze solution continues to be driven, it obviously cannot freeze. It can, however, and will, overheat very rapidly. This overheating may crack the cylinder head and block. It can also gum and score pistons, burn and gum valves, and scum cylinder walls. It can even melt an aluminum cylinder head.

When low boiling point anti-freeze is used, the winter driver's problem is further complicated, engine's point out, because high temperatures are a necessary by-product of high compression engine. High temperatures are also necessary to operate a car heater. A thermostat that opens when the heat in the engine reaches 160 degrees enables the average car

heater to operate satisfactorily. This also means that 160 degrees will be approximately the lowest temperature at which the motor can run after it is warmed up.

Despite all safeguards, this minimum temperature gets out of control at one point of the motor's operation. This is when the driver slows up or stops. Due to the heat built up in the engine, and the retarding or stopping of the fan and water pumps, the temperature will rise 20 degrees, or higher, to 180 degrees or more. With an anti-freeze such as a 50 per cent solution of alcohol, which has a boiling point of 180 degrees, boiling immediately starts at the hottest points in the engine. The once generated steam, which forces the anti-freeze from the engine into the radiator and out on to the ground.

The one perfect safeguard for the winter driver, the engineers agree, and the only one necessary, is the use of high boiling point permanent anti-freeze. With a 50 per cent solution of this type of anti-freeze, the boiling point cannot be reached short of 226 degrees. The car owner is thus fully protected, because he has a super-safety margin of more than 45 degrees over that provided by alcohol solutions of the same concentration.

Providing the owner has had the car's cooling system thoroughly cleaned and checked, and all connections tightened, before putting in the permanent anti-freeze, he should be able to drive throughout the winter, the experts conclude, and get as good motor performance as he does during the Summer months.

### Water Conservation Meet In Lubbock Nov. 12

LUBBOCK, Tex., Oct. 30—Invitations to all interested officials and citizens to attend a district ground water conference in Lubbock, Monday, November 7, in the ballroom of the Hilton Hotel at 2:30 P. M., are being extended by officials of the City and the Chamber of Commerce.

On that occasion, members of a state-wide committee appointed at a conference in Austin last summer are to be here for a public hearing and discussion of legislation to be proposed to the January legislative session seeking to conserve diminishing underground water resources of Texas. F. W. Pulliam of Crystal City is committee chairman.

The Lubbock conference will be

### FARMERS' FALL CASH INCOME LESS THAN USUAL AT THIS SEASON

STIN, Tex., Nov. 1. — Farm income in Texas during September was substantially over the same month, but the increase was less than the usual seasonal increase, according to Dr. F. A. Bue, assistant director of the Bureau of Business Research, University of Texas. As a result of the drop in farm cash income, the average September farm cash income was \$274,648,000, compared with \$368,331,000 during the like period last year, a decline of more than 25 per cent. "The current relatively unfavorable showing of farm cash income in Texas is mainly the result of the decline in production and price of cotton. Since this crop dominates farm cash income during this season of the year, unfavorable comparisons are expected to continue through October and November at least."

index of farm cash income is computed, 1928-1932, the average September farm cash income was about \$114,189,000. For the first nine months of the current year farm cash income as computed by this Bureau was \$274,648,000, compared with \$368,331,000 during the like period last year, a decline of more than 25 per cent. "The current relatively unfavorable showing of farm cash income in Texas is mainly the result of the decline in production and price of cotton. Since this crop dominates farm cash income during this season of the year, unfavorable comparisons are expected to continue through October and November at least."

### Dutch Bread in the 15th Century

BREAD was a food as vital to the Dutch in the 15th Century as it is today, and the Dutch made a wide variety of breads, buns, pretzels, rusks and cakes.

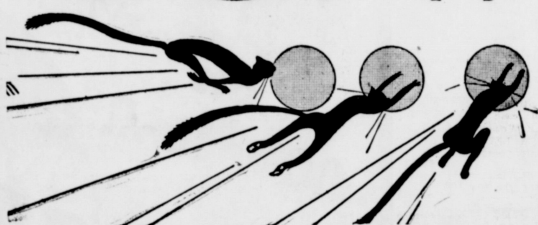

The Dutch had many superstitions and beliefs based on bread and its uses. For example, the Dutch mother placed a piece of stale bread in her baby's cradle to ward off disease; and a large square cake containing citron and almonds was presented by a suitor to his sweetheart, signifying a proposal of marriage.

Dutch bakers in the year 1500 cried their wares by blowing a ram's horn and calling, "Bread's ready!" They were required to place their marks on each loaf of bread, as a guarantee of its quality. Today, here in America, the housewife no longer waits for a call to get her bread. Modern methods of distributing bakery products have made them readily available in all parts of the country. The American housewife knows that her daily bread is of the finest quality ever known in the world.

## Briggs Oil Clarifier

# To TRUCK, BUS, and CAR OWNERS who are interested in SAVING MONEY!

WITH THE BRIGGS OIL CLARIFIER OIL LASTS MUCH LONGER AND STILL MAINTAIN PERFECT LUBRICATION AT ALL TIMES

The superintendent of a large nationally known trucking fleet has written: "Since installing Briggs Oil Clarifiers on our long haul trucks, brake maintenance and repairs have displaced motor maintenance as the major item of our shop costs. The unit is paid for by oil savings alone in 10,000 to 20,000 miles of operation."

#### FILTRATION BY REFINERY METHODS

The Briggs Oil Clarifier continuously refines the crank-case oil during engine operation, removing DIRT, SLUDGE, and ACID, which attack bearings. No chemicals are used; the refining is accomplished by the time proven practice of oil refiners—adsorption and absorption by Fullers Earth.

While the motor is running, the oil from your crank-case is constantly flowing through an inexpensive Fullers Earth cartridge and is constantly being purified. The changing of this cartridge is so simple as to require only a minute. By regular changes of the cartridge, your oil remains clean—visually and chemically—actually REFINERY CLEAN.

#### DON'T LET YOUR EYE FOOL YOU

You cannot see acid nor can you feel it—but the bearings of your motor can and do. Copper, bronze, silver, calcium are all affected by the acid that is released from any oil by oxidation. That means dollars of expense out of your pocket through bearing troubles. Good oil, kept REFINERY CLEAN, lasts MUCH longer—and that means dollars IN your pocket.

You will find other savings, too, when you install the Briggs Clarifier. It will pay for itself in a few months time. Remember, the Briggs Clarifier is not to be confused with devices that merely "strain" the oil—the Briggs PURIFIER is in addition to removing the visual dirt.

### INTER CONFERENCE—

Continued from page 6  
only one held within the area of the Texas and Pacific Railroad, including the whole of the Plains and the Texas Panhandle, and extending eastward to the tier of counties made up of Wilbarger, Baylor and Comerton.

### If I Were a MAN

Of course we girls just love to have dates. But even though we are on the receiving end and have to sit around hoping for the phone to ring, we still have our rights. I mean about the Betty Co-Ed way our dates when they finally show up. Fair maidens grimp and fuss the best we can with what the nature provides. We're neat we look pretty snappy even if we say so ourselves. But what the big moment when he arrives. He looks a little together sometimes and he disobeys. Because, I suppose he's a downright mess or thinks God's gift to ladies no matter how he looks. Maybe he even has a mustache. But we don't care. But we do. We spend ages trying to be ourselves. Look our prettiest some man, it's a big blow to him arrive looking as if he got up from a nap. Well, thank goodness most aren't quite as bad as that. It's so easy for them to look as if they'd stepped out of a hand box... much easier for them than it is for girls. Even if a man's pocket handkerchief doesn't happen to match his tie or shirt, the least he can do is to wear a hat. And when I say "hat" I don't mean some battered antique. I mean a well-shod, rooming hat with a fresh, neat lining band.

By the same token, if a man is immaculately groomed in everything BUT his hat, he's a total loss. I spend a lot of our time out doors and most of my attention is focused on his long lashes or blue eyes and dimples. So you can see how distracting an old sombrero really is. That's why I still say... no matter how short the crease in his trousers or how shiny his shoes, his hat looks as if it's been sitting on a collecting dust for a century. The total effect is nil. Why don't these big heroes of ours get wise to themselves? If I were a man, I would.

P-T. A. Planning Annual Convention In Lubbock Soon

LUBBOCK, Tex., Nov. 1.—The annual convention of the Texas Congress of Parents and Teachers will meet in Lubbock on November 15 to 17. Some preliminary meetings are scheduled for November 13 and 14, including a meeting of the Board of Managers Monday afternoon, November 14.

This will be the thirtieth annual convention of the state organization. Officers for the triennium 1938-41 are to be chosen, as this is election year, in view of which fact official registration figures are expected to exceed those for previous years. The committee in charge of room reservations reports that virtually all space at the Hotel Lubbock, convention headquarters, has been taken, as well as space in other hotels. Rooms in private homes are being listed to take care of the overflow. It is hoped that delegates coming from distant points over the state can be accommodated with hotel rooms, if desired, and that delegates from neighboring towns will cooperate by accepting reservations in private homes. PTA officers and members from over the South Plains are especially urged to attend the convention, which comes to this section for the first time and offers a varied and worthwhile program.

Mrs. M. A. Taylor, of Bonham, president of the organization, will preside at the three day convention, the theme of which is to be "Parental Questions." Nationally known persons who will appear on the program include: Cameron Beck, lecturer and vocation and industrial relations consultant; School of Business Practice and Speech, New York City; Mrs. John E. Hayes, Twin Falls, Idaho, first vice president of the National Congress of Parents and Teachers and associate editor of the National Parent-Teacher magazine; and W. Roy Berg, executive secretary, Allied Youth, Inc., Washington, D. C.

The local arrangements committee, with Mr. Robert J. Allen in charge, is making elaborate entertainment plans for the thousand or more registered delegates which are expected for this convention. Two luncheons, one honoring state presidents and one honoring district presidents, and a dinner honoring local presidents will enliven the convention program. Plans also include a tour of the city and a tea for the visitors.

USING TRIPLE A PLAN, IS CLAIM

COLLEGE STATION.—Whether conscious of it or not, proponents of the so-called domestic allotment plan for cotton are using some of the AAA's best thunder, according to George Slaughter, chairman of the state agricultural conservation committee.

Slaughter, a Wharton county farmer who heads the intra-state policy-making board of the AAA, observed that domestic allotment bankers promise, under their plan, a parity price for that portion of the cotton crop domestically consumed. "Why, for the past six years under the farm program now in effect, farmers have received only eight-tenths of a cent per pound less than the parity price on cotton domestically consumed," he pointed out.

He gave figures, they follow: Domestically consumed cotton 6,002,000 Cotton payments \$145,400,000 Payments divided by domestically consumed cotton 4.8 cents Actual price per pound 10 cents per pound Total actual price plus parity price 15.3 cents Parity price 16.1 cents per pound

SALE OF MEN'S WEAR SHOWS GAIN

Austin, Texas.—Department stores and men's and women's specialty stores in Texas during September showed the usual seasonal increase of sales in dollars over August but were moderately below September last year, according to the Bureau of Business Research of The University of Texas. The percentage decline in dollar volume was about the same as the percentage decline in retail prices of department stores; so there was practically no change in physical volume of goods. In comparison with September last year, the Bureau report said.

Reports from 104 Texas establishments indicate an increase of 14.4 per cent in dollar sales over August and a decline of 5.2 per cent from September last year. Aggregate sales during the first August and a decline of 5.2 per cent from September last year, the Bureau report said.

Mrs. Roy Everett, her daughter, and Kathryn Allen were in Lamesa, Monday on business. Mr. and Mrs. Major Rogers and son, Charles, visited with their parents, Mr. and Mrs. C. H. Donk, and other relatives the past weekend.

NEWS BRIEFS

Miss Mona Rae Edwards was in Tahoka Saturday morning attending Mrs. Haynes' funeral Sunday.

Miss Lulla Maye Yarbrough visited in Lubbock last week.

Mr. and Mrs. W. T. Huff attended Mrs. Haynes' funeral.

Mr. and Mrs. E. T. Wells visited Mrs. Wells' father, J. B. Burleson, in Artesia, New Mexico, last weekend.

Mr. and Mrs. Joe Whigham and Mary Jo visited friends in Lamesa Sunday.

Mrs. Harvey Line, accompanied her sister, Mrs. N. M. Wyatt of Tahoka, to Lubbock Monday.

Sentinels of Health

Don't Neglect Them! Nature demands that the kidneys do a marvelous job. Their task is to keep the blood clean and free from excess toxic impurities. The act of living—its most constant function—wears master the kidneys must remove from the blood of food, from its excretion. When the kidneys fail to function as Nature intended, there is retention of waste that may cause body-wide disturbance. This may suffer manifest backache, persistent headache, attacks of dizziness, gout, may suffer swelling, puffiness under the eyes—feet tired, nervous, all over set. Frequent, scanty or burning passages may indicate evidence of kidney or bladder disturbance. The recognized and proper treatment for this ailment is to help the kidneys do their job. Doan's Backache Kidney Pills are the only medicine to help the kidneys do their job. Doan's Backache Kidney Pills are the only medicine to help the kidneys do their job. Doan's Backache Kidney Pills are the only medicine to help the kidneys do their job.

A Rose By Any Other... And Names Are Names In State of Texas

Texas mothers and fathers, in search of names for their newborn babes, sometimes make the strangest choices, according to the State Observer, Austin weekly.

A check of the vital statistic records in the State Health Department reveals that parents do not limit themselves to such well-worn Biblical names as Peter, Paul, John and Mary.

The Ford family, for example named their baby, "V-8 Ford," while the Lock family named their child, "Yale Lock."

One religious family proudly chose "Jesus Junior," while another family, more pessimistic, called their child "Ebil."

The depression made a deep imprint on the minds of some families, as evidenced in such names as "Hoover Depression," "Depression," and "N.R.A."

Personal characteristics are forecast in such appellations as "Lady," "Puddy," "Ezee," "Lamie," "Pinky," "Winner," "Hard-head," "Angel," and "Whirlie."

Names reminiscent of the auto-

Dr. Hall W. Cutler

Chiropractor. Office Nix Bldg.—Tel. 474 LAMESA, TEAS

mobile business include "Taxi," "Belmie," "Clearance" and "Curb." Musically-minded parents chose "Dinner Bell" and "Plooch," while patriots picked "July Fourth" and "Armistice."

Parents already experienced the bearing of children with "Number Two" and "Bopie" while one set of parents, picked at random, chose the strange one of "Obey Butter."

MY HEAD-ACHE'S GONE! MY HEAD IS CLEAR! MUST BE YOUR ALKA-SELTZER DEAR. There is a modern pleasant way to get relief from Headache, Gas on Stomach, Cold, Heartburn, Morning Ache and Muscular Pains. Just drop one or two ALKA-SELTZER tablets into a glass of water. Watch it bubble—listen to it fizz. As soon as tablet is dissolved, drink the tangy solution.

Alka-Seltzer

(Analgesic Alkalinizing Effervescent Tablets) You will really enjoy the taste—more like spring water than like medicine. ALKA-SELTZER, when dissolved in water, contains an analgesic, (Sodium Acetyl-Salicylate), which relieves pain, while its alkalinizing agents help to correct everyday ailments associated with hyperacidity. Your druggist has ALKA-SELTZER. Get a 30 or 60 c package on our "satisfaction-or-money-back" guarantee.

THE MOST DANGEROUS PLACE—

Believe it or not—the most dangerous place you can be in is at home!

According to the National Safety Council, the principal causes of death from home accidents last year were divided as follows: falls, 17,500; burns and explosions, 5,600; poisonings, 1,700; firearms, 800; mechanical suffocation, 1,000; poison gases, 1,100. The grand total was 32,500 deaths—ninety out of a hundred of which were unnecessary, and could have been easily prevented.

The Red Cross, in company with other safety organizations, has been carrying on a drive to awaken the public to the danger of home accidents, and to show how hazards may be easily removed and avoided.

Take a look around your own home. Is there a loose rug at the top of a staircase, it may easily cause a fall that will result in long agony in the hospital, or death. Can unlocked medicine cabinets be reached by children? If so, they are a latent danger of fatal poisoning by such a common first-aid accessory as iodine. Are guns kept unloaded and out of reach of amateur hands?

You can think of many more such vital safety questions. When you do, answer them at once—and not by guesswork, but after a rigorous investigation of every room in your home. And once you've eliminated hazards, keep them eliminated. Remember that a home that is safe today may be filled with dangers tomorrow.

Keep safety in mind at all times—if you want to keep your name and the name of your loved ones off the future lists of home accident victims.

CHASES A PEEPER

SPUR.—While returning home from an American Legion night meeting, Rev. C. B. Brown found a prowler as he drove up to the house. The man hid behind some shrubbery but was forced out. The minister chased him several blocks, but the family dogs followed the minister, thinking it was a game, and he lost track of the intruder.

NEW MORTON EMPLOYEE

MORTON.—Miss Allene Cox of Lubbock has been named as stenographer of the Farm Security Administration here. She takes the place vacated by Miss Virginia Nickles who resigned recently to be married.

HERE are the new 1939 Ford V-8 cars. Above, the deluxe Fordor sedan, below the Ford V-8 Tudor sedan. The two cars are individually styled. The deluxe car has wholly new streamlines, a deep hood un-

Winged Hosts Retored

More ducks than sportsmen have seen since 1929 sw southbound. Top, a pair of blacks, or black mallard, the wariest of all. This is one of the mojar species cast of the Mississippi. Middle, baldpate, or American widgeo, coming back in large ers along the Pacific Flyway. Bottom, brood-bill or big bluebill, a favorite of open water. Pientiful aggs the duck depression ends.

Skies and Water Again Alive With Hurryflocks, Product of Rescued Breeding Grounds

By Jay N. Darling (Mr. Darling was chief of the Bureau of Biological y when the present system of wildfowl restoration was stg. He is now president of the National Wildlife Federation—supplance of organizations working for conservation.—Editor)

THE DUCKS ARE COMING! Winged proof that wildlife restoration pays is right ready to move southward and eastward over the great air high of North America. The prospects are for a bigger flight than year since 1929 along all of the four main routes of migration, Central, Mississippi and Atlantic.

A million sportsmen, and more routes to who pattern of hurrying flocks against the autumn sky is of greater any day than roost canvasback and burgundy, are bearing tony to the lightness of the Biological Survey wildfowl progre

In 1933, extinction of the ducks, geese and brant th America was a dire likelihood. Wildlife geos swiftly throug last stages of its doom. Within ten years, the passenger pigeon from millions to zero. In 1871, buffalo spread over the n plains in dense herds for thousands of miles, their numbers d the ken of man. In 1883, the last band was wiped out.

For such legal protection for the buffalo was domped, and denied. Hunter, the wise old-timers, said: "There's still plenty of buffalo; they've just taken another route." The fowls they took was to ob-

NEW HOME OF DR. MILES LABORATORIES IN ELKHART

The picture shown above was sent to us a few days ago and interested us so much that we are passing it on to our readers, who have been seeing advertisements of Dr. Miles Products for many years.

This new building is the last word in modern construction. It is three stories high, of reinforced concrete, pressed brick and glass construction. Each floor contains nearly 100,000 square feet of space. Natural light is admitted by glass brick of which there are more than 15,000, each 8"x10", in the outside walls. Artificial light is indirect and as nearly as possible like natural daylight.

The new building is air conditioned throughout, air conditioning having proved of much value in improving the quality of Dr. Miles products. Indeed, without air conditioning, controlled to the finest degree, it would be impossible to manufacture some of Dr. Miles medicines.

The laboratories are the last word in scientific equipment and are in charge of specialists who devote their entire time to analyzing the ingredients used in Dr. Miles remedies and the finished remedies. Much space in this building is devoted to thoroughly modern experimental laboratories in which renowned chemists constantly strive to perfect methods of improving Dr. Miles' remedies.

Weekly Newspapers Have Been an Important Factor in Our Growth

A letter received from the Advertising Manager of Miles Laboratories, Inc., says, in part: "Your paper and a thousand more weekly newspapers have been an important factor in the growth of our Company. Weekly newspapers were one of the first mediums we used to tell the public about Miles Remedies. We have been using them consistently for more than fifty years."

When our readers see Alka-Seltzer, Nervine, or Anti-Pain Pills ad-

ABERNATHY GINNINGS

ABERNATHY.—Ginnings for the season passed the 8 mark when the week's total 443 bales. Total is now 3,443 bales. Season is expected to be the 4,090 bale mark.

SCURRY GINNINGS

SNYDER.—Local ginning the five plants here are approximately 10,500 bales. Season is expected to be mated at about 20,000 bales. This week delayed picking.

MONROE GINNING

MONROE.—Four hundred at 500 bales were ginned here past week, making the total 2,600 bales for the season.

AMHERST GINNING

AMHERST.—Local ginning 1,662 bales turned out up to middle of the week for the 1933 season.

Advertisement for Dr. Miles Nervine featuring a cartoon illustration of a mother and children. Text includes: "STOP! YOU'RE DRIVING ME CRAZY", "I LOVE TO SEE THE CHILDREN HAVE A GOOD TIME", "Which KIND OF MOTHER ARE YOU".

Do you "fly all to pieces" when the children are noisy, or when the vegetables burn, or when the jelly won't "jell"? Some mothers are just naturally cranky. Some mothers are cross and impatient because they are nervous.

If you are a natural crank, DR. MILES NERVINE won't do much for you. If you are irritable because your nerves are overtaxed, DR. MILES NERVINE will do a lot for you.

Do you suffer from Sleeplessness, Restlessness, Nervous Irritability, Nervous Headache, or Nervous Indigestion? Do you worry over trifles, start at sudden noises? Overtaxed nerves will cause all these troubles, and DR. MILES NERVINE will help you to relax those overtaxed nerves.

Why don't you give it a trial on our guarantee of satisfaction or your money back? Your druggist can tell you about DR. MILES NERVINE. He has been selling it ever since he started clerking in a drug store. Dr. Miles Nervine comes in two forms—Liquid and Effervescent Tablets.

Liquid Nervine, Large Bottle \$1.00—Small Bottle 50c Effervescent Tablets, Large Package 75c—Small Package 35c

Advertisement for the V-8 motor car. Text includes: "A LETTER OF APPRECIATION V-8 OF THE PUBLIC:", "During the time the Ford cars were on display, a gratifying number of people have visited our showrooms. We wish to take this means to thank you for your fine co-operation in making our formal showing of these cars a success. Never in the history of this motor company have we had such values to offer the public.", "For the benefit of those who haven't had a chance to view these cars on display, we wish to announce that we will have others on display, and we invite you to come and see them. We urge that you do take time and examine these fine motor cars. Salesmen on the floor each day.", "Sincerely, Lynn County Motor Co. OLL D. HASSIS, Manager"
