

COUNTY COURT IS IN SESSION

Opened Monday; New County Officials Now Getting Court Experience

(Lynn County News) Judge G. C. Grider is having his first experience as a judge on the bench this week...

County court opened Monday morning, but no jury had been drawn for this week and no contested cases are being tried.

Judge Grider and County Attorney Nelson found a number of old cases on the docket in which the defendants were gone...

PLAN HEREFORD SHOW AT ALBANY

Annual Sale of Purebreds to be Held at Exhibition

ALBANY, Texas, Feb. 2. — The eighth annual Hereford Show and Sale of Shackelford County will take place at Albany, Feb. 25 and 26...

The last year with the Shackelford County Association has been one of marked progress. Those in the association are F. W. Alexander, C. H. Arendt, R. V. Colbert & Son, Merrick Davis, George De La Fosse, John Diller, W. J. Dodson, J. L. English, R. A. Elliott, Byron Elliott, B. H. Ezell, John M. Gist, J. H. Jenkins, G. D. Keith, F. S. Hendricks, R. D. Leach, R. J. Moberly, A. W. Reynolds, John F. Sedwick, R. W. Tipton, R. S. Walker, P. H. Williams, Lewis Ackers and W. L. Hill.

A new feature of the show this year will be an educational section for the club boys of the county. The boys will be cared for during the two days by the association.

TOTAL GINNINGS TO DATE 25,000 BALES

To date about 25,000 bales of cotton have been ginned in Dawson County, and it is estimated that there are about 3500 bales yet to be ginned.

The above figures are a considerable improvement on what was considered possible a few weeks ago and together with the heavy feed crop should insure a prosperous season during the coming spring.

PLAINVIEW WILL BEGIN DAIRY SHOW HOME

PLAINVIEW, Feb. 2.—Construction will begin Monday on the permanent home being built by Plainview for the annual Texas Panhandle Plains Dairy Show.

Harrison & Smyth of Plainview have the contract for the construction and will have the second annual show on April 2, 3, 4 and 5.

Fifty-four counties of the Panhandle-Plains participate in this show. The building will be built in the shape of a cross with the main entrance through the commercial and manufactured products room, which will be 50 feet square.

around the judging ring, which will be 75x35 feet. From three sides of the judging arena and seats three large stall barns will project, each with a capacity for housing from 100 to 150 exhibit animals.

HOW TO KEEP FROM GROWING OLD

Always drive fast out of alleys. You might hit a policeman. There's no telling.

Always race with locomotives to crossings. Engineers like it. It breaks the monotony of their jobs.

Always pass the car ahead on curves or turns. Don't use the horn because it might unnerv the other fellow and cause him to turn too far.

Demand half the road—the middle half. Insist on your rights.

Always lock your brakes when skidding. It makes the job more artistic. Often you can turn clear around.

Always drive close to pedestrians in wet weather. Dry cleaners will erect a monument to your memory.

Always try to pass cars on a hill when possible. It shows your bus has more power and you can turn somewhere surely if you meet a car at the top.

Never look around when you back up. There is never anything behind your automobile.

A few shots of booze will make your car do a real stunt. For permanent results quaff long and deeply of the flowing bowl before taking the wheel.

Drive as fast as you can on wet pavements. There is always something to stop you if you loose control—often a heavy truck or a plate glass window.

New drivers should be shown how to drive fast in heavy traffic. It gives them the experience every motorist should have.

Always speed! It looks as though you are a man of men even though you are an amateur driver.

Never stop, look or listen at railroad crossings. It consumes valuable time, and besides, nobody believes in signs.

In wet weather always drive in raily tracks. It's smoother driving.—Ex.

Bill Der Says

HOME SWEET HOME

A home is more like a home if it is beautiful, commodious, conveniently arranged, and well finished. The family will really enjoy such a home, and the children, when they are grown up and gone, will look back to it with the tenderest memories.

Why not make life really worth living by providing your family with a real home? We can show you how.

HIGGINBOTHAM-BARTLETT COMPANY "EVERYTHING TO BUILD ANYTHING" E. T. WELLS, Mgr. O'Donnell, Texas

BROWNFIELD WELL HAS BUCKET HUNG IN HOLE

The Brownfield oil well in the M. V. Brownfield pasture some 12 miles southeast of town now has a fishing job on hand, as the slush bucket became hung some days ago, and every means of extricating it has failed so far.

They are still in a fine line formation, we understand, and were in the neighborhood of 5,070 feet when the bucket hung.

Let's hope for a real gusher, but keep our heads and do nothing unwise.—Brownfield Herald.

FIRE DAMAGES T-BAR GRASS

One Section Burned Tuesday Night, Bringing Total to About 5,000 Acres

The grass in the T-Bar pasture caught fire Tuesday night and about a section of it burned before fire-fighters were able to extinguish the flames.

Fire destroyed several hundred acres of grass for W. B. Edwards also a few weeks ago and it requires

ed heroic work to prevent its spread over the T-Bar.

LUBBOCK, Texas, January 8.—The fourth session of the summer school of Texas Technological College is scheduled to open June 3.

The work in the Tech summer school beyond the bachelor's degree is attracting superintendents and a very high school principals from a very wide area.

LUBBOCK, Texas, Jan. 8.—Dr. Paul W. Horn, president of Texas Technological College, has accepted an invitation to address a Y. M. C. A. conference of older boys at Childress March 9.

DOLLARS AND HEALTH FROM GARDEN

Waco—From a spring and fall garden last year, Mrs. O. W. Moroski, a home demonstration club woman who lives near here, produced veget-

ables worth \$231.65 at a cost of only \$10.35 according to a report of Mrs. Lenna Peery Boles, home agent for McLennan county.

There are many reasons for the ease of steering the new Ford

The new Ford is exceptionally easy to steer because of the well proportioned weight of the car, the steel-spoke wheels, the co-ordinated design of springs and shock absorbers, the size and design of the steering wheel, and the simple mechanical construction of the steering gear.

Hardware Talks SERVICE—What does the use of this much used word usually mean when it appears in an advertisement? Sometimes little or nothing, but in this case it stands for a great deal.

Everything Has Been Attended To Where you use Natural Gas for a fuel, and your stove or furnace is connected, you find all your requirements whether for heating or for kitchen range has been attended to, far in advance of your need.

them, and also they have a tendency to antagonize the public by cluttering up the scene along the highways. But all experts on advertising now readily concede newspaper advertising to be the best by a big majority and at the lowest cost in proportion to the number of people it reaches. It goes into homes of cities, towns, villages, hamlets, and to the furthest most farm and ranch of the trade territory—into homes of people who are hard to reach otherwise. It is something that no householder will dare throw away before the rest of the family sees it, for they all want to see the home paper, and if old Dad comes home without it, he has to make good by producing another from the newspaper office when he goes to town next time. This soon learns him to take care of the local paper as he would the family letters.

In the past few years representatives of great manufacturers, especially of implements, make the newspaper offices almost as regularly as they do the dealers themselves, to see how much advertising their local dealer is doing, and if he is not coming up to expectations, they take steps to change at the first convenience. They offer their aid and help to the paper's advertising solicitors, and they never mention that possibly the rates are too high. What a contrast to just a few years ago when the only advertising man to come around was generally some patent medicine drummer, and his first hard work was to beat the paper down on their advertising rates. But these birds have to act very nice now days to even be allowed space in most country weeklies. It is not a question of rates with them now, but some of them hang out for a "good" proposition, and are turned down on that. The Herald has turned some of them down recently on this demand.

Only recently the Herald had a representative of one of the largest advertising agencies in the country to call on us, and we found in him a willing helper and adviser. He let it be known that the entire resources of his company was at our command to help in any way to improve the service to their advertisers and to the public which read their ads and bought their products. This company handles the advertising of all General Motors products, and you can begin to guess what the business amounts to. Yet they are willing and ready to send their men to the smallest country papers to help and assist them in rendering service to their clients and to the public. Advertising is now classified as one of the nation's greatest institutions and businesses, and he that heeds it not is simply standing in his own light and in his own progress toward financial success—Brownfield Herald.

THE CAUSE OF PEACE

They tell us, these skeptics, who serve well to keep us face to face with reality, that Europe is brewing another great conflict, which will surpass in horror the catastrophe of 1914. They call our attention to the great armaments abroad, to the nationalist spirit that governs the emotions of most Europeans, to large populations, fretting under the yoke of foreign domination, and to the aggressive capitalism, still engaged in struggles for commercial supremacy. Quite true. These elements do exist. But he who maintains that the world of today is essentially the same as the world that preceded the great war is failing to recognize all of the new elements that have come into existence in the last decade. Capitalism, regarded widely as the vicious monster that plunged the world into the great carnival of murder, is now looked to by many historians and thinkers as the great hope for world peace. H. G. Wells, long a socialist thinker, is one of the latest world figures to express the view that international capitalism

and banking have now become the greatest forces working to maintain international concord. Charles A. Beard, author of the Rise of the American Civilization, is another who has adopted this same point of view.

These observers call our attention to the intricate ramifications of international finance as it exists today. They point to the fact that the bankers of New York, Paris, London, and Berlin have holdings at present in every industrial nation on the face of the globe. These capitalists are financing the manufacture of steel, of automobiles, of graphophones, and of almost every other useful commodity in all civilized nations. While these articles may be manufactured by different concerns in different nations, these companies are merely units in great international financial systems.

With these scattered business interests, world bankers and financiers, it is naturally assumed, have too much to lose through a war between civilized nations. Their interests have become international. Accordingly they are throwing their great power and influence to the cause of world peace.

They are not actuated by humanitarian motives, to be sure. Their desire for world peace is dictated by pure selfishness. But when we see what a force selfishness on the part of men of power has exerted in creating past wars, we may rightfully feel that it could become an equally effective force in the cause of peace.

THE NEW FORD IS EASY RIDING AUTOMOBILE

One of the things for which the new Ford car has already become famous is its exceptionally easy riding qualities over rough roads. Many factories contribute to this, especially the low ratio of unsprung weight to sprung weight, the flexible transverse springs, Houdaille hydraulic shock absorbers, etc., but perhaps none more than the so-called torque tube drive. This principle of taking the thrust from the rear axle was first introduced into automotive practice by the Ford Motor Company on the Model T car and has later been adopted on many of the finest European and American cars including the Lincoln.

The torque tube is a metal housing surrounding the driving shaft. It takes the driving thrust from the rear axle and carries it to the universal joint housing, a point well forward on the chassis so that the car is really pulled rather than pushed over the road. This construction also relieves the rear spring of any function except that of supporting the load. This permits the leaves of the spring to be made flexible and shackled at both ends, resulting in free and normal action and an easy absorption of road shocks.

Radius rods join the torque tube at the forged steel housing of the universal joint adding strength and

rigidity, keeping the rear wheels in perfect alignment, and further resulting in improved riding qualities.

PLAIN BOYS GROW PURE MILO

Plainview—The Jolly Farmers, as the 4-H club members of Stoneback in Hale county are known, last year produced from 12 acres 15 tons of cleaned milo maize seed which has been sold at three cents per pound to local seed dealers and farmers of the county. The Snyder club accomplished a similar feat, according to the county agent, R. M. Mihollin, who explains that these seed meet all the requirements for the production of pure seed as the fields were inspected by J. D. Tinsley, agricultural agent for the Panhandle and Santa Fe Railroad, and all seed were threshed in a centrally located clean machine.

KNOW TEXAS

The geographic center of Texas is in McCulloch County, 10 miles northeast of Brady.

The Lone Star flag of Texas was adopted by the Third Congress of the Texas Republic in session at Houston January 25, 1839.

Texas has in the neighborhood of 17 billion board feet of pine and seven billion five hundred million ft. of hardwood standing.

The annual lumber cut of Texas is about one billion five hundred million feet.

WILL THE SEED GROW?

It is easy to test farm seeds at home and guard against crop losses due to poor seed or weed seeds.

C. E. CAMERON

is the representative of the Texas Electric Service Company in O'Donnell.

For any information about your electric light service call Mr. C. E. Cameron at Texas Electric Service Company, Lamesa, Phone No. L. D. 11 or at Lamesa Texas, Phone 237

Much seed is imported nowadays and widely variable grades are on the market, and it is especially desirable to test seed of red, alkali, and crimson clovers, alfalfa, timothy, broomgrass, millet, cereals, rape flax, vetch, and corn. Bluegrass, orchard grass and the fescues require special temperature control which is difficult to maintain except with special equipment such as seed laboratories maintain. Detailed directions for testing seeds are given in Farmers' Bulletin 428-F, "Testing Farm Seeds in the Home and in the Rural School, which can be secured from the U. S. Department of Agriculture, Washington.

Isn't It Funny?

Referring to that which is of great importance to every business man, Printer's Ink says:

ISN'T IT FUNNY—That so many business men will get up in the morning

- Clean their teeth with an advertised brush and advertised tooth paste,
- Shave with an advertised razor,
- Wash and save with advertised soaps,
- Put on advertised underwear,
- Advertised hose, garters, shirt, collar and shoes,
- Seat themselves at a table and eat
- Advertised breakfast foods and bread
- Put on advertised hat and gloves,
- Go to the office in an advertised motor car,
- Give down letters to a typist who types on an advertised machine,
- Using advertised carbons,
- Signs their letters with an advertised pen,
- Containing advertised ink,
- And trun down a proposal to
- Advertise on the ground that
- Advertising doesn't pay!

Slaton Merchant Believes in Wilson

(From Wilson Pointer)
Mr. O'Boyle of the Green Parrot Stores was a pleasant caller at the Pointer office last week and while here expressed his appreciation for the business from Wilson the past fall.
Mr. O'Boyle stated that he figured that at least 30 per cent of his business had come from Wilson territory. This percentage was figured from the checks that he had received.
We asked him to explain the reason for the unusual business here, here is what he said: "I have advised in a number of papers, but from actual check up I find that I get more results from the Wilson Pointer than any paper that I advertised in." He said that he prepared his copy then lived up to it, in other words he had what he advertised, and when he said he had bargains in certain classes of ladies ready-to-wear he had them just exactly as we advertised.

Mr. O'Boyle also complimented the ladies of Wilson very highly. He said "in our line of business we always have a large number who will come in to look over our merchandise and on finding something that pleases them, but for some reason say, 'Well I won't buy just yet but will be back later.'" Mr. O'Boyle states that invariably the Wilson women come back just as they say they will. He also stated that he had not received one cold check on the Wilson Bank.

The Green Parrot store is moving from Slaton to Lubbock this week, they will operate two stores there, one to be only three prices for dresses, these will be low in price, while the other will specialize in dresses a little more expensive. The Slaton Store that is moving will be located in the building now occupied by Hall Music Co., next door to Mierer Music Co.

Mr. O'Boyle we appreciate your flowers. We are glad you gave them to us now while we are here to enjoy them. After they button us up in our wooden overcoat and you had something nice to say, we wouldn't be haughty to know about it. So far the bouquet we thank you.

SOPHOMORE CLASS

(From Wilson Pointer)
The Sophomore class elected new officers last Thursday and they are as follows: President, Burke Styles; Vice President, Alfred Schaffner; secretary, Iva Presley; reporter, Mattie Pear Jones.

Two of our class mates Willie Jo Morrow and Loyd Roxburg have been ill.

Our class has had two new members since the holidays, Mona Parks and Osco Cole.

Miss Latch did not return to us after Xmas, so we have a new teacher Miss Wallace of Morgan, Texas, whom we have fallen in love with.

Reporter.

FRESHMAN CLASS

(From Wilson Pointer)
The Freshman class elected new officers for this term. They are: president, Mary Rose Joplin; vice president, Sherley Styles; treasurer, Annie Ruth Corder; reporter, Lodaonia Mueller.

We are trying to do better this term than last and wish to have frequent visitors.

Reporter.

Sunday School Workers Coming

(From Wilson Pointer)
Rev. Thompson announces that Dr. B. L. Nance, of Abilene, who is the Conference Supp. of Sunday School Work in the Northwest Texas Conference, Methodist Church, will visit the Wilson and Dixie Sunday Schools. Dr. and Mrs. Nance will be with the Dixie Sunday School at the regular Sunday School hour, 10:00 a. m., Sunday, February 10. They will be in Wilson for an Institute Wednesday February 13, at 10 a. m. This is part of a conference wide Institute campaign being conducted by Dr. Nance and Extension Secretary Dr. W. E. Lyon. All teachers and officers of these Sunday Schools are expected to attend with many others who are interested in the work, to hear these expert Sunday School workers.

Mrs. A. E. Jones, of Gainville, came Monday to be with her brother, Byron Beatenhammer, who has been dangerously ill with tetanus. We are glad to report that he is somewhat better.

Messrs John Campbell and Jess Fortner arrived this week from Levelland and are preparing to farm the A. B. Fortner place another year.

CROP ROTATION PAYS DIVIDENDS

Granbury—That crop rotation pays in Hood County has been demonstrated by A. R. Gilmore of Antioch Community who has made a little more than a third of a bale of cotton without the aid of fertilizer on an old corn land. A three year rotation of corn, cotton and one year in pasture has been followed for a number of years, and L. W. Stasney, county agent, states that the yield of cotton has been high, with the crop last year bigger than that of any other farmer in that section.

FARM IMPROVEMENT CONTEST GETS RESULTS

Huntsville—Seven bales of cotton from five acres were made last year by J. B. Atkinson of Walker county who won a local farm improvement contest designed to show the way to a better balancing of the farm program, and especially to increase the difference between income and expense. He also raised 316 standard bred white Leghorn pullets, purchased a pure bred dairy bull, and used pure seed corn and cotton seed, says T. A. Fritts, county agent. The dwelling house was remodelled, the kitchen re-made, and water-works added according to plans furnished by the home demonstration agent.

Five years' protection from grazing of a watershed in the Manti National Forest, Utah, resulted not only in great improvement in the vegetation, but in a reduction of 54.6 per cent in run-off during the summer rainy period and a reduction of 56.2 per cent in erosion. The improvement in vegetative cover seemed to have little effect on run-off from melting snow.

Among other causes for rejoicing in O'Donnell now-a-days is the appearance of a very dear friend, the

measles. We are unable to provide a full list of all those entertaining the guest, but among others are Beryl Koeninger and his sister, Leta Merle, Elsie Bernice and Billie Louise Etter, and Mrs. Henry Scholler, and children.

Miss Roxie Hancock who has been employed at the Popular Store, is now occupying the cashier's desk at the B. & O. Cash Store.

Mr. and Mrs. Lee Christopher and Mrs. Wade Christopher and son of Fort Worth, visited Mr. and Mrs. W. L. Christopher last week.

Little Miss Norma Fay Fairley arrived last Friday, February 1, and is now making her home with her parents, Mr. and Mrs. J. D. Fairley. She is a very blue-eyed, dark haired young lady, and her pa and ma and friends think she's due to work havoc among the boys in a few more years.

If the fruiting grape vines were not pruned last fall, they should be pruned before the sap starts in early spring but not while the wood of the vines is frozen. Of the two ways of pruning grapes—the renewal and the spur system—the renewal system is

better, says the U. S. Agriculture, as it except the trunk of the previous year, two or four canes arms. With the spur system you leave two high and the same way.

A Dollar Dinner For Four

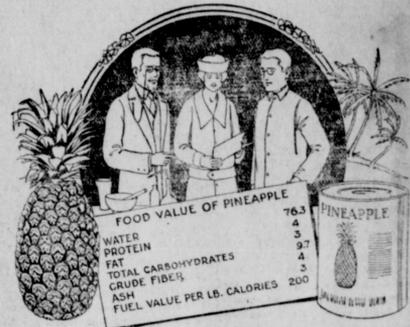

Here is a dinner which will meet all bodily needs and appeals to both the eyes and palates of your family:

- Menu**
Cream of Celery Soup Tomato Sauce
Milanese Pudding Spinach
Apricot Tapioca Coffee

THIS dinner requires the following supplies at prices current at the cheap stores: one medium size can of spaghetti in tomato sauce, fourteen cents; one egg, six cents; one pound of ham butt, twelve cents; one can of spinach, eighteen cents; one can of cream of celery soup, ten cents; one-eighth pound of butter, seven cents; one can of apricots, twenty cents; one-fourth pound of sugar, one and one-half cents; one-fourth cup of tapioca, one and one-half cents; and coffee, four cents; a total cost of ninety-two cents. The eight cents remaining will pay for bread and butter, fuel and any necessary seasonings.

The Pudding and Dessert
The recipe for Milanese pudding follows:

to one can of spaghetti in tomato sauce, add one cup of ground boiled ham, one egg slightly beaten, and salt and pepper to taste. Pour the mixture into a buttered mold and steam for one hour. Turn from the mold and serve. A little grated Roman cheese is an addition to this dish. For ground ham dishes, butts at a low rate are economical. Apricot tapioca is made as follows: open and drain the juice from a can of apricots. Add enough water or milk to make two cups of liquid. Heat in a double boiler, and add one-fourth cup of granulated tapioca. Stir frequently until the tapioca becomes transparent. Add salt, a little lemon juice and one-third of a cup of sugar. When partially cool, stir in the fruit. Chill and serve.

THE FOOD VALUE OF PINEAPPLE

A pineapple is being produced in large quantities in the Hawaiian Islands and is gaining a prominent place on the American bill of fare, it is attracting the attention of food specialists, scientists and doctors. In fact it is greatly to the credit of our colleges and universities today that they maintain a department where the food value of any product is tested, and where the most careful experimental work is carried on with any food that the American people like to eat.

Such experiments have been performed on Hawaiian pineapples, and the following interesting figures have resulted:
Moisture, sugar, protein, crude fiber, mineral matter, and fruit acids in the order named are found in canned pineapple. Naturally the largest percentage of this juicy fruit is the moisture.

Since the vitamin content of any food is regarded of great importance in arriving at a judgment of its dietary value, various experiments on rats and guinea pigs are performed to determine this point.

These experiments have proved beyond question that the pineapple takes an unusually high rank as an all round source of vitamins,—this applies to both the canned pineapple and the fresh,—just after it has been picked at the right stage of ripeness.

Thus the American housewife is justified in her belief that canned pineapple is an article of diet of substantial food value and is not to be regarded as a luxury of pleasing flavor only!

The **FLORSHEIM SHOE** with FEETURE ARCH

Greater comfort with regular Florsheim style... a hinged (flexible-rigid) shank is built into the shoe, that bends freely as you walk, supports the arch firmly, carries the strain, relieves and comforts both weak and normal feet.

**CHEVROLET MADE
A QUICK CHANGE
FROM A FOUR TO A SIX**

Michigan, Feb. 9.—The
... answer, yet ob-
... question, "How did
... in effecting one of
... mammoth turnovers in in-
... story?" was revealed here

... November when Chev-
... rolet that it would discon-
... necting four cylinder cars
... produce instead a six in
... range of the four, specu-
... mobile circles was rife as
... was to be accomplished,
... manufacturers who had at-
... turnovers had required as
... months to two years to
... into capacity production,
... many skeptics.

... Chevrolet followed up its an-
... of a six with the an-
... that deliveries on the
... were to begin January 1,
... the company believed
... in quantity numbers did
... ary 1. On that date prac-
... Chevrolet dealer in the
... played the new six. Once
... tion reached through-
... circles, "How did they do
... ver on it now comes to
... be explained in a single
... word. The foresighted
... General Motors and Chev-
... rolet have been known to coun-
... sel their customers to
... open mind, and
... that they could be
... by a six cylinder

... ving, and
... tive sort

of checking. Chevrolet engineers expressed themselves as satisfied that they had perfected a six cylinder engine of exceptional merit. It was a momentous occasion in the history of the company and marked the achievement of one of the greatest engineering triumphs in the history of the industry.

Maxime Fisher Body engineers, working in close co-operation with Chevrolet, announced that they had a body, rugged and attractive—in every way worthy of the sensational new engine. And then it was that the Chevrolet board of strategy expressed themselves as finally satisfied.

Then began the process of making ready 20 widely scattered Chevrolet plants for the advent of the new six. It meant that an entirely new set of machine tools, patterns and dies had to be developed in the shops and on the drafting boards. It meant that Chevrolet's 40,000 employees had to be adapted to the change over.

All of this had to be done while the company's resources were involved, chiefly at this time, with the production of four cylinder gear shift cars in numbers never before equaled in the history. It is to be remembered that last year Chevrolet again sustained its position as the "world's largest builder of automobiles" with a production of 1,200,000 cars.

Recognizing the fact that men had to be trained to handle the new work and that preliminary practice was necessary in the handling of tools and fixtures, the company built an experimental motor plant at Saginaw, Michigan, containing a complete equipment of new machinery purely for research, experiment and establishment of production practice. This plant started last September 1 and continued in operation until November 15.

Meantime, the Flint Motor plant was shut down from October 1 until November 15, and the task went forward of installing new machinery, re-building old machines for new work and re-educating in precision methods thousands of employees.

On November 15, the machinery used in the experimental motor plant was removed to the main production line and the Saginaw plant was dismantled. So well grounded were all the plans that 12,000 motors were produced between November 15 and December 1, an average of more than 1,000 a day. During December 60,000 motors were produced, an average of more than 2,000 a day.

The assembly plants continue operations on the old models until October 25 when the last one closed down to prepare for the new car. The first assemblies of the new car started December 11th.

Today thousands of the New Chevrolet sixes are moving along the highways of America. Owners have reported that the engine is everything its designers knew it would be. The acceleration is not surpassed by that of any other car on the road. It has ample speed for any emergency. It has an economy better than 20 miles to the gallon. It is beautiful in appearance. It is exceptionally easy riding.

Engineers and all those who can, in detail, visualize what a truly tremendous industrial achievement this incredibly fast turnover comprises, marvel at its accomplishment. It stands as a brilliant tribute to two great organizations—General Motors and its Chevrolet Division.

BAPTIST CHURCH SERVICES

(From Wilson Pointer)
We are beginning our spring Revival the third Sunday in March. Rev. Graves Darby, former pastor will do the preaching. Every one is cordially invited. We are anxious that every one pray that God will give us a great soul winning Revival.
Regular services next Sunday.
Sunday School—10 a. m.
Morning Service—11 a. m.
Subject—"Some things Peter Forgot."
B. Y. P. U.—7 p. m.
Evening Service—8 p. m.
Subject—"The Man With the Wrong Pants On."

Since the "Flu" has practically stopped raging, we are having splendid crowds, but we want to extend a cordial welcome to come and be with us.
Philip C. McGahay, Pastor.

HIGGINBOTHAM TO BECOME HEAD COACH AT TECH

LUBBOCK, Texas, Jan. 8.—Ewing Y. Freeland, head coach since the opening of Texas Technological College, becomes head of the department of physical education with the rank of professor, according to an announcement made by the Athletic Council. Grady H. Higginbotham, assistant head coach since the schools opening, becomes head football coach under the reorganization. Victor Payne, member of the Tech coaching staff since 1927, will assist as football coach and become varsity basketball and track coach. Rhodes Inger-ton, a member of the staff since 1926, will be freshman football coach and assistant track coach.

These assignments, according to President Paul W. Horn, will hold good for the rest of the present school year and for the session of 1929-30.

1929-30. It is further announced that there will be no additions to this coaching staff.

Bass Baker Is Building New Home

(From Wilson Pointer)
Mr. and Mrs. Bass Baker are building a new home on their farm south of town. The home will be five rooms and modern.
We congratulate Mr. and Mrs. Baker. They have a fine location out there and this new house will add much to it.

Farewell Party

(From Wilson Pointer)
Miss Laverne McCormick entertained a number of friends at her home Wednesday evening with a 42 party honoring Miss Othella Hamilton and Mr. Wiley Hamilton who have moved to Barstow.

After many exciting games of 42 of which Mr. Alvin Crews was high scorer, delicious refreshments of cocoa and cookies were served to the following: Misses Othella Hamilton, Laverne Owens, Lillie Bird, Evelyn Stand, Hattie Server, and Christie Huffaker; Messrs Wiley Hamilton, Noel Galloway, Alvin Crews, Stanley Barksdale, Marvin Bird and Mr. and Mrs. Melvin Todd.

METHODIST CHURCH

(From Wilson Pointer)
The services at the Methodist Church Sunday should be well attended and the pastor is desirous that we all get back in the services now that the flu has subsided. It is easy to get out of the "habit" of attending the services when we lose a few services. We have been late for the beginning of the Sunday School of late and will plan to begin on time next Sunday, let us all strive to be on time.
Sunday School—10 a. m.
Morning Service—11 a. m. Sermon: "Heaven's Great Magnet."
Leagues—6:45 p. m.
Evening Services—7:30 p. m. Sermon: "Give God a Chance."

The pastor will fill the pulpit both hours Sunday and we hope to be able to see you with us. Strangers especially invited. "New Comers" will find a welcome with us.
Services every Sunday in each month except the first Sunday.
Sunday School every Sunday.
J. B. Thompson, Pastor.

HIGH SCHOOL REPORT

(From Wilson Pointer)
We are now starting the second term of school, after a few hard days of mid-term examinations we are arranging our schedule for the new term. A few new pupils have been

enrolled in high school, and we extend a hearty welcome to them.

We are all proud to know that the gas will be heating our class rooms soon.

We also are proud of our new wall clock in the hall bought by the P. T. A. Now we can always see Mr. Faubion keeps us over time or not.

We would be very glad to have every one of our parents to visit some of the classes.

GALLOPING GUS THE HOTFOOT CUSS

NO FOOLIN'
A chicken cannot live on scraps
And sand—we do, not mean
perhaps;
Some grits are relished now and
then
By every rooster, chick and
hen!

A sack of feed or a carload—
it makes no never mind to us.
We can fill your order pronto,
says Galloping Gus. And we
don't necessarily specialize in
chicken feed. There's bran for
the cattle, too. Call personally,
telephone or write.

SINGLETON Hardware Co.

Galloping Gus, the Hotfooted
Cuss. Comes when you call
without flurry or Fuss!

TO NEWSPAPER MEN WHO READ THE INDEX
ARE YOU BOTHERED WITH STATIC ELECTRICITY?
I HAVE A DEVICE THAT WILL TAKE FROM 95 TO 100 PER CENT OF THE STATIC OUT OF YOUR PAPER PRESS, ON PRESS OR OFF PRESS. YOU WON'T HAVE TO WAIT TILL THE ELECTRICITY IS OUT OF YOUR PAPER BEFORE YOU CAN MAKE THE SECOND RUN. ALSO YOU CAN TAKE THE PAPER RIGHT OFF THE PRESS TO THE FOLDER IN ANY KIND OF WEATHER CONDITION AND YOU WILL NOT BE BOTHERED WITH STATIC. IF I CAN'T TAKE IT OUT IT WILL NOT COST YOU A RED CENT.
I AM A PRINTER AND A NOW WHAT A STATIC WILL DO ON PRESS DAY.
IF INTERESTED I WILL GIVE YOU A FREE DEMONSTRATION IN THE NEAR FUTURE.
S. T. PRICE, The O'Donnell Index O'Donnell Tex.

Appreciation

We have disposed of our interests in the Chevrolet business to Mr. Rayburn of Tahoka who have already assumed management of the business.

We wish to thank our customers and our friends for the splendid patronage accorded us during the past few months and ask that you continue with the new firm. We will remain residents of O'Donnell and hope to be engaged in a new line of business within the next few weeks. Our future plans will be made known at an early date.

Again we want to thank you for all past favors and hope that you will not forget us when we again enter the business life of O'Donnell.

E. M. & E. H. Wilder

The Dairy Cow comes to Texas
delivering a constant flow of cash to Texas Farmers

Probably no development is as widely important to Texas today as that of dairying. The dairy cow brings ready money to the farmer, cash trade to the retailer, increased deposits for banks; greater buying power to all the people. paves the way for various types of industries. establishes agriculture on a permanent basis encourages the building of good roads, improves school attendance; and, in short, makes for a balanced development of Texas which is beneficial to all the people.

From all over the state word comes from editors, educators, bankers, business men and farmers alike saying that the dairy cow is the salvation of Texas agriculture. Cities endeavoring to build themselves are turning a helping hand to the farmer, realizing that a balanced development is permanent. The Texas Electric Service Company welcomes this change in Texas agriculture and in the attitude of business toward farming.

TEXAS ELECTRIC SERVICE COMPANY
The Silent Partner of Progress

Baby Chicks--

From our first hatch will be off in about two weeks.

Our big 18,000 egg Petersine Electric Hatchery is now in operation and we invite everyone to call and see it. We are located in the Fritz Building and will be glad to show you the new wonder.

New hatches will be put on Mondays and Thursdays of each week. Make your reservations early for that Spring hatch.

We will have baby chicks for sale at an early date. So leave your order now.

Busy Backs Wont Collect Moss

**"THE LORD HELPS THEM THAT HELP THEMSELVES."
PEOPLE ALSO HELP THEM THAT HELP THEMSELVES.
THE LIVE MERCHANT HELPS HIMSELF ALONG BY ADVERTISING.**

It is a means of reaching out after business. Advertising space is a sort of show window that offers a merchant the chance to display by picture and type the leaders of his stock-in-trade. The live, enterprising merchant has the good judgment to invest in publicity. It forms a contact, or touch, between him and his trade—his regular and prospective customers. If you want more business, "rustle" for it, keep busy. People admire the fellow who keeps on keeping busy. He doesn't sleep on the job. If he's a merchant he keeps a well-arranged stock, quality goods, gives good service, and reaches out for business by newspaper advertising as well as by other publicity means.

THIS PAPER WOULD LIKE TO IMPRESS THESE FACTS UPON ITS READERS. THE BUSY, ENTERPRISING, WIDE-AWAKE MERCHANT IS THE ONE WHO DESERVES YOUR PATRONAGE. HE IS WILLING TO WORK. YOU WON'T FIND ANY MOSS ON HIS BACK.

Stamford—(WTCC) Thirteen different orders from twelve different towns for pecan trees have been forwarded by the West Texas Chamber of Commerce to the nurseryman who made reduced prices possible in this way.

Halbert and Burckett varieties seem to be most popular with Nugget also in demand. One order was received for the success variety. Although two year old trees, those between three and four years old, and those between four and five years old were offered, the preference is for older trees.

One thousand of these trees have been arranged for by the regional organization with prices ranging from one dollar to two dollars, according to age, the older trees being the most expensive.

The season for planting pecans is at its height now, and the sooner the trees are planted the sooner they will produce.

NEW BILLS INTRODUCED

AUSTIN, Texas, Feb. 2.—The following bills have been introduced in the Legislature:

In The House 535. By Dunlap and Hornaday: Creating Willey County Water Control and Improvement District No. 1 and validating bonds.

536. By Webb of Ector. Providing for elimination of lands not practical and feasible to irrigate from water control improvement and districts.

537. By Long of Houston and Palmer: Prohibiting removal of more than one-half pound of cotton as a sample from a bale.

538. By Graves of Williamson: Making it mandatory to apply motor vehicle registration fees in county where owner resides.

539. By Petsch: Allowing Sheriff of Gillespie County not more than \$2,500 for summoning jurors.

540. By Hines: Permitting persons convicted of misdemeanors to work out fines at rate of \$1 per day.

541. By Bond: Prohibiting Governor from signing any patent for any land emanating from the State until he shall have investigated and satisfied himself that sale was at a fair, reasonable market value.

542. By Montgomery and Johnson of Dimmit: Changing open season on white wing doves.

543. By Long of Houston: Imposing a 5c tax on gasoline and other motor fuels.

544. By Petsch and others: Regulating public utilities and creating an appointive public utilities commission.

545. By Beck and Graves of Erath: Redistricting Texas into eleven judicial districts.

546. By Hubbard and others: Requiring company writible on casualty insurance, when held liable on a claim to pay in addition to amount of the loss, damage together with attorney's fees.

547. By Graves of Erath and Snelgrove: Prohibiting collectors from receiving payment of taxes for any year if taxes remain unpaid for any prior years.

548. By Kemble and Forbes: Authorizing Comptroller to make contracts to prevent failure in full collection of inheritance tax by reason of unfair appraisement or other failure to comply with the law.

549. By Conway, by request: Repealing Article 3252-54 relating to

the American Legion Memorial Sanitarium.

550. By Conway, by request: Returning fees collected by Pasteur Hospital to the institution for its use and allowing extra compensation for assisting physician at the hospital.

554. By Johnson of Dimmit: Five years closed season on quail in Medina County.

552. By Van Zandt and Bateman: Validating appointment of guardian when citation was published.

553. By Pope of Jones: Making it unlawful for counties to issue warrants or other indebtedness for road and bridge purposes which requires the levy of taxes subsequent to the year the indebtedness is incurred.

House joint resolution 16. By Pope of Jones: Submitting constitution amendment fixing the qualifications of voters in a county or district bond issue election as those who own real estate subject to taxation in the area in which the election is held.

In the Senate

405. By Berkeley: To provide for refunding Jeff Davis County road warrants with bonds.

406. By Cousins: Authorizing the Gulf Refining Company to build a bridge across Salt Bayou.

407. By Hyer: To fix a maximum tax rate for school districts providing \$1.50 for common school districts; 50c for construction, repairs or equipment and \$1.50 for maintenance.

408. By Parrish: To direct the Secretary of State to distribute judicial reports to the Supreme Court library and to institutions of learning teaching law or pre-law courses.

409. By Parr and others: To provide for an elective highway commission of nine members.

410. By McFarlane: To provide for reorganization of the State prison system.

411. By Hyer: To regulate the bonds required of depositories of school funds in cities of over 75,000 inhabitants and requiring bonds equal to the estimated receipts of the school fund for a year.

412. By Williamson: To create the Sayers Independent School district.

413. By Woodward and Hornsby: Defining motor carriers (trucks) and placing them under the Railroad Commission regulation.

WORMS KEPT TURKEYS FROM GAINING

Llano—Enormous losses of young turkeys last year in Llano county due to intestinal worms were largely stopped by a worm campaign staged by H. C. Robinson, the county agent, who demonstrated the use of a liquid iodine solution introduced directly into the gizzards of the birds. Worms

are said to have been completely eliminated within an hour after treatment with no bad after effects. About 10,000 turkeys were thus treated whose owners report an average increase in weight per bird of one lb., worth at least 15 cents.

One demonstrator, J. W. Benskin, treated 115 turkeys in this manner after they had been at a standstill for a month. Within three weeks they had gained an average of 4 pounds per bird on practically the same amount of feed as given before the treatment. Mr. Robinson states that this method of worm control has the advantage of concentrating the expelled worms in one pen as they are passed, thereby enabling the owner to destroy the pests without having them reinfest the range.

Fermented milks have a high food value and are digestible in many cases where other foods cannot be taken. When taken regularly as a means of correcting some physical disturbance, a physician's advice should be sought, as their high food value may add unnecessary elements to the diet. Taken occasionally, buttermilk, acidophilus milk and other forms of fermented milk are refreshing and wholesome.

Rayon or artificial silk must be carefully laundered. It should always be washed in lukewarm water with soapsuds. Pure soap should be used. The fabric should not be rubbed, but squeezed and rinsed repeatedly until clean. Rough finger nails or rings worn on the fingers while washing may tear wet rayon articles. After laundering the garment should be spread out to dry. Under no circumstances should it be hung from a line with clothespins. In ironing care must be taken to avoid too hot an iron; medium heat is best for rayon.

Have a special place for your spring sewing—a little room, if possible—or at least a corner in a room.

FAIRLEY & HAYMES

INSURANCE AND REAL ESTATE OF ALL KINDS O'DONNELL, TEXAS

More water is required to produce a pound of dry matter in oats than in any other cereal—hence the need for growing this crop on land that naturally retains moisture or that is well filled with humus.

CLEANING HARNESS

When overhauling, cleaning, and greasing the harness once or twice will prolong its life. A harness apart so that all is overhauled, and soak it for an hour in lukewarm water which some mild soap has been added. Scrub and rinse it then nearly dry, rub edge on the leather where needed with metal parts, and make necessary. Oiling the leather is done while damp, using either oil, castor oil, or a petroleum oil. The U. S. Dept. of Agriculture says that a mixture for heavy harness is 6-foot oil mixed with tallow or a paste of about the consistency warmed butter. Rub well into the leather and let it dry away from fire or sun. If it has dried, rub the leather with a white castile or a good harness soap, to remove surplus grease.

DOING IN WEST TEXAS

Best fire fighting equipment, pumper, special hose, pressure equipment, mounted on a truck has been purchased City of White Deer. The bill is paid for by the fire insurance.

Plans are being made preparatory to the new building for the American Telephone and Telegraph Company at Gleco. The building will have four stories and a lobby house division head-

quarters has installed the green, amber traffic light system of their busiest streets throughout the city to find the direction necessary.

Work being advertised for the paving to be done in February 20. The paving will be in eight blocks.

Butter factory has been installed in the Hope milk plant in Erath, and will add an additional unit for the cream production section. The plant has the amount of sweet milk 100 gallons a year and a total of 700 gallons now.

Plans for the addition of ten to the Crawford Hotel at Big Bend will be let within 40 days according to the owner A. J. Crawford, a large mezzanine private dining rooms, banquets with a seating capacity of a reception room will be let within 100 days added to the hotel.

Shipments of various items during 1928 excluding 50 cars of wheat, 2 cars, 321 cars of grain, and of hay and straw, 2 other cars, 50 of prunes and 4 cars of other fruit.

The West Texas Chamber of Commerce agriculture from January 1929 has been postponed because of the farming season. The Chamber has had a meeting of thirty members who had been invited by the agricultural regional association of them

more nutritious and palatable than stems. When possible, include some grasses that will germinate quickly and make a heavy growth the first year. Always include legumes; they furnish protein and minerals and preserve the nitrogen in the soil. Plan the pasture mixture so as to make the grazing season as long as possible, finally, a varied mixture will provide variety in the ration.

The demand for manure in farming has increased so greatly that we now bring in goat manure by the boatloads from South America. This manure is landed along the eastern coast, principally Florida, and largely goes into the making of mixed commercial fertilizers.

PASTURE POINTERS

Here are some pertinent points for permanent-pasture mixtures. First, choose only grasses and legumes adapted to the soil and climate. Some of the grasses should be long-lived perennials, so that the pasture will not deteriorate too fast after the first year. Some turf-forming grasses are desirable; they keep out weeds and make a firm footing for livestock. Grasses with a large number of basal leaves are preferable; leaves are

more nutritious and palatable than stems. When possible, include some grasses that will germinate quickly and make a heavy growth the first year. Always include legumes; they furnish protein and minerals and preserve the nitrogen in the soil. Plan the pasture mixture so as to make the grazing season as long as possible, finally, a varied mixture will provide variety in the ration.

CITY TAX NOTICE

The following described real estate in the City of O'Donnell, according to the delinquent rolls, is subject to foreclosure for delinquent City taxes, and the present names and addresses of the owners are unknown: Lot 12, in Block 57, (Dawson Heights Addition) year 1927.

- Lots 13, to 16, Block 79, year 1927.
- Lots 1, and 2, in Block 136, year 1927.
- Lots 1, and 2, in Block 137, year 1926 and 1927.
- Lot 10, in Block 8, year 1927.
- Lot 4, in Block 23, year 1927.
- Lots 1, 2, and 3, in Block 130, year 1927.
- Lots 1, 2, and 3, in Block 129, year 1927.
- Lots 1, and 2, in Block 119, 1925 and 1926, formerly O'Donnell Motor Co.
- Lot 14, in Block 93, year 1926.
- Lot 70-70 in Block 57, year 1924.
- Lot 9, in Block, 77, 1924, and 1926.
- Lots 4, and 5, in Block 130, 1924 and 1926.
- Lots 1, 2, and 3, in Block 129, 1924 and 1926.

Any owners, or persons claiming any valid lien on said real estate should see the City Tax Collector, Mr. J. Y. Everett about this at once.

CITY OF O'DONNELL,
By W. H. Crunk, City Attorney.

B. Y. P. U.

Everyone is invited to come to B. Y. P. U. We especially urge the Baptist young people to attend the business meeting Sunday evening at 5:00 o'clock at the First Baptist Church.

Every Tuesday evening there will be a class of young people studying the B. Y. P. U. Manual. Everyone come.

SCHOOL NOTES

The following is a copy of an original theme written by a Fourth Grade pupil, Dorothy Walls.

If I were in a circus, I would be a clown. I would learn to do funny tricks. When I would do my tricks the people would laugh and clap their hands. The crowd would go off happy and gay.

These fourth grade pupils made 100 on Arithmetic every day for a week: Frances Foster, Marvin Payne, Iona Mae Caddell, Claud Norris Mansell, L. A. Green, Mildred Goddard, Norma Vermillion and Willborn Kirkpatrick.

MRS. L. P. HARDY HONORED BY MRS. J. P. BOWLIN

Mrs. L. P. Hardy, who recently came with her husband to make their home in O'Donnell, was guest of honor at a pretty party Tuesday afternoon at the home of Mrs. J. F. Bowlin. Bridge and forty-two were the diversion of the afternoon, two tables being placed for each game. At the conclusion of a very pleasant occasion, the hostess, assisted by Mrs. Harvey Jordan, served chicken salad, crackers, apple cheese, and coffee to the following guests: Mesdames L. P. Hardy, B. J. Boyd, Ferrol Farrington, M. J. Whitsett, A. A. House, Ben Cowden, J. W. Campbell, Mack Garner, E. L. Sorrels, H. E. Gillispie, E. T. Wells, Guy McGill, R. O. Stark, John Earls, and Champion—Miss Willie Schooler.

Hens are creatures of habit and will give best results if attended to regularly. Remember a hen that spends all her time in one pen has little to do but watch for the next feeding. She should be fed at regular times early in the morning and afternoon. If a moist mash is fed, it also should be given at the same time each day.

Plan to hatch your chicks early. Early hatching this spring means early maturity and early laying next fall when prices are highest. It also means marketing of broilers and roasters when prices are up. In the Northern States, March 1 is a good date to commence and May 15 a good date to complete hatching, says the U. S. Department of Agriculture. In the Southern States hatch two weeks earlier.

If the silage supply runs short in winter, it is all right to refill the silo with corn fodder or stover if plenty of water is used and uniformly distributed through the dry cut material. Add water at least equal in weight to the fodder or stover. Run the water in the blower or the sprinkler and cut material in the silo while it is being put in, so that every particle is wet.

Herman Whitehead has been out of school this week because of the flu.

A. D. Brown was a business visitor in Amarillo the first of the week.

THE RANDALL NEWS

Our community is deeply grieved over the death of Grandmother Oron. Our sympathy goes out to the children that mourn her death.

The sickness of our community is somewhat improving.

Mr. and Mrs. Lee Meares and Mr. and Mrs. Jack Meares spent Sunday with Jesse Meares and family.

Mr. Ben Young and Mr. Dickie Harris and Ben's nieces, Theima and Leona, attended church Sunday night they reported they head a good sermon.

THIS FOOD IS PUT UP IN A VARIETY OF FORMS

WHEN a food overgrows the stage of being a delicacy and becomes so universally used as to be a staple, a demand is created for various forms of that food on the market. Not so long ago, tomatoes grew in old-fashioned gardens as "love apples," to be looked at but not eaten. Later it was discovered they were good to eat. The first tomatoes canned were a delicacy, but today, tomatoes can be bought in some dozen different forms — ranging from whole tomatoes to tomato paste. Pineapple used to grow in royal gardens under glass. When it was discovered that Hawaii could grow better pineapple in the open fields and ship it, sun-ripened in cans, pineapple was a delicacy. Today, with the discovery that pineapple is a complement to meat and vegetables, it is known, also, that it contains valuable food elements. It is not only a delicacy but an important food product and is packed in a variety of forms, ranging from sliced pineapple to the pineapple juice.

The most popular forms in which Hawaiian pineapple is available are sliced, crushed, "tid-bits" and broken slices, and pineapple juice. Both sliced and crushed pineapple may be had in what is known as "fancy," the choicest pack, and "standard," almost as choice but

costing less, and very delicious. Crushed pineapple is primarily a culinary ingredient. It is just as choice as the slices—in fact, it is even better as far as flavor is concerned as it comes from the outer portion of the pineapple, nearest the shell and this shell is nearest the sun.

The juice is pure juice of the pineapple, unsweetened so that it can be mixed with other liquids in sandwiches, pudding sauces, etc. It contains all of the rich mineral properties and vitamins which make pineapple so vital a part of the health diet.

Pineapple is put on the market in various size cans. They are: Buffet can, containing five slices of pineapple or nine ounces of the crushed product; No. 14, a slightly larger flat can containing six larger slices; No. 2, a tall can, containing ten slices, or one pound of crushed; No. 1, a tall can, containing nine slices of pineapple, or eleven ounces of crushed; No. 2 1/2 can, containing eight large slices of pineapple or one pound five ounces of crushed pineapple.

Pineapple tid-bits and pineapple juice are obtainable in No. 2 tall cans. These tid-bits are especially suitable for salads or any dish in which small pieces of pineapple are needed.

Mr. Jesse Warren and family spent Sunday with W. A. Snow and family.
