### 'American Home' Is 23 Study Club Topic

"Home is a place in a small community surrounded by hills, God's foot stools; a place that has a garden and a place where friends are, stated Mrs. Homer Blalock in introducing the American Home program for a meeting of the 23 study club last Friday afternon. Members and guesis assembled in the parlor of the Presbyterian church where Mrs. Richey Abernathy and Mrs. King Abernathy were hostess-

es for the meeting. Mrs. Blalock quoted from an article by DeWitt Mackenzie, AP Foreign affairs analyst, using the program of the afernoon to show other essential aspects of a home.

"Home is where beautiful music is head," the leader said as she paid ribute to the prelude organ music by Mrs. O. E. Lochridge.

Mrs. Sam Hill emphasized in an impressive devotion that home is where Christ is the head and where worship is consistently observed. "Home is where a worthy woman is," was the thought given preeminence in a question and answer

discussion conducted by Mrs. S. L. Soil Conservation Denny. The role of woman as wife mother, homemaker, spiritual guide

and community leader was vivdly portrayed by Mrs. C. E. Birk, Mrs. tors. H. E. Donohoe of Wichita Gibbons Brubaker and Mrs. Fred

Guest entertainer for the program was Mrs. Chester R. Seals of Wichita Falls who showed pictures and

habit of chewing gum in school.

0 BETTER SEEING

## With Three Basic Lighting Rules...

Good lighting usually costs little more than poor lighting ... follow these simple rules and see for yourself:

Provide better light for easier seeing with the proper size bulb for every lamp in your home. Right size bulbs eliminate eyestrain caused by dim light from small size bulbs.

2. Fill every socket in your home with the correct size bulb. Empty sockets cut down the effi-ciency of lighting fixtures, and pave the way for accidents in areas that require good lighting.

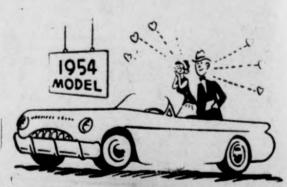

Always keep a ready supply of extra lamp bulbs on hand. When you have an immediate replacement for old bulbs, it's easy to keep every lamp and fixture in your home ready and workable.

Consult the chart in your dealer's store or in our office for correct size bulbs for every room.

Miss Jo Lindley, daughter of Mr. and Mrs. J. P. Lindley, became the bride of Donnie Lee Childress, son of Mrs. Annie Childress of Electra, in rites of beautiful simplicity performed in the home of Mr. and Mrs. George V. Pybus.

Rev. Guy E. Perdue, minister of of the Methodist church, directed the recitation of vows. Mrs. Oscar E. Lochridge, planist, provided treditional wedding music.

The living room of the Pybus home was decored with an arch entwined with white carnations and greenery, with basket arrangements of white carnations and tapers burning in Swedish candelabra in flanking positions. Directly back of the arch was a large fan arrangement of greenery and white gladiolus.

The bride, given in marrige by her brother, Claburne Lindley, was attired in a two piece suite of navy blue and white faille. The skirt of navy blue was cut full. The fitted jacket of white and navy blue was fashioned with three-quarter length sleeves with a wide cuff. She wore a close fitting hat of white shells and navy blue accessories, and completed her costume by carrying a bouquet of while carnations. She observed the sentimental traditions of something borrowed, something blue, by wearing her mother's wrist watch, carrying a blue hand-

kerchief as something old and wore a six-pence in her shoe. Mrs. Larry Chisum of Abilene attended the bride as matron of honor. She was dressed identical to te bride and carried a bou

quet of white carnetions. Miss June James participated in the wedding as bridemaid. She wore a sult of black velveteen with tight critics a term of abuse, a synonym

PROBLEMS OF OLD AGE **By Science Features** 

The song which laments that "the old rockin' chair's got me" expresses a feeling all too often characteristic of elderly people. In many cases these people suffer from no organic disturbance. They simply feel "old."

proverb that you are the only as old as you feel has received entific support in recent years. Advances in medical science, which have added years to our life expectancy, have made old age healthier than ever before. As a matter of fact, the com-

plex problems involved in helping the ever-increasing elderly popula-tion lead healthy and useful lives has given rise to a whole new branch of medical science. This is called gerontology, the study of old age.

Many cases of elderly people who lack a sense of general well-being—who feel "old" and spirit-less—can be traced to a deficiency in certain hormones, the life-regu-lating chemicals produced by the

body's glands. To help people suffering from this deficiency, a hormone drug, called Combandrin, has been developed. This drug, containing two

important hormones, acts to help rebuild tissue and promote a sense of fitness. It can be given by in-jection or by tablet. But this is only one aspect of generated or others include psy-

gerontology. Others include psy-chiatry and preventive medicine— in fact, all scientific knowledge that can help old people live happier, healthier lives.

Word Orgin

By a curious trick of fate the word dunce is from the name John Duns Scotus, one of the most bril liant thinkers of the middle ages After his death, his followers unwittingly sabotaged hi sreputation. When the Renaissance and the revival of learning came, his disciples raved in every pulpit against the new culture, and finally they were called "duns men."

Duns or "dunsman" was applied by their opponents to the followers of John Duns Scotus. Since these followers obstinately opposed the "new learning", the term "duns' became in the mouths of their

banged their way to their second division of the Wichita Falls Regchampionship in the high school ional Golden Gioves meet held last week. The victory gives the locals

a total of five team trophies They won their first title in 1952, when they won the novice champ ionship in the Red River Tourney, their first venture into fistdom. Last year a powerful team won the Golden Gloves Regional, the Oil-

belt tournament, and their second Red River championship.. All eight point fighters from last

year's squad were lost via the graduation route, and prospects for a top notch team looked dim aat the beginning of the season. A group of boys who were willing to work and who had fighting hearts soon served notice that they were out to equal last year's record.

In the tournament just completed, Earl Whisenant won his first two fights with first round knockouts, and would have repeated in the finals had not Billy Sellars been saved by the bell. The Wichita southpaw was down for the count as the gong sounded ending the bout.

James Crosthwait, Holliday flyweight, lost a decision in his first bout to Jerry Smith of Munday, the eventual champion in that division

Wayne Wainscott, Holliday feath- Plaintiff in July, 1953 and reerweight, won his first round bout with a decision over Buddy Patterson of Seymour, but Gene Goodwin of Seymour avenged his teammate's loss by pounding out a decision over Wayne in the semi-fin-

Holliday was well represented in he light-weight bracket. Four loal hopefuls were in this division. Roy Lee Stone was beaten by Jimmy Sartin. Joe Powers won a decision over Seymour's Aubry Big gerstaff and knocked out Petrol-

ia's Jimmy Garner. He met team mate Sartin in the semi-finals and disposed of him in 42 seconds of the first round. In the bottom bracket, meanwhile, Charles Young won over Larry Hall of Iowa Park by deand the Seal of said Court, at offault, then knocked out Dalton Tet ters of Iowa Park. In the semifinals he continued his one man

elimination of the Hawks by betting his second KO over Bobby Archer. Thus the stage was set for the finals between Powers, the in-fighting slugger, and Young, the boxer with the KO right. The fight was a crowd pleaser, with Powers being crowned champion after taking a close decision.

Duward Stone, welter, took on the job of eliminationg Henrietta from contention in that weight. He won decisions over Jesse Thompson and Gene Reed. In the finals "Deadwood" lost a very close one to Norman Ingram of Nocona. All three of those fights delighted the crowd no end. They were free swinging, leather-swapping affairs, with all science chucked out the window. In the middleweight division Holliday's hopefuls were dropped in their first fights, with the exception of Wendell Goforth, who beat Bill Farguhan of Nocona for a benth in the finals. George Cok had lost to Farguhan the opening night on a very close one. Herschel Wortham was knocked out by Billy Hollings-1104 Sixth St. Wichita Falls, Tex. worth in the first round of their took Goforth in the initial stanza battle. Hollingsworth, the champion of their Sat. night finals fracas. Don Hubbard won a close decision over team mate Charles Tice cision over team mate Charles Tice in the middleweight division and went on to hammer out a decision over Nocona's Ray Hargrove in the championship tilt. Charles Kellogg met Seymour's 265 lb. Bob Miller in his first fight and by virtue of left jabs won a split decision. That same left jab brought him through in the finals against 200 lb. team mate Dickie Rast who had earlier won decisions over Seymour's R. B. Dippre and Nocona's Larry Smith by default. ### **Christian** Science

### Entitled

Christian Science: Magnifying God in Prayer

by

Earl E. Simms, C.S. of Austin, Texas

Member of the Board of Lectureship of The Mother Church, The First Church of Christ, Scientist, in Boston, Massachus

Delivered at Midwestern University Auditorium, at 3:00 o'clock, Sunday afternoon, January 31, 1954, under auspices of the First Church of Christ, Scientist, of Wichita Falls. Texas.

#### The lecturer spoke substantially as follows:

Standing in the city of Jerusalem one day, I saw beyond its walls the Mount of Olives where Jesus retreated often for prayer and spiritual meditation. It may have been here that he delivered what we call the Sermon on the Mount, recorded in Matthew's Gospel. This Sermon, I am sure, is studied more often and by more people than any other portion of the Scriptures. Jesus' followers love every word of it. Do you wonder why? It is be-cause purer teachings of both Science and Christianity have never come from lips more spiritually inspired. Indeed, more exaited thoughts can never fall upon expectant ears.

So vital is this Sermon to one's spiritual progress in Christian Sci-ence that its beloved Discoverer and Founder, Mary Baker Eddy, says of it (Message to The Mother Church for 1901, p 11), "To my sense the Sermon on the Mount, read each Sunday without comment and obeyed throughout the week, would be enough for Chris-tian practice." Then she contin-ues, "The Word of God is a powerful preacher, and it is not too spiritual to be practical, nor too transcendental to be heard and understood."

Quite property, then, genuine students of Christian Science seek not to digress from the fundament tals of this Sermon in their daily work and conversation any more than they would deviat from the absolute and scientific spiritual methods of healing the sick as tausht in Christian Science

The Christian Scientist accepts and studies the King James Ver-sion of the Scriptures as authentic and inspired. To him the Bible is a sacred book. His purpose is to un-derstand its spiritual truths, which lift humanity out of disease, sin, and death

shed it as one of the forever textbioles in Christian Science. It is ive, full place in every Christian Science church service. She says of her discovery of Christian Sci-ence (Scance and Health, p. 126): The Bible has been my only authe straight and narrow way of Truth." She further says, "and I have found nothing in ancient or

and hope, happiness, and love made to flower in the place of sickness, despair, and discourage-

sickness, despair, and discourage-ment as a result of reading her book, 'Science and Health with Key to the Scriptures.'" Indeed, it was what her discov-ery was doing for humanity that gave this intrepid Christian Leader. Mary Baker Eddy, the courage to build her church upon the Rock (the healing Christ) against which the gates of hell shall not prevail. Indeed, she so built her church that you may be sure the gates of sin, disease, and death are not pre-vailing against it, but are definitely crumbling in the face of its Christly ministrations

### The Lord's Prayer

My friend, do you seem at pres-ent enmeshed in the webs of con-fusion, fear, sin, and disease? Are you at a loss to know which way you at a loss to know which way to turn? Do you desire above all else to know how to pray, how to approach God, the Giver of all and approach God, the Group of an approach God, the Group of a solution of the dis-ciple who pleaded, "Lord, teach us to pray" (Luke 11:1). Jesus at once warned his disciples against many false methods of prayer. Then he gave what we rightfully call the Lord's Prayer because he gave it; and, equally important, it was the way he himself prayed Could he have given any but his own method of prayer? It was effective for him, hence he knew it would demonstrate God's tender love, His goodness, presence, and power, in the experience of all who prayed it understandingly, humbly, and fer-vently. This prayer of Soul, though entirely spiritual in nature, covers every human need.

The first four statements of our Lord's Prayer are clearly intended as magnifications of God; while the last three statements are assurances of what He does for man Spiritually interpreted, this prayer destroys ignorance of God. Indeed, it magnifies Him. The diligent Christian Scientist spiritually praye verbating the Lord's Prayer prays verbatim the Lord's Prayer daily However, he employs it many more times each day in its infinite, all-inclusive sense. Our Master said, "After this manner therefore pray ye" (Matt. 6:9); he did not say, "Confine yourself to these words." Surely, effective prayer, prayer that heals, is not stereotyped or ritualistic but is spontaneous, original, individual. Such prayer heals, regenerates, and saves. Jesus declared, "When thou prayest, enter into thy closet, and when thou hast shut thy door, pray to thy Father which is in secret; and thy Father which seeth in secret shall reward thee openly' (Matt. 6:6). It is the heart and not the lips which prays in secret and is rewarded openly! So in prayer the Christian Scien-

tist closes the door of his consciousness to the false testimony of the physical senses. He refuses to see or entertain any thought of anything that is unlike God. In-deed, he closes his lips and silently pleads, that is, he affirms God's allness—His all-power, His all-intel-ligence, His everywhereness. One can readily see that this prayer does not petition God to be God. It does not plead with God as one pleads with a corporeal mortal. Rather it knows, understands, Him to be good, to be merciful now and forever. It acknowledges that here and now He exercises His authority and love as the Father-Mother

Now, my friends, let us explore together, petition by petition, this matchless prayer and thereby mar unde its healing and spiritual nature Surely we shall then feel here and now its heavenly influence and healing power in every fiber of our being. Recently I heard in a Wednesday testimony meeting in a Christian Science church a person tell of the complete healing of fear, fever, and pain by praying the Lord's Prayer with its spiritual in-terpretation given in Science and Health (pp. 16, 17). Here Mrs. Eddy quotes first the opening line the Christ, the Saviour of the world. The fatherhood of God was never a debatable question with Jesus Hence, he prayed, "Our Father which art in heaven."

Jesus, the human name of our Master, meaning Saviour, was given him through inspiration ex-pressed in these words: "And thou shalt call his name JESUS: for he shall save his people from their sins" (Matt 1:21) In hum n stat-ure he appeared to be a person just like you and me: yet spiritual comprehension and understanding reveal him as the highest human corporeal concept of God's idea He rebuked sin, destroyed disease. and thereby brough, to light man's immortality In this capacity he fulfilled the office of Christ. "the divine manifestation of God, which comes to the flesh to destroy incarnate error" (Science and Health, p. 583). Indeed, the Messiah, Im-manuel, or God with you and me, is the Christ, Truth, operating in our consciousness, destroying error and establishing harmony as the forever fact of being.

#### "Hallowed be Thy name. Adorable One."

The word God is the greatest of all words. It is complete in itself; hence, we do not compound or connect it with any lesser words! To do so would be to take His name in vain To you and me, God is Allin-all. He is infinite, divine, su-preme, eternal good We sanctify His name. We hold it sacred and blessed; we keej it pure and unadulterated in our hearts Indeed, the word "hallowed," stemming from the Anglo Saxon "halig," means holy, blessed, and conse-crated. Rightly, then, we have the Christianly scientific unfoldment of "Hallowed be Thy name" as sim-ply "Adorable One." It is interest-ing to note that the term "adore" in its pure and original sense can be applied only to Deity. It means to speak or act in prayer, to admire greatly, to pay honor, to show reverence for. In Christian Science there is one God only. Hence, there can be no god before, after, or equal to the one and only God, the

Soul or Essence of all being To the inquiring thought of Moses, God said, "I AM THAT I AM." Here is a definite and inspired name for Deity. Now man is not God, but is God's image and likeness. The true being of man is spiritual and reflects God. There-fore man cannot say I AM to any-thing that is unlike God. So then man can never truthfully say I am sick, I am tired, I am discouraged, unhappy, or in lack, because no such thing is true about his divine Principle, God. On the other hand, you may affirm of your true being, "I am Godlike and Christly, hence I am happy, I am joyous, and I am free, because God made me so and preserves me in my original state of perfection."

### "Thy kingdom come.

Thy kingdom is come; Thou art ever-present."

The Scripture declares, "In the beginning God created the heaven and the earth" (Gen. 1:1). Obvi-ously, heaven and earth, God's creation, are not 'two widely separated creations, one spiritual and eternal and the other material and temporal, as is commonly believed. Originating in and emanating from Spirit, heaven and earth are spiritual, perfect, and eternal. Earth in its genuine and real sense is a compound spiritual idea of God; while heaven also expresses the nature and the presence of God. Heaven and earth, God's kingdom, spiritdence of the divine Mind or God and are not outside of man, your real being. Jesus said, "Behold, the kingdom of God is within you" (Luke 17:21). The kingdom of God in you is the Christ-consciousness revealed in Christian Science. This Christconsciousness is attainable here and now. Truly, it is your real selfhood expressing action, healing sickness, destroying sin, and overcoming death. We can definitely win peace, harmony, health, and happiness by magnifying God, His kingdom, and His man here on earth. Our Mas-ter promised, "Fear not, little flock; for it is your Father's good pleasure to give you the kingdom" (Luke 12:32).

I recalled, from the Bible, how he said to Peter, "Thinkest thou that I cannot now pray to my Father, and he shall presently give me more than twelve legions of an-gels?" (Matt. 26:53.) Thereupon the Saviour, with incomparable compassion, forgiveness, and love, healed Malchus' ear. With a start, I exclaimed aloud: "What a victory! What a triumph! Love has conquered hate!" Does not our Master's experience here remind you of what our Leader says in Science and Health (p. 254)? "If you venture upon the quiet surface of error and are in sympathy with error, what is there to disturb the waters? What is there to strip off error's disguise?

"If you launch your bark upon the ever-agitated but healthful waters of truth, you will encounter storms. Your good will be evil stoken of. This is the cross. Take it up and bear it, for through it you win and wear the crown. Pilgrim on earth, thy home is heaven; stranger, thou art the guest of God."

Here, again, one may ask: "How can I gain a better understanding of God? How can I magnify Him?" Certainly to magnify God is not to change or move Him through flattery or exaggeration, but is rather to change our thought of Him from a material to a spiritual basis and to enlarge upon this concept.

Seeking to enlarge, that is magnify, his concept of God, one stu-dent while reading consecutive pages in the Christian Science textbook for forty-five minutes re-corded twenty-eight descriptive names for God The seven major synonyms for God, namely, Mind, Spirit, Soul. Principle, Life, Truth, Love, so prominently used in Christian Science, are found in the Bible either by s'atement or 'y implication The Scriptures also plainly define God as the only cause and creator. He revealed Himself to Noah as Saviour and Preserver To Moses he defined Himself as "I AM THAT I AM." To "lijah He was Provider; the ravens at God's command fed him by the brook Cherith To Elisha he was Healer, even Life itself. Witness the heating of Naaman of leprosy and the raising from the dead of the son of the Shunammite woman To Daniel in the lions' den and the three Hebrew children in the fiery furnace He was definitely Supreme Ruler, hence protector and guardian To David He was Shepherd, keeper, restorer And Isaiah de-clared (Isa 33:22), "For the Lord is our judge, the Lord is our lawgiver the Lord is our king; he will save us." Jesus affirmed and proved God to be Father, Truth, Love, Life, Spirit. The Discoverer and Founder of Christian Science reveals Him as incorporeal, infinite, divine, supreme Mind: Fåther-Mother; All-in-all; all-pow\_4; all-loving; all-wise; Almighty; the one Ego; Comforter: Supreme Being; Immanuel.

As we continue to study the Bible and Science and Health we shall find many more names for Deity, all of which help us to gain a broader and more infinite sense of His being and nature. Through this unfoldment and its application we are enabled to heal our-selves and others of fear, inhar-mony, and disease. For example, woman, a student of Christian Science, found herself confronted with what material medicine terms an incurable disease. She did not, however, have a physical diagnosis, which is considered unneces-sary and undesirable in Christian Science practice, nor did she resort to any material means. The condition seemed to persi her earnest prayers. Finally, when seemingly quite desperate, she de-termined, "From now on, I, shall refuse to think about anything but God, that is, His love, His goodness, His allness, and myself in His image and likeness." Said she: "For three days, during every wak-ing moment, I dwelt upon what Cod is and my relationship to Him. Nothing else was allowed to enter my thought. Suddenly I realized that I was free from pain, other symptoms had also disappeared, and I was completely and perma-nently healed." In her book "The First Church of Christ, Scientist, and Miscellany" (p. 210) Mrs. Eddy admonishes her followers: "Beloved Christian Scientists, keep your minds so filled with Truth and Love, that sin, disease, and death cannot enter them. It is plain that nothing can be added to the mind already full. There is no door through which evil can enter, and no space for evil to fill in a mind filled with goodness. Good thoughts are an impervious armor; clad therewith you are completely shielded from the attacks of error of every sort. And not only yourselves are safe, but all whom your thoughts rest upon are thereby benefited." forting effects that your magnifica-tion f God and man will bestow upon you and others here and now. For example, let us magnify God as Life What are Life's attributes or qualities? Obviously some of them are existence, activity, freedom, progress, prosperity, immor-tality, eternality, Logica'ly, then, since you are the manifestation of Life, your qualities are and must be the same Plainly you can have no opposite qualities, since only that which is true concerning God can be true of man

#### Mind Magnified

Can you conceive of God as Mind? I am sure you can As the first and only cause, God is Mind What originates with and ema-nates from Mind? Ideas Mrs. Eddy says (Science and Health, p. 475). "Man is idea, the image, of Love; he is not physique. He is the compound idea of God, in-cluding all right ideas; "Thus it is plain that God is the Mind of His idea, ma... Therefore instead of our using the divine Mind, as it of our using the divine Mind, as it seems, we reflect the divine Mind. Isn't it a glorious relief  $\rightarrow$  awaken from the hypnotic beliefs in a car-nal or mortal so-called usind and to realize that you reflect the quali-ties of the divine Mind? Therefore, you are wise, obedient, intelligent, alert. Knowing this, you express alertness and astuteness in your daily affairs. So when it seems necessary to make decisions, reach conclusions, or when a sense of conclusions, or when a sense of fear, confusion, or the question of which way to turn arises, then resist through denial, rejection, and repudiation the false suggestions of the human mind that you are inadequate. lack intelligence, or are not equal to the occasion. Then declare calmly but firmly your oneness with the one Mind, God. Maintain the divine fact that God is your real and only Mind and that this is the all known all wise this is the all-knowing all-wise Mind, which does not have to be made up or reach a conclusion. It knows all there is to know. Under Mind': direction you can proceed with confidence and assurance.

### Soul Magnified

Here, my friend, let me ask, Are you confronted with the errone-ous suggestions of inability to ex-press beauty | refinement, and press beauty do grace and learning seem be-yond your attainment? If so, then your resort, your comfort, your progress out of these conditions, may be sought in the unfoldment of God as Soul. Got is the Soul of man, and Soul is never in matter, in physicality. The physical senses are the material counterfeit of Soul. They do not therefore belong to man and cannot testify concerning him. Man's senses are spiritual; hence he is conscious only of God and himself as God's image. The attributes of Soul, namely, beauty, graciousness, attractiveness, culture, refinement, and holiness, are yours to claim and be in contradiction and rejection of their materially mental counter-feits which are not in God's plan for you.

### Spirit Magnified

Gc1 is All-in-all. The allness of God is brought out in understanding Him as Spirit. Jesus declared, "God is a Spirit: and they that worship him must worship him spirit and in truth" (John 4:24). In Christian Science, Spirit is divine substance. It is all good. Plainly, only Spirit can be perfect, omnipresent, omnipotent, all intelligence, omniactive, and eternal. Thus we see that sub-

Here again one observes how prayer as taught in this Science supersedes the ordinary method of petition. , Truly scientific silent prayer is based on an earnest desire for goodness and spirituality. It must be fervent It must be importunate. Therefore, it never cases to affirm God's ever-present portunate. love, goodness, and power and man's indestructible relationship to Him The Christian Scientist persists in this prayer until the spe-cific claims of fear, sin, discouragement, and sickness abate and har-mony reigns. Plainly such scien-tific prayer does not reconcile God to mortals but lifts mortals out of their false beliefs in sin and sie<sup>1</sup>-ness—belief in a power opposed .0 God.

### "And forgive us our debts, as we forgive our debtors. And Love is reflected in love."

Sin is intentionally failing to obey the Commandments or to live up to our Saviour's Sermon on the Mount. Sin is forgiven only when repented of and forsaken, and not otherwise. Reformation must fol-low repentance. The sins one cr m-mits igainst his fellow man, that is the hatred, dishonesty, reven; and injustice one erroneously holds, must be replaced with love. forgiveness, and understanding.

"Love is reflected in love" is a powerful, unchanging la v of G d. Zealously standing on the bulwark in our Lord's Prayer, "Forgive us our debts as we forgive our debt-ors," living it in daily life, we are assured of the operation of this divine law

A woman had a physical diffi-culty She called on a Christian Science practitioner. During the course of the visit, they prayed the Lord's Prayer together with an understanding of its demonstral e power. When they came to this portion of the prayer just referred to, a family s tuation that had been disastrous in more ways than one came to her thought. There was an inheritance of house and land which actually should have come to her. However, a sister took it. This "aused a breach between them that existed over a number that existed over a number 'I years This woman said that though she had prayed the Lord's Prayer daily, it was only at this moment that it came to her what she must do. She aid: "With the help of the practitioner I went about to forgive my sister and prayed that she much forgive me. prayed that she might forgive me. Indeed, I cleared my thinking re-garding he, and, believe me, it was no easy task. I refused to admit that God had made anything but perfect man. I denied and repudiated every suggestion of dishonesty, unfairness, injustice, hatred, and revenge. I held that these were lies about man, hence were no part of my sister or me replaced them in my thought with the attributes of God which man expresses, namely, love, forgiveness, compassion, righteousness, and purity." She continued: "Within a comparatively short time I realized that the untowerd physical condition was healed. In addition I had a letter from my sister acknowledging that the inheritance was rightfully mine an that she was taking legal steps restore it to me." Solomon sa in t well, "As in water face answer in to face, so the heart of man, to man" (Prov. 27:19). "And lead us not into temptation, but deliver v from evil; And God leadeth us not into

temptation, but delivereth us from sin, disease, and death." Most of you are perhaps already

teachings that maintain that Cod

tempts His children to sin and then

punishes them for yielding to the temotations which He Himself has set before them. Webster says, in his definition of "tempt." conside

ing it as "to put to trial or test, archaic." Also in his definition "tempter" he offers no intimat

familiar with prevalent

found motions in ancient or found my own, except the teach-ings and demonstrations of our great Master and the wyes of prophets and ap atles."

### The Discoverer and Founder on **Christian** Science

The discovery of the Christianly scientific method employed by the Master in healing the sick and diseased and regenerating the sinful was not by chance.

Following an experience where she was healed instantaneously of the effects of an accident by reading an account in Matthew's Gos-pel of a healing by Jesus, Mrs. Eddy retired from society. As time went on she recognized the mission for which God had been preparing her since childhood. The ensuing three years she devoted to conse-crated study of the Scriptures. Days and nights of earnest, unselfish prayer revealed to her the scientific and divine nature, hence the practicality of Jesus' mission. Through Christlike love for God and man, coupled with self-sacri-fice and self-abnegation, exceeded perhaps only in the life of her Exemplar, Christ Jesus, she was divinely led to write her textbook, 'Science and Health with Key to the Scriptures," a book that has had wider circulation than any other religious textbook with the exception of the Bible. It is most interesting that the last one hundred pages of this book, while not written by the author, are given over to testimonies of healing of disease and discord of every sort accomplished by reading the book alone

My friends, let us think for a moment on Mrs. Eddy's situation at this time, that is, when she began receiving letters brimming with gratitude and love from persons she had never seen or known, who had been healed and who in turn had heated others through reading her book. "Surely," as one writer puts it, "one other than the God-inspired would have been completely swept off her feet with the holy realization that devastat-ing diseases, bad habits, and sinful thoughts were being destroyed, of the prayer, "Our Father which art in heaven."

This she spiritually interprets in the following beautiful words:

### "Our Father-Mother God, all-harnious.'

Most comforting it is to know and underwand God as our Father-Mother, hence ourselves as His children. Truly, this fact estab-lishes the brokerhood of man. Those who do the will of God are even his mother, said Jesus. Then insist, that is, be importunate in your acknowledgment that God is your Father-Mother, that you are an heir of God, a joint heir with Christ, and thus feel His love and tender care. tender care.

We all agree, I am sure, that there is only one God! The Scriptures define Him as the great I AM. Life, Truth, Love, Spirit; they imply that He is Mind, Soul. Plainly, God is the one and only creator of man, including the uni-verse. As Father-Mother of all, He must be and is the divine Principle, the source, the foundation, the origin of all existence. It is recorded in the first chapter of Gene-sis, "And God said, Let us make man in our image, after our like-ness: and let them have dominion. So God created man in his own image... And God saw every thing that he had made, and, be-hold, it was very good." Thor-oughly cognizant of the present reality and power of these spirit-ual facts, the beloved disciple John exclaimed, "Beloved, now are we the sons of God" (I John 3:2).

#### Jesus the Christ

The spiritual nature and origin of our Master exemplifies God as the Father-Mother of man. Jesus was born of a virgin; he loved, respected, and obeyed his mother, but be did not agree that the hu-man bonds could be evidence of either real motherhood or sonship. he beloved Mary expressed in manifold ways the purity, tender-ness, love, and assurance of a spir-itually-minded mother. Indeed, she was conscious of Jesus' spirit-ual origin. Indubitably, she knew and felt his mission to represent

#### "Thy will be done in earth, as it is in heaven.

Enable us to know,-as in heaven, so on earth,-God is omnipotent, supreme."

In his struggle in Gethsemane, when the human challenged the divine in him, Jesus prayed, 'Father, if thou be willing, remove this cup from me: nevertheless not my will, but thinc, be done" (Luke 22:42). As did Jesus, so does Christian Science repudiate and silence the human so-called will. It magnifies God's will. To acquiesce in the belief that human will or self-will represents strength, courage, and right determination is erroneous; while to prayerfully consider, "Is this what Love would have me do?" is to demonstrate God's will here on earth. Our aster's Gethsemane experience a complete surrender of the fundation to the divine. Defining (p. 586) talls it, "Patient woe; the meeting no is to the divine: love maining love." Sponse, but still re-

I found it most inspiring one day to visit the garden of Gethsemane. Presently I found myself mentally looking up the mountainside. In trees the soldiers and servants of the high priest and Phariase be-searched for our Saviour. They searched for our Saviour. Sad denly they came upon him as has knelt in prayer. I saw the masquerading Judas craftily bestow the deceitful kiss. At that moment Malchus stepped forward and seized Jesus. The impetuous Peter, standing by, unsheathed his sword and struck off Malchus' ear. Ex-emplifying the Christ, as he had done many times before. Jesus bade Peter put his sword in its place, 'reminding him that they who take the sword shall perish by the sword. Jesus had none of this world's weapons. He needed none.

### Man Magnified

Perhaps you are wondering if we have considered all the names for God. Indeed, we have not. God is infinite; so the names for God are infinite. Now let us consider man. Can we magnify man? Most assuredly w can. We must magnify man if we are to break the bonds of limitation, the beliefs of the flesh, that is, the erroneous concepts of body that would keep us earthbound. First of all, let us grasp firmly the basic fact concerning man, your true selfhood and mine, set forth in the first chapter of Genesis, where man is said to be made in the image and likeness of God, infinite perfection.

So then man in Christian Scince is the precise image of God. He is the exact likeness of his divine Principle. He is the offspring of Soul; the idea of Mind; the witness of Truth; the manifes-tation of Life; the reflection of Love; the expression of good; the creation of the only creator; the effect of the first cause; the child of his Father-Mother; the loved of Love. In these Christianly scientific names for man, your true being, there is nothing material, Inite, sick, sinful, or mortal. Then in inust agree that man is not

### Life Magnified the grating and impress upon you

spiritually mental. Divided into two syllables the word "substance" means "understand." Then your originality, your real nature and being, your inspiration and spontaneity, are in Spirit and not in the material senses. So, my friend, hold steadfastly to the fact that God is Spirit and that you are spiritual. Understand this, and you will realize that it is as impossible for you to be material, limited, and mortal as it is for your divine Principle to be so.

"Give us this day our daily bread; Give us grace for to-day; feed the famished affections."

The Psalmist sang, "This is the day which the Lord hath made; we will rejoice and be glad in it" (Ps. 118:24). The author of Science and Health, in the opening words of its Preface, assures us (p. vii), "To those leaning on the sustaining infinite, to-day is big with blessings."

The daily bread to which Jesus referred, rightly understood, is the grace of God—Love's gentle, supporting influence and direction. Mrs. Eddy saw, a: did Jesus, that the innate tendencies in individual consciousness to Christliness and goodness secure the divine afflatus. God's loving sustenance. These delicate affections must be fed daily through magnification of God as Life and yourself as the evi-dence, the unfoldment, of Life, until they appear as your normal, ever-operative, ever-active nature. Jesus' prayer was not for things material. He prayed for the things of the Spirit. In Christian Science, prayers are not for wealth, fur coats, or automobiles, or even for material health. The Christian

Scientist follows his Saviour's ad-

monition: "Take no thought, say-ing, What shall we eat? or, What shall we drink? or, Wherewithal shall we be clothed? ... But seek ye first the kingdom of God, and his righteousness; and all these things shall be added unto you" (Matt 6:31, 33). Daily supply does come in response to spiritual men-tal work in Christian Science. My friend, have you found your-My friend, have you found your-self petitioning the Father for the things which shall be added in-stead of praying for more spiritual light and unfoldment whereby you may better understand God and His righteousness? Indeed, pray for that Mind to be in you which was also in Christ Jeeus Pray for for that Mind to be in you which was also in Christ Jesus. Pray for the 'unselfed love and humility which actuated his every word and deed, then you will feel the grace of God, that holy divine influence, inspiring and directing your hu-man aspirations and efforts into healthy progressive and ergent

healthy, progressive, and prosper-ous channels.

that the tempter might be God, but associates it definitely with the devil, which Jesus declared to be "the liar and the father of lies." Temptation through being enticed to do evil is not the divine plan for you and me. The belief that God knows evil and deals in sin or the temptation to have you commit it is a basic error in theology, and Christian Science corrects it. Remember, God knows you only as you really are, as His perfect, spiritual creation, forever unchanged and unfallen. Hence He does not tempt you. On the contrary, He is ever at hand to lovingly and mercifully deliver you from the temptations to sin, to be sick, and die. The worker for God avoids even the appearance of sin; he refuses to be a party to sin or in a party where sin is in evidence. "For Thine is the kingdom, and the power, and the glory, for-

ever For God is infinite, all-power, all Life, Truth, Love, over all, and All."

The kingdom of God is infinite, that is, without limitation; it is all-inclusive. To be so it must be and inclusive. To be so it must be and is spiritual. All power belongeth unto God. - Omnipotence is the name for Deity. God is All, and is over all. There cannot be more than all. God, the one Ego, is do preme. He knows only Himself and His perfect spiritual creation, man, including the universe. Then all honor, praise and glory belong all honor, praise, and glory belong to Him. Often the Scriptures tell us that the acceptable day and year of the Lord is here, that is, that now is the time to work out our salvation, that now is the time to accept the spiritual teachings of of the Lord is here, that is, that the Science of Christianity and demonstrate the kingdom of God here on earth, thus proving the practicality of Paul's statement, "Behold, now is the accepted time; behold, now is the day of salvation" (II Cor. 6:2). Jesus de-elared that the kingdom of God is in you and me in our consciouts. clared that the kingdom of God is in you and me, in our conscious-ness. This kingdom of God in you and me is our present awareness of God and His Christ. Then the kingdom of God, divine Love, is not yet to come. It is here. Man, the son of God, is not approaching freedom and dominion. These are his now. Man then is not going to be saved. He is saved. You and I my friend, and not going to heaves.
