Wooden Nickels to Publicize County's 75th Year Jubilee

There is an often used expression "Don't take any wooden nickels" usually voiced when taking leave of a close friend. However, such wooden disks will actually soon make their appearance in Wichita county stores and will be passed out as "coin of the realm," according to Don Wilson, chairman of the novelties committee for the Diamond Jubilee celebration.

"These attractive souvenirs will commemorate the 75th anniversary of the founding of Wichita county," Wilson stated. "The committee will release three different issues of the wooden nickels.

"These collector's items are circular in form and about the size of a silver dollar, featuring as a central motif a buffalo-head, like the old US five-cent piece.

"The Jubilee committee will sell the wooden tokens directly to the various merchants and business firms, who will, in turn, put them into circulation just as they would an ordinary nickel by handing them out in change to their customers.

"The total quantity of the entire three issues, each of which will be printed in a different color, will

New Baseball Diamond Nearing Completion; Evening Lions Honor Will Burnett as "Mr. Baseball"

Evening Lions club paid honor to a grand person of Iowa Park, Tuesday evening at their directors meeting held in the Metz Coffee Shop private dining room, by suggesting the name "The Will Burnett Ball Field" for the new baseball park in the new City Park.

Will Burnett, or Mr. Bill, as so many friends call him, has been interested in baseball here and has given much time and money for many years to support the game.

He and his wife Maggie Denny Burnett are pioneers of this area. They have been residents here since childhood and have always been interested in the youth of Our Town and given generously to all projects.

Lions plan to meet Saturday and finish leveling the playing field

Voting Machines Are Sought for County; Petitions Circulated

A committee from the Wichita Falls Jaycees, working with Col. Floyd W. Taylor, former chairman of the Democratic executive committee for Wichita county, is circulating a petition which will call upon the Commissioners Court to call an election for the purpose of issuing \$225,000 bonds. With this money the county will buy 120 voting machines to be used throughout the county in all future elections.

Advocates of the use of voting machines point out seven advantages:

1. Voting is easy and speedy
2. Secrecy is assured the voter
3. There are no spoiled ballots

The count is mechanically accurate

5. The results are ready when the polls close
6. There is a permanent record
7. Election expenses are reduced

In discussing the bond issue to be voted on and the increased taxes the bond issue will authorize, Taylor pointed out to a group of Iowa Park businessmen Tuesday that the average cost to home owners in this area will be \$120 a year. The bond issue will be retired in five years, and the machines are expected to last indefinitely.

Machines put in use in 1935 are still functioning perfectly.

Mrs. Hamilton Is Heart Victim

Mrs. Lydia Ellen Hamilton, 69, died Wednesday morning in a Wichita Falls hospital after suffering a heart attack at her home earlier that day.

Funeral services will be conducted Friday afternoon, March 22, at 3:00 in the Church of Christ, with Ray Marcum, minister and Boyd Taylor and A. D. Neal, both of Wichita Falls, officiating.

Burial will be in Highland cemetery under direction of Tanner Funeral home of Iowa Park.

Born in Van Buren, Ark., Oct. 2, 1887, daughter of Mr. and Mrs. Nath White, she was married to George H. Hamilton in Kirkland (Tex.) on March 4, 1910.

The Hamiltons moved to Iowa Park about 40 years ago. Mr. Hamilton died last year.

Surviving are five daughters: Mmes. C. C. Hall, Jack Parrish and Lee D. Martin, all of Odessa, R. E. McComie of Andrews, Geraldine Gregory of Iowa Park; five sons Walter of Vancouver, Wash., Elmer of Plainview, Oliver of Greeley, Colo., J. R. of Odessa, Leorne of Iowa Park; two sisters Mrs. Emma Powell of Childress and Mrs. Elzbie Gregory of Amarillo; three brothers Nath White of Abilene, Lee White of Spur, Houston White of Claude; 25 grandchildren and one great-grandchild, Donald Eugene Kueger of Greeley.

Palbearers will be M. L. Smith, Ernest McCormie, B. L. Bradford, Rex Lehman, K. P. Caldwell, Aft Rogers.

Mrs. J. W. Haynes of Murfreesboro, Tenn., grandmother of Mrs. Kenneth Scott, died Monday. Mr. and Mrs. E. H. Thomas, parents of Mrs. Scott, and daughter, Mr. and Mrs. Elwood Luedtke of Vernon came through Iowa Park enroute to Tennessee, Sunday night and visited with Mrs. Scott.

Mr. and Mrs. Bob Pace of Wichita Falls are announcing the birth Tuesday morning, March 19, of a son Robert Kelly Pace Jr. Proud grandparents are Mr. and Mrs. T. J. Pace of Iowa Park.

Mr. and Mrs. W. E. Scott of Vernon visited Wednesday night with their son Kenneth and family.

Mr. and Mrs. R. N. Watson had as guests last weekend their daughters and son and families: Mr. and Mrs. H. M. Orsborn of Charleston, Ark.; Mrs. Hank Cole and sons Bill and Bob and David of Fort Smith, Ark.; Mr. and Mrs. Lester Watson of Iowa Park.

Gibbons Brubaker was dismissed Monday morning from Wichita General hospital. He is recuperating from surgery.

For Your Beauty

Mrs. Jimmy Miller (Jean) now has the beauty shop that formerly was operated by Mrs. Essie Johnson at 511 Wall street. Known as the Beauty Box, the shop is owned by Mrs. Gilbert Steele.

Jean will have the Beauty Box open Tuesdays through Saturdays from 8:30 a.m. to 6:00 p.m. Appointments can be made by phoning 6621.

Mrs. Thompson Dies after Stroke

Funeral services will be conducted for Mrs. Mary Etta Thompson, 70, Friday morning, March 22, at 10:00 in the First Baptist church.

Rev. George Shropshire of Faith Baptist church, and Rev. Homer Thompson of the host church and Dr. Spurgeon McClung of Wichita Falls and formerly of Iowa Park, will officiate.

Burial will be in Highland cemetery under direction of Tanner Funeral home. Palbearers will be R. R. Brubaker, Orvil Deary, L. C. Hill, Earle Denny, Fred Hays and Pat Kingcade.

Born Nov. 22, 1886, in Trinity county, daughter of Mr. and Mrs. Joseph Ben Bell, she came to Iowa Park in 1891 with her parents. A few months later the Bell family moved to the John Pace farm across the Wichita river. In 1894 they moved to where Valley View school is now located.

Mr. Bell bought a farm two miles south of town and in 1901 the family purchased a home in the southeast part of Iowa Park.

She was married to William Edward Thompson in Iowa Park on Oct. 1, 1905, in her parents' home.

Mrs. Thompson was the first employee of Levine's department store of Wichita Falls, which was then located in Iowa Park, some 30 years ago.

She had been a member of the First Baptist church over 50 years and teacher of the TEL class for 30 years, before becoming a charter member of Faith church.

After being in ill health for several years, Mrs. Thompson suffered a stroke Tuesday, March 12, and was admitted to Wichita General hospital, where she died Wednesday evening, March 20.

Though confined to her home most of the time in recent years, she enjoyed her friends' visits and the telephone and was greatly concerned about the welfare of her many friends.

She is survived by a son J. C. Thompson of Fort Worth; two daughters Mrs. Kenneth Davis of Wichita Falls and Mrs. Roy Wood of Titusville, Fla.; a brother John T. Bell of Iowa Park; a sister Mrs. Lula Morgan of Dallas; seven grandchildren, 1 great-grandchild and several nephews and nieces.

Be Sure to Attend Lions Club's Annual Minstrel, Specialty Show

Hey! There! It's that time again! The Noon Lions club is about to present the annual Dixieland Follies!

Everybody in the area can look forward to two nights of fun next Thursday and Friday in the school auditorium.

Lover-Boy Richard Hill will be on hand again to serve as Mr. Interlocutor. He will be straight man for the eight endmen whose capers and jokes on local citizens will keep the audiences in stitches.

Look at this line-up of comedians and you'll know you don't want to miss it:

Buck Voyles as Steam Boat Keith Swim as Wash Tub R. B. Faulkner as Flap Jack Rollins Woodall as Float Sam Peanuts Wilson as Tug Boat Dan Barnes as Gum Shoe Royce Brown as Flat Iron Archie Bryant as Jet Sam

The specialty numbers are earnest rivals of Tennessee Ernie's Ford show. Several faithful old standbys will be back this year, along with some new personalities.

Among them are:

- Milo (Bones) Hunt of Holliday
- A group of high school twirlers from the Hawk band
- Richard and Carole Cook of Harrold with their Rock 'n' Roll music. Come on kids; hear them and you'll forget about E. P.!
- Cletus and Marilyn Vaughn will break your hearts with their "crying" voices.

Kay Lynn Johnson and Bobby Houston lay Gene Kelley in the shade with their tap dances. They will also have a group of other tap dancers with them.

Then there's that little timid Royce Brown with his slim finger to sing a way into your heart.

Johnny Lee, Jerry Beggs and Jimmy Jones will be here with their dance band.

Supporting cast will include the wives of all the members.

Morris Jacks is chairman of the ticket committee. Directors of the Emmy Show of the Year are Mesdames Harriett Coppock, Thelma Gay, Mary Miles Mixon.

Attend both nights and you won't miss a thing. It's supposed to be the same show, but it never turns out that way. Come early and wear loose clothing so you won't bust any seams.

As the kids say? "See ya Thursday and Friday of next week."

Farmers Union speaks

Alex Dickie Jr., president of Texas Farmers Union at Denton, was recently elected to the executive committee of the National Farmers Union in a meeting of the board of directors of that organization in Denver.

The executive committee is the governing body of NFU, which is composed of over 700,000 farm families in 30 states.

Dickie is serving his third term as president of TFU, which is the fastest growing farm organization in Texas and now has a voting strength of approximately 18,000 members.

Salvation from past sins is definite, complete, and certain. Luke 24:47 serves as a commentary on Mark 16:16, thus making the salvation there equal to remission of sins. When one is saved from past sins, being redeemed by the blood, he is born of water and the Spirit and added to the body of the redeemed.

We are accused of teaching that a Christian must live a perfect life, obey Christ perfectly in order to be saved eternally in heaven. We must walk in the light to keep cleansed by the blood (1 Jno. 1:7). We must pray as Jesus taught and ask God to "forgive us our trespasses, as we forgive those who trespass against us." (Matt. 6:12-15). It is not God's will that anyone sin, but "if any man sin, we have an Advocate with the Father, Jesus Christ the righteous." (1 Jno. 2:1).

Naaman had to dip seven times to be healed. One dip short would not have been obedience, and would not have brought the blessing of being cleansed from his leprosy. (II Kings 5). One must hear, believe, repent, and confess and be baptized to obtain the blessing of forgiveness of past sins. We are then added to the family of God. No one will get to heaven on the grounds of perfect obedience but on the merits of the grace of God and the blood of Jesus, in addition to humble and best efforts to serve God. adv

Reflections from the Bible

By Ray Marcum, Minister Iowa Park Church of Christ

Many ask: "If the Old Testament was nailed to the cross, why then can we not lie, steal and violate all the ten commandments?" The answer is easy: Because all sin is condemned in the New Testament.

Salvation from past sins is definite, complete, and certain. Luke 24:47 serves as a commentary on Mark 16:16, thus making the salvation there equal to remission of sins. When one is saved from past sins, being redeemed by the blood, he is born of water and the Spirit and added to the body of the redeemed.

We are accused of teaching that a Christian must live a perfect life, obey Christ perfectly in order to be saved eternally in heaven. We must walk in the light to keep cleansed by the blood (1 Jno. 1:7). We must pray as Jesus taught and ask God to "forgive us our trespasses, as we forgive those who trespass against us." (Matt. 6:12-15). It is not God's will that anyone sin, but "if any man sin, we have an Advocate with the Father, Jesus Christ the righteous." (1 Jno. 2:1).

Naaman had to dip seven times to be healed. One dip short would not have been obedience, and would not have brought the blessing of being cleansed from his leprosy. (II Kings 5). One must hear, believe, repent, and confess and be baptized to obtain the blessing of forgiveness of past sins. We are then added to the family of God. No one will get to heaven on the grounds of perfect obedience but on the merits of the grace of God and the blood of Jesus, in addition to humble and best efforts to serve God. adv

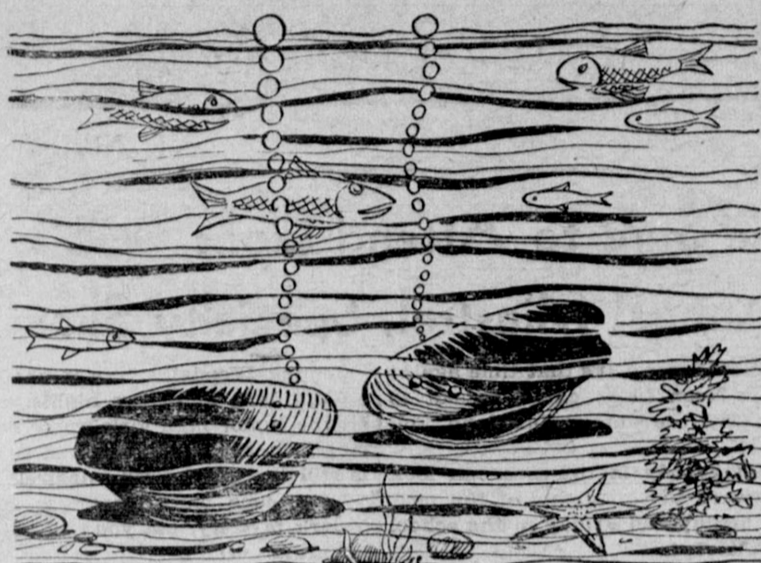

GIVE YOUR DOCTOR A CHANCE

400,000 Americans, leading active lives today, are living proof of the fact that cancer can be cured if detected in time. Give your doctor a chance to give you this protection by having a physical checkup every year of your life. This should include a chest x-ray for men; for women, a pelvic examination. Make it a habit... for life.

Seniors

Sue, daughter of Mr. and Mrs. E. L. McDonald, was born in Iowa Park on Oct. 15, 1939. She has attended school here all 12 years. In grade school she was a member of Blue Birds and Camp Fire girls. She was a member and officer of FHA and her Soph year was Who's Who in FHA. She has made the honor roll consistently and is one of the eight top honor students of the Sr class. Sue is treasurer of the class. Member of the Methodist church, she sings in the choir, attends Sunday School and is an officer in MYF. Plans to attend NTSC and major in elementary education.

Hershel Randall (Potts) Pierce was born to Mr. and Mrs. H. Pierce on Sept. 8, 1939. He has received his schooling here. He was salutatorian of the 8th grade. Potts was a member of football, basketball and baseball squads for four years. He received honorable mention all-district 2 years in football and was named on the 2nd team all-area. Besides sports, Randall is active in other groups. As a Jr he was named most popular boy in the class and received Who's Who in sports. This year he got Who's Who in sports and in speech and Best All Around. He will enter the district meet in declamation. He hopes to win district in baseball this year. Future plans are college and to stay single.

Harvey, Gerald, Darlene and JoAnn are on the tennis squad this year. Good luck Monday when you have your tournament.

The Sr play was quite a success. Thanks, awfully, to everyone who came or helped in any way. Janice Wilson is band queen. Congratulations, Janice. See you next week.

—JODY

BUSY BEES VISIT "LITTLE RASCALS" PROGRAM

Mrs. L. P. Adams, Mrs. Sarah Haskins and Mrs. Bill Fowler took the Busy Bee Blue Birds to Wichita Falls recently to appear on television during the Little Rascals program. Blue Birds were Trudy Cofer, Ysindra Smith, Doris Schell, June Doyle, Diane Fowler, Sharon Adams, Sharon Kay Davis, Rose Mary Haskins. Roy Wayne Adams and Barbara Fowler went along to see the fun.

Mr. and Mrs. W. K. Barron visited over the weekend with Mr. and Mrs. O. B. Barron at Jean.

Fireboys Study Tricks of Trade

Monday night at fire meeting the Iowa Park Volunteer Fire department made plans to begin a training course for all members. Andy Anderson, chief drill instructor of the Wichita Falls fire department, will conduct the training course. He met with the boys and outlined the 10-week program.

Some of the things discussed were the set-up of the department, equipment and members. Andy impressed on his listeners that a plan of attack is necessary on every fire of any size, and that proper planning can go a long way toward saving property and lives.

Proper hooks and handling of equipment came in for a short session, and Andy promised there will be plenty of work to do in learning proper fire-fighting techniques. He said emphatically that only by participation can fire-fighting be learned, and that there will be no watchers from the sideline.

Use of all equipment available is on the agenda, and tracking and tracing of causes will be studied. Chief Oscar Singleton urges every member of the local fire department to attend all the sessions, not only for the good of the department, but for their own good. Mr. Anderson is giving his time without charge.

Recent guests in the home of Mr. and Mrs. W. H. Willeford have been Mr. and Mrs. C. A. Bickford and son of Houston; their daughter Mrs. Argie Malone and a friend of Houston; Mr. and Mrs. W. A. Willeford and Mr. and Mrs. Earl Gilbert of Burkburnett; L. D. Willeford and family of Anarine; Mr. and Mrs. W. A. Harris and children of Fort Worth.

Mrs. Shirley Vessels and son Steve will join Mr. Vessels in Houston this week, where they will make their home. He is employed with Continental Oil company.

Mr. and Mrs. Sammie Shelton and son Shelby of Wichita Falls took Sunday dinner with his parents Mr. and Mrs. L. Shelton.

E. E. Ratcliff has been visiting with his grandparents Mr. and Mrs. W. H. Willeford, and left Wednesday for Perryton where he will continue his drilling operations.

NEW FARM PLAN URGED BY PATTON GETS BI-PARTISAN SUPPORT IN CONGRESS

A bill embodying the most comprehensive and all-inclusive family farm program ever to come before Congress was introduced in the House last week by Rep. Metcalf, Democrat from Montana.

The Metcalf bill (H.R. 6024) makes a completely new approach to the problem of bolstering and stabilizing farm prices and incomes (substantially in line with proposals outlined by NFU Pres. Jim Patton at the National Farm Institute in Des Moines, Iowa, in February).

The new approach is to make farm price and income supports essentially cost-free to the US treasury by enabling farmers to adjust their production and marketing to what can be sold in a prosperous national economy at fair prices.

This is exactly what every other basic industry is now doing. The automobile industry operates without governmental assistance; the output was cut in order to support increased automobile prices. The oil industry operates with the aid of powerful governmental help; oil output is controlled at less than half of capacity in order to support high prices.

Bi-partisan support for this new approach is indicated by a pledge by Rep. Laird, Republican of Wisconsin, that he will introduce a bill to establish a program for the dairy producers almost identical to that provided in the Metcalf bill for all farmers.

Laird has never previously been a strong backer of improved farm legislation. But in an extended House speech recently he endorsed a program calling for strict marketing quotas. Laird's shift may be indicative of more widespread willingness within the farm bloc to re-unite behind the new approach to farm legislation.

WSCS

Circle I of Woman's Society of Christian Service met Tuesday afternoon with Mrs. Fred Widmoyer. The lesson was on articles taken from the World Outlook under the leadership of Mrs. Glenn Miller.

Mrs. Scott Morris presented the devotion.

"Speech of Welcome to Missionaries" was given by Mrs. Arch Hughes. "What Missionaries Are Doing in Hiroshima and Iwo Jima" by Mrs. C. J. Simpson. "Report on New Missionaries" by Mrs. Fenton Dale. "Christ's Quest and Ours" by Mrs. W. M. Owens.

Others present were Mmes. Walter Willard, Richey Abernathy, Jay Laible, Elden Cole, Gene Lowrey. Mrs. T. R. Horine was hostess to Circle II in her home Tuesday morning. The program was led by Mrs. C. C. Robinson.

Mrs. W. F. George brought the devotion. "The Indian American" was discussed by Mrs. C. J. Thurber. "City Summer" by Mrs. S. L. Denny. "Community and Settlement Houses" by Mrs. W. E. Stockton. The group sang "America the Beautiful."

Others present were Mmes. E. B. Taylor, E. D. Shook, Gordon G. Clark.

Circle III met in the Methodist church Tuesday morning to complete favors for the Senior party. Mrs. Hilda Thompson and Mrs. Grace Hadley were hostesses to Mmes. Mary Clark, Ruth Sawyer, Ada Christian, Edith Willcutt, Mary Mixon, Julia Berry.

Linda Price call the meeting to order. We said our motto, pledge and prayer. Mrs. Nellie Cobb gave a demonstration on "Pudding-and-cake." After the demonstration, she handed out sheets on a contest for boys and girls in 4-H. The contest will be held April 27 in the Texas-Oklahoma Fair building. Mrs. Cobb wishes all 4-H boys and girls to enter.

CLARA CHURCH DEDICATES NEW PARSONAGE

Trinity Lutheran church of Rt. 1, Iowa Park (Clara) was privileged to dedicate its new parsonage in the name of the Triune God and to His glory last Sunday afternoon.

The Rev. Erwin Metz of Harrold was guest speaker using as theme "The House God Built." Pastor Louis G. Borlack, minister of the congregation, spoke the invocation and dedicatory prayers.

In addition to members of the church, many visitors came from Wichita Falls, Harrold, Vernon, Electra, Iowa Park, Burkburnett and other points.

Open house was held after the service, and the kind women of the congregation served delicious refreshments with coffee.

Mrs. Carrie Smith has returned to her home at 610 East Cash after a visit in Katy with her daughter Mrs. John Larsen.

Mr. and Mrs. Homer Blalock visited relatives in Graham last Sunday.

Texas Music Is Study Topic

Texas Composers' Day was the topic of an interesting study by Modern Music Study club of Iowa Park when members met Thursday, March 14 in the home of Mrs. Paul Zink, with Miss Mary Butcher and Mrs. Esther Thornberry as co-hostesses.

Roll call was answered by the following members, each giving the name of a Texas composer and a brief comment concerning his life and works: Miss Butcher, Miss Ethyle Kidwell, Miss Helen Reed, and Mmes. Charles Coppock, Robert J. Covington, Bill Curry, Otis Gay, Wayne House, Henry Jones, W. J. Lacy, Oscar Lochridge, Preston Pace, Gayle Park, James A. Sewell, Thornberry, C. Weiler, Marilyn Brown, Z. F. Dale and Zink.

After a discussion of Texas music by the leader, Mrs. Curry, she introduced the following program: Vocal solo, Mrs. Coppock, "The Tamale Peddler" by Mrs. Charlene Underwood.

A Tall Texas Tale, Mrs. Weiler. She gave some interesting true stories of the fabulous Neiman-Marcus store in Dallas and how it helped to make Dallas the Big D that it is. In connection with these stories she also played the record of "Big D" taken from the album of "The Most Happy Fella."

Piano solo, Mrs. Park, "Lovely Marianna" by Eitel Allen Nelson. Chorus, the club, "Bluebonnet Time," "Have You Ever Been to Texas in the Spring?" and "When the Work's All Done This Fall." Miss Reed displayed an original water color painting to illustrate each of these songs, which enriched the meaning and enjoyment of them.

Hymn of the Month, by Mrs. Sewell, "All Hail the Power of Jesus' Name."

In the business meeting the club voted to accept the resignation of Mrs. Joe Bob Tyler from the club, and to place Mrs. Lacy on the associate list.

With the singing of "Texas, Our Texas," the club adjourned.

—Mrs. Henry Jones, reporter

DAR Awards

Josette Hensley, IPHS senior, and her mother Mrs. Herbert Hensley, were among the guests who attended a luncheon recently in Wichita Falls, honoring six young ladies of the area. Hostesses were members of the Maj. Francis Grice chapter of Daughters of the American Revolution.

Josette was one of the six who received the 1957 DAR Good Citizenship awards. The awards are presented each year on the basis of dependability, service, leadership, patriotism and scholarship.

Josette was selected to represent Iowa Park by members of the senior class and the school faculty. Daughter of Mr. and Mrs. Herbert Hensley, she is an AA honor roll student and member of National Honor Society. She is a member of the annual staff and has been chosen Who's Who her sophomore and junior and senior years.

Josette will represent IPHS in the shorthand contest next month in the district meet. She plans to enter NTSC, Denton, next fall and major in business.

Besides the award pin, each girl received a sterling spoon.

Mr. and Mrs. E. L. Hartfield visited last week in Breckenridge, returning home Sunday evening.

Mr. and Mrs. M. H. Grammer visited last Wednesday in Ardmore, Okla., with their son Harvey and family.

Mr. and Mrs. J. D. Roundtree and children Eddie, Kay, Randy and Ricky will visit with relatives in Abilene this weekend.

PTA

Mrs. Stanley Williamson has been elected president of PTA for 1957-1958. Elected to serve with her are Mmes. John Clapp Jr., vice-president; Dwain Holmes, secretary; Johnny Crawford, treasurer; Rollins Woodall, parliamentarian; Kenneth Watts, historian.

Mrs. China B. Smith gave the report of the nominating committee at the regular PTA meeting Wednesday afternoon. Also on the committee were Mrs. Buck Voyles and Mrs. Ray Watson.

Mrs. J. C. Helms, vice-president, directed the business session. Other business included two recommendations by the executive board: (1) That the next regular meeting date be Wednesday, April 3 due to the district conference in Vernon; and (2) That every member be asked to take five cook books to sell. Both recommendations carried.

Mrs. Williamson, finance and budget chairman, reported on the cook book sales and reminded the group of the PTA project to help some worthy student toward a teacher's degree.

Mrs. Clare Warren, legislative chairman, reported on bills before the state legislative concerning pay raises for teachers.

Keith Swim stated that the governor, Sen. George Moffett and Rep. Vernon Stewart and Rep. J. B. Walling are in favor of S.B. 80 and H.B. 8, to raise teachers' pay. He moved that the local PTA send a letter of appreciation to the governor. Mrs. Warren amended to include letters to Moffett, Stewart, Walling and to Senator Alken and Representative Turman, who introduced the bills. Motion carried.

Individual members were urged to write letters also.

Mrs. Malcolm Mills was program leader. She presented Rosemary Clark for a Chopin waltz and Rev. Homer Thompson, who gave the meditation.

James E. Elms showed a film "Learning Democracy through School-Community Projects."

Attendance awards were won by Miss Lomax's 4th grade and Mrs. O. R. Owen's 10th grade.

Mr. and Mrs. Clyde McDonald of Happy are in Iowa Park this week on business. They were guests at Noon Lions luncheon Tuesday.

Little Miss Leslie McDonald of Dallas is visiting her grandparents Mr. and Mrs. Oscar Lochridge this week.

ORDINANCE 271

The State of Texas, County of Wichita, City of Iowa Park.

Be it ordained by the City of Iowa Park: That the following amendments are hereby ordered in Ordinance No. 143, dated Feb. 6, 1928:

Section 2: "75 cents changed to \$1.00."

Section 5: Add, "Notice provided herein to be posted when dog placed in pound."

Section 6 (a): "fifty cents per day" changed to "\$1.00 per day."

"A sum of one dollar" changed to "A sum of three dollars."

As thus amended said Ordinance shall remain in full force and effect.

Done by the City Council of the City of Iowa Park in regular session assembled this the 10th day of September, 1956.

Approved: R. E. Van Horn, Mayor
Attest: Dossia S. Smith, Secretary

(SEAL)

Mr. and Mrs. L. P. Adams and children Ronnie, Sharon, Gene Earl and Roy Wayne visited in Rush Springs, Okla., last Saturday with his parents Mr. and Mrs. W. W. Adams.

Mr. and Mrs. Roy Van Dorve of Dallas visited her parents Mr. and Mrs. M. H. Grammer recently.

Abilene, Texas

SERMON

Sunday morning, March 24:

"Things that will help us be good."

Sunday evening, March 24:

"The 10 Commandments law was abolished by Christ."

Monday evening, March 25:

"Did Jesus really have to die?"

Tuesday evening, March 26:

"Yes, Faith saves! But when?"

Wednesday evening, March 27:

"Martin Luther and the German Reformation."

TOPICS

Thursday evening, March 28:

"Finding the church which Jesus built."

Friday evening, March 29:

"What Saul of Tarsus saw while he was blind."

Saturday evening, March 30:

"How the Holy Spirit operates today."

Sunday morning, March 31:

"Falling from grace."

Sunday evening, March 31:

"If I am lost!"

Nutrena's new Livability Insured Chick and Pullet Program offers you two-way protection:

1 To help give your birds a strong start, all the nutrition and protective factors known to be important for chicks or growing birds are built into Nutrena Chick Starter and Nutrena Grower.

2 INSURED PROTECTION (at no extra cost) covers chicks lost from fire, windstorm, cyclone, tornado, hail or lightning plus disease or malnutrition. Pays for cost of chicks lost and Nutrena Feed used. Protection can last through first five months.

With good chicks, good management and Nutrena Feed, plus this Insured Protection, your chick investment this year will be about as safe as safe can be!

See us for full details about Nutrena's Livability Insured Chick and Pullet Program. Register before chicks are four weeks old. You can register even before chicks arrive for protection from very first day.

ENJOY COOK-OUT

Al-Ku-La-Na Camp Fire girls went on an all day cook-out at Lake Kickapoo last Saturday. The trip included breakfast, dinner and supper, which is a requirement for passing the Woodgatherer's Rank. The girls made their own fires and prepared most of the food. They also enjoyed a hike for rock and flower collecting.

Our thanks to Mmes. Jim Cowden, S. E. Watson and R. D. Roach for this nice trip. Attending were Jo Ellen Cowden, Sherye Compton, Betty Engledow, Brenda Capehart, Angela Scott, Linda Robertson and Elaine Sawyer.

Elaine Sawyer, reporter

Mrs. T. K. Spencer entered Bethania hospital last Thursday for observation.

Mr. and Mrs. L. S. Swanson visited Sunday in Nocona with Mr. and Mrs. N. E. Patterson.

Camp Fire girls and Blue Birds held their annual flag raising ceremony Wednesday morning in observance of the National Birthday Week of Camp Fire. The ceremony was held in the elementary school building with Mrs. Gene Lowrey as chairman and Miss Ethyle Kidwell, school principal, in charge. The girls will close the Birthday Week next Sunday by attending churches dressed in their uniforms and being recognized by their ministers.

Flying Blue Birds met last week in the home of Mrs. Robert Luthy. Linda Sawyer lit the candle. The group enjoyed making earrings for handcraft. Mrs. Luthy served refreshments to Linda Sawyer, Linda Jo Grace, Glenda Sawyer,

Excerpts from 'The Chemistry Bulletin' of M.U.

Why You Should Learn to Write

By Don James

The rare chemist who can mix the ingredients and come up with a good sentence is being hunted aggressively by industry. Just take a good look at help-wanted ads in any large newspaper. All chemists need to write clearly, of course, so they can get their ideas across to fellow chemists.

But specialized technical writers have a tougher job; they must prepare reports and manuals for people who are not trained chemists. These men need the scientific knowledge of professional engineers and the writing skill of professional authors. Such men are hard to find.

The problem is the growing complexity of modern equipment. International Business Machines, for example, is building millions of dollars' worth of electronic computers for all types of companies, even including the early-warning radar systems, being designed for operation by relatively untrained (in higher technical fields) military personnel.

The company must furnish manuals explaining how to operate and maintain such equipment. The manuals, which commonly contain up to 20,000 pages and stretch across a 12-foot bookshelf, occupy up to 75 technical writers for upwards of eight to nine months in preparation.

Civilian equipment such as appliances, radios, and trucks, is more complicated now, too, and requires carefully-prepared instruction books.

This rare combination of skills—offered by only a few colleges—commands a good price, naturally enough. Experienced technical writers are being offered as much as \$8,000 to \$12,000 per year. Supervising editors receive even more. Salaries in this bracket compare favorably with those offered other scarce specialists.

The government's National Science Foundation surveyed 47,000 research scientists, about a fifth of the total in the United States. Half of them earn more than \$6,525 per year. Some, physicists for example, do better.

But the technical writer will not want for challenging opportunities in the foreseeable future.

ing and will be on view to side-"thermopane" glass windows facing Rusk Street.

The large room it occupies was specially designed with cables under a metal sub-floor and other features. Temperature and humidity will be carefully controlled constantly.

The 705 data processing system has been described as "the most powerful tool yet available to business management for business problems." The complex and flexible high-speed system of machines is capable of performing the complete series of operations required for any data processing task.

It will enable management to obtain immediately mathematical solutions which have not been heretofore obtainable promptly enough to prove of value.

After a question with all the variables involved has been programmed, the big computer can tick out, in minutes, the answer which formerly took months to solve.

Questions like these: How can we pinpoint the geological structures most favorable for productive drilling?

What is the day-to-day status of Texaco's crude oil reserves? Which mix of available crudes, and rate of operation of various refining units, will yield optimum type and volume of products?

A recurring job in production takes an accountant using a mechanical calculator two days. The 705 would give an answer in a single second.

Is 'Qual' Disqualified?

Qualitative analysis, one of the basic disciplines of classical training in chemistry, has fallen into disrepute.

The trend in college curricula today is to eliminate qualitative analysis as a separate course and combine it with the course in general inorganic chemistry. In fact, in 1950 qualitative analysis was included in the second semester of the course in general chemistry in 59% of the colleges in this country, compared to 35% in 1940.

Yet, to many teachers, qualitative analysis must continue to be taught as a separate course because the basic chemical principles learned in an intensive study of qualitative analysis are of tremendous importance in professional development. It is in this course, they say, that the fledgling chemist learns the principles of ionic equilibrium and the chemistry of metals.

Here are some of the views on teaching qualitative analysis expressed by participants in a symposium on qualitative analysis held by the Division of Chemical Education.

Modern Trends

Development of modern instrumental analytical techniques, such as spectrographic analysis, has outmoded the wet analysis procedures of classical qualitative analysis. Therefore, according to Eamarch S. Gilreath of Washington and Lee University, less emphasis should be placed on laboratory work in present day courses. Instead, major emphasis should be placed on the broad theoretical aspects of qualitative analysis. The most important of these are the laws and theories pertaining to the various forms of equilibria that may exist in aqueous solution, such as ionization, solubility, complex formation, and oxidation-reduction.

However, in taking the theoretical approach to teaching qualitative analysis, great care must be exercised to avoid making the course a rehash of general chemistry or having it degenerate into a diluted presentation of physical chemistry.

At Indiana University, according

to Frederic C. Schmidt, integration of qualitative analysis into the second semester of first year chemistry has been very successful. This system, in use for the past five years, is not designed to teach analytical chemistry, but, Schmidt says, qualitative analysis is used as a scheme to teach the chemistry of metals. With the instrumental training now available, laboratory training in the classical qualitative separation schemes is not necessary.

One of the advantages of integrating qualitative analysis with the chemistry of the metals and their compounds is that the ideas of solubility product, ionization constants, and complex ions are put where they belong and are in better perspective for comprehension by the student. Another advantage of integrating the two subjects is that a separate course is eliminated from the already overcrowded chemistry curriculum.

Keep Qual Alive

Decrying the modern trend of downgrading the qualitative course to streamline the crowded undergraduate chemistry curriculum, Henry Freiser of the University of Pittsburgh made a strong plea to return qualitative analysis to its proper place in the curriculum.

Brilliant developments in instrumental methods of analysis seem to have overshadowed the role of separations processes in analysis. Yet, Freiser points out, knowledge of separations is extremely important. For example, the chemist's chief contribution to atomic energy has been the development of separation processes.

The principal function of qualitative analysis in Freiser's opinion is not to teach detection, but to give the student a thorough grounding in the principles of analytical chemistry. It is in this course that the student will learn what he must know about the chemistry of metals, ionic equilibrium, and the basis of analytical separations.

To Frederic C. Strong III of Stevens Institute of Technology, the qualitative analysis course should teach analysis. From a study of methods used in some commercial laboratories, Strong concludes that the classical fractional precipitation scheme for cations is outmoded. For this purpose the laboratories make spectrographic determinations or use spot tests. However, anion procedures usually taught in colleges are used extensively.

For a modern course in qualitative analysis Strong suggests that determination of anions should be emphasized. Brief mention should be made of hydrogen sulfide separations, but no laboratory work should be done in this field. Instead, the theory of arc, spark, and flame spectrography should be taught. Practical training in the use of the spectrograph should be given.

However, Strong warns, heavy emphasis should be placed on the theoretical approach to avoid training technicians instead of analytical chemists.

Scholarship Grants Are Up

Grants totaling approximately \$1 million will go to higher education in the U.S. over the next five years, gifts of the International Nickel Co. Some \$400,000 will be shared during the present school year by 85 colleges and universities; the remaining \$600,000 will support Inco fellowships and scholarships during the following four years.

The lion's share of the grants will be devoted to fellowships and scholarships, with a limited amount applied to special projects and gifts. The company will expand its present fellowship program to establish one research fellowship in 10 universities, and 10 teaching fellowships, 57 scholarships, and three special summer courses for science and mathematics teachers and for guidance counselors in preparatory and high schools.

Research fellowships, to be established for a five-year period, will provide an annual stipend of about \$4200 to the fellow and an equal amount to the institution in which the fellow is placed. The

teaching fellowships, for a three-year period, will provide \$3000 annually, plus a yearly grant of \$1000 to the institution. The summer refresher courses will be financed through annual grants of \$5000 to each of three schools.

The scholarships will range in value from \$750 to \$1000 each for tuition and part of the student's living expenses. In addition, a grant of \$500 will go to the school as a cost-of-education supplement. Forty-seven of the scholarships will cover instruction in engineering, preferably mining, geology, and metallurgy.

What Happens to the 'Lead' in Tetraethyl Lead?

"Under light loads of city driving, a car's exhaust system acts as a trap, condensing lead on its surfaces," said an Ethyl corporation researcher, when queried as to the role of his company's product in creation of smog conditions in the vicinity of large industrial complexes.

"At low speeds the amount of lead discharged is only a fraction of that present in the gasoline consumed," the researcher added.

The accumulation of deposited lead, he states, is largely expelled during high-speed driving on the open road. Thus the exhaust piping and muffler are capable of again trapping lead in city driving.

Ethyl's study of lead emission from automobiles was undertaken because of current interest in the minor constituents of engine exhaust gas, Hirschler says, and because no other work on the subject has been reported recently.

In his report before the Division of Petrochemical Chemistry, Hirschler said electrostatic precipitators were used to separate lead particles from the exhaust gases of both six-cylinder and eight-cylinder motors. Particle-size studies indicate that only one-half to three-quarters of the lead emitted in city driving is small enough to remain suspended in the air. This fact, and the lower lead emission during light-load operation, account for low concentrations of lead observed in recent studies of urban atmospheres.

It is difficult to relate atmospheric lead analysis directly to amounts of lead exhausted by automobiles, Hirschler claims, because other industrial and natural

sources also contribute lead to the atmosphere.

"Our results indicate that even lower lead emission in cities may result from current trends in engine design," Hirschler says. The use of dual-exhaust systems and multiple mufflers is increasing; they will trap more lead during light-load operation and release it as coarser particles in open country driving. And the use of larger engines, which operate at lighter loads in city driving, will also tend to reduce lead emission in congested areas.

Scouts Visit SAFB Overnight

Twelve Boy Scouts and two of their adult leaders of Troop 37 were among the 200 explorer scouts who were recent guests of SAFB. Boys of north Texas and southern Oklahoma made firsthand contact with the air force Friday and Saturday. This was the 5th annual Northwest Texas Council explorer scout conclave.

There were 33 units represented at the two-day meeting. Those from Iowa Park were Donald and David Thompson, Tommy Scott, Floyd Browning Jr., Gary May, Lanny Starr, Mark Clark, Hugh Stockton, Bobby Hartsell, Jimmy Davis, Creath Pace, Louis Sawyer. The two leaders were Scoutmaster Miles Thompson and Committeeman J. H. Bingham.

Highlights of the program were a firefighting display, helicopter demonstration, airplane rides, skeet shooting, a tour of the flight line and a display of military aircraft. Scouts and leaders took meals in the base dining halls and slept Friday night in barracks.

Band Notes

The band banquet Friday night was a great success. We would like to thank the parents for sponsoring it.

Preceding the meal, our queen Janice Wilson was crowned and was presented a big bouquet of white carnations.

Awards were presented to the top five musicians from each class. Table decorations were green music symbols and beautiful peach blossoms.

We would also like to thank the junior high jazz band for providing the music.

Texaco Installs 'Brain'

Twenty-five thousand highly-trained mathematicians have been hired by the Texas Company for service in its Houston plant, officials announced recently.

At least, the equivalent of these highly-trained specialists now are on duty at the plant. The IBM 705 electronic Data Processing System, the first of its kind in Houston and one of the comparatively few (110) in operation in the world, has been installed.

A special program will be staged with a notable pushing the button to start the tremendous mathematics complex in operation not later than the middle of March.

The Texas Co. and the International Business Machines Corp., makers of the 705 EDPM, have spent more than two years in planning and preparing for the computer and housing and handling the system.

The gigantic "brain" will occupy approximately 4,000 square feet of space on the first floor of the build-

TELEPHONE TALK

by Norman S. Stuckey, Manager

9,000 CALLS A MINUTE

Have you ever thought, as you picked up the phone, how many other people were doing the same thing that very minute?

Well, believe me, you're not alone—you've got lots of company. Texas people used their telephones 9,000 times a minute last year.

That's just for local calls. Long Distance lines were busy, too, as Texans called out-of-town 98 million times in 1956.

This was a record number of both local and Long Distance calls, but it looks now as though 1957 will be an even busier telephone year.

What's behind the steady increase in the number of telephone calls? For one thing, thousands of new telephones are added each year, but there's more to it than that.

Nowadays, people seem to count on their telephone to do more errands for them, to help them keep up with the faster pace of living and doing business.

Personally, I think it makes a lot of sense. You can do just about everything faster and easier with the telephone.

LOOKING AHEAD TO WEEKENDS

If you're like most people, you look ahead to weekends.

That's when family and friends get together to relax and have fun.

Unfortunately, sometimes all the family can't be on hand, or perhaps you haven't heard from some old friends for too long a time.

There's no point in letting this dampen your weekend fun. Just reach for the telephone and call them Long Distance. They'll be glad you called . . . and so will you.

Rates are lower all day Sunday, and after 6 p.m. weekdays. And remember to call by number—it's twice as fast.

CONVENIENCE IS HERE TO STAY

All around the house, every day, we see convenience and more convenience.

Dad has his easy chair conveniently located next to his favorite reading table. Mother has a novel or her sewing basket near her. And the youngsters like to have a radio or record player in their room.

Maybe this is the time to take another look at your telephone service to make it more convenient for you and your family.

Why not have telephones where you want them, when you need them? We'll install additional phones wherever they serve your family best—in kitchen, bedroom, or any room in the house.

The cost is low, only \$1.00 a month and a small one-time installation charge. Just call the telephone business office.

Southwestern Bell Telephone Company

LONG DISTANCE IS TWICE AS FAST WHEN YOU CALL BY NUMBER

KAMAY

By Mrs. E. L. Holbrook
Route One, Electra

Funeral services for George Enloe, 78, were conducted Monday, March 11, at Bryson. Enloe, a retired farmer, died Sunday, March 10, at the home of a daughter Mrs. Gladys Sheppard in Graham.

Born March 31, 1879, in Mansfield, Mr. Enloe came to Bryson with his parents at the age of one year. He lived in and near Bryson the remainder of his life.

Surviving are two other daughters Mrs. Leo Manley of German and Mrs. Lorena Haley of Lovington, N.M.; two sons Garland of Graham and L. C. of Kamay; 12 grand- and 2 great-grandchildren.

Valley View band left Monday morning on a concert tour for two assembly programs in Wilbarger county. First performance was at Harrold school.

Opening number was the march Sound and Fury. The band continued with Nina Mia, Westward Ho, Curtain at Eight, Allegheny Moon, Latin Americano, Time Out for a Jam Session, and closed with the march Norma.

The same program was given at a later hour in Oklaunion school.

The Warrior band is under direction of Carol Magee, senior at Midwestern university. He is a graduate of Holliday high school.

Approximately 60 members make up the regular and beginner bands at Valley View. They recently have moved into the new band hall and are preparing for a solo contest (April 16) and a band playing contest (April 27), to be held in the county seat.

Mrs. Bert Stevens is ill and in Wichita General hospital.

Members of the Baptist Tri-L Sunday School class entertained their families Friday, March 15, with a supper at Kamay Community House.

About 65 attended the covered dish supper and enjoyed games after a short business session.

Ed Lowery has returned from McKinney hospital and is back at his job as school principal and teacher at Valley View.

Members of the fund raising committee, representing the Kamay Community House, made a house-to-house campaign Thursday, March 14, to solicit funds for upkeep and repairs needed on the building. Unofficial total has gone over \$300. Some of the pledges are still to be collected.

Mrs. A. L. Chambliss, chairman of the drive, was assisted by Meses. O. R. Moore, H. L. Gage, Orlin Dickerson, Don Dowell, Coy Thomason, D. W. Munsey, Cecil Sands and Don McCoy.

The public is invited to a special meeting at the Kamay Church of Christ, Friday, to hear mission works and needs in Switzerland.

discussed. Slides explaining the work in that and other fields will be shown.

A gospel meeting is to be conducted at the church from March 24 through 31. Weldon B. Bennett, Bible instructor at Abilene Christian college, will conduct the services. Jackie Robertson will lead the congregational singing.

Loy Mitchell is minister of the church in Kamay.

Rev. H. E. Allison of Denison will conduct revival services at the Baptist church of Kamay beginning March 29 and extending through April 7.

Evening services will begin at 7:30; time for the morning sessions has not been announced.

Rev. Wilson Welch, Kamay pastor, will lead the congregational singing. Carol Magee will be in charge of special music and songs.

Mr. Allison is pastor of Epling Memorial church at Denison. He served churches in Anchorage, Alaska for five years before going to Denison.

Rev. J. J. Terral of the Church of God at Kamay announces the fellowship meeting to be held at the church this Friday night.

Date for the state camp meeting near Weatherford will be June 21 to 28.

Several Iowa Park folk are to receive certificates of appreciation who have contributed outstanding service to the county tuberculosis program the past year, at the annual dinner next Thursday in the YWCA gym in Wichita Falls.

To be honored are Keith D. Swin, general chairman for Iowa Park; Dr. Bill Huddleston, Christmas seals sales chairman; George R. Huckabay, publicity.

Miss Margaret Hall, executive secretary of Wichita County Tuberculosis association, announced the dinner and meeting will be open to the public. Reservation can be made with Miss Hall in Wichita Falls.

REPORT on Modern Living

BY LYNN SCOTT

Director, Plaskon Home Arts Council

When I read about atomic energy and the wonders of electronics, I can't help feeling that the world of modern industry and science is unreal—it has no connection with my world—my home, my family, my community.

I mentioned this to an industrial designer friend and he smiled. "Even though it may seem that industry and government are focusing their interest primarily on abstract scientific research," he said, "the end result is very often aimed at you, the consumer. And certainly the homemaker is the nation's principal consumer. Industrial research is a never ending process to find better materials, better products for better living. It's the American way."

Modern Plastics Age
"Take plastics," he said, "we used to look on them as substitutes for other materials. Now they've been developed as unique materials with superior properties all their own. Properties often not duplicated in other materials."

"A good example is the Touch-Plate light switch system," he said. "They come in panels of one, two, three and six switches and are trimly designed to mount on the wall. It includes a master panel that controls any light you wish from any given room."

"From my bedroom, where I can control any light in my house. Touch-Plate Mfg. Corp. of Long Beach, Calif., makes the control panel with built-in pilot lights that tell me at a glance which lights are on, or off."

"The panels and buttons are in eye-catching ivory urea, a plastic that has an extremely hard, smooth surface, and excellent resistance to short circuits. And these handsome panels are moderately priced, too."

I was reminded of the conversation a few days later when I saw an attractive portable "Intercom Set" on display. Manufactured by Teletronic Laboratories, Inc. of Gardena, California, the new device can be used as baby sitter, messenger, second radio.

The 2-way electronic set consists of a pickup station and a control station connected by 50' of wire. All you do is plug it into your house socket, turn the switch to "On," and you can be in two places at once. Busy wife can work at dinner and keep an ear on sick-room, patio, playroom at the same time.

These handsome units are available in ivory and gay Pastels including pink, blue, green and yellow. The cabinets, which look like small radios, are molded from Plaskon urea, the plastic material that resists scratches and electrical short circuits. They will not attract dust or dirt, and the molded-in color cannot be impaired by chipping, cracking or peeling, as can painted surfaces. A quick wiping with a damp cloth is all that's necessary to keep them sparkling and new looking.

I'm always interested in new home decorating ideas. I'd be pleased to hear from you about yours. Just write to Lynn Scott, Director, Plaskon Home Arts Council, Room 312, 40 Rector Street, New York 6, N. Y.

SCHOOLBOY'S LEG BROKEN IN SCOOTER-CAR COLLISION

Deryl James, son of Mr. and Mrs. D. O. James, is in a Wichita Falls hospital with a broken leg as the result of a collision. He was riding his motor scooter to school Tuesday morning and had a collision with an automobile at the corner of Highway and Wall streets. Although both bones of the leg were broken, his physician has hopes of a good mend.

pital again next summer and then enter nursing school there next fall.

Mr. and Mrs. Jerry Hardin of Wichita Falls are parents of a son Gary Farris, born Friday, March 15, at Wichita General hospital. Mrs. Hardin is the former Miss Anna Lakey. Grandparents are Mr. and Mrs. F. P. Hardin of Wichita Falls and Mr. and Mrs. V. C. Lakey of Iowa Park.

Future Nurse

Ann Vestal, daughter of Mr. and Mrs. W. D. Vestal and a senior of the local high school, will be one of a group of 15 girls of Wichita county attending the second annual Texas Future Nurses association attending a conference in San Antonio.

The conference sponsored by the Texas Medical Auxiliary, is designed for an exchange of ideas about the profession they plan to enter.

Ann joined the Iowa Park Future Nurses club in 1954 and last summer served as nurses aid at Wichita General hospital. That is when she really decided on nursing as a career.

Mrs. Bill Huddleston, wife of a local physician, serves as sponsor of the local club. The group meets twice a month.

Ann plans to work at the hos-

Pvt. Jimmy Ray Jinkins, son of Mr. and Mrs. Wayland Jinkins, is now stationed at Ft. Carson, Colo., where he is platoon guide of the 47th infantry regiment. He has been in service three weeks and is taking basic training at Ft. Carson.

Choose your power You get mightier, more responsive performance no matter which new Ford engine you choose—the savingful Mileage Maker Six, most powerful six of them all, or one of Ford's dynamic V-8's with horsepower ranging all the way to 300 in the Thunderbird 312 Supercharged V-8!

You get an all-new Inner Ford

Ford's new clear through this year . . . with a completely new "Inner Ford" that's heavier, stronger . . . with extra quality in every inch. New suspensions, front and rear, new insulation—the most in Ford's field—are designed to give you the smoothest, quietest ride ever in a car priced so low.
