Religious Census to Be Made Here October 10

The Ministerial Alliance is sponsoring the citywide religious census to be taken by the churches of Iowa Park on October 10.

Such a census was taken two years ago and it is felt that with the increasing number moving to Iowa Park a new census needs to be taken. The residents of Iowa Park are asked to help the workers calling at your home early Sunday afternoon, October 10.

Workers for the churches will meet at a central location for instructions and receiving of materials. From this meeting they will go to assigned sections of the city to visit each home. Results of the census will be tabulated that same afternoon.

Committee in charge of arrangements includes Mrs. Fred Wright, Mrs. George Trammell, Miss Patricia Faulkner, and members of the Ministerial Alliance with Chester Gleason acting as director of the

A Lecture

Christian Science Entitled

"Christian Science: The Way of Dominion"

Elisabeth Carroll Scott, C.S.B. of Memphis, Tennessee

Member of the Board of Lectureship of The Mother Church, The First Church of Christ, Scientist, in Boston, Massach

The lecturer spoke substantially

The first mention of man in the Bible states that he is made in the image and likeness of God. The next statement concerning man tells us that God has given him dominion over all the earth. Now dominion, as all of you know, means supreme power, and one necessarily free from fear. Today humanity is apparently very far from asserting and proving this

There is no doubt of men's attempted mastery of the physical world. Mankind seeks its mastery there—in the sea, in the air, on earth, under the sea. Yet these triumphs over the physical world have not brought surcease from fear. On the contrary, mankind today seems beset by fear. Men fear war, they fear aggression and depression. They fear one another. They even carry fear to such an extent that they fear themselves, their own weaknesses and their

lack of capacity for success.

Christian Science comes to tell you that you need not be afraid. The Bible tells you that dominion is yours by immutable right, for it is God-given and coexists with God. Christian Science comes to show you that you can exercise this dominion and thereby control the everyday affairs of your life in the degree that you reflect divine law. It enables you to prove that you are not a helpless victim of chance or circumstance. On the contrary, it teaches you that you have the capacity, through Christian Science, to help others and to allow God's law to govern your own life and to make that life useful, joyful, and complete.

It is not necessary to say that the power bestowed by God is Godlike. In order to exercise this power one must understand and love God, the source from which divine power emanates.
In the Christian Science text-

book, "Science and Health with Key to the Scriptures," its author, Mary Baker Eddy, the Discoverer and Founder of Christian Science, writes (p. 275), "The starting-point of divine Science is that God, Spirit, is All-in-all, and that there is no other might nor Mind,—that God is Love, and therefore He is divine Principle." From this standpoint it is apparent, since God is infinite Spirit, that nothing unlike Spirit can exist in a universe created by Him.

We learn through Christian Science that God is not a far-away entity or a potentate whose favor is conferred only as we implore it as a slave implores his master. On the contrary, Christian Science teaches us that God is the only Mind, flawless and eternal. It teaches that this Mind is so in-variable in its perfection that the word divine Principle is used as a synonym for the Mind which is God. It declares that this divine Principle is everywhere present Principle is everywhere present, universally available, always com-passionate, tender, and kind. It teaches that God is not only loving; it teaches that He is Love itself and that His love encircles His children, sustains and protects them, and endows them with His

The Perfect Son

In order to demonstrate Christian Science, it is essential to understand the true status of man. It teaches that from the spiritual standpoint he has always been the perfect son of the perfect Father, never less than that. The Psalmist said, "What is man, that thou art mindful of him? and the son of man, that thou visitest him?" (Ps. man, that thou visitest him?" (Ps. 8:4.) The man of whom God is mindful is created by Him to express Him; for "Man," our textbook says, "is the expression of God's being" (p. 470).

Matter with its dying beliefs does not constitute the real man.

The man created by God is one with God. He is held in indissoluwith God. He is held in indissoluble unity with his creator. Science and Health says (p. 70), "Man is never God, but spiritual man, made in God's likeness, reflects God." This man is ageless and timeless. He is not deluded by the timeless. He is not deluded by the cult of youth nor made fearful by the threat of age, for he reflects the God who is timeless Life Man in divine Science is not conscious of anything of which God is not conscious, for he reflects the Mind that is God. He is never restless, dissatisfied, confused, or misled,

for he abides in the peace of God, his divine Principle. He does not need to progress toward perfection. In his true being, as the reflection of his Principle, he is perfect here and now. It is only the human concept of himself which needs to be evangelized, which needs to receive the good news of man's true selfhood and needs to demonstrate this selfhood.

Christian Science teaches that the spiritual man's individuality is eternal. Mrs. Eddy writes on page 336 of Science and Health, "The spiritual man's consciousness and individuality are reflections of

individuality are reflections of God," and on page 70 of the same book, "The divine Mind maintains book, "The divine Mind maintains all identities, from a blade of grass all identities, from a blade of grass to a star, as distinct and eternal."
You need never fear that you will lose your individuality. On the contrary, through Christian Science you are going to find your true individuality, and you are go-ing to experience the joy of ex-

pressing it.

There would seem to be a trend in the world today to deprive all men of individuality and to deny them the right to think and act for themselves. Certain Eastern philosophies feach that the extinction of man's individuality is the highest hope that can be offered to a human being. One of the chief doctrines of the totalitarian state is that the citizen must subordinate his conscience, life, and intelli-gence to the dictates of the state, and has no right as an individual to control himself.

Christian Science takes a diametrically opposite view: it honors true spiritual individuality, because God possesses individuality and identity; therefore, man, as His expression, reflects spiritual individuality. This is made mani-fest as individual, immortal men and women in Science.

God-bestowed Dominion

The gift of infinite dominion has been granted to man as God's reflection, though humanity is, as yet, almost completely unaware of it. The author of the epistle to the Hebrews, speaking of man, says: "Thou hast put all things in subjection under his feet. For in that he put all in subjection under him, he left nothing that is not put under him. But now we see not yet all things put under him" (Hebr. 2:8). Jesus was the greatest exponent of God's power who ever lived. He illustrated the divine Mind. He awakened those around him to the majesty of that Mind and proved to them, by his healing work, the tenderness and compassion inherent in the Mind which

of that which affirmed his unity with God, Jesus could say, "I and my Father are one" (John 10:30). maintained and proved this unity by his Godlike words and acts. He caused the illusion of disease to vanish from afflictive beliefs. Leprosy, blindness, lame-ness were healed by the power of his spiritual understanding. He proved that spiritual healing is an essential element of spiritual power, and he pointed to his healing ministry as evidence that he was sent of God. Mrs. Eddy writes in Science and Health (p. 171), "Jesus illustrated the divine Principle and the power of immortal Mind by healing sickness and sin and destroying the foundations of

Throughout his earthly experience Jesus maintained and proved his unity with God. He based his capacity to do the works of God upon this unity. His conscious awareness of the presence of God enabled him to remain unmoved. enabled him to remain unmoved in the presence of hate. Whether he was with his disciples who loved him or with the Pharisees who appeared to hate him, Jesus was always convinced of God's allpresence. He said, "He that sent me is with me: the Father hath not left me alone" (John 8:29). It was this awareness of God's loving presence which enabled Jesus to prove the triumph of love over hate.

Jesus lived in the radiance of Mind's eternal selfhood. He prom-ised men freedom and set them free. He told them the conditions upon which freedom could be obtained. He said, "Ye shall know the truth, and the truth shall make you free" (John 8:32). He illus-trated the truth of which he spoke by his life and by his triumphant victory over death, known as his

Mrs. Eddy writes of him in Science and Health: "Jesus demonstrated Christ; he proved that Christ is the divine idea of God the Holy Ghost, or Comforter, revealing the divine Principle, Love, and leading into all truth" (p. 332); "The divine image, idea, or Christ was, is, and ever will be inseparable from the divine Principle, God" (p. 333).

The Christ brings to human con-

sciousness the message of man's inseparability from God. The mis-sion of the Christ is ameliorative and redemptive, for its mission is to take away the sin and suffering of the world.

Promise and Fulfillment

Christ Jesus expressed, demonstrated, and revealed the Christ. However, he recognized that the world was not yet ready for all he had to give, and he promised that the Comforter or final revelation of Truth would be sent by the Father and would lead humanity into all Truth. This revelation has into all Truth. This revelation has come in our time; it is called Christian Science. It has been rechristian Science. It has been revealed through a woman, Mary Baker Eddy, and through her textbook, "Science and Health with Key to the Scriptures," wherein is found the Science of the Christ.

Science and Health is not a book

of dogmatic theories. It explains
God's nature and makes clear His
purpose and plan for His creation.
It brings Truth within reach of every stage of human consciousness, from the child to the sage. It is practical and redemptive on every level of human thought. Its author, Mrs. Eddy, as a devoted follower of the Master, Christ Jesus, perceived as no one had before, the import of his lifework. She loved her fellow men

as Jesus had loved them spiritual perception, her ner to God, enabled her to receive revelation promised by thris Jesus, and her measureless lov for her fellow men gave he the courage and self-sacrifice leces sary to give this revelation to her sacrifice leces sary to give this revelation to her sacrifice leces sary to give this revelation to her sacrification to the sacrification of the sacrification to t

She says of herself at this Price (Science and Health, pp. 226, 22 "I saw before me the sick, we nout years of servitude to an use master in the belief that the local terms of the servitude to an use master in the belief that the governed them, rather than he "The lame, the deaf, the dy

the blind, the sick, the sensual, sinner, I wished to save from slavery of their own beliefs from the educational systems the Pharaohs, who to-day, as yore, hold the children of Isi in bondage. I saw before me awful conflict, the Red Sea and wilderness; but I pressed through faith in God, trust Truth, the strong deliverer, guide me into the land of Christi Science, where fetters fall and te rights of man are fully known aid acknowledged."

Mrs. Eddy's love for God ws wholehearted, her love for he fellow men was Christlike; there fore she did not flinch from stand ing alone and maintaining the Science of Christianity in the face of

persecution by the materially minded and the spiritually obtuse She constantly turned the thought of her followers away from herself as a person to God, the divine Principle which she revealed. Yet, one cannot separate the message from the messenger, the revelation from the one through whom it was revealed. Today the movement which she founded encircles the world, and hundreds of thousands of those who have been healed and regenerated by the Science she discovered joyfully attest the divine origin of her revela-tion. Those who love her best are those who practice the Science she discovered and who try to bring out its Christlike quality in their

own lives. Mrs. Eddy based her discovery upon the King James Version of the Bible. Everything which she gives us in Christian Science is based upon its inspired word. Stu-dents of Christian Science love and cherish the Bible. They study it daily. They ponder it and strive to understand and to be obedient to its inspired commands.

Prayer-the Gateway to Power

Through prayer we learn to claim and prove our unity with God. When the disciples asked Jesus, "Lord, teach us to pray" (Luke 11:1), they voiced a longing deep in the human heart, a longing common to all men; though many of them are as yet unaware of it. Christian Science satisfies this longing. It teaches those who come to it how to attain dominion through prayer. It teaches them how to pray and how to pray ef-

fectively.

Indeed, the prayer of spiritual understanding is the sole equipment of the Christian Scientist. Mind is his only medicine in healing the sick and sinning; just as prayer was the only medicine employed by Jesus. Mrs. Eddy writes in her book "Miscellaneous Writings" (p. 25), "Jesus' only medicine was omnipotent and omnis-cient Mind."

Generally speaking, mankind has been unable to pray aright, for it been under the delusion that God is the author of all of its woes. Christian Science demon-strates that God is wholly good, the divine Principle which is Love itself, and thus makes it clear that God is never the source of trouble and that whatever appears as evil must of necessity be unreal.

From this standpoint the student of Christian Science maintains the allness of good and denies the reality of evil. As this is done with understanding faith in God, evil beliefs of sickness or sin lose their hold and disappear; for in the atmosphere of spiritual under-standing where God is known to be supreme, evil cannot continue to sustain a claim to presence or to power. Science and Health says (p. 102), "Mankind must learn that evil is not power. Its so-called that evil is not power. Its so-called despotism is but a phase of nothingness. Christian Science despoils the kingdom of evil, and preminently promotes affection and virtue in families and therefore in the community." Humanity has been slow in learning the lesson "that evil is not power." It has feared evil and been in bondage to it for too long. Christian Science comes to release it from the foar comes to release it from the fear of evil and thus deliver it from its effects. It comes, as Paul says, to deliver men from the power of darkness and to translate them into the kingdom of God's dear son. It agrees with Paul's statement, "Sin shall not have do-

son. It agrees with Paul's statement, "Sin shall not have dominion over you: for ye are not under the law [of mortal belief], but under grace" (Rom. 6:14).

Here someone may ask: "How does Christian Science achieve dominion over evil? How is the healing work done?" In her book "The First Church of Christ, Scientist, and Miscellany" Mrs. Eddy says (p. 242), "Christian Science is absolute; it is neither behind the point of perfection nor advancing towards it; it is at this point and must be practised therefrom."

The Christian Science practitioner learns early that his thinking must be based on absolute Truth. He affirms the truth of God and man, and he applies this truth to himself and to his patients. He knows that the real man is forever at one with the Mind which is God. He learns to deny the false mortal sense of man which has so long thwarted and frustrated human beings. This denial is as absolute as Truth itself, for it refuses to recognize anything contrary to Truth; therefore, it is found to be lute as Truth itself, for it refuses to recognize anything contrary to Truth; therefore, it is found to be potent in dissipating error. The Discoverer and Founder of Christian Science writes in Science and Health (p. 339), "You conquer error by denying its verity." Of course, any effective denial is predicated upon a knowledge of truth, and in Christian Science a valid denial of evil is predicated upon the truth of God as All-in-all, which discloses His all-

presence and all-power.

God's power is available to you—use it, as a beloved son uses the riches of his father's house. Use it for yourself and for your fellow men. It is potent in overcoming every phase of evil. It can be utilized in overcoming so-called in-curable disease. I know of many instances in which such disease has been healed. I should like to share one such instance with you.

woman whom I know was told that she had an incurable disease. She was a young woman, and the diagnosis seemed especially hard to accept; so she was taken from one specialist to another. I believe there were twelve or thirteen in all. Each one gave the same verdict. She was told to reconcile herself to a life of semiinvalidism in order to prolong a life span which it was intimated would not be a long one at best. Through what appeared to be an accident the Christian Science

textbook was placed in the hands of this woman. She read it constantly and eagerly, for she found therein a God whom she could worship, a God who is unchanging Love and who could not possibly create anything evil or afflictive. The woman had no thought of healing. Her consciousness was filled with the joy of finding her God and of finding that in her real being she was forever identified with Him as His reflection. For some months she read and pon-dered Science and Health; then the healing came, almost unnoticed and unsought. It has been permanent and complete. And what has ever since seemed to her of even greater importance than the physical healing was the fact that this book, "Science and Health with Key to the Scriptures," changed her life completely, and it did so at once. The healing itself seemed to her then, and seems ow, relatively unimportant. It was the revelation of the Christ hich mattered supremely. The woman was healed, as thou-

ands have been healed, solely through study of the Christian Sci-ence textbook. Thousands of others have been healed through the rayer of Truth, known as Christian Science treatment, whereby dissipated by spiritual understandof God and by the realization that the God-created man is perfeet here and now.

The Christian Science practiwhen called upon for help mates the truth he maintains so practical and available that it reaches and heals the one who is, as yet, unaware of his present perfection. Christian Science teaches that the errors which appear to confront us are merely figments of the Adam-dream, the deep sleep which fell upon Adam. It bids us awaken from this sleep. Paul says "Aware thou that sleepest, and arise from the dead, and Christ shall give thee light" (Eph. 5:14) Christan Science proves that in the light of Christ, Truth, error disappears, as darkness vanishes

at the resence of light.

As you abide in the consciousness of God and try to express His love, you will find that you have the courage to recognize and face what is wrong in your life in order to correct it. Through Christian Science you will be able to change whatever may need changing in your work or surroundings. For example: if your work appears to be monotonous (and we are al somewhat in sympathy with the young woman who said that the trouble about life was that it was so daily), deny it. God's love for His children is so great that He has provided interesting and fruitful work for each one of them which that one alone can do. You, too, can find the best human expression of this work, right here and now; and you can do the work when found and do it well.

If you seem to lack a home or if your surroundings appear to be drab and unattractive, you may perhaps be unaware that your surroundings may in a way be ex-pressive of your thought. If you will allow Christian Science to show you the qualities which constitute home, knowing that they typify divine qualities of Mind such as stability, ease, inclusiveness, hospitality, and beauty, and will endeavor to express them, your surroundings will improve, and you will sooner or later see the and you will sooner or later see the promise of the prophet fulfilled, "My people shall dwell in a peace-able habitation, and in sure dwellings, and in quiet resting places" (Isa 32:18).

Abiding in Truth, accepting it as the only reality, is true prayer, as the Christian Scientist can prove for himself. Certainly it can be proved that one's ability to heal depends upon the extent to which he abides in the divine presence and expresses divine Love.

As one dwells in the conscious ness of Love, he will find that he need not submit to the buffetings of need not submit to the buffetings of evil. As an example of this: a small child whose parents were students of Christian Science burned his hand so severely that it was apparently seared white. His grandmother rushed up to him and asked to examine the hand. The child put his hand behind him and said, "It is all right, God abiding." He apparently felt no pain and said, "It is all right, God abid-ing." He apparently felt no pain, and in a short time the material evidence of the burn disappeared. This child had had no false edu-cation as to the reality of pain and accident and could therefore prove his exemption from their

Many of us have had a good deal of false education, and since false education might seem to be the source of most of our troubles, we source of most of our troubles, we need re-education, spiritual education, to enable us to claim and demonstrate our birthright of dominion. Christian Science comes to bring us this spiritual education; it comes to teach us how to specific to the company and to prove to us that prove pray and to prove to us that prayer is potent to heal through the irresistible impulsion and enforcement of divine law.

The Decisive Battle

Mrs. Eddy writes in Science and Health (p. 268), "Belief in a ma-terial basis, from which may be deduced all rationality, is slowly

yielding to the idea of a meta-physical basis, looking away from matter to Mind as the cause of every effect." Today many physical scientists of distinction have yielded to this idea to the extent that they no longer conceive of matter as substantive. However, it was not so when Mrs. Eddy had the sublime courage to publish in Science and Health her epoch-making statement known as "the scientific statement of being," which I quote in part: "There is no life, truth, intelligence, nor substance in matter. All is infinite Mind and its infinite manifestation, for God is All-in-all" (p. 468). At the time this statement was first made, the intellectual world was in complete disagreement with it. Not one physical scientist was found to support Mrs. Eddy's state-

at least, with her as to the unreality of matter. In his book "The Human Situa-tion" William Macneill Dixon, after quoting several authorities, sums up the consensus as follows (p. 170): "In the age-long encounter between mind and matter, thought and thing, it is not matter which has in our time gained upon its adversary. The standard of mind it is that has gone forward, and is planted upon the captured heights." He continues, "Our successors may look back, I believe they will look back, upon us as belonging to an age in which was fought the greatest and most mo-mentous among the decisive battles of the world."

ment. Now men have dealt with

the molecule and have split the

atom, and many, if not all, natural

scientists are in partial agreement,

Christian Science teaches that matter is inert, mindless, that it is never substantive nor causative, hence that it is never the substance of body and never the cause of disease. Christian Science makes it clear that humanity has afflicted itself unnecessarily through its belief in matter. It points to material belief, not matter, as the cause of disease and proves continually that correct thinking, spiritual thinking, is its cure.

It shows those who accept it that they do not in reality live in a material universe but that the material universe is but a belief or delusion of the carnal mind, from which one needs only to awaken in order to perceive the glory of the spiritual universe.

Income and Outgo

Christian Science teaches that under the deific law supply invariably meets demand. One who believes that his supply is matethat it depends upon stocks and bonds, a job or a business, is never without anxiety in regard to it, for he is well aware that his stocks can become worthless, his job can disappear, and his business fail. He is always afraid, even amid prosperity, that lack lurks just around the corner. Christian Science can release him from this fear by showing him that material belief is the cause of poverty, while spiritual thinking is its cure.

Poverty is a state of deficiency or lack, hence it could not have its source in God, who is infinite good; and since it is not sent by God, His children need not submit to it. Man, the expression of God, cannot experience what God does not know. Since it would be incon-ceivable for God to know lack, is not equally inconceivable for the man who reflects Him to know it? The Christian Science textbook says of man (p. 475), "He is the compound idea of God, including all right ideas; the generic term for all that reflects God's image and likeness." Such being his rich heritage, how could God's man be

These statements apply, of course, to spiritual man, God's image and likeness. They bring out the absolute truth concerning this man of God's creation. This truth can be successfully applied here and now in our human expehere and now in our human experience; for as we become consciously aware of our indestructible unity with God, we see that we reflect the affluence of our divine Principle. Then we begin to see that the limitation, from which so many appear to suffer, is merely a delusion of the carnal mind. Just as the children of Israel were guided through the wilderness into the promised land, there is also a way out of limitation for us. Christian Science teaches us to refuse to accept limitation of any kind. Limitation of opportunity, of strength, of intelligence, or of environment, is an illusion. We recognize it as such only when we perceive that we receive our intelligence. recognize it as such only when we perceive that we receive our intelligence, strength, and capacity from God alone and that He is limitless in His bestowals.

In the measure that we ourselves express Him, we can receive and possess what He gives. A friend of mine, a practitioner of Christian Science, recently said to me: "So

Science, recently said to me: "So many people come for help about their inadequate incomes. I wonder why they are concerned about their incomes, when they should their incomes, when they should be a practicular to their incomes, when they should be a practicular to their incomes, when they should be a practicular to the should be a practic their inadequate incomes. I wonder why they are concerned about their incomes, when they should be concerned about their outgo, for the outgo determines the income." The Bible says, "He which soweth sparingly shall reap also sparingly; and he which soweth bountifully shall reap also bountifully shall reap also bountifully" (II Cor. 9:6); and the Bible also says, "Whatsoever a man soweth, that shall he also reap" (Gal. 6:7). How can one sowing little but penuriousness and ill will expect to reap the fruits of generosity and good will? How can one maintain a false concept of his brother, see him as fettered by false appetites, in bondage to self-interest, a victim of the carnal mind, then expect to attain for himself the freedom belonging to the sons of God? How can we express the affluence born of spiritual understanding, if we ourselves are devoid of it?

As our love goes out to our brother in ever in the sons of concept of the carnal and the sons of God? How can we express the affluence born of spiritual understanding, if we ourselves are devoid of it?

As our love goes out to our brother in ever-increasing measure, as we are generous in our appraisal of him, willing to help him, anxious to deny whatever seems to be unworthy or inadequate in him, quick to praise him when praise is merited, glad to be silent when it appears to be unmerited, we shall find that our outgo of good has increased, and

we shall also find that our income of good has increased in the same

God's Government Supreme

Every citizen of a democratic nation is, or should be, interested in the government of his own country, for the quality of the government is determined by the colernment is determined by the col-lective will of its citizens. In the past decade it has been increasingly evident that world welfare should concern everyone in the world. The airplane is bringing us ever closer together physically, and the radio has made it possible for ideas voiced in Tokyo to be heard almost simultaneously

New York.

We find that we are bound together as never before, and we are aware that the welfare of the aware concerns each one of the world concerns each one of us, Does it not then become our duty to realize and to declare that the world is governed, neither by greed nor by fear, but by God? Under the divine government, man is free. Perhaps the most Christlike thing that we can do for our brother is to know that he is free to know that the omnipotent Min which governs him brings him under the rule and law of spiritur freedom. We may well ask ourselve

"What can we do to demonstra the government of God on earth? In her book "The First Church of In her book "In a church of Christ, Scientist, and Miscellany," Mrs. Eddy writes (p. 287), "Love lived in a court or cot is God exemplified, governing governments, industries, human rights, liberty, life." Great then is our responsibility for the well-being of the world. It is the purpose of every sincere follower of Christ Jesus to exemplify the love of God. The motive of every earnest student of Christian Science is so to live love that the activity of divine Love may be tangible and evident in human affairs, safeguarding human rights and bringing freedon to those who, as yet, know it no

In order to have righteous gorernment in a nation or in the world at large, we recognize the we must first learn to govern our selves; we realize that we me first have individual self-goven ment based upon man's unity wi God. Since man's unity with Gi is indestructible, man is free. The Bible says, "Where the Spirit of the Lord is, there is liberty (II Cor. 3:17).

Human beings prove their right to this spiritual freedom by releas ing themselves progressively from those human traits and characteristics which hold them in bondage to mortality. It is not right me is it natural even for human being to be hateful, fearful, barbaric All men have the capacity to express God. One who replaces dis-cord with harmony, disease with ease, is actually demonstrating t government of God on earth.

The oneness of God and m has never been broken. In the asurance of this divine fact we ca rest and rejoice, for the truth of the unity of God and man is ev erywhere present to deny any ilusion that man, collectively individually, is governed by evil. The great need of humanity today is an understanding of man's ow God-bestowed power. There I universal agreement that humanity needs to be saved. However, s long as it seeks to find its salvation through material means, will seek in vain, for salvation is found solely in the realm of Spirit and is humanly evident only as the power of Spirit is utilized. The divine power is actually available here and now. It is here to be

here and now. It is here to be used. It is as present as is 604 from whom it emanates.

Jesus said, "Behold, I give mit you power... over all the port of the enemy: and nothing shall any means hurt you" (Lib 10:19). We sometimes wonder it so many of the his followers as so many of us, his followers so reluctant to take these words Jesus literally and why we did the exercise of the dominion of the come did not be the come of the c stowed upon us to some and discerned and far-off future Is we believe that we accept the Biblical statement, "Now is the accept the Biblical statement," cepted time; behold, now is the day of salvation" (II Cor. 62)

Christian Science teaches that all men are to be saved. It teads us that we can help one another in proving the allness of God and the dominion over evil which one stitutes salvation. Mrs. Eddy the given to her followers a brid prayer which che ages us to us. prayer which she asks us to B daily for ourselves and for a mankind. It may be found on 24 at 1 of the Church Manual. kingdom come; let the rep divine Truth, Life, and Love to established in me, and rule out me all sin; and may Thy war enrich the affections of all makind, and govern them!" The government of God is actually the or government on earth or in heart for the Bible says, "I am the Lorand there is and there is a like the control of the Bible says, "I am the Lorand there is a like the lorand the says," I am the Lorand the says is a like the says in th and there is none else. . I'm sworn by myself, the word is a

I hereby designate the Iowa Park

(Published in the Iowa Park Herald Sept. 16, 23, 30, Oct. 7, 1954) THE STATE OF TEXAS To: Joseph H. Praetz, Jr., De-

endant, Greeting: You are hereby commanded to appear before the Honorable 30th District Court of Wichita County at the Court House thereof, in Wichita Falls, Texas at or before 10 o'clock a.m. of the first Monday next after the expiration of forty-two days from the date of the issuance of this citation, same being the 1st day of November, A.D. 1954, then and there to answer Plaintiff's 1st Amended Petition filed in said Court, on the 14th day of September, A.D. 1954, Original Petition filed on July 21, 1954, in this cause numbered 54,172-A on the docket of said court and styled Mary Ethyl Praetz, Plaintiff, vs. Joseph H. Praetz, Jr., Defendant,

A brief statement of the nature of this suit is as follows, to-wit:

After alleging jurisdiction, plaintiff further alleges that she and defendant were married on or about March 11, 1947 and continued to live together as husband and wife until on or about July 18th, 1953, when by reason of cruel, harsh and tyrannical treatment on the part of the defendant toward this plaintiff without cause or provocation, was of such a nature as to render their further living together insupportable; that during the time they were married, they adopted the following children, a boy six years old, a girl five years old and a girl four years old. Plaintiff says they acquired one lot in Kansas City, Missouri, which is community prop-

Wherefore, plaintiff prays that defendant be cited by publication to appear and answer herein as required by law; that on final hearing she have judgment for divorce, care, custody and control of said children; and that the defendant be ordered to pay \$100.00 per month to the Clerk of Wichita County, for the support of said minor children; and for such other and further relief, in law and in equity, to which she may show herself justly entitled.

If this citation is not served within ninety days after the date of issuance, it shall be returned un-

The Officer executing this process shall promptly execute the same according to law and make due return as the law directs.

Issued and given under my hand and the Seal of said Court, at office in Wichita Falls, Texas this the 14th day of September, A.D. 1954. Attest: (SEAL)

Flora Cobb, Clerk, District Court, Wichita County, Texas. By Wayne Wiggins, Deputy.

Robert R. Brubaker, Manager

Sue Geisert Marries **Baptist Church Rites**

Family sentiment was noted in the costume worn by Miss Dolores Sue Geisert when she became the bride of William Carroll (Pete) Thompson of Lubbock in Sunday afternoon services performed at the Iowa Park Baptist church at 3:00. Rev. H. M. Rick directed the ex-

change of nuptial vows between the daughter of Mr. and Mrs. S. B. Geisert of Iowa Park and/ the son of Mr. and Mrs. Lloyd Thompson of Lubbock.

The bride, when given in marriage by her father, wore the dainty bridal gown worn by her paternal aunt, Miss Jimmie Geisert, when she became the bride of George Bruce McGlashan three years ago. To observe further family senti-

ment she wore her paternal grandmother's golden wedding band. Created of white organdy over

white taffeta, the bride's waltzlength dress was designed with a tightly fitted evelet embroidered organdy bodice with a low scalloped neckline. The full skirt featured an accordion pleated panel in front, ornamented on either side with the eyelet embroidered organdy used in the bodice. The veil of bridal illusion cascaded to fingertip length from a caplike lace headdress with sequin trim

The bride wore long lace mitts and carried a white prayerbook topped with white gardenias and

feathered carnations, Mrs. A. R. Potts of Wichita Falls attended as matron of honor. She wore an orchid organdy frock styled with a full waltz-length skirt and a tight bodice featuring a low neckline. On her head she wore a ruffled orchid organdy bandeau. She carried a crescent bouquet of yellow daisy mums.

Little Becky Geisert attended her sister as flower girl. She was attired in yellow organdy and carried a basket filled with blue daisies.

Lighting the candles in the nuptial space were Mrs. Deloss Rich and Miss Mary Ellen Roberts. Clad in blue organdy and green organdy, respectively, their costumes were patterned along identical lines to that worn by the honor matron. They wore wristlets fashioned of yellow daisy mums.

Best man for the groom was Eldon Embree of Lubbock, Duties of ushering were assumed by A. R. Potts and Jerry Geisert, the bride's brother. A musical background for the

wedding was provided by Mrs. O. E. Lochridge, organist, and Lloyd Thompson jr., of Lubbock, brother of the groom, vocalist.

Decorations in the nuptial space featured three large white gladiolus filled baskets, the central basket before which the couple stood being entwined with emerald foliage.

Stylized palm trees marked extremities of the space while white candles burning in tall candelabra in the choir loft provided effective background The wedding was followed by a

line were the parents, the newly- business, he says. weds and feminine members of the bridal party.

Miss Linda Geisert, sister of the bride, presided at the bridesbook In Dairy Management during the reception.

three-tiered wedding cake topped with a miniature bride and groom Other table appointments included a crystal punch service and white candles glowing in crystal holders. Miss Shirley Barron presided at the punch bowl and Miss Patsy Thompson of Lubbock, sister of the

groom, served to cake. Other house party members were Mmes. G. M. Brubaker, Dorothy Thompson, Clifford Roberts and R.

R. Brubaker. When Mr. and Mrs. Thompson left for a honeymoon trip to Baltimore, Md., the bride was wearing a smart fall two piece dress featuring a navy blue skirt and matching striped jacket. On their return the couple will establish residence in Lubbock where the groom is connected with Furr food store.

Mrs. Thompson was graduated from Iowa Park High School last spring. During her senior year she was accompanist for the Melody Maids, treasurer of the class, secretary and reporter for the band. She was also FFA Sweetheart and runnerup for school beauty. In the band six years, she was a majorette two years. She was on the annual staff for two years.

Since graduation she has been employed by Southwestern Bell Telephone company. She will work for the company in Lubbock. The groom is a graduate of Lub

bock high school. A member of the choir for two years, he was voted all-state second tenor during his se-

Dairy Cows Need "Vacation"

Dairy cows, too, need an occasional rest.

Unless given a good vacation between lactation periods, dairy animals may be unable to produce a strong, healthy calf and give their full quota of milk, says R. E. Burleson, extension dairy husbandman. He refers to the dairy cow as a "complicated piece of machinery."

A cow, during her dry period, must recover from heavy milk production, build a calf and store reserves for her next lactation period. How well she does these jobs depends upon the length of the rest and her feed and care during this time, says the specialist.

She'll need six to eight weeks of rest, good care and a balanced ration. A high producer will deplete her reserves of minerals and nutrients. Lowered production may resuit unless these are rebuilt.

The problem of feeding a dry cow is practically solved if she has access to a good pasture. But otherwise hay or silage should be fed liberally. The amount of grain to feed de-

pends upon the condition of the cow, but generally the same grain can be fed to dry animals as to milking cows. Every dollar put into a good dry

cow is a wise investment, Burleson says. Here's the reason: A dairy cow that is fed well and cared for during this time will often proreception in the church parlor. The duce 25 per cent more milk during guests were greeted by Mrs. Cecil her next lactation. It's the milk in Marquart. Composing the receiving the bucket that counts in the dairy

Record Are Important Herd records form the foundation

out danger signs and possible de-

Some herds in Wichita county have cows which are not paying gether. their way, Haws points out. In their cases an empty stall would increase profits. Only actual production records can sound out these boarders, he says. It cannot be done by guessing or estimating.

Only a small percent of the Grade A milk producers in Wichita county are members of a dairy herd improvement association, and many registered herds are not on test. The majority of herd owners are trying to operate without the most important tools for making muchneeded sound decisions.

Concentrate feeds, the most expensive in a cow's ration, should be controlled, or fed according to production. Without records, a cow may be underfed, overfed, or properly fed. Chances are two to one against being correct, Records on milk production will eliminate such

Are herd replacements out of the best producing cows? There is danger in being oversold on the statement "The bull is half the herd." As far as each heifer is concerned, one-half of her inheritance came from her dam. Here again, without records, the dairyman is guessing at one-half of her inheritance, regardless of the bull,

Committee Praised for Planning of Parade

Our hats are off to Chairman John Mixon and his committee for the nice parade Monday before the official opening of the 1054 Texas-Oklahoma Fair! The four mayors of Wichita coun-

ty rode at the head of the parade: Lloyd Thomas of Wichita Falls, T. E. Shaw of Electra, Frank Kelley of Burkburnett and Bert Van Horn of Iowa Park.

Sheppard AFB commander Gen. Edward White shared a car with C. P. McGaha, representative of Albert Johnson of Iowa Park.

Gov. Johnston Murray of Oklahoma, Supt. Keith D. Swim and Rep. Tony Fenoglio of Nocona rode to-

The Fair officials occupied another car.

The parade featured bands from Sheppard, Iowa Park and Electra. Riding clubs from Clay county and

ceived frist prize, with the Lions club and United Church Women tying for second.

Alan Berry was announcer over he P.A. system furnished by the Chamber of Commerce.

Woodall, George Jones, Wayne House, Eldon McDowell, Wilburn Bedford.

Baptists to Hold Three State Meets in October

Fort Worth will be host city for three annual Baptist state conver tions in October.

The 69th annual session of the Baptist General Convention of Texas will begin on Tuesday evening, October 19. Sessions of the threeday convention will be conducted in Will Rogers Coliseum.

The Women's Missionary Union will have its annual convention on Monday and Tuesday, Oct. 18, 19, in Will Rogers Auditorium.

At the same time the annual Baptist Brotherhood convention will be in session in the Coliseum.

for 20-odd whooping cranes winging their way south from an Arctic wilderness to a marshy refuge on the Texas coast near Rockport.

The migration is an annual event for the whooping cranes, perhaps the most celebrated of all birds and the last flock of their kind still in existence.

The cranes are the largest and most stately of all migratory fowl on the North American continent. They stand more than four feet high, and they are snow white except for sharply etched black wing tips, black legs, yellow bills, and bare red crowns.

Their fall migration takes them from their summer nesting ground in northern Canada to the Aransas National Wildlife Refuge about 15 mlies north of Rockport on the

Texas coast. Whooping cranes generally leave Canada in late September or early October. They fly in small groups, and bring their young ones-hatched during the summer. Length of time required for the trip varies. Some arrive at the refuge as early as mid-October. Others don't complete their flight until late Decem ber or early January.

The cranes usually head back to Canada in April.

Pvt. Howard Gay jr., who finished basic training at El Paso recently, has been home visiting his father and grandmother Mrs. May Palm. Howard has now been transferred to Fort Knox, Ky., where he has entered clerk school. He reports Kentucky is a beautiful country.

of Fullback James Fenner. The teams battled to a scoreless deadlock during the first half. After the second kickoff, the Hawks started from their own 34 yard line and marched 66 yards to a touchdown. Fenner scored but Danny Kinnet broke through to block the extra point try.

In Dedicated Game

The Bulldogs stormed back and scored the tying touchdown when Jerry McCabe handed the ball on a reverse to Leslie Terry who ran from the Iowa Park 14. Lewis Mc-Donald's kick was low.

Playing like they knew they could the Hawks then took command. Gerald Combs took the kickoff on his own 5 and ran to the 45 before he was stopped. With every man doing his best, the Hawks marched downfield. Joe Garrison followed his blockers for a 14 yard scamper and Fenner added two ground gainers. From the one yard line Harvey Klinkerman sneaked over to seal Burk's fate. Fenner's attempted conversion was blocked by Gary
