TO PRESERVE THE HEALTH!

USE THE—Magnet Appliance Co.'s

Magnetic Protector!

PRICE ONLY \$5.

They are priceless to ladies, gentlemen and children with weak lungs; no case of pneumonia or croup is ever known where these garments are worn. They also prevent and cure heart difficulties, colds, rheumatism, neuralgia, throat troubles, diphtheria, catarrh, and all kindred diseases. Will wear any service for three years. Are worn over the underclothing.

Catarrh.

It is needless to describe the symptoms of this nauseous disease as that is supplying the life and strength of only too many of the fairest and best of both sexes. Labor, study and research in America, Europe and Eastern lands have resulted in the Magnet Lung Protector, affording cure for catarrh, a remedy which contains no drugging of the system, and with the continuous stream of Magnetism permeating through the afflicted organs, must restore them to a healthy action. We place our price for this Appliance at less than one-twentieth of the price asked by others for remedies upon which you take all the chances, and we especially invite the patronage of the many persons who have tried dragging their stomachs without effect.

How to Obtain

This Appliance. Go to your druggist and ask for them. If they have not got them, write to the proprietors, enclosing the price in letter at our risk, and they will be sent to you at once by mail, post paid.

THE MAGNET APPLIANCE CO.

28 State St., Chicago, Ill. Note.—Send one dollar in postage stamps or currency (in letter at our risk) with size of shoe usually worn, and try a pair of our Magnetic Insoles, and be convinced of the power residing in our Magnetic Appliances. Postively no cold feet when they are worn, or no more rheumatism.

KANSAS CITY TO MEMPHIS

Without Change of Cars!

The attention of the people of the west and north-west is called to the Memphis extension of the Kansas City, Ft. Scott & Gulf Railroad, now completed and in operation between Kansas City, Mo., and Memphis, Tenn. The completion of this short line to the south brings that hitherto to the West practically inaccessible section into close relation with the west and north-west to the very great advantage of all.

Extraordinary Offer to All Wanting Employment.

We want live, energetic and capable agents in every county in the United States and Canada, to sell a patent article of great merit, on ITS MERITS. An article having a large sale, paying over 100 per cent. profit, having no competition, and on which the agent is protected in the exclusive sale by a deed given for each and every county he may secure from us. With all these advantages to our agents, and the fact that it is an article that can be sold to every house owner, it might not be necessary to make an extraordinary offer to secure good agents at once, but we have concluded to make it to show, not only our confidence in our invention, but in its salability by any agent that will handle it with energy.

Mine Leasing.

Several Rico mines have at one time or another been worked under leases, and this method of working has generally been productive of best results to both lessee and owner.

The general features of leasing and the reciprocal benefits to owners and operators are too generally understood to need recapitulation and only the practical results demand recital.

No district in the state has so thoroughly adopted this system, and here we find not only all classes of mines thus operated, but also all classes of citizens enlisted in the grand army of lessees. Business men, professional men, the clergy, sporting men, miners and even newspaper men are enrolled in the ranks, seeking, securing and operating under royalty to owners.

Blasting Without Caps.

The Ruby Hill (Nevada) Mining News produces the following. We'll bet Rico's News against Ruby Hill's News that the thing can't be did:

A miner employed at Ivanpah, San Bernardino county, California, has hit upon a new way of exploding giant powder that may work a revolution in the use of that explosive.

It has always been believed that giant powder wouldn't explode without the fulminate cap, and in the use of the cap was the great danger to be apprehended. Our miner, by the way, is a sailor without any miner's experience, and ran out of caps, and seeing no reason why the powder should not explode without it, just placed his fuse in position, tamped his charge and ignited his fuse; the result was that it exploded as well as though a cap had been used.

Law on Tunnel-Sites.

On this much complicated subject the Denver Mining Review says: There is no authority of law for a tunnel location 3,000 by 1,500 feet.

A proper location is the width of the tunnel itself for three thousand feet. The requirements of location and notices of a proposed tunnel apply only where blind lodes are sought to be discovered.

When a lode is struck or discovered for the first time by running a tunnel, the tunnel owners have option of recording their claim of fifteen hundred feet all on one side therefore.

Maximilian's Execution.

Mr. William McCarthy furnishes the Washington Hatchet with an interesting account of the manner of the execution of Maximilian, which he obtained from the Jeffe Politico of the place where the unfortunate Austrian met his death.

Maximilian, Marrimon and Mexia were placed side by side, with Maximilian in the center. He, however, calmly said: 'I am alien-born; give the place of honor to a native-born Mexican, and moving to the left, gracefully waved Marrimon to take the center place—the place of honor.'

He refused to allow his captors to tie his arms, and just before the work 'fire' was given, he tore the bandage from his eyes, and raising himself up to his fullest height, received the fatal volley. All three were instantly killed, practically riddled with bullets, the Mexican Government having considerably ordered forty muskets for each man.

Ed. DAVIS returned to Telluride Tuesday last. The Nellie Gold Mining Company has just filed with the Secretary of state, its articles of incorporation.

Among the trustees for the first year we notice the name of 'Edward L. Davis, of Rico, Colo.' The duties of this position will assist in preventing him from being a candidate for the republican nomination for representative, of which there has been talk.—DOLORES NEWS.

We see no reason why this should prevent him from being placed before the convention, at which place he would doubtless receive the nomination without trouble. He is as popular as he is competent for the position, and we would be glad to support our esteemed friend.—Telluride Journal.

The Silver World man, over at Lake City, thinks Jordan is a hard road to travel and makes the following remarks: 'From the frequent demise of Colorado newspapers and the starving condition of most of them, including the San Juan papers, we judge that Colorado advertisers and subscribers harbor the illusion that newspapermen print their own greenbacks or that they can live upon air and scenery, take growling, kicking, cursing, cordwood and potatoes on subscription and to pay and satisfy competent printers in their employ with stand-offs and while doing all this, keep an overstock of faith, courage and enthusiasm in the country sufficient to supply the local community at retail and the outside world at wholesale.'

E. P. SUYDAM, of Rico, was in town last Thursday. He has his eye on some Red Mountain properties and we hope he will secure them. Mr. Suydam is an old-timer in the San Juan and has the reputation of never being idle. A few rustlers like him could materially brighten the outlook in this camp.—Red Mountain Review.

SLEEPING-CARS are a great comfort to travelers in Mexico. The wise bandits never disturb the passengers; they go for the porters.

Orders at home or from abroad, attended to with promptness.

The day after the death of Secretary of the Treasury, Chas. J. Folger, which took place Thursday afternoon of last week, the Secretary of State addressed the following letter to the other members of the Cabinet: 'With deep regret I announce that Hon. Charles J. Folger, Secretary of the Treasury, yesterday died at his home at Geneva, New York. Thus has closed the life of a distinguished and respected citizen, who has been in the service as an executive officer of the United States, and as a Legislator and Judge in his own State, and has won the esteem and regard of his countrymen. The President directs that all the departments in the executive branch of the Government and all the offices subordinate to them, shall manifest due honor to the memory of this eminent citizen in a manner consonant with the dignity of the office which is thus made vacant, and with the upright character of him who held it. To this end the President directs that the Treasury Dept. and its dependencies in this capital, be draped in mourning for a period of thirty days; that the several executive departments shall be closed on the day of the funeral of the deceased and on all the public buildings of the government, throughout the United States, the National flag shall be draped in mourning, and displayed at half mast.'

There is in the Southern part of Nevada, near the Arizona line, and a short ways above the mouth of the Grand Cañon of the Colorado, a house built of petrified logs. The cabin is six feet high and the interior is seven by eight feet. It is built in the side of the hill, only a portion of the side of the cabin and the front being exposed to view. This cabin was erected by a desperado and cattle thief, and was sought by him as a place of safety when pursued too closely by the enraged people whom he had been robbing.—Denver Inter-Ocean.

It has just transpired that an effort was made at the Grand Opera House on Wednesday night to assassinate Sitting Bull. As he was leaving the theater one of two unknown men suddenly drew a pistol, and without raising, aimed it at the great chief, but his companion knocked the weapon down before it could be discharged. Both of these men followed the Indians out, but no further attempt on their lives was made. Sitting Bull is now constantly guarded, even in the hotel a guard being placed at his door.—St. Paul Gazette.

The Rome correspondent of the Times says: A cholera panic prevails throughout Italy, each town taking measures for its protection regardless of the Government. Some of them post guards to prevent all travelers from entering their precincts until after a quarantine of twenty days, and many have closed their gates to everyone. The villages have established armed cordons and the result is that in many parts of the peninsula practical anarchy prevails. Travel is greatly interrupted.—London Times.

In a Mexican railway case, involving a large sum of money, the favorable opinion of the judge was considered eminently desirable. A deputation from one of the contending parties interviewed him, and remarked confidentially: 'Sign this, and we'll give you five thousand dollars, and not a living soul shall know anything about it.'

'Not a living soul?' 'Not one.' 'Well, make it six thousand dollars, and I don't care a—who knows it.'—Denver Inter-Ocean.

The oldest and largest tree in the world is a chestnut, near the foot of Mount Atna. It is hollow, and large enough to admit two carriages driving abreast through it. The circumference of the main trunk is 212 feet. The Grizzly Giant, monarch of the Mariposa Grove, measures ninety-two feet. The famous 'Charter Oak,' near Hartford, Conn., which fell August 21, 1856, was thirty-three feet in circumference at the ground.

Alafiosa Independent, 6th. Joseph Meredith, a prominent resident of Rico, was in town Tuesday. He is a delegate to the convention at Colorado Springs, and is a Hill man.

Lafe Pence, an attorney of Rico, and an old friend of the writer, was in town on Monday on his way to Del Norte to attend to business in the United States District Court now in session there.

The Pioche Record has this gnaty paragraph: 'There is a gnat here this year that crawls up under a person's hair and bites him on the scalp, causing an immense lump to swell on his head. It is hard for a person who has been bitten by one of these gnats to tell whether it is a little head on a big bump, or a big bump on a little head.'

'What's the matter with you?' asked a bar-keeper of a man who was standing near the counter shivering like an aspen. 'I am shivering for the drinks,' he replied. Then something struck the stranger, and he concluded that there was a horse or him, so he retired in disorder.—Scissors.

'Well, well!' said old Mrs. Gumbo, as she laid down her morning paper: 'And so they've rescued poor old Greeley alive! I do hope that Horace'll take hold of the Tribune again and run it sensibly like he used ter!'

The Oldest Paper in the Dolores Country.

MINING MATTERS.

A Week of Progress.

DURING WHICH VERY ENCOURAGING DEVELOPMENTS HAVE BEEN MADE.

Charging the Pasadena Furnaces.

The Rico Reduction Works and the Santa Clara Mill Preparing For Active Work.

THE MAMMOTH. A force of men is at work on the Mammoth, on Dolores mountain.

SILVER BELL ORE. Wattles & Jones' teams came in on Wednesday with another lot of Silver Bell ore.

THE HONDURAS. We understand that Charlie Dutcher and Bob Burghardt have taken a lease on the Honduras.

MAQUIE ORE. S. H. Matthews, of Ames, and J. S. Fletcher, of Ophir were in town Thursday with a shipment of ore from Mount Wilson.

THE BOURBON. Some runs made on ore from the Bourbon gave richer returns than any preceding ones. The ore tested this week run in the vicinity of 200 ounces.

THE GYPSY. A sample lot of ore from the Gypsy, the property of Morey & Sirrell, was sent to the Grand View this week. It ran 25 ounces in silver and 46 per cent. in lead.

SHEEP MOUNTAIN. W. W. Bodley, Charlie Andrews and Jim Morris have gone up to Sheep Mountain to work on some claims belonging to Messrs. Habermann, Bodley and Andrews.

THE PAROLE. The Parole, owned by Johnstone, Robbins, Caldwell and Crooke, is being worked. It is a mine whose large bodies of low grade ore have made it prominent, and it will be heard from as a producer.

THE DUDE. The Dude ore has been considered chiefly valuable as a flux, but it is not likely that it will show up very rich ore. An assay of 671 ounces was made this week. Shipments of ore are of almost daily occurrence.

THE RICHMOND. Louis Schloss is operating the Davis-Thompson interest in the Richmond and J. W. Burns is working his own interest. There is some prospect of a lease on the property, and preparations are being made for such work.

READY TO SHIP. Andy Miller on Wednesday brought down two tons of ore from one of Wm. Gilham's property at Trout Lake. This will be tested and if the returns are satisfactory, Gilham will send down 50 tons, which is already mined, and follow this up with more.

THE BLACK HAWK. Work at the Black Hawk has been resumed in two different places on the mine. Messrs. Darling and Rogers have a lease on a portion of the lode near the Little Maggie end line and have opened a vein 12 to 18 inches wide of ore running 35 to 67 ounces in silver.

LITTLE HELEN. John Summers and Jim Tilden have located the Little Helen on Telescope Mountain. It is a claim which has been abandoned for some time, but the new owners have discovered a new vein and had an assay of 57 ounces. They commence work on it to-morrow.

THE FLORA. In working the Flora, Messrs. Clark and Bradley have struck a vein of spar, quartz and carbonate ore, with a little decomposed subcarbonate, 30 inches wide, running from 35 to 265 ounces. A tunnel is in 60 feet; the vein was cut about 50 feet in. The claim is on Telescope Mountain.

THE DEADWOOD. J. M. Dodd will commence work Monday morning on the Deadwood, on Dolores Mountain, near the head of Deadwood gulch. It is one of five claims in the immediate vicinity owned by him. A test on ore from the Deadwood gave \$48.90 in gold and silver and 41 per cent. in copper.

THE WEEK'S WORK. This week has been one of very encouraging development. Its most encouraging feature is that mines which have not been counted on as a source of ore supply are showing an ability to produce good ore in quantities. With the old stand by they guarantee an abundance of rich mineral for every smelter and mill which will run.

THE RICO REDUCTION WORKS. The last of the machinery for the Rico Reduction Co., was brought in yesterday by Longenbaugh. At Rockwood now there only remains a car-load of salt and some odds and ends. In ten days the works will be ready to start up and the addition of the amalgamation plant will enable them to handle many ores which were shut out before.

THE LELIA DAVIS. The Lelia Davis has this week shipped about 20 tons of gold ore and is producing from one stope about 2 tons daily. Eight men are working and are preparing to open new stopes. The winze from tunnel to shaft has been timbered, preparatory to extracting the ore struck in sinking the shaft, and which runs about 65 ounces. It will be dropped to the tunnel and shipped by way of the new trail, passing by the mouth of Little Maggie tunnel.

THE LITTLE MAGGIE. About 175 tons of Little Maggie ore has been delivered to the Pasadena smelter and is now being sampled. There are about 300 tons of ore at the mine, probably 8 tons of which are daily being brought down. Recently five feet of sand carbonate ore was struck in the breast of the tunnel, now 500 feet in and 400 feet below the surface. An average of the entire width of the vein was taken as nearly as possible and runs 43 ounces in silver, 32 per cent in iron and 27 per cent. lead.

THE GRAND VIEW. The fire brick, plates, etc., for repairing the Grand View furnace have arrived and work on the furnace will be at once commenced. It will require several days to finish the task of repairing, as only one mason can be employed at any one time to advantage and a few more days will be required for drying. The ore has not lately been shipped to the smelter, but it has been stored and is accumulating at the mines. A new body of ore was opened this week in the Grand View mine. As the ore lately mined has been from the Phoenix ground, this should considerably increase the ore production.

THE SANTA CLARA MILL. Men will be put to work in the Santa Clara mill on next Monday morning, getting it in shape for operations after an idleness of some months. The mill, with the Puzzle Extension, is under lease to E. P. Suydam, although leases of mine and mill have no connection. The rich developments in the mine have caused this step, and it is expected to keep the mill fully supplied with ore of a free-milling character from the Puzzle Extension and other mines. The capacity will be 20 tons daily. All arrangements have been perfected, and within the next two weeks the mill will be at work; Mr. Suydam thinks in 8 or 10 days.

THE PREMIER. The Premier is a lode which has all of a sudden sprung into considerable prominence. Last week it was almost unheard of outside of a small circle; this week it is receiving much attention. Thirty sacks of the mineral were sent down to the Pasadena and the mineral ran 42 ounces. A little later 12 sacks of ore, containing mineral of three grades, was tested and the result was; 50, 62 and 90 ounces, respectively. The mineral is very easily mined, being contained in a vein from 5 to 6 feet wide, with pay streak of 24 feet, which can be easily worked with pick and shovel. The character of the ore is a quartz spar, somewhat discolored, and looking as though it did not carry silver enough per ton to plate a teaspoon. The stuff is said to be over 90 per cent. silica. A tunnel is on the vein, but a chamber is being cut some distance back from the breast and a shaft will be sunk. Shevley, Bangs, Sherry and Goble are at work. The claim was located in 1880 and it is owned by W. B. (Ed) Shevley, of Rico, and Franc O. Wood and W. H. Lamb, of Colorado Springs.

THE C. H. C. The C. H. C. has attracted more attention within the past two weeks than any mine in the district and it deserves more than passing notice. On Monday last two men were put to work on a mill-hole, 22 feet from the workings which have produced ore since the resumption of work. On Thursday morning they opened up 12 inches of ore, and the vein in the other workings holds out as before. In this connection we have a correction to make; last week a number of papers were printed stating that the pay-streak, was 12 inches in width—we should have said 48 inches. A road is being built by W. H. Sockrider, who is working a number of men and it will be finished some time next week; a wagon can be drawn to the mine, but it will require some days to put it in complete repair. The grading for the boarding house has been completed and it will be built at once and other preparations for work during the winter will be made. One hundred and fifty sacks of ore were at the mine last night ready for shipment to day. The ore is of very high grade, and the last mill-run on C. H. C. ore (made some time ago) was 250 ounces in silver. D. M. Evans is foreman at the mine.

THE PUZZLE EXTENSION. It has been a long time since we have had anything of particular interest to record from the Puzzle Extension mine, but the developments of the past few days place it in shape to produce rich ore in no limited quantity. Work was commenced on a small scale a short time ago and since that time various tests have been made on the ore. We give them in order as made, and by whom. All tests were for silver:

By McCassey—73 ounces, By Pasadena—77 ounces, By McCassey—46, 71, 73 and 116 ounces, By Pasadena—54, 22, 170, 45 and 142 ounces, By McCassey—139 and 207 ounces, By Grand View—107 ounces. Yesterday 52 sacks of ore were sent to the Pasadena smelter, taken from various portions and intended as an average of 70 feet of exposed mineral. Much of this shows native silver and chloride ore and it will give a high return.

An increased force was put to work on Thursday. An underground survey of the mine was made this week and shows

it to be in line with the old Puzzle for a distance of more than 700 feet. The mine, as is generally known, is now under lease to E. P. Suydam for a term of two years, beginning some little time back. An incline will be run from the level of Horse creek to strike the present workings, which are 111 feet below the surface and a California whim will be put in use. At present the ore and waste must be run 250 feet and then raised by windlass to the surface.

WILL CHARGE TO-NIGHT. The fire in the Pasadena furnace was lighted about half past eight o'clock last Saturday night and has been burning ever since. Everything being in readiness for the match, Mrs. Jno. F. Watkins applied it to a Dolores News procured for the purpose and the fire which is destined to reduce much of Rico's crude ore into bullion was kindled. We feel proud of the compliment to the News. We were content that the paper should do its utmost to advance the enterprise, and be pleased to think that its efforts should be thus recognized, in practically using it as a means to start the fires of the furnace. The furnace is working splendidly, and the first charge of slag, put in today, was melted in one hour. The heat is intense and nothing is lacking now that could be desired. Some time tonight the furnace will receive its first charge of ore and we hope will not be empty for many a day. About 250 tons of ore are already bedded and ore bins and sheds are crowded with mineral ready for the blast. The capacity of the concern for the reception of ores will at once be increased. Everybody about the works is happy to-day and certainly no enterprise ever commenced its operations under more favorable auspices than does this one. It enjoys the confidence and good will of the people and all hope and believe that the good work the enterprise has done in stimulating the mining industry here has but fairly begun. That it has so stimulated development is apparent on every side. It has brought into the range of profitable treatment, the ores of many mines heretofore worthless and many which otherwise would have been idle are to-day not only working but producing.

Great Fire in Cleveland. CLEVELAND, Sept. 7.—A great conflagration is raging on the flats. The entire fire department is in service and telegrams were sent to Akron, Youngstown, Painesville, Erie, Sandusky and Toledo for assistance. The origin of the fire is unknown. Incendiarism is suspected by some, but the most probable theory is that sparks from a tug set fire early in the evening to a pile of shavings, from which the flames spread until the wood of Perry & Co's. extensive lumber yard was ablaze. The fire continued to extend, defying all efforts of the firemen. The lumber yard of Potter, Birdsall & Co. and C. G. King & Co. were also consumed.

The Variety Iron works are destroyed. Stanley's candle factory is burned and part of Sherwin, Williams & Co's. varnish works, and at 10 o'clock the conflagration threatens to become still more extensive.

About ten acres of lumber and frame buildings were aflame at one time and huge clouds of smoke, thickly studded with blazing cinders, were blown by the changing wind for miles, causing intense excitement lest the myriads of sparks should kindle fires in every direction and perhaps lay waste a large part of the city.

A Petroleum Spring near Pagosa. It has long been known that on the Navajo river, about twenty miles from Pagosa Springs, a petroleum spring exists. Petroleum issues from the rocks in a small stream and runs off into the river. The indications are that it has been running for a long time, as a large deposit of asphalt has been formed surrounding the spring. Recently the locality was visited by a gentleman interested in oil and some of the oil and asphalt was brought away by him. The asphalt, says the Denver News, was sent to Prof. Davis, chemist of the Agricultural College, and analyzed with the following result:

Oil.....34.943 per cent Other combustible matter.....5.889 per cent Moisture and mineral.....59.168 per cent The oil is quite pure and burns readily although it is believed to be more valuable for lubricating than illuminating purposes.

The country abounds in coal, shale and sandstone, which are supposed to be favorable indications for the production of petroleum. The Durango branch of the Denver & Rio Grande road runs near this section of the country, rendering it easy of access and convenient for prosecuting the oil business if it should prove to be profitable.

The Mayflower mine, located up in Bridal Veil Basin and owned by Gamble, Wagoner and Shroy, has been bonded to E. L. Davis and Mr. A. Wilson, of Stafford in England, for \$75,000, the sum of \$1,000 forfeit money being paid down to the Mayflower boys, who will continue working the property until the bond expires, at which time the mine will no doubt prove its value and pass into the hands of a rich company.—Telluride Journal.

Mr. Davis, spoken of above, returned to Rico this week and tells us that it is not improbable that he will go to London this winter, where negotiations looking to the sale of the Mayflower have already been entered into. The mine is one of the best ones of that rich gold region and is bonded for one year. A ton of gold specimens, which are very beautiful, as well as possessing great intrinsic value, were turned over to Messrs. Davis and Wilson, for use in showing what the vein has in it, and these specimens have been sent to England.

The Telluride Evening News has been discontinued and the weekly Mining News will take its place.

THE days when people believed in witchcraft are long past among civilized people, but some of our Mexican neighbors in Rio Arriba county, New Mexico, do not seem to be entitled to a place among that class. At Chimayo, in that county, a few days ago, Juanita Henera, a Mexican woman who was accused of being a witch and in league with the devil, was brutally butchered by three Mexicans, who dragged her from her adobe hut, stripped her naked, bound her hand and foot and finished their devilish work by butchering the poor creature with bowie knives. Although they are known, no arrests of the murderers have been made as the officers are afraid of them.

The republican state convention met at Colorado Springs at noon Wednesday. Hon. W. A. Hamill, of Clear Creek county, was made temporary chairman. He appointed committees on credentials, permanent organization and resolutions, after which an adjournment was made to two o'clock Thursday afternoon when the session was resumed. It is stated that the committee on credentials reported adversely to the Hill interest, and the convention adjourned to seven o'clock, Thursday evening, since which time we have no report.

It is reported that Indian Agent Warren Patten, of the Southern Ute Agency, has resigned his position and Senator Galloway, while in Denver a few days ago, headed a movement to have Gen. J. J. Jefferson appointed. We believe the movement was premature, as there seems no grounds for belief that Agent Patten has resigned, or that he will do so. The dissatisfaction with Agent Patten has all arisen out of political reasons.

In the proceedings of the U. S. District Court at Del Norte we notice the following disposition of the case of the Parole vs. Forest: "Richard Johnston et al. vs. Gustavus St. Gem et al. Remanded to District court of Dolores county, upon defendant's motion."

BEN BREWER'S BRICK BARN.—This fine alliterative heading refers to the burning of the barn spoken of on Sunday last. It was situated on Colfax avenue, Denver, and fourteen horses and other property were sacrificed to the flames.

The election in Maine last Monday resulted in the re-election of Governor Robie (rep.) the present incumbent, over John B. Redmon, (dem.) by a majority of about 15,000.

NOTICE OF FORFEITURE. Rico, Dolores County, Colo., July 12th, 1884. TO RICHARD HAMIL: YOU are hereby notified that we have expended one hundred dollars in labor and improvements upon the LADIAN lode mining claim, situated in Pioneer Mining District, County of Dolores, and State of Colorado, and of record in the records of said county, in order to hold said premises under the provisions of section 224, Revised Statutes of the United States, being the amount required to hold the same for the year ending December 31st, 1883.

And if within ninety days from the service of this notice by publication, you fail or refuse to contribute your proportion of such expenditure as a co-owner, your interest in said premises shall be deemed to have been abandoned and the undersigned under said section 224. AUGUST MISCH, BY J. J. GRAHAM, CHAS. A. JONES.

MINING APPLICATION NO. 369. DISTRICT NO. 7. U. S. LAND OFFICE. DURANGO, COLO., AUGUST 23d, 1884. NOTICE IS HEREBY GIVEN THAT A. J. Clark, whose postoffice is Rico, Colo., has made application for a patent for 1500 linear feet on the SKEPTICAL LODE, bearing silver, the same being 375 feet N 3° E and 125 feet S 3° W from discovery shaft thereon, and 230 feet in width, and 230 feet in length, and situated in Pioneer Mining District, Dolores county, state of Colorado, and described in the plat and field notes on file in this office as follows, to-wit: Beginning at cor. 1, in thence N 30° E 300 feet; thence N 3° E 1500 feet to cor. 2, thence S 42° E 200 feet to cor. 3, thence S 42° E 200 feet to cor. 4, thence S 42° E 200 feet to cor. 5, thence S 42° E 200 feet to cor. 6, thence S 42° E 200 feet to cor. 7, thence S 42° E 200 feet to cor. 8, thence S 42° E 200 feet to cor. 9, thence S 42° E 200 feet to cor. 10, thence S CHEAPER THAN ANYBODY!

D. R. CLAY & CO. Will Sell Goods For the Next Few Days WAY DOWN FOR CASH.

LOCAL BREVITIES.

PAY-DAY at the Pasadena.

MAX HIPPLER left for Denver this morning, and will remain there this winter.

FRANK JOHNSTON went to work yesterday morning as engineer at the Grand View smelter.

ED DAVIS returned from Telluride on Sunday last and has been busy among the mines during the week.

MR. AND MRS. NATH. CAHN left us on Tuesday morning last, bound for their future home in Columbus, Ind.

THE BAKWELL brothers and Pat Murray are off on an extended prospecting trip and will be absent some time.

LAFE PENCE returned from Denver last evening. At Trimble Springs he was joined by Mrs. Pence and the baby.

FRANK MOGENSEN, owner of the Silver Bell mine at Ophir, came in Thursday. Mr. M. is shipping his ore to Rico.

SOMEBODY will be surprised this evening. Beyond the fact that it will be an agreeable surprise, our Faber No. 2 must not say.

MR. AND MRS. HARRY CAIN, and Misses Mary Ohlhausen and Lillie Silverman returned from their visit to Telluride on Thursday.

GEO. W. KEPHART came up from Durango Monday evening and remained during the week, taking the stage for home this morning.

JIM SUTHERLAND came down from Mount Wilson on Wednesday and returned to his work on the Magpie and Sunlight mines Thursday.

JOE SPURLOCK has charge of the blacksmith shops at the Pasadena smelter. He is one of the most competent men for such work in San Juan.

THE fall and winter term of school commences on Monday morning next, with Frank C. Loring as teacher, and the heart of the average mother is glad.

TO-MORROW morning Messrs. E. L. Davis, E. P. Snyder and H. L. Scott will leave for Ouray, to be absent only until Wednesday or Thursday next.

MANY suppose that Sept. 1st is the date when deer may be killed for sale, and that was the date in the old Statutes. Sept. 15th is the time set by the Revised Statutes.

HUGH RAY left Rico yesterday morning, headed for Gallup, N. M. He will try the effect of a lower altitude on a rheumatic complaint which has troubled him for over a year.

VISIT the various mills and producing mines and draw inspiration. No man can help having a favorable impression after seeing the wonderful progress made in the past few weeks.

E. S. WILLIAMS came up the river yesterday afternoon in much haste after a physician to attend Mrs. Frank Robison, who is quite sick at her home below Bear Creek. Dr. Roys went down.

KEPHART & Co. have sold the bulk of their groceries to L. Habermann and to-night the Kephart store will be entirely cleared of groceries. The sale of dry goods, etc., will continue until Oct. 1st, when the doors will be promptly closed.

COUNTY CLERK HULL was this week notified by Messrs. Dolane & McLaughlin, who received the contract to build a stone vault for the county, that they could not do the work. What will now be done in the premises remains to be seen.

REV. W. H. HOWARD is looked for this evening without fail. He announced that he would hold services here to-morrow morning and evening. He will probably remain during the coming week and also hold services on Saturday Sept. 21st.

THE preliminary examination of W. E. Sears, charged with the murder of William Solomon, before Justice Hechtman, occurred on Saturday. Sears was bound over to the November term of the District Court, without bail. He is now in jail.—Durango Herald.

A FEW days ago, at sunset, Warren Rose located a claim opposite Scotch creek. The name, appropriate to the time of day, was the Sunset, and on the stake the names of Rose and W. H. Bean appeared. These expectant bonanza kings had the fine looking croppings tested and the result was 000. The assayer seemed to forget the first figure.

THE mammoth stove in the store of Kephart & Co. has been purchased by Frank H. Bishop. The old stove has been a traveler for the past eight years and has been in use in the various establishments of Kephart & Co., first at Pueblo, and then in each successive establishment as the railroads opened up the country west and south of there. "It is like parting with an old friend to leave it now," voices the sentiments of the Kephart people.

A. A. SHELL returned Wednesday evening from Durango.

J. C. THOMPSON, formerly of the Rico drug firm of Thompson & Towne, (now L. O. Towne), has accepted a position with B. A. Taft, of Silverton.

WORK for the season has been abandoned by Messrs. Dodd and Graham on their Trout Lake properties. They left the claim in good shape this week and have come down to devote their time to Rico properties.

DONALD MCINTYRE returned on Tuesday. He rolled one of his finest horses down the new trail to Ice Lake Basin, laming it so badly that it took a week to get him back to Rico. He has hopes of ultimately saving the animal.

EARLY risers Monday morning found the sidewalks painted red—with be-lud, red be-lud. A prospective stabbing or shooting affray was run down and found to be nothing but the fall of a citizen upon a lot of broken beer bottles.

HENRY GOODMAN, one of the best known cattle men on the Dolores, came in last evening and went on to Telluride this morning. Mr. Goodman was a candidate for sheriff of La Plata county last fall, but was defeated by a small majority.

THE Trout Lake country was enlivened by a little family row a few days ago, in which a pistol was discharged. Mrs. Neumeyer claims that Jim struck at the "old man" with the pistol and it was accidentally discharged, while the "old man" swears that Jim shot at him and that the bullet grazed his cheek.

W. G. BARNETT and A. A. Waggoner returned Wednesday evening from a hunting trip on the West Dolores, bringing back as trophies of the chase, five deer—two bucks, a doe and two fawns. One of the latter was killed by Mr. W. at a distance calculated to be 800 yards. It was a chance shot, but was eminently successful.

MRS. JOE TREMBLE and son, Willie, came up the river from their ranch, on Tuesday, for the purpose of making a visit to their old home. They started on their return yesterday, taking with them Mottie, who has been for the past year with the Mundee family. The Tremble ranch is about 60 miles below Rico on the Dolores river.

L. W. LISCOMB, while chopping timber on Thursday afternoon, had the misfortune to cut his foot severely. He struck a standing tree with his ax, which glanced and cut his foot through and through between the first and second toes, and split the foot for some distance back. The foot was attended to by Dr. Landon, but it will be a month before it can be used.

W. T. ROBERTSON found the body of Ferg. Slater last week and it was buried in the Telluride cemetery. The body was carried far down the mountain side in the slide at the Mendota mine on Dec. 24th, last year—almost three-fourths of a year ago. Although a constant watch was kept and frequent searches made, the snow had only melted sufficiently last week to show the location of the body.

JESSE LOVE started out Wednesday for the Cimarron country to work some of his prospects there. The day before leaving he had the misfortune to lose his fine gray mare. She was picketed out with a rope, of which article she always had a mortal terror. Becoming frightened, she started off on a run, but on reaching the end of the rope was thrown violently to the ground, breaking the bones in one of her shoulders. The bones protruded from the flesh, and she was shot to put her out of misery.

H. N. COPP, of Washington, has just issued another of his valuable publications, "Copp's Prospector's Manual," which is a valuable thing for every prospector. It deals with minerals and claims to help the prospector to determine with reasonable certainty any mineral he may discover, with acid and blowpipe tests. It gives U. S. and local mining laws, complete to date, with forms for location notices, miners liens, leases, applications for patent, etc. The publisher has our thanks for a copy. He will mail one post-paid to any address on receipt of 50 cents.

WEDNESDAY, about noon, John, the five-year old son of Mr. and Mrs. James West, sustained a painful accident. He had left town about 11 o'clock in company with John Muncaster, a cousin, and together they were going to the toll-gate and were tiding burros. Near the slaughter-house young West fell from his burro and the animal stepped on his left arm, breaking and splintering it badly about an inch above the elbow. His companion put him on the burro and they proceeded, but the wounded boy was too faint and could not ride. They were met by Mr. Muncaster and he took the boy on the horse and was bringing him back to town when he met Mrs. West and Mr. and Mrs. Ray in a spring wagon and they took him down to the toll-gate and then returned with him to town. So it was about nine p. m. before the arm received any surgical attention. It is feared that the arm will always be a stiff member.

JOHN S. POLLOCK is an unfortunate miner. While out hunting burros near Ironton a few days ago he lost his pocket-book, containing, among other valuables, \$650 in currency. He offers a reward of \$100 for its return. If a really wants the pocket-book, he would do well to make his offer \$700, so as to insure the finder against loss.

E. A. ROBINSON has our thanks for a copy of the "Woman's Daily Globe," which has just been presented to every reader of the Beston Globe. The paper purports to be printed September 1st, in the year 2002, at which time it is presumed the condition of men and women will be opposite to that of the present day. The paper relates how the men of Massachusetts petitioned for the privilege of suffrage, and the U. S. Capitol is located at Anthony, Wyoming, from which place telegraphic accounts of the doings of a Woman's Congress are printed. Even in the advertising columns, the style is kept up and the illustrations are:

"Young lady paying for ice cream."
"Man doing the family washing."
"She leaves her husband crocheting."
"Mr. Walker tending the babies."
"Man almost scared to death by a mouse."

The following is a fair sample from the "woman" columns:

WANTED—A strong and willing man, widower preferred, to do general housework and assist in the care of 7 children; must be of affectionate disposition and not afraid of horses. Apply to Mrs. Carrie Huggins, Hotel Beaumont.

And in fact, everything is changed to the conditions of brave women and fair men.

Senator Galloway's Position.

A short time ago a resolution was adopted at Lake City by the republican convention of Hinsdale county requesting Governor Grant to issue a writ requiring an election to be held to fill an alleged vacancy in the position of Senator in the Twenty-first Senatorial District, now held by Jas. P. Galloway. The cause of this was that Mr. Galloway had removed his residence from Hinsdale county, although still within the district he represents, his cattle range being in Dolores, San Miguel and Montrose counties. Senator Galloway was in Denver a few days ago and was interviewed by the *Tribune-Republican* in regard to the matter, here said: "I have noticed the action to which you allude. That action proceeds from parties who have always been unfriendly to me personally, and is based upon false premises. As a matter of fact my present location is within the boundaries of the Senatorial District which I was duly chosen to represent. My headquarters are located in San Miguel county, my range extending into Montrose and Dolores. When I was elected to the Senate, Ouray County, which was a portion of the Twenty-first District, extended westward to the Utah boundary and included all of territory now forming the new county of San Miguel. You will therefore see that I am actually located within the boundaries of the district for which I was duly chosen and that the action of the Hinsdale Convention was without warrant. The passage of the resolution was without doubt procured by certain persons for ulterior designs, and I have no doubt had the facts I have stated been known to the convention the purpose of my personal enemies would have met with signal defeat.

But there is another point to this question. In locating in San Miguel and Montrose counties I have done merely what people of this State are doing daily. I have simply established my business there just as I might establish a business stand in Denver. As a matter of fact I have not permanently moved my residence to San Miguel, although I am proud to say that I intend to do so just as soon as proper arrangements can be made for the comfort of my family. Until this can be done my family will reside at Del Norte, where I now have a house, and in the meantime I and my boys will watch our herds along the borders of the Dolores and San Miguel. Why, I am required to pay taxes on my ranch and herds in the Twenty-first Senatorial District, which establishes the fact that I am still a resident of the district I represent in the Senate.

"Then you don't believe Governor Grant will take any notice of the resolution adopted at Lake City?"

"Of course he will not. Why should he? I am aware that under Section 2, Article 5, of the State Constitution, the Governor is authorized when vacancies occur in either House to issue a writ of election to fill such vacancy. But the vacancy must clearly exist, and be shown to exist, not by a mere declaration thoughtlessly made, but by actual facts legally ascertained and established before such writ can legally issue. Even should the Governor issue a writ the election would amount to nothing, for the reason that I do not intend to vacate. The Governor cannot make a vacancy. I am the only man in the State who can do that, and I assure you I have no such intention. The State Constitution authorizes each branch of the Legislature to alone judge of the election and qualification of its members, and as I still possess all the legal qualifications I possessed when elected and admitted to a seat in the Senate, it is not likely that I will be disturbed or that the question will ever be raised in

the Senate. No, I will be in my place in the Senate next winter if I continue to enjoy my usual good health."

Bleaching Bones.

While Messrs. Waggoner and Barnett were hunting on the West Dolores this week, they ran across "Navajo Jack," whose real name is Jack Bader, but who acquired his title by a long residence among and close companionship with the Indians. He is a well known character in this section and his headquarters are at Trout Lake. Jack told the hunters that he had discovered the skeleton of a man and he described the location of it as in a gulch on the western side of the West Dolores, and near the head of that stream. He said that the weeds had grown up all about the bones and that he was almost over it before he saw it. The skull, he said, was missing, but the ribs and bones of the leg were intact, and that there was no doubt that the bones were those of a human being. Messrs. Barnett and Waggoner tried to find the bones and search closely for some means of identification, but they entered the gulch too high up and encountered a precipitous slope of slide rock, which prevented them from descending to the vicinity of the whitening remains of some poor hunter or prospector, who gave up his life in some one of the many ways which might befall a wanderer in the mountains.

This poor unfortunate has evidently gone the way of many others in this country, who suddenly and mysteriously disappear from the sight of friends and are never afterwards heard of, and after a time are even lost to memory. An instance in point is the loss of Jno. Geisel from this place in the spring of 1880, who went off on a prospecting trip and was never again seen, and his fate, and probably always will be, a mystery. His existence is almost forgotten and if in a few years his skeleton is discovered, there will be no thought of the lost Jno. Geisel. Every year a skeleton or two is discovered somewhere in this country and each one tells a sad story, made all the more pathetic because only the ground work of the tale is apparent.

All Right, Gentlemen.

A couple of weeks ago the following paragraph appeared in this paper: "The Montrose ditch people have failed and left a vast amount of debts behind them. To show that they were successful confidence operators, we will say that they downed T. B. Townsend, formerly of Rico, for \$4,000 worth of hardware, etc. The ditch is about finished and will doubtless be taken hold of by somebody. The extensive and productive Uncompahgre valley will make it a profitable investment."

We are inclined to believe that a mistake has been made, as this week we have received the following letter from Mr. Townsend, inclosing the paragraph: "You will please correct the enclosed paragraph as wrong. I never made such a statement, and have never had any fears but what the ditch company would pay up in full. They do not owe me any such amount, but when they pay up I will collect in about that amount from parties connected with the ditch, which I cannot expect to get before then. Please don't forget to make the correction in your next paper."

The Montrose *Messenger* seems to think that Mr. Townsend is virtually ruined by the paragraph, and says:

"The DOLORES NEWS does Mr. Townsend of this place a great injustice by stating that the ditch company 'downed' him for \$4,000 worth of 'hardware.' There is not a word of truth in this, and our contemporary ought to correct its mistake before greater injustice is done Mr. Townsend."

The Montrose *Enquirer* reprints the article in question and said: "We called on Mr. Townsend last Thursday and he says there is not a word of truth in the above regarding his loss. Mr. Townsend is nothing out on the ditch company or any one, for which he is not amply secured, and he is not afraid of the ditch company in the least. While the latter are behind in payments to a great number of our merchants, the property they own here is ample if even sold at public auction to more than cover all indebtedness. The Uncompahgre Canal is one of the big properties of Montrose county. We hope our contemporary will correct the error he has made."

In consideration of this triple request we will say that Mr. Townsend is a man of his word and when he says that he has not lost anything, he should be believed. We were told that he had lost \$4,000 by Mr. L. J. Lewis, who was a sub-contractor on the ditch, and who is likewise a man of his word. Where he got his information we are unable to say.

CLOSING OUT FOR CASH.

We must and will sell our stock by October 1st. We mean that we will sell out at cost for cash. Call and be convinced that we are doing it.

KEPHART & Co.

Democratic Convention.

The Democrats of Dolores county will meet at Armory Hall on Thursday Eve at 8 o'clock p. m., Sept. 18th, to select 3 delegates to the Democratic State Convention to be held in Denver, Sept. 24th, 1884. Also 18 delegates to the District Democratic and Representative Convention to be held at Telluride, Oct. 4, 1884, and transact such other business as may properly come before it.

DISSOLUTION OF PARTNERSHIP.

Notice is hereby given that the co-partnership heretofore existing between Nathaniel Cahn and Frank H. Bishop, doing business under the firm name of Cahn & Bishop, is this day dissolved by mutual consent, Mr. Cahn retiring from the firm. The business will be continued by Frank H. Bishop, who assumes all liabilities and will collect all debts due the late firm. Dated at Rico, Dolores County, Colorado, this 15th day of August, A. D. 1884. NATHANIEL CAHN, FRANK H. BISHOP.

Democratic District Convention.

District Democratic Representative Convention.

A Democratic delegate convention for the Representative District composed of the counties of Ouray, San Miguel and Dolores, is hereby called to meet at Telluride in San Miguel county, Colorado, on Saturday, October 4th, 1884, 11 A. M., for the purpose of nominating a candidate for Representative in the General Assembly, to be voted for at the next election. Also to select a District Central Committee, and to transact such other business as may properly come before it.

The several counties in the District will be entitled to representation as follows: Ouray, 25; San Miguel, 20; Dolores, 18.

W. M. STEWART, Ouray;
E. S. YOCUM, San Miguel;
C. J. PENCE, Dolores.

Bob Burdette's Ideal Old Man.
From the Brooklyn Eagle.

Man never attains his ideal. He comes nearest it the day he leaves school; all that year he hovers around it in pleasant proximity. Sometimes I think he quite attains it on commencement day. But a year away from school, he and his ideal part company. He sees it drifting away from his eager hands. I have, in my own brilliant and aggressive career, pursued several fleeting and more or less perfect ideals. From where I now stand, at the distance pole, I can see the majority of them scooting under the wire, and I feel that I am shut out. One, I can see, is yet in the nearer sight, and I am very loth to see it get entirely away from me.

I have my ideal of physical perfection in the aged. This is the manner of old man I want to be. I am not a tall man now. I do not really have to stand up to look over the back of a car seat. I stand up merely because I can see further. But as I grow old I want to fat up. I want to develop a capacious bay window, so that when my summer vest is hanging on the line it will look like a schooner coming down "wing and wing." Then I can wear my watch in my fob with a great big seal dangling from it like a bell clapper. I want to be short in breath and wheeze when I climb up stairs, and puff and pant when I walk up hill, and have to take two steps when I cross the gutter. And I would wear a claw-hammer coat, with wide lapels, all the time, and carry my handkerchief in my hat. I would like my hair to turn snow white or else fall off, I am not particular which. I would like my mustache to bleach out until it looked like a streak of flour across my lips. I believe this is all. I think it is a photograph of the kind of an old man I would like to be. This is my ideal old man. Cane, and wheezy laugh of course.

And I am just as confident as I am that I will die rich, that, as I grow old, I will shrivel up and dry out until I look like a shoestring with clothes on.

An American's Discovery.

The St. Louis Globe-Democrat says: A well known Philadelphia citizen, J. J. Boyle, has just returned from Vigo, Spain, where he claims to have discovered, after thorough and exhaustive exploration of the inner harbor of that town, a fleet of sunken Spanish galleons, supposed to contain not less than \$2,000,000 in bullion, which he expects to rescue from a watery depository. These galleons are a portion of a fleet of treasury ships sunk in the harbor in the early part of the eighteenth century, during a conflict between English and Holland war ships and a French and Spanish fleet. Mr. Boyle left Philadelphia several months ago with a view to recovering these sunken treasures, his enterprise having been directed in that channel by information imparted to him in a confidential manner. He not only located the vessels, but found many pieces of silver of ancient coinage and other curiosities, among which were some coins that had been washed almost as thin as a piece of paper and thrown upon the rocks to a distance of forty-five feet by the heavy surf which was constantly breaking over the wreck. Mr. Boyle, as soon as he had located the wreck, secured the services of several divers at Liverpool, and work was immediately begun upon the vessels which had rested undisturbed for nearly 200 years. The galleons are huge, round-stemmed, clumsy vessels with bulwarks three or four feet thick, and built up above stem and stern like castles. Two more sunken vessels were also discovered and examined north of the islands of Barona and Esteles, in Vigo Bay. Mr. Boyle himself went down in a diver's suit to the treasure galleons sunk in the inner harbor, and found the vessel covered with mud to the extent of four or five feet. The wood-work of the sunken fleet he discovered to be in a sound condition. The number of the sunken galleons is not known. Permission to recover the money has been obtained from the Spanish Government and work will be commenced immediately.

HUNDREDS of mining claims have been located in and around Rico during the past five years, but for want of capital the assessment work even was not kept up in many of them. Many have been worked which brought rich returns to their owners. The discoveries made within the last eighteen months have greatly increased interest in the mines, owing to the very favorable results obtained, and a large number of mines in this district will now be continuously worked.—*Denver Journal of Commerce.*

STATE Veterinary Surgeon Holcombe of Kansas has filed with Governor Glick his report of the cases of Pleuro-pneumonia which he has been investigating in Illinois. He recommends that until all the localities in which the disease exists have been made public, that Kansas shall quarantine against the world and admit no cattle except they undergo a strict quarantine for a period of twenty days. The live stock Sanitary Commission will consider the matter at a meeting to be held shortly.

THERE are mines in this State upon which thousands of dollars have been expended without reaching pay ore, which might have been made large producers long ago by the exercise of average business ability on the part of the owners and managers. Honesty and common sense must go together in successful mining; the lack of one or the other of these in owners, as well as managers has made many a really good prospect or mine a failure.—*Denver Mining Review.*

"Why, Sammy," said a father to his little son the other day, "I didn't know that your teacher whipped you Friday."

"I guess if you'd been in my breeches you'd a knowed it," whimpered Sammy.

SENATOR JIM GALLOWAY, of the Paradox valley, has been in Del Norte this week looking up a residence for his family. The Senator looks hale and hearty and "runs" a little bunch of 1,000 head of graded stock on a range sixty-five miles long, down in the Paradox country. He will sell \$10,000 worth of beef this season. The Senator has fully made up his mind to bring his family to Del Norte.—*Prospector.*

AN Ohio farmer says that a cow can be cured of kicking by catching hold of her leg while in the act. Just so, and a bee can be cured of stinging by catching hold of the stinger while in the act. Try 'em both some time. It's fun.—*Burlington Free Press.*

"MAY I have the pleasure of seeing you home?" he bashfully asked. "Certainly," she replied. "There is a high hill just in front of the house, or, if you prefer it, you can climb a big tree in the cow lot. Go any where where you can get a good view."

A JUDGMENT against Grant & Ward for \$712,495 was entered in the County Clerk's office in favor of the Marine National Bank on a suit brought for money loaned just prior to the firm's failure. No defense was entered.

"Has George proposed yet, Emily?" "No, ma, but he did the next thing to it last evening."

"What did he do?"

"He asked me if I thought paregoric injurious to teething children."

It looks like business to see nearly one hundred tons of ore going to the railroad weekly from this part. By November 1st this weight will be doubled!—*Lake City Register.*

TULARE Lake, California, is rapidly drying up and exposing adobe walls, stone instruments and relics of men who certainly did not live under water.

A MULE with five legs has been born in Alabama. One leg will go out and solicit business for the main firm.—*Paris Bee.*

BOB FORD, one of the murderers of Jesse James, and Dick Liddle are running a saloon at Las Vegas, N. M.

Tourist Tickets East.
DURANGO, Colo., Aug 8th, 1884.
EDITOR DOLORES NEWS,
Rico, Colorado.

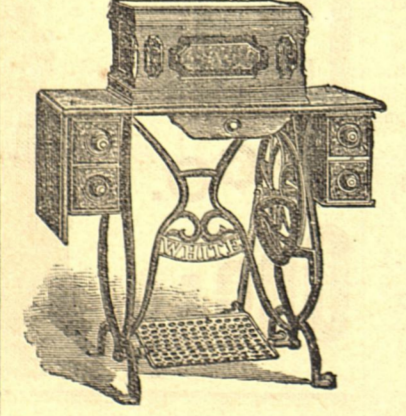

DEAR SIR:—For the information of the public generally, I wish to state that I have just been furnished with a full line of tourist tickets from Durango to Kansas City, Leavenworth, Atchison or Omaha and return, with choice of route in going or coming. These tickets are good for return passage until Oct. 31st. Fifteen days' time is allowed in going east, with stop overs en route, and seven days' time coming west. That is, parties must go through inside of 15 days after purchasing tickets and upon their return must come back inside of 7 days after they start. Fare for round trips is \$77.65. The regular fare to Denver was raised \$2.50, on Aug. 4th, and is now \$31.45 and the fare from Denver to Kansas City or other points named is \$19.00, limited to 2 days or \$22.50 for unlimited. Hence, the round-trip tourist tickets make a saving over local fares each way of \$23.25 at least, and of \$20.25 if you purchased unlimited tickets upon which you could stop as you can on the tourist. No one who contemplates going east as far as the Missouri river or beyond and returning before Oct. 31st, should fail to secure a tourist ticket. They will only be on sale up to Sept. 30th next.

Sleeping cars now running from Durango. Ticket office open on arrival of train from Rockwood.

Yours truly,
FRANK C. JACKSON, Ag't.

A PRIZE. Send six cents for post-
age, and receive free, a
costly box of goods which
will help all, of either sex, to more money
right away than anything else in this world.
Fortunes await the workers absolutely sure.

TRY WILL BE BY EXAMINING THIS MAP THAT THE

CHICAGO, ROCK ISLAND & PACIFIC RY
Calls the attention of travelers to the central posi-
tion of its line, connecting the east and west
by the shortest route, and carrying passengers,
without extra charge, to Chicago, St. Louis, Kan-
sas City, Council Bluffs, Leavenworth, Atchison,
Minneapolis and St. Paul. It connects the Union
Depots with all the principal lines of road between
the Atlantic and the Pacific Oceans. Its equip-
ment is unrivaled and magnificent, being composed
of most comfortable and beautiful Pullman Coaches,
Magnificent Hotel Sleeping Cars, Day Coaches,
and First-Class Pullman Dining Cars, and the best
Line of Dining Cars in the West. Fine Trains
between Chicago and Missouri River Points. Two
Trains between Chicago and Minneapolis and St.
Paul, via the Famous
"ALBERT LEA ROUTE."

A New and Direct Line, via Bismarck and Kankakee,
has recently been opened between Richmond,
North, Newport News, Chattanooga, Atlanta, Aug-
usta, Nashville, Louisville, Lexington, Cincinnati,
Indianapolis and Lafayette, and Omaha, Minne-
apolis and St. Paul, and intermediate points.
All through Passenger Trains on Express
Trains.

Agents for sale at all principal Ticket Offices in
the United States and Canada.
Passages checked through, and rates of fare al-
ways as low as competitors that offer less advan-
tages.
