THE GRUVER STATESMAN

Volume 15 No. 20

THE GRUVER STATESMAN, GRUVER, TEXAS 79040

Thursday, February 20th, 1986

Lady Greyhound's drop heartbreaker to Kelton at Borger Thursday Nite

into a big lead in the first quarter at Borger last Thursday night, when they met Kelton for the bi-district basketball championship. Even though the lady Greyhounds jumped into an early 11-3 lead in the first quarter, the Kelton girls came back to win the game in a thriller of a finish, 43-39. Kelton froze their scoring attack in the last quarter, trying to pick up enough fouls to win the game, and it worked for them. However, Kelton missed a bunch of free throws, and Gruver missed a bunch of shots from the field, or the game could have gone into over-time. In fact, the Lady Hounds had 7 shots at the basket from the field in the last minute of the game, but just were unable to score. Both teams were playing so hard, they were just "dog tired" and couldn't score!

Kelton, 24-2 for the season, was paced by Teresa Moore with 12 points an dMichele Keelin with 10 points. The Victory moved Kelton into the area round of the playoffs.

Gruver, which ended its season at 18-7 was led by Anne Potts with 16 points, and Sharon Reynolds with 12 points.

The Lady Hounds performed great this season, and this newspaper joins with the entire county in thanking them for such a great season! We are all proud of you!

ordyler (39): Date Shapley, 1-0-2; Anne vits, 6-4-16; Joby White, 2-1-5; Clsay Smith, 1-0-Sharon Reynolds, 3-6-12; Cami Shapley, 1-0-Sally Holt, 0-0-0; Lori Fletcher, 0-0-0. TO-

TALS: 14-11-39.
KELTON (43): Teresa Moore, 6-1-13; Lacy Buckingham, 2-2-6; Lesile Calcote, 0-0-0; Mi-chele Keelin, 3-4-10; Wanda Taylor, 0-3-3; Lesile Johnson, 1-0-2; Janette Hink, 4-1-9, TOTALS: 14-

TECHNICALS: None

David Steele

David Steele is the new football coach for the Greyhounds --- We join in congratulating this fine young man!

Barry Haenisch Coach Haenisch, the former AD for Gruver schools, will remain in Gruver and open a local business in the near future.

Thanks From Fire Dept.

The Gruver Vol. Fire Dept. would like to Thank everyone for thier donations to our Pager drive, we received about half of the \$6,000.00 needed. Pagers contact the Firefighters so we will not need to blow the sirene for a fire during stormy

Since 1975 we have bought one fire truck, built office, meeting, two rest rooms in the fire station with your donations.

The Fire Dept. answered 53 calls last year, 43 in country, 12 in city. Time for calls 30 minutes to 16 hours straight for one fire. We averaged 3 trucks and 7 firefighters on each run.

The state requires us to have 20 active firefighters at he present we have only 15. The Fire Dept. meets the first, second, fourth Tuesday of each month. Come by to visit or join at any time, you are welcome. Thanks Again For Your Support

John Cotter

Harmony Club

The Gruver Harmony Club had their first meeting of the new year on January 23rd at 7:00 p.m. in the Methodist Church. Carrie Hart opened the meeting and then Tracy Logsdon read the minutes of the last meeting. Topics discussed were the Valentine's Dance, which will be on February 15th, and money-making projects to pay for the dance and the annual Mother-Daughter Banquet, Bruce Collins, the GHS band director, Then played the clarinet, Mr. Collins was accompanied by Mrs. Burgoon on the piano. The meeting was then adjourned and refreshments were

Derby

The Gruver Cub Scouts, Pack 550, held their annual Pinewood Derby on February 17th at the Methodist Fellowship Hall. The meeting began at 6:30 p.m. with judging for Best Appearance. Each car was checked by Gary Evans and weighed. The judges for Best Appearance were Jeff Burress, Jim Terry, and David Steele. The winners were: Third Place--Kyle Deeds; Second Place-Doug Gumfory; First Place-Kevin Spivey. They received medals to be pinned on their

Roy Deeds was in charge of setting up the track, David Steele was Chart-keeper and Jeff Burress and Jim Terry had the difficult job of being the Line-Judges. The Cub Scouts, Den Leaders and others wish to express their Thanks for the help given by them. The Cub Scout Mothers provided free refreshments during the evening and for this we want to give them a special Thank

The races them began, after the rules were explained. This was to be a double elimination race where you necame disqualified after your second

Local Sales Tax

another increase in the sales tax allotment which was distributed by Texas State Comptroller Bob Bullcok

In Hansford County, Gruvers return climbed to \$6,994.02, while Spearman experienced a dramatic increase as its return was \$25,790.21

Pearl Pierce is Candidate

Pearl Pierce

Pearl Pierce is announcing her candidacy for election to the office of County Treasurer of Hansford County and is asking for your vote and support in the Democratic Primary, May 3, 1986.

Pearl is a native of Hansford County and her parents were the late Finis and Ethel Maize. She is a life-long member of the First Methodist Church in Spearman. She is a graduate of Spearman High School; attended West Texas State University, and graduated from Draughan's Business College in Abilene.

After raising a family, Pearl returned to Spearman in 1975 and was employed for a time at Hansford Hospital as Central Supply Clerk. She then worked at Agoo as a bookkeeper and for Wytex until their move to Amarillo. She has been Director of the Golden Spread Center in Spearman since March, 1979. She is member of the Women's Division of the Spearman Chamber of

Commerce and in 1983 the sororities of Beta Sigma Phi honored her as Woman of the Year for Community service. She is a member of the Area Agency on Aging Council of the Panhandle Regional Planning Commission, and an Executive Board Member of the Panhandle Community Services Agency.

Pearl has the qualifications and the education to handle competently the duties of County Treasurer. She has hed valuable on the job experience in bookkeeping, Tax reports, State and Federal reports, Grant applications and payroll records. She will be very appreciative of your vote and support in obtaining election to the office of County Treasurer.

Wrestling Held!

The Gruver Wrestling Team traveled once again to Dumas for a very tough tournament. Results are: Div. I - Brant Armes - 2nd, Buster McLain - 3rd. Div. II - Ryan Atwood - 1st, Bailey Barkley - 4th, Jace Dawson - 2nd, Skeeter French - 3rd, Clint Williams - 6.4, Wyler Maupin - 2nd. Div. III - J. J. Boese - 1st. Div. IV - Clint Bell - 3rd.

Trent Seagler - 2nd Next Tournament - Feb. 22nd -River Road.

loss. Brad Spivey was the Official starter. There were 100%turn-out of Cub Scouts entering the Derby and it was very exciting evening. After much suspense, the following boys

were declared the winners. First Place-Ryon Atwood; Second Place-Kyle Deeds; Third Placed-- T. J. Bayless: they received trophies.

NORTH PLAINS GROUND WATER CONSERVATION DISTRICT NO. 2

DUMAS, TEXAS

ORDER NO. 3

RULES GOVERNING TOXIC AND HAZARDOUS WASTE DISPOSAL

Notice is hereby given that the following Rules are to be effective within the limits of North Plains Ground Water Conservation District No. 2 ("The District") at 7:00 o'clock a.m. on March 1, 1988, and thereafter, in accordance with resolutions adopted by the Board of Directors of said District, to-wit:

PURPOSE

This Order and these Rules are promulgated and adopted in order to provide for the conservation, preservation, protection, and prevention of waste of the underground water of underground water reservoirs or their subdivisions consistent with the objectives of Article XVI, Section 59, of the Texas Constitution and as provided by the Legistature of the State of Texas in Chapter 52 of the Texas Water Code.

The Rules, Regulations and Procedures herein contained are intended to protect the underground water within the District from pollution or harmful alteration by deleterious matter admitted from another stratum or from the surface of the ground. These provisions are adopted in order to regulate activities which have a potential of causing pollution or harmful alteration of the Ogallala Aquifer, or other underground water bearing formations. The activities addressed are those that pose direct or indirect threats to quality of underground water. Nothing in these rules is intended to restrict, impede, or interfere with the powers of The District or its Board of Directors, or of any other governmental agency or official, state or federal, to prevent pollution or harmful alteration of underground water.

ORDER AND RULES: PUBLICATION, EFFECTIVE DATE

The full text of this Order and these Rules shall be published once a week for two consecutive weeks in one or more newspapers within The District to give circulation within The District. This Order and all of the Rules set forth herein become effective at 7:00 o'clock a.m. on the 1st day of March, 1986, which effective date is more than 14 days after the dates of the first publication.

DEFINITIONS

1. "The District": North Plains Ground Water Conservation District No. 2, 702 East First Street, P. O. Box 795, Dumas, Texas, 79029, Area Code 806 935-6401 created in 1955 under the provisions of Chapter 52 of the Texas Water Code.

2. "Ground water" or "Underground water' means water percolating below the surface of the earth that is suitable for agriculture, gardening, domestic, or stock grazing purposes, including the Ogallala Aquifer, but does not include defined subterranean streams or the underflow of rivers.

3. "Underground water reservoir' means a specific subsurface water bearing reservoir having ascertainable boundaries and containing underground water that can be produced from a well at a rate of 25,000 gallons or more a day.

"Subdivision of an underground reservoir' means a reasonably definable part of an underground water reservoir in which the underground water supply will not be unreasonably affected by withdrawing water from any part of the reservoir, as indicated by known geological and hydrological conditions and relationships and on forseeable economic development at the time the subdivision is designated or altered.

5. "Waste" means pollution or harmful alteration of underground water in an underground water reservoir by salt water or other deleterious matter admitted from another startum or from the surface of the ground.

FINDINGS AND CONCLUSIONS The Board of Directors of the North Plains Ground Water District No. 2 has heard and considered evidence and information with respect to the subject matter of this Order and those Rules and has made the following findings and

1. The North Plains Ground Water Conservation District No. 2 ("The District") consists of all or part of seven counties located in the Northern Texas Panhandle:

Hansford Moore Hartley Ochiltree Hutchinson Sherman Lipscomb

Underground water exists unseen in reservoirs beneath the surface of the earth. Within The District it constitutes the only significant source of water to support human populations, food and fiber production. It is absolutely essential to the area's quality of life that adequate supplies of pollution-free underground water be ensured for the present and future generations.

3. The quality of undergorund water is threatened by various human activities. Throughout the United States many of the most prevalent sources of contamination are from disposal of industrial wastes. Prior to 1950 our underground water resources received very little attention; in earlier years it was thought that the natural filtering capacity of soils simply removed dangerous contaminants. Because most contamination is hidden underground, and because most contaminants require a long time to reach water wells, public awareness of the problem was limited. Until recently, the ground was actually thought to be the best place to get rid of waste.

4. While the extent of the threat to underground water nationally cannot be precisely determined, thousands of water wells have been abandoned throughout the United States. More than 200 organic and inorganic chemicals have been identified in various underground water aquifers.

5. Most underground water supplies in the United States are of good quality. The area in which The District is located is fortunate in that underground water contamination has not yet reached critical proportions. Vast areas of underground water remain largely unimpaired, although known instances of pollution do exist.

6. The importance of underground water to the national quality of life requires that every level of government aspire to the highest and best methods in preventing the contamination of underground water.

The unique nature and variability of underground water resources - geographical occurrence, physical and chemical properties, uses and sources of contamination - demands local control and regulation by persons most knowledgeable of the circum-

Once underground water aquifers are contaminated, remedial action is extremely costly in the best of circumstances and is not technically feasible in most circumstances. Clean-up can require many years and can cost millions and millions of dollars, and still may not completely solve the problem. Substantial efforts are now underway at various locations in the United States to address clean-up problems and to protect underground water users from the adverse effects of existing contami-

9. The Texas State Legislature authorized the creation of Underground Water Conservation Districts to perform certain prescribed duties, powers and functions as set forth in Chapter 52 of the Texas Water Code, formerly Article 7880 3c, Texas Civil Statutes; generally, these are as follows:

(a) To formulate, promulgete, and enforce rules and regulations for the purpose of conserving, preserving, protecting and recharging the underground waters.

(b) To formulate, promulgate, and enforce rules and regulations to prevent waste.

(c) To require permits for the drilling, equipping and completion of wells capable of producing in excess of 25,000 gallons of water

(d) To provide for the spacing of water wells, or to regulate the production of water wells, of both, so as to minimize as far as practicable the drawdown of the water table or to prevent waste.

(e) To require records to be kept and reports made of the drilling, equipping and completion of wells; and accurate drillers' logs to be kept and copies filed with The District and the State Water Development Board.

(f) To do whatever is practical and possible to recharge the underground water reservoir.

(g) To cause to be made surveys of the underground water reservoir as to the quality of the water, quantity of the water, use of the water, and recharge needed.

(h) To help develop and promote comprehensive plans for the most efficient use and the control and prevention of waste of underground water, to carry out research projects; to develop, collect, and preserve information regarding the underground water and the practicability of recharge of the underground reservoir; and to publish plans and information and bring them to the attention of the users of

the underground water. (i) To enforce by injunction or other appropriate remedy in courts of competent jurisdiction the rules and regulations duly adopted and promulgated by The District.

10. By the enactment of the Underground Water Conservation Districts Law, now codified as Chapter 52 of the Texas Water Code, formerly Art. 7880-3c, Texas Civil Statutes, the Texas Legislature joined the Federal government and many states in committing the State of Texas to an imperative objective: to protect the physical, chemical and biological integrity of the underground water resources in Texas and ensure that they are not degraded in any way that may be harmful to humans or the enviroment.

11. The several Underground Water Conservation Districts created under the Texas statute. including The District, have as their goals, in common with similar state and Federal legislation, the following: to work with all agencies to promote, conduct, and support all feasible research in an attempt to find the most efficient use of the underground water; to keep District personnel available to help with any water problem within The District; to protect the underground water from contamination and waste; to be mindful of the future and to do everything possible to have available a supplemental supply of water when needed.

12. The foregoing objectives and goals are based on the following principles:

(a) Underground water must be actively managed if the resource is to continue to meet human and environmental needs.

(b) Degradation of the valuable underground water aquifers and critical water supply should be prevented because of the technical difficulties and economic costs involved in clean-up.

(c) Because of the wide variation across the state in the nature. vulnerability, and use of underground water, its protection, preservation and conservation can best be accomplished at the local level by local political subdivisions.

(d) Local political subdivisions often experience the underground water contamination problem most directly because they are closest to it; they must ensure that these supplies remain potable and should be prepared to take prompt action to prevent contamination.

13. By a confirmation election held throughout The District in January of 1955, the citizens of The District made a long-term commitment to protect the physical, chemical, and biological integrity of the underground water resources within The District and ensure that they are not degraded in any way that may be harmful to humans or the environment. The citizens of The District thus determined that this local subdivision of the state could deal with and prevent underground water contamination within its boundaries. The Board of Directors of The District are charged with this responsibi-

14. Toxic and hazardous wastes, including radioactive wastes and polychlorinated biphenyls, constitute a threat to humans and the environment and are capable of percolating down into and entering the Ogallala Formation and other groundwater-bearing formations within The District. Upon such entry the underground water could become polluted and harmfully altered, unfit for human consumption or other beneficial use.

15. It is imperative to the protection of the underground water formations within The District and the well-being of its citizens who use such water as the sole source of drinking water, domestic water, commercial water, industrial water and agricultural water, that an Order and Rules be adopted by the Board of Directors of The District and thereafter enforced to prohibit disposal of toxic and hazardous wastes within The District and to prohibit facilities used for disposal of such

IT IS THEREFORE ORDERED:

RULE 1

None of the following materials or substances may be imported from outside The District to a point within The District, nor moved within The District from point to point, for the purpose of temporarily or permanently disposing of such materials or substances within The District:

(1) Radioactive wastes Toxic substances

Hazardous substances (4) Polychlorinated biphenyls

(5) Soil, fluids or other materials or substances contaminated with any of the above.

(B) Exclusions: The following are excluded from this Rule and Order: agricultural insecticides, herbicides and other agri-chemi-

RULE 2

The following activities are prohibited:

Construction, operation, maintenance or use of waste disposal wells for disposal of any of the materials or substances enumerated in Rule 1.

(B) Construction, operation, maintenance or use of tanks, reservoirs, pits, depressions, sites, land fills, or any other manner of storage of any of the materials or substances enumerated in Rule 1 on either a temporary or a permanent basis within The District.

RULE 3

(A) All persons, firms, corporations, associations of persons, or other entities having in their possession or under their care, custody or control within The District any of the materials or substances enumerated in Rule 1 as of the date on which this Order and these Rules become effective, whether for use, storage or disposal shall report by sworn inventory to The District office in Dumas, Texas within 60 days of the effective date of this Order and Rule. The report shall include a description of the materials or substances possessed, amount, location, status and whether a plan or schedule has been formulated for the ultimate disposal of the materials or substances.

(B) Within 60 days after receipt of such report, the Board of Directors shall either approve the report or set the matter down for hearing according to the notice provisions and procedure outlined in Rule 4.

RULE 4

EXCEPTIONS

(A) These rules will be strictly enforced in their application; however, circumstances may arise that are materially different from those normally encountered in, or resulting from, any of the disposal operations or activities described or prohibited in Rules 1 and 2. A departure from Rules 1 or 2, in order to alleviate hardships when such circumstances would not constitute a threat of waste, pollution or harmful alteration of underground water within The District, may justify an exception to Rules 1

(B) Procedure.

(1) Any person, firm, corporation, association of persons, or other entity desiring an exception to any of the provisions contained in Rule 1 or 2 of this Order shall file a written, sworn Application with The District office in Dumas, Texas stating:

a. The nature of the exception requested; b. The justification for

granting the exception; and c. Any information that the Applicant deems appropriate in support of the Application.

(2) Seven copies of any Application for an Exception under this Rule 4 shall be submitted to The District at its general office, North Plains Water District, 702 East First, P. O. Box 795, Dumas. Texas, 79028, Area Code 808 935-6401.

(3) All Applications for Exceptions shall be heard and considered by the Board of Directors meeting in regular or special session within 90 days after submittal. At least 30 days notice of the hearing shall be given to the Applicant, to known interested perties including all governmental agencies having potential concurrent jurisdiction, and notice shall also be given to the public by appropriate notice published in a newspaper in general circulation within The District at least 30 days before the date of the hearing.

(4) The board of Directors shall enter an Order granting or denying an Application for Exception, with such conditions as it shall deem proper, within 60 days after such hearing.

(5) Any hearing held under Rule 4 shall be open to the public.

(6) At the hearing the Applicant will be given the opportunity to present evidence with respect to the type of substance or materials for which an exception is sought, the quantity, location, description of the present facilities and environment of the materials or substances, and whether the substances or materials will alter or harm the underground water.

(7) The decision of the Board of Directors shall be based upon a preponderance of the evidence submitted at the hearing by the Applicant, by The District, or by other interested parties, state or federal agencies, or public officials.

Passed and adopted by the Board of Directors of North Plains Ground Water Conservation District No. 2 meeting in regular session at the offices of The District in Dumas, Texas this 4th day of February,

Gaston Wells, Chairman

Robert Thompson Roy Stollings N. F. Renner Neal Spurlock

Directors

# TOP DRESS YOUR WHEAT NOW FOR MORE BUSHELS AT HARVEST

Liquid fertilizer, such as 28% UAN Solution, is priced as low as we have seen in years. A top dress application of liquid fertilizer has proven to be a cost effective method of increasing yields at harvest. Also herbicides, such as 2, 4-D or Glean can be applied right along with fertilizer. We cannot forecast how long fertilizer prices will remain at these levels, but you may want to seriously consider making a decision on your fertilizer needs as soon as possible, while there is plenty of time, product, and equipment available.

See your fertilizer specialist at the Perryton Equity.

# These People Can Get You A Tax Break

Pictured above are Debbie Smith, Bruce Julian, and Thalua Garner, ready to help you with your IRA.

# What will you do for a tax break this year?

Tax time is here, and you have just a few weeks to file the federal income tax return for 1985. There aren't many legal tax breaks left, but you can still get a \$2000 tax deduction for 1985. It's an Individual Retirement Account. An IRA. You can start an IRA and deposit to it right up to the time your income tax return is filed. It's for people with earned income. Married couples with a non-working spouse can deduct up to \$2250. When both work, deduct up to \$4000.

#### How do you start an IRA?

When taxes are involved, you need the best advice available. Bruce Julian, Thalua Garner and Debbie Smith are ready to explain how an IRA gets started and how to make deposits to your IRA. They've helped hundreds of people like yourself get a tax break every year. You can earn high interest rates, compounded daily. There's no maintenance fee or service charge. Every dollar is insured safe by FDIC to \$100,000.

# Come to First National Bank for your tax break

Come to the second floor of First National to visit with Thalua, Debbie or Bruce about your Individual Retirement Account. Or call us at 435-3676 to find out how to help your tax situation.

## Student teachers in four state area

sity. Back Row, [L to R], James Hamrick and Linda Lamle, Gruver;

Tana Brown, Dalhart; Jim Burks, Dimmitt; Patricia Neel, Perryton. place forty-nine student teachers in elementary and high schools in the four state area. Their assignments will begin on February 17. This directed observation in student teaching is designed to give each prospective teacher practical experience in actual classroom insruction on the appropriate level under the guidance of a skilled supervising teacher.

In addition to actual teaching

Panhandle State University will

In addition to actual teaching experience, conferences are conducted each week for those students doing practice teaching in the area elementary and secondary schools. Practical problems arising in the student teaching situation are discussed at the conferences as well as the general problems relating to the teaching profession.

The practice teachers, their teacing assignment, and their subject are: Dawn Bridges, business education; Lisa Chadwick and Vicki Cleland, HPER; Diane Phillips, LaDona Powers, and Yvonne Sims, elementary, in Goodwell.

Those PSU student teachers doing their practice teaching in Guymon include: Alicia Austin and Holly Hansen, HPER; Diann Huddleston, natural science; and Steve Land, industrial arts. Also assigned to schools in Guymon are: Mark Makeever and Ruth Ann Ogden, HPER; Kimberlie Parker, social studies; and Ron Smith, industrial arts.

Student teachers assigned in the elementary grades in Guymon include: Karen Bergner, Marva Burnham, Cathy Evans, and Glenna Faulkner. Also practice teaching in elementary areas are: Nadine Gift, Judy Land, Pepper Mason, and Karla Stone.

Four students will be doing practice teaching in the Hooker school system.

Manuel Acosta will be in the area of HPER: Stewart Hendrickson, industrial arts; Melinda Holder, Ridenour, HPER.

Adam Potter has been assigned to Hardesty and Gary Kirk will be in Tyrone. Both will be teaching HPER.

Students doing their practice teaching in Beaver County are: Terry Harland, vocational agriculture in Balko, and Mary Hardesty, mathematics, in Beaver.

John Powers will practice teach in natural science in Boise City and Alice Overman will practice teach mathematics in Keyes.

Also teaching in Oklahoma are Brent McDonald who will go to Laverne and G.R. Maixner to Okeene. Both will teach vocational agriculture.

Students doing practice teaching in Southwestern Kansas include Sue Omo, Hugoton, and Anna Dobie, Moscow, both in elementary; and Amy Mosburg, Liberal, vocational home economics

Eleven students have been assigned to schools in the Texas Panhandle. Patsy Hout will teach elementary in Booker; Tana Brown will teach elementary in Dalhart; and Jim Burks will teach HPER in Dimmitt.

Hayley Hatton, Linda Lamle, land James Hamrick will be going to Gruver where Hatton will teach elementary; Lamle, vocational home economics; and Hamrick, HPER.

Practice teachers in Perryton include: Joyce Durham, computer science; Wendy Gore, music; Patricia Neel, elementary; and Carolyn Taylor, Vocal music.

Also practice teaching in the Texas Panhandle will be Barbara Haile who will teach English in Stratford. Dinah Navarette will go th Hoehne, Colorado to do her practice teaching in the area of HPER.

In early April, Ithe forty-nine practice teachers will attend a one day seminar on the PSU campus then return to their teaching assignments until May 9. A final seminar will be held at PSU on May 12.

Library News

Note a new book - but a good book to be read during the Sesquicentennial year is LONE STAR - A HISTORY OF TEXAS AND THE TEXANS. LONE STAR, by T. R. Fehrenbach, traces the fabulous history of Texas from the arrival of the earliest Old American race 40,000 years ago through the agonies of the spanish and French invasions and the heyday of the cotton, cattle, and oil empires of the 19th and 20th centuries to the tragic Kennedy assessination in 1963 and its aftermath.

Never has the Texas history story been told with more vitality and immediacy. Organizing his vast material with consummate skill, the author takes the reader on a fascinating odyssey through the history of the Lone Star State - a saga that epitomizes the pioneer growth of America, the excitement of the entire westward passage, and the development of modern American civilization.

In fascinating detail, LONE STAR tells of the Apaches and Comanches who first introduced culture into the land; of Cabeza de Vaca, Cortes, Vasquez de Coronado, St. Denis, and De Croix, explorers and emissaries from abroad who foresaw visions of vast kingdoms in the New World; of the Pueblo cliff dwellers and the legendary Zuni city of Cibola; of the introduction of the horse by the spanish; of the exploits of Jean Lafitte and his plundering hatred of the spanish crown; of Sam Houston and the winning of Texas independence at San Jacinto; of the settling of new frontiers and the Agricultural Revolution; of the cattle spreads and oil booms and the antic events that shaped modern Texas, a state where the cultural clash between Anglo-American North and Hispanic South still goes on and where the ethnic of the old frontier is not entirely ended.

With a historian's precision, an artist's eye for detail, and a novelist's sense of narrative, T. R. Fehrenbach has created in LONE STAR a bold and definitive chronicle of America's Western leviathan that dispels romantic fables and sets the Texas record straight for posterity. LONE STAR by T. R. Fehrenback, a Texan whose ancestors helped settle Texas and the West. Check it out!

### On the go with Joy

Once in a while, an article is turned into me that we have had in the paper several years ago. However, we sometimes reprint these articles for the new subscribers that have not seen them before. We also receive articles that are turned in and for some reason are never put in the paper. So the most often question asked me are "How come?" "Where was it?" etc., etc. My only answer is "I don't know" or "Beats me."

Anyhow, here is an outstanding description of a small town but it describes us 40 or 50 years ago better than it does now. I used to wish I lived in a Big Town where there were more apportunities for cultural exhibits and activities, until I heard some one from a larger town say "There is not enough to do here - we need more things to keep us busy." Next week I hope to have a re-buttal for those

#### in Praise of Small Towns

In case any of you aren't sure whether or not your hometown qualifies, we've printed the following definition of a small town, sent to us by one of our North Dakota readers. The verse, which originally appeared in the North Dakota Union Farmer with no credit to its author, salutes an American institution; we hope you

You know you are in a small town when:

The runway of the airport is terraced.

The polka is more popular than disco on Saturday night.

Third Street is on the edge of town. Every sport is played on dirt.

The editor and publisher of the newspaper carries a camera at all times. You don't use your turn signal because everyone knows which direction you

You are born on June 13 and your family receives gifts from the local merchants because you are the first baby of the year.

You speak to each dog you pass by name, and he wags at you by name. You dial a wrong number and talk for 15 minutes anyway.

You are run off Main Street by a combine.

You can't walk for exercise because every car that passes offers you a ride. You get married and the local paper devotes a quarter page to the story. You drive into the ditch five miles out of town and the word gets back before

The biggest business in town sells farm machinery. You write a check on the wrong bank and it covers for you. Pickup trucks on Main Street outnumber cars three to one. You miss a Sunday at church and receive get-well cards. Someone asks how you feel, then listens to what you have to say. THANK GOD for small towns and the people who live in them.

But a problem occurred. Graft

By MIKE FREY

Kip Pittman, a standout football and basketball player at Gruver High School the past few seasons, is used to battles.

He was an all-district football player for the Greyhounds last season and gained all-district honors as a junior in basketball during the

as a junior in basketball during the 1984-85 campaign.
But instead of battling opponents on the hardwood during his senior season, Pittman finds himself fighting for something much more vital – his life.

Pittman, 18, has missed what would have been his final prep basketball campaign because on Dec. 12 of last year, it was discovered he has aplastic anemia. a rare blood Finding blood for Pittman has also been a problem, although his family has been able to locate blood without making a plea for public help. Pittman's blood type was originally O-positive, but after the transplant he assumed the blood has aplastic anemia, a rare blood disease that prevents the bone martype of his brother, O-negative. row from producing blood. ble locating blood because O-negative is rarer," Bill Pittman said.
"But through friends, we were able

Two weeks after the discovery, Pittman arrived at the Scripps Clinic in La Jolla, Cal., for treatment. The clinic is one of only a handful in the country capable of treating the disease. The disease is often fa-tal because it also breaks down the

infected person's immune system.

Luckily, there is hope for Pittman. It is necessary for a person with aplastic anemia to receive a bone marrow transplant to survive, but a person with a bone marrow type that suitably matches the infected person must be found for the transplant to be successful.

"If you're young enough and can get the right match, the best treatment is a bone marrow transplant," Bill Pittman, Kip's uncle and the president of First Natl. Bank in Spearman said. "The doc-

tors did some tests and got a good match from Kip's brother, Luke." Luke, a 19-year old freshman at York College in York, Neb., trav-eled to California with his brother and parents, Frank and Lucy Pittman of Gruver. The transplant took place on Jan. 2 and within three

### Museum News

Now that good weather has returned to the Panhandle, our thoughts turn to the prospects of Spring. With that in mind we look forward to improvements at the Stationmaster's House Museum.

J.D. Wilbanks reports the erection of a 4 ft. high chain link fence on the south and a 6 ft. high chain link fence on the north and west of the property will commence in about a week. The glossy black wrought iron fence across the front will be next. The Museum Board is still asking for donations from the public for this project.

Gary Scroggs will be painting the "Spearman" signs on both end of the depot and will renew the sign in front. It has been damaged by vandals.

All in all, we think you will be proud of YOUR MUSEUM. And it is yours-the public. We need your help. Any donation may be given to any board member or left at the Museum. It is a tax deductable

The Museum also needs: An old time chuck box and cast iron cook ware-the kind used with a chuck wagon.

## **Funeral** Thursday

Leon Howard Bowling, a lifetime resident of Spearman, died Feb. 17 in Hansford Hospital following a lengthy illness. He had been a patient of Hansford Manor for 20

Leon was born July 15, 1909 at old Hansford, the son of Arthur and Lillie Bell Martin Bowling.

Most of his life Leon followed the trade of an ole-time shoe cobbler. His specialty was hand-made cowboy boots. He earned the name of being the best boot-man in the Texas Panhandle. He taught several members of his family the art of bootmaking. He had to give up his trade in 1966 when he sufferd a

Two sons, a brother a sister and his parents have preceeded him in death.

Survivors include a son Jerry of Kerrville, Tex; a son Arthur Jerry of Spearman; two sisters: Lela Mae Ritchie of Cory, Colo; Lois Allison of Topeka, Kans; his wife Goldie of Houston; seven grandchildern and seven great grandchildern.

Funeral rites will he held (today) Thursday, Feb. 20 at 2 p.m. in the Union Church, Spearman. Officiating will be Rev. David Jones Fellowships Baptist pastor, assisted by Rev. Steve Rogers.

Pall Bearers will be Don McLain,, Peter Vernon, Billy Martin, Bryan. Jones, Ray Martin, Jerry Ford. Burial will be in Hansford Cem-

etery, directed by Boxwell Brothers of Spearman.

## **Do You Qualify**

For farmers who qualify, the USDA Reserve Program (CPR) offers an excellent opportunity to establish protective vegetation on highly erodible cropland.

Since hunting and the sale of hunting rights on land in the program will be permitted, it also provides an opportunity to improve wildlife habitat.

Grazing and having will not be permitted on CRP acreage.

Agricultural Stabilization and Conservation Service (ASCS) will pay about half the cost of establishing vegetation plus an annual rental for 10 years.

Permanent vegetation includes grasses, shrubs and trees.

Producers can plant a combination of plants for livestock forage Sylvia Duncan, Kathy Gillespie, that will improve habitat for a Marsha Lowe, Mary TeBeest, vareity of wildlife species. Farm Sandy TeBeest and Shirley Lowe. wildlife, such as pheasant, dove, and quail, can benefit from areas of grass within or near the edges of cropland.

The Soil Conservation Service (SCS) has been assigned the responsibility for assisting landowners and operators with vegetative plans. SCS personnel can recommend plant species suitable for livestock or for desired wildlife species and procedures for vegetative establishment.

The first sign-up period for the CRP is the first two weeks in March. SCS personnel assisting soil and water conservation districts can explain the program.

## Bridal Shower Held

Nanette Cluck, bride-elect of Tom Haines was honored with a shower in the Bill Logsdon home Saturday, February 15, 1986 from 2:00 until 4:00 p.m.

Guests were greeted and registered by Tanya Adkins. Throughout the afternoon Candy Hicks, Beth Holt and Clara Thompson presided at the refreshment table.

The serving table was laid with a lovely cut-work linen table cloth. Punch was served from a crystal and silver punch bowl and coffee from a silver coffee service. A centerpiece of tropicana colored and white carnations accentuated with tropicana roses and baby's breath in a Paul Revere silver bowl graced the table where small cakes and mints were served.

Nanette was presented with a lovely corsage of tropicana roses and her Mother, Mrs. Del Cluck and Tom's mother, Mrs. Tom Haines, Sr. of Oklahoma City, also wore corsages of roses and carnations. Nanette's grandmothers, Mrs. Ralph Bort and Mrs. Sam Cluck were presented corsages by the hostesses.

Over a hundred guests from Gruver and out of town enjoyed the afternoon viewing beautiful gifts and visiting with the bride-elect and other guests.

Hostesses for the afternoon were: Mrs. June Barkley, Pat Barkley, Sharon Barkley, Charlotte Bergin, Diane Brown, LaMoyne Cator, Ruth Crawford, Sherry Crowley, Louise Curlee, Gerry Davis, Pat Dawson, Ann Dorman, Geneva Eddleman, Ida Edwards, Delphine Etling, Louise Evans, Nelle Evans, Carolyn Fletcher, Josephine Fletcher, Lil Fletcher, Carlotte Gilbreath, Rosalee Grotegut, Linda Haight, Mary Hart, Mavis Hart, Aline Henderson, Carolyn Hicks, Jean Holland, Georigia Holt, Janie Jeffries, Vireta Knight, Juanita Logsdon, Kathy Logsdon, Fran Maupin, Fran-Murrell, Rosemary McKee, Mickey Nah, Marguerite Nelson, Margaret Ralston, Melba Rasor, Angie Remmel, Mary Jo Robinson, Alma Ross, Lucille Schad, Judy Schaefer, LaNetta Shapley, Marian Shapley, Anna Marie Stedje, Opal Wallin, Rita Williams, Marlene Winger, Vinita Womack, Helen Wood, Jeanette Bort, Mandy Derrington,

# Bridal Shower

A lovely bridal shower honoring Miss Ruth Ann Noah, bride-elect of Gary Gilbreath, was held Saturday, February 15, in the home of Mrs. James Dorman.

As the guests arrived, they registered in the bride's book of which the cover was an elegant work of needlepoint. The cover,

personalized with the name of the bride and groom and the wedding date was made by the groom's mother, Charlotte Gilbreath.

The serving table, centered with a beautiful arrangement of pink roses, cushion mums, white daisiies, and babies' breath, was laid with a hand-crocheted, ecru cloth. Completing the table appointments were a silver punch bowl and a coffee service and pink napkins engraved with silver emphasizing the bride's chosen colors.

The honoree was presented a beautiful corsage of pink roses. Corsages were also presented to the groom's mother, Mrs. Zay Gilbreath, and his grandmothers, Mrs. Virginia Gilbreath and Mrs. Louise Mears, special guests for the occasion from Dimmitt, Texas." Hostesses for the shower were Ann Anderson, Doris Armes, June Barkley, Pat Barkley, Regina Barkley, Sharon Barkley, Andrea Bayless, Charlotte Bergin, Diane Brown, Pat Burnam, Barbara Cluck, Sue Cooper, Georgia Davidson, Gerry Davis, Pat Dawson, Mandy Derrington, Fran Duncan, Louise Evans, Nelle Evans, Carolyn Fletcher, Lil Fletcher, Darla Ford, Lou Garrett, Rosalie Grotegut, and Lee Harper.

Other hostesses included Mavis Hart, Alene Henderson, Carolyn Hicks, Georgia Holt, Janet Irwin, Juanita Logsdon, Kathy Logsdon, Marsha Lowe, Shirley Lowe, Fran Maupin, Rosemary McKee, Evi Meyer, Sandre Mills, Marguerite Nelson, Debby Odom, Judy Park, Melba Rasor, Angie Remmel, Lanetta Shapley, Marian Shapley, Mary TeBeest, Alexis Thoreson, Nell Thoreson, Rita Williams, Jackie Wilson, and Marlene Winger.

Each of the hostesses was presented a beautiful hand-decorated guest towel from Miss Noah and

Mrs. Gilbreath.
