Upper Red River Flood Control and Irrigation Dist. Board Met Here

Monty Stephens was taken to Lockney General Hospital last Thursday, suffering from a virus infection. He returned home Monday about noon. He is improved, but will have to be quiet and rest.

A meeting was held here last week in the Community Room of the First National Bank of the Board of Directors of the Upper Red River Flood Control and Irrigation District and Government officers to discuss plans for possible dam on the Upper Red River.

The committee is a three-county committee with membership from Briscoe, Hall and Childress counties. Members of the board are O. E. Bevers of Lakeview, C. C. Broughton of Childress, Carl Hill of Parnell, Arville Settiff of Turkey and O. R. Stark of Quitaque. Others present at the meeting were State Representative Bill Heatley of Childress and Mr. John Thompson and Mr. I. C. Douglas, both from the State Bureau of Reclamation.

The Bureau of Reclamation has spent considerable time surveying for possible sites for dams, the flood damage along Red River, extent of pollution and other phases of the considered program.

There is a possibility that a dam will be built under a program of Pollution, Flood Control, Irrigation and Recreation. One tentative site mentioned is on Prairie Dog Fork of Red River north of Turkey. A dam there would back water up some 18 miles and would cover about 4000 acres of land. This would mean that the lake would extend back west about even with Quitaque. Several other sites were mentioned, also.

SAVINGS BOND DIRECTOR WARNS AGAINST CHAIN LETTERS

The U. S. Treasury's State Savings Bonds Director, J. L. Adams, cautioned Texans about becoming involved in chain letters or similar schemes.

He stated that the Treasury Department disapproves of the use of Savings Bonds and Savings Stamps as prizes or awards in lotteries or games of chance involving the element of personal profit. "This has been a policy of long standing," he pointed out. The Treasury has no objection, however, to the use of Savings Bonds and Stamps in contests of knowledge or skill, such as quiz programs and athletic events.

What prompted Adams' words of caution were reports of a resurgence of chain letters involving the use of the U. S. Savings Bonds. Wherever the plan has been started in a town, banks have reported a quick depletion of the \$25.00 and \$50.00 Savings Bonds used. Adams pointed out that the Treas-

ury's objection is based upon consideration of public policy and in no way involves the legality or illegality of this or any device or method employed.

"The purchase and distribution of Savings Bonds through the so-called 'chain-letter' arrangement, which has been brought to my attention by personal inquiries to the Treasury Department, is contrary to the policy of the Treasury's intended purpose for which such Savings Bonds are sold by the Government.

"United States Savings Bonds are issued by the Treasury to permit our citizens to invest in securities of the Government and through their savings put aside regularly something for future use and benefit. It is my understanding that this present scheme serves no such purpose."

Adams would still like to see Savings Bonds purchased by thousands of Texans in every bank; however, he wants them to be purchases for themselves and their loved ones as "gifts today for a brighter tomorrow."

SAVINGS BOND REPORT

Savings Bond sales in Texas for the first 6 months of 1962 totaled \$76,720,875 which represents 102.3 percent of the 75 million dollar Freedom Bond Drive goal for Texas. June bond sales in Texas were \$11,489,268.

These figures were reported recently by Mr. Perry Whittemore, Chairman of Briscoe County Savings Bonds Committee. Mr. Whittemore also reported that bond sales in Briscoe County were \$80,857 for the first 6 months of the year. This figure represents 101.1 percent of the 1962 sales goal. Air Conditioning experts agree...

WATER cooling is BEST!

Youngsters learn mighty early about the cooling effect of water when the weather's hot. And air conditioning engineers know that water cooling is far more efficient than air cooling. The reason is simple . . . 85° water can absorb more heat from your home than 100° air.

That's why ARKLA-SERVEL Sun Valley's GAS air conditioners are WATER cooled! Water cooling, plus Sun Valley's "no moving parts" principle, gives you two big advantages unavailable with other air conditioners. One, a Sun Valley gives you CONSTANT EFFICIENCY, while air cooled units lose as much as 15% efficiency. Two, Sun Valley operating COSTS REMAIN CONSTANT, while air cooled equipment operating costs rise as much as 23%.

KING-SIZED FILTER

double Sun Valley's double filtering capacity STOPS ALL HOUSEHOLD ODORS! It even takes cigar and fish odors, giving your home Spring-like freshness all year long.

NO MOVING PARTS

. . . in the heating or cooling cycles of the Sun Valley . . . nothing to wear out or break down! Sun Valley is year-around comfort for the mortgage life of your home!

CONSTANT EFFICIENCY

Sun Valley has no comfort-robbing friction to run up your operating costs. It doesn't cost a penny more to operate the Sun Valley for an hour when it's 115° than it does when the temperature is 90°.

Tiffin added, "Thomas stated that Christendom has falling away from true Christianity herself, so could not be responsible to represent God. FARMERS UNION SEEKS "YES" VOTE IN WHEAT REFERENDUM
(The following story was taken from the National Union Farmer, national newspaper of the Farmers Union.)

For nine consecutive years the National Farmers Union, the state unions, affiliated local and regional Farmers Union co-operatives in the Great Plains Region, have given leadership and financial assistance to national information campaigns which have led farmers to vote favorably for wheat marketing quotas.

Despite the uncertain status of farm legislation by reason of the defeat of the Administration's farm bill, which may return the wheat farmer to the programs of the 19-50's, we believe we have an even greater obligation to actively participate in the 1962 wheat referendum campaign.

At the moment, we are aware of the disappointment of farm

prove quotas. In reality, this would be a choice between \$1.82 a bushel, based on a 55-million acre national allotment, or one dollar or even less for wheat if quotas are rejected.

It is our hope that Congress will extend the present wheat program for 1963 on a temporary basis, with people over the failure of Congress to improve their economic outlook. We are also fully aware that the choices are far from the necessary of expected economic levels to which wheat farmers are entitled. Nevertheless, the choice is between reasonable controls and minimum economic floors or no controls and economic disaster.

Without any further farm legislation, wheat farmers would have a choice between \$1.82 a bushel and 50 percent of parity, provided they abide by acreage allotments should fewer than two-thirds of them ap-

or without minor changes, so the choice would be \$2 a bushel, based on a 49.5 million acre national allotment, or less than a dollar for wheat with no allotment.
