### Is Your Number Up!

If your blood pressure is 120 over 80, what does it mean? For persons between ages 18 and 45, it would probably mean a normal blood pressure.

It's important to know, however, because high blood pressure can be very dangerous, if not properly treated, Carla Shearer, a health education specialist, warns.

Years of untreated high blood and blood vessels. It is the pressure can damage the heart leading cause of heart disease, it contributes to almost 300,000 deaths annually in this country, she added.

Ms. Shearer is with the Texas Agricultural Extension Service, The Texas A&M University System.

"Unfortunately, less than half of the people who have high blood pressure know it—yet physicians recommend regular blood pressure checkups for everyone, even children," Ms. Shearer said. Blood pressure is the amount of force required to circulate blood through the body.

The top number (systolic) measures the force of the heart. The bottom number (diastolic) measures the pressure of blood against the vessel walls when the heart is relaxing between beats.

Normal pressures range from 90 over 60 to 140 over 90. Generally speaking, a blood pressure reading of 120 over 80 is normal for an adult between the ages of 18 and 45.

Blood pressure varies not only from person to person, but also in the same person at different times. Throughout the day a person's blood pressure will vary and may even be higher than 140/90. It is only when it is high and stays high most of the time that a person is considered to have high blood pressure, she explained.

### PROSPECTIVE BUYERS WARNED TO CHECK SALES TAX LIABILITY

Comptroller Bob Bullock again warned investors Tuesday that if they are interested in buying a Texas business they will be smart to check carefully to see if the business owes the state delinquent sales taxes.

"Without checking, it's like buying a pig in a poke," said Bullock. "It's just not a happy event to buy a business, open up shop and then get a fat bill for delinquent sales taxes before you get started."

Bullock said the sales tax law makes the new owner responsible for any delinquency run up by previous owners.

He urged the news media to help get the warning out to all

### Home Can Save Energy During Vacations

A home can save energy for its vacationing owners—if they will take five conservation steps before walking out the door.

Claudia Kerbel, consumer information specialist with the Texas Agricultural Extension Service, The Texas A & M University System, advises the following:

Turn off all unnecessary appliances. Unplug an "instant-on" TV or timed coffee pots and clock radios.

If you'll be gone more than a week, consider turning off your refrigerator. If you do, remember to unscrew the interior light bulb and prop the door open so mildew won't form. If you prefer to leave the refrigerator running, put it on a warmer setting—and be sure no foods are left that will spoil at the warmer temperature.

Turn off the air conditioner, but be sure to move any house plants to a friend's house—if warmer temperatures in your house would harm them. Consult a horticulturist about temperature range the plants can withstand.

Turn off the electric or gas supply to your hot water heater. One appliance you may want to leave on is a timed light, to discourage burglars.

Mrs. Doc Williams and Mrs. Jim Majors made a trip to Llano for the Memorial weekend. The two ladies did some fishing and mostly rested.

potential business investors.

Bullock noted that his office has changed procedures to make it easier for business buyers to get delinquency information quickly.

"We have also put out news releases, news columns and public service ads, but this unfortunate occurrence is still too common," said Bullock. "It's a sad story, but unfortunately one we can do nothing about other than issue warnings."

The Comptroller said the law actually requires the new owner to withhold the amount of any delinquent taxes from the purchase price of the business but as a practical matter many deals are already closed and paid before the new owner finds out about the back taxes.

Bullock urged every potential buyer of a business to contact the nearest Comptroller's field office early during purchase negotiations to make certain there is no outstanding delinquency.

"It ought to be as automatic as checking for clear title when buying a new home," he said.

### From Lloyd Bentsen Cast Preparing For New Season Of "TEXAS"

It is now widely recognized that the current system of criminal sentencing is not working. Manson and Richard Speck are eligible for parole, and other dangerous offenders are going unpunished. Glaring injustices in the sentences of those who are punished have led to numerous and great injustices.

What I have proposed in the past, and what several of my colleagues in the Senate are now proposing, is that we should have fixed, specific sentences written into the law for specific crimes.

As things now stand, federal judges sentence convicted criminals to an indeterminate number of years in prison, and then leave it up to the parole board to decide how long any individual should actually serve.

For example, judges are allowed to set prison terms for bank robbery at anything from zero years to 20 years under current federal law. And, at the discretion of the parole board, often only one-third of the sentence is ever served.

It is finally becoming widely accepted that our judicial system lacks standards and guidelines. The disparities in the sentences imposed under the present system have forced us to recognize that the use of indeterminate sentencing is neither fair nor effective. The concept of trying to rehabilitate by promises of early parole has been an abysmal failure.

Recently the "presumptive" sentence approach which I have long advocated has begun to win broad support among law enforcement officials and in legal circles. Legislation to revise and consolidate the laws—the Criminal Code Reform Act of 1977—has, been introduced by several members of the Senate Judiciary Committee.

It includes a provision similar to one I proposed a year ago which would replace the "indeterminate" sentencing system now used by federal courts with a system of "presumptive" sentencing. This approach sets a middle or "presumptive" sentence to create a uniform standard of justice for all.

For example, a four-year presumptive sentence might be set for first offense bank robbery, with virtually no eligibility for parole. The presumptive sentences would then increase sharply for repeat offenses.

Too often too many officials in the past have been hesitant to even face the issue of criminal justice squarely, preferring to speak in fashionable terms of "rehabilitation" rather than "punishment." There has been too much concern for criminals and too little thought for the victims of crimes.

As it now stands, there is no certainty for the criminal that he will be punished, no certainty for society that the dangerous will be incarcerated, and no certainty that punishment, when it is meted out, will be fair.

When an adult burglar knows that he has only one chance in 412 of going to jail for any single burglary he commits, it is

One-hundred-forty people are deep in preparations for the twelfth season of "TEXAS". One crew has placed the seats in the theatre, including the places in the new installation for the last two rows. Others are finishing work which will be in place for the opening. There is a new exit from the theatre so that the bottleneck after the show will be avoided.

The box office is open and manned and telephones have been installed. Mail reservations are increasing each day. More than 125 more bus groups have made reservations than had done so on this date last year.

Company members are checking proofs to choose their pictures for the Souvenir Program. Virginia Raillard and Lee Stribling are busy with the last minute copy.

The publicity department is preparing press kits and comments for interviews.

Rehearsals start with company warm up exercises, then actors, singers, dancers go off into different rooms to work on their specialties. By June 15, everything will be drawn together into focus for Opening night.

The western paintings and drawings for this year's Souvenir program will be from the works of Charles Russell, through the courtesy of the Amon Carter Museum in Fort Worth. Prints will be available in the Souvenir Building at the theatre.

During the past few years, the directors have asked a skilled director from outside to work with them as the assistant to the directors. This year the post is held by E. Don Williams of Lubbock.

Mr. Williams has been the assistant professor of speech at Lubbock Christian College for nine years. He has degrees from Tech in public address. At present he is working on the thesis for his PhD and will use material from his "TEXAS" experience as a base for it.

Mr. Williams has just been made assistant to the president of Lubbock Christian College.

For tickets and information write "TEXAS", Box 268, Canyon, Texas or call 806-655-2182. The season opens on June 15 and runs through August 20, 1977. There will be one Sunday performance July 3. Other weeks will have performances Monday through Saturday. Please make your reservations early.

### Bentsen Seeks Drilling On Atlantic Coast Bill

Senator Lloyd Bentsen Monday said he will push for early passage of legislation to overturn a court ruling that has barred drilling for oil and gas in the Atlantic Ocean, off the Eastern U. S.

Bentsen is cosponsoring a bill to validate existing oil and gas leases in the Baltimore Canyon, which lies in the Atlantic Ocean.

"The best available estimates are that Baltimore Canyon may produce as much as 1.4 billion barrels of oil and 9 trillion feet of natural gas; production that is sorely needed in this time of energy shortage," Bentsen said.

Exploration in the canyon has been held up by the decision of U. S. District Court Judge Jack Weinstein in New York in a suit brought by politicians and other East Coast residents.

Last week Interior Secretary Cecil Andrus announced that a new lease sale would not be held until December 1978.

"It isn't fair for them to come in and drill off the Texas Coast and then block efforts to drill off their own coast," Bentsen said.

"Texas has shown, through our experience with off-shore drilling, that you can increase the supply of energy and still protect the environment."

Senator Bentsen pointed out that in the Gulf Coast Outer Continental Shelf area, from 1971-75, there was no oil spill of more than 50 barrels even though 4,105 new wells were drilled.

The legislation Bentsen is cosponsoring would allow exploration to begin immediately by ratifying existing leases. Before production could begin, however, the driller would have to submit plans for production and development to assure that adequate steps are being taken to protect the environment.

### Base Loan Rate For Cotton Increased

The 571 points per pound (5.71 cents) increase in the national base loan rate for cotton, from 38.92 cents per pound in 1976 to the 1977 rate of 44.63 cents, will mean an increase on average High Plains cotton of only about 558 points (5.58 cents) according to calculations made by Lubbock-based Plains Cotton Growers, Inc.

Most cotton grown on the High Plains falls below the Strict Low Middling 1-1/16 inch, 3.5 to 4.9 micronaire base quality, and discounts on the lower grades and staples are an average of 27 points greater than 1976 discounts. However smaller discounts are on cotton with below 3.5 micronaire will offset about 13 points of this, leaving a net loan value reduction from discounts of about 13 points.

PCG used the average of qualities produced on the Plains in the 1971 to 1975 crop years as the basis for its calculations.

PCG officials also note that 1977 is the fifth consecutive year for which the grade and staple discounts have increased on qualities below SLM 1-1/16 inches, and that it is the first time in the last five years that overall micronaire discounts have not increased.

Grade and staple discounts for 1977 on qualities that make up over 95 percent of the average Plains crop average to 542 points, 216 points more than the discounts that applied in the loan schedule of 1972.

Low micronaire discounts for 1972 and 1977, respectively are: points; 2.7 to 2.9, 270 and 390; 3.0 to 3.2, 165 and 200, and 3.2 to 3.4, 70 and 65 points.

Premiums and discounts that apply in the loan schedule each year for the most part reflect spot market quotations for the period August through April of the previous year.

Mr. Williams has just been made assistant to the president of Lubbock Christian College.

For tickets and information write "TEXAS", Box 268, Canyon, Texas or call 806-655-2182. The season opens on June 15 and runs through August 20, 1977. There will be one Sunday performance July 3. Other weeks will have performances Monday through Saturday. Please make your reservations early.

"Therefore the five year trend toward a greater disparity between loan values for High Plains cottons and the base quality," explains PCG Executive Vice President Donald Johnson, "means there is similar trend in the marketplace where our cotton must eventually be sold."

The USDA announcement of premiums and discounts included a statement that freight differentials for various warehouse locations across the Cotton Belt would be released soon. The High Plains rate, considering past experience, is expected to be about 44.55.

When the exact High Plains rate is available, PCG will compute

price of all cotton qualities eligible for the loan. The schedule of loan values will be a part of the second quarter issue of membership newsletter.

Mr. and Mrs. Billie Joe McFall and two daughters, Dianne and Danett, and two grandsons, Marty and Chad, sons of Mr. and Mrs. Gary McFall of Pampa, spent the weekend with their mother and grandmother and great-grandmother, Mrs. Delila McFall.

Mr. and Mrs. Tom Eudy visited over the weekend in Claude in the home of their daughter, Mr. and Mrs. Jack Fields and Nancy.

**WOMEN'S LIB MEN'S LIB!**

The mass media echoes with talk of liberation. We hear of men, women, students and minority groups, all seeking to achieve various degrees of freedom. Regardless of our political position, we all, as human beings, seek a liberation of our minds, and our spirits. We seek a freedom to grow, to achieve and to mature. One of the greatest discoveries a Christian makes is that liberation of the spirit is to be found in Christ. Freedom from sin and guilt are in him.

This freedom, so essential to human fulfillment, allows us to be children of God, even though our circumstances may be far from ideal. Liberation in Christ fortifies and equips us to cope with the injustices of our time

in a positive way. When this freedom is used "though love (to be servants of one another)," it follows that we will be concerned about spiritual and physical hunger wherever it is found. May this be a day in which we all exercise our liberty to follow Jesus.

"... True freedom is to share  
 All the chains our brothers wear,  
 And, with heart and hand, to be  
 Earnest to make others Free!"  
 James Russell Lowell

The Bible says: "So if the Son makes you free, you will be free indeed." John 8:36.

**PIONEER NATURAL GAS COMPANY**  
 (A Division of PIONEER CORPORATION)

**HOT SUMMER COULD PUSH HIGHER ELECTRIC BILLS**

A long hot summer could produce some of the highest electric bills in years, West Texas Utilities Company officials warned this week.

And according to some weather observers, official and otherwise, a hot summer is long overdue. West Texas, like much of the nation, has enjoyed five relatively cool summers in a row. The law of averages, therefore, would indicate a change.

One of the consequences would be more use of air-conditioning, requiring more electric energy. This could run bills up sharply. There already are indications th-

at customers may soon be jolted out of their summer lull. During the first 21 days of May, temperatures in Abilene averaged 5.81 degrees above normal and electric usage went up accordingly.

A change back to even the normal weather pattern could bring the impact of higher usage and higher costs, a company spokesman said.

Historically, the four peak months for electric usage in the WTU territory are June through September. The peak day usually comes in August. Last year the system's electric load peaked at 5 p.m. on August 11.

Weather records for Abilene and San Angelo show that June-

through-September temperatures have averaged below normal for the past five years. The result, WTU officials say, has been that the customers have grown accustomed to relatively lower summer electric usage.

WTU officials are not worried about meeting the energy demand. The company's generating system is adequate to supply all the electricity needed even on an extremely hot day. But they are urging customers to practice conservation in order to hold their usage and bills down.

The key to lower bills this summer will be efficient handling of home cooling. Proper ceiling insulation and adequate attic ventilation are two of the most important factors. WTU engineers also suggest that thermostats be set at 78 degrees, that houses be opened up to take advantage of nature's cooling when the outside temperature is less than 75 degrees, and that shades be kept pulled on the sunny side of the house.

They also urge that air conditioners be checked to see if they are in good working order, and that air conditioners not be left running if everyone leaves the house for substantial length of time.

Mr. and Mrs. Rolfe Wooten and children of Baytown are visiting this week in the home of her parents, Mr. and Mrs. E. L. Hill. They were joined for their visit by Mrs. Jerry Weatherly and children of Haskell during the weekend.

Mr. and Mrs. Herbert Gipsen were at Rock Creek Church of Christ Sunday to hold the church services and drove to Turkey to be dinner guests in the home of Mr. and Mrs. Jack Lacy.

**CARD OF THANKS**

Though our words are inadequate and too few, our hearts are filled with a great thank you for the loving thoughts of sympathy you had for us at the loss of our wife, mother and granny. Thanks to all the ladies who served the lunch and to all those who brought food in. And a special thank you to Bro. Melvin Clinton and J. E. Stewart.

Mr. and Mrs. R. A. Farmer  
Mr. and Mrs. L. V. Thrasher  
Mr. and Mrs. L. C. Thrasher  
Mr. and Mrs. Fay Bacon  
Mr. and Mrs. Ray Thrasher  
Mr. and Mrs. Gerald Carnes  
And grandchildren

**CARD OF THANKS**

We wish to thank everyone for all the beautiful gifts that we received on our anniversary and for all the pretty cards. It is at times like this we remember how wonderful it is to live in Turkey and how thankful we are for all our friends. A special thank you to everyone that helped with our celebration. May God bless each one of you.

Love,  
Bill and Jimmie Mullin

Mr. and Mrs. Jack McFall and children, Jena and Justin of Silvertown came for supper with their mother and grandmother, Mrs. Delila McFall, Saturday night. They had dinner with Mrs. McFall and her other visitors Sunday, too.

Mr. and Mrs. A. L. Cowan of Edgewood, Texas gave his sister, Mrs. H. B. Finney of Quitaque a surprise visit Saturday night.

Mr. and Mrs. Jerry Maupin and girls were joined by Mr. and Mrs. Michie Maupin of Turkey for a trip to Dallas to visit with Mr. and Mrs. Eddie Maupin and Mr. and Mrs. Mark Webb. They all made a trip to Bridgeport to fish.

Mr. and Mrs. Dale Wilks of Memphis visited with her parents Mr. and Mrs. Preston Jonett on Sunday.

Mr. and Mrs. Bob Williams and boys of Amarillo were visitors in the home of Mr. and Mrs. Lawrence Hedrick over the weekend.

Mr. and Mrs. Oscar Turner of Amarillo visited in the home of Mr. and Mrs. Aubrey Turner Sunday.

Shorty Hollingsworth returned to his home in Turkey Sunday following eye surgery at the Veterans Hospital in Oklahoma City Friday.

Steve Farley of Turkey has just finished his first semester of Auto Mechanics at Clarendon College. He maintained an average of A through the entire course and received an outstanding student award. He is now employed at Russell Buick in Amarillo for the summer.

Steve is the son of Mrs. Therna Farley, who operated Kathleen's Beauty Shop in Turkey. They have three small children.

Mrs. Kenneth Garvin and children visited in Claude with her sister, Mr. and Mrs. Bud Strange and family.

Mr. and Mrs. Rick Elmore and daughter, Shalynn, of Tokio are visiting this week with her parents, Mr. and Mrs. J. T. Mullin.

**Dear Producer:**

Recent reports indicate the probability of storage shortages for the upcoming wheat crop. I would like to take this opportunity to notify you that we have storage available in Silvertown for your crop. We have 350,000 bu. of licensed storage available for wheat. We are licensed and bonded by the State of Texas and able to issue warehouse receipts on grain in storage for "loan" purposes.

Please come in and visit with us about your storage requirements. We are looking forward to doing business with you and hoping for a bountiful harvest.

**COMBINATION OF METHODS USED IN BRUSH CONTROL**

Fire, chemicals, chopping, bulldozing and outwitting nature through biological means all have a place in brush control.

In more than one effort, combinations of methods are used by range management specialists.

But at Texas Tech University a new combination is at work in field tests. It is a farm-type tractor rigged on the front end with a shredder and a spray attachment, providing mechanical and chemical control in one operation.

The unit can shred and spray stumps of trees with stem diameters up to 10 inches. It can handle a swath of 9 feet 8 inches and has been field tested at forward speeds of 3 to 4 miles per hour on rolling terrain.

The tractor being used in field tests has 130 horsepower, although a 60 to 80 hp. tractor will pull the equipment. The advantage of the heavier machine is in speed per acre. At maximum speed the Texas Tech machine can clear three to four acres per hour.

Sincerely,  
Service Elevator and Mackenzie Feed Mill  
Roy Dale Wood, Manager

Dr. Willie L. Ulich of the agricultural engineering faculty and Dr. Ronald E. Sosebee, Billie E. Dahl and Donald F. Burzlaff of the range and wildlife management faculty are directing the research with the machine.

"There is the advantage of handling two control methods in one operation," Sosebee said, "but there is another advantage in placement of the spray."

Only the stump left by the shredder and a small area around it is sprayed. This leaves some of the mesquite for possible harvest and makes the chemical application safe despite nearby crops.

The unit has two hydraulic motor-powered cutter heads about 60 inches in diameter, each with a 40-inch fly wheel and two offset swinging 10-inch knives. This unit is mounted at the front.

The chemical pump and spray unit located immediately behind the shredder goes into operation as soon as the shredder passes over the mesquite.

Researchers report that preliminary indications show that Tordon 225 is the most effective herbicide throughout the year. Consistently good root mortality rates were registered in May with results in other months dependent upon good soil moisture. With

good soil moisture early results indicated that 50 milliliters per tree is sufficient to kill the basal bud zone of multiple stem mesquite with a maximum basal diameter of three to four inches, Sosebee said.

"Our data indicate the method is economical for surface mesquite removal," he said, "and we are preparing stump-kill data now, but final evaluation on some aspects will require more time."

He said that studies underway include field efficiencies, machine downtime and wear, and regrowth control on various degrees of infestation.

Working with the research team are W. E. Boyd and Frank Turley, graduate research assistants, and E. B. Hendon, research associate in the Department of Range and Wildlife Management at Texas Tech.

**CARD OF THANKS**  
We would like to thank all of our friends and loved ones who were so thoughtful during the loss of our dear sister, Marie Pitts. Thank you for every thought, card and prayer. May God richly bless you.  
Jim and Allie Mae Taylor

**CARD OF THANKS**  
We would like to express to everyone our thanks, especially to the Turkey Fire-boys. Your cards, flowers, calls during my stay in the hospital were greatly appreciated. We didn't realize how much our friends meant to us until an emergency such as this happened. It is hard to find words to express how much you are appreciated. May God richly bless each and everyone of you.  
Mr. and Mrs. Woodrow Mullin
