Incumbent U. S. Representative Graham Purcell (D-Texas) has announced that he will seek re-election in the redrawn 13th Congressional District in 1972.

In making the announcement, the six-term Democratic Chairman of the House Agriculture Committee's Subcommittee on Livestock and Grains, said simply, "This is where I belong." Purcell's statement thus ended speculation that he would run in the newly-created Dallas-Fort Worth District established when the Texas Legislature redrew Congressional District lines earlier this year. The announcement also set the stage for what would undoubtedly be the most difficult campaign Purcell would ever wage—against Republican Bob Price who also has his eye on the new District which combines the Panhandle and other counties eastward.

"I was greatly impressed by the show of support I received during my visits with people around the Panhandle," said Purcell, who has been serving continuously in Congress since the 87th Congress, to which he was elected in 1961 when he left his post as District Judge. "While I was also flattered and deeply appreciative of the people who wanted me to represent them in Fort Worth and Dallas—my roots are here. This is where I grew up, where I returned after the War, and where I will stay. This is my home," the veteran Congressman said.

Mrs. Fay Frazier of Aspermont, sister of Mrs. J. W. (Thelma) King, was buried Saturday, August 28, in Aspermont at 2:30 p.m. She passed away Thursday night after an extended illness.

### Boll Weevil Control Program Underway

The first insecticide treatment in the 1971 diapause boll weevil control program should be completed during the first few days of September, according to County Agent Jackie Johnson. Spray operations will be conducted on a selective basis during the current program, Johnson said. Only fields which show significant evidence of weevil infestation will be treated. Survey teams are working in all counties in the control zone in order to select fields which require treatment.

Special attention will be given to fields treated during the early phase of the program since insecticide applications made during late August and early September might cause an increase in bollworm infestations. Due to the potential bollworm threat, only fields having large numbers of weevils will be treated during the early portion of the program. Survey teams are making bollworm counts as well as weevil inspections. In general, bollworm infestations have decreased during the past two weeks and the possibility of heavy infestations now appear less likely. However, program officials stated that wide scale weevil spraying would be avoided until after the threat of a bollworm buildup subsided.

Overall, boll weevil infestations

have been very light up to this time. According to the latest survey reports, only a small number of fields in Hall, Dickens and Kent counties will require treatment during the first application. However, very heavy weevil infestations have developed in a few fields. It is important that treatment be initiated in these fields soon to prevent damage and to prevent weevils from spreading to other fields.

In an effort to hold down the toll, the DPS and local law enforcement agencies, in cooperation with the news media of Texas, will conduct "Operation Motorcade"—a public awareness program designed to focus attention on the traffic problem. Special reports on fatal traffic accidents will be prepared at DPS Headquarters and released three times daily during the holiday period which runs from 6:00 p.m. Friday, September 3, to midnight Monday, September 6.

All available uniformed officers of the Department of Public Safety will be on the highways during the holiday to enforce state traffic laws, and maximum use will be made of radar and breath testing instruments. ## State Capital News

by Bill Boykin

Texas Press Association

AUSTIN, Tex.—The Legislative Redistricting Board, its hands tied by a court order, has called for a staff research toward reapportionment of both the Texas House and Senate.

If the Board were permanently enjoined from action, the thorny reapportionment chore may be handed back to the Legislature in a special session this fall. Board was created in 1943 to redistrict where a legislature fails to do so in its first regular session after a decennial census.

Day before the five-member panel was to meet and begin work on Senate realignment (a task left undone by the Legislature this year), an Austin judge entered a temporary restraining order. At the same time, Judge Herman Jones set a hearing for September 2 on a petition for an injunction.

Rep. Fred Head of Henderson filed the suit to stop Board action, contending 1970 census figures are not yet all in, and that reapportionment should wait until the 1973 Legislature.

On August 2 Judge Jones declared the House version of reapportionment by the Legislature this year unconstitutional. Atty. Gen. Crawford C. Martin has promised an appeal to the Texas Supreme Court.

Meanwhile, Martin who was named temporary chairman of the redistricting Board in absentia, left a message expressing hope that the panel will begin work "at the earliest possible date" on House reapportionment in event the High Court rules that it its duty.

At. Gov. Ben Barnes, another member of the Board, also called for early staff attention to a House redistricting bill, although both he and Martin agreed Senate reapportionment is the first objective.

Board has 20 separate plans already submitted for rearing the Senate's 31 districts in line with the 1970 census and federal court rulings of substantially equal population for each.

### "FREEZE" BRINGS SUMMER CHILL

The President's wage-price freeze continued to be the closest-watched and fastest-changing news event at the state capitol.

Gov. Preston Smith's proclamation to state agencies to disregard the presidential order and place pay raises for state employees in effect September 1 was quickly held invalid by Attorney General

Martin. Martin then went to Washington to plead for exceptions for state workers and school teachers who had been assured raises by legislative action and (in the case of teachers) valid contract well before the freeze order date, August 15.

Meanwhile, Texas State Employees Association filed a formal petition for exemption of 60,000 state employees from the order and hinted at court action if refused.

Teachers kept close watch on Washington announcements to see if subsequent federal agency rulings would permit their raises covered by contracts signed prior to August 15 to be granted September 1.

### INFO OFFICES OPENED

Internal Revenue Service announced opening of nine offices in southern Texas to answer questions, study complaints and investigate alleged violations of the wage-price freeze.

Offices are located at IRS headquarters in Austin, Beaumont, Waco, Corpus Christi, El Paso, San Antonio, Houston, Harlingen and McAllen.

Questions on new import duty surcharge will be referred to the Office of Customs in Houston.

### LABOR DAY TOLL PREDICTED

Fifty-two may lose their lives in traffic accidents during the long Labor Day weekend, predicts the Department of Public Safety.

If Texans can't drive more safely than that, Governor Smith told his traffic Safety Committee, serious consideration may have to be given to declaring a state of emergency on three-day holidays and calling out the National Guard to supplement police activities.

Smith's committee reviewed plans for an intensive Labor Day Safety Campaign.

DPS Director Col. Wilson E. Speir urged motorists to refrain from drinking while driving, to avoid fatigue and to modify driving speed in accord with heavy traffic conditions.

All uniformed officers of DPS will be on highways Friday through Monday to enforce traffic laws. Maximum use will be made of radar and breath-testing devices. DPS special reports on fatal accidents will continue.

### AG OPINIONS

Public junior colleges may charge tuition in amounts greater than rates specified by the Legislature and may authorize additional fees, Attorney General Martin has held.

In other recent opinions, Martin concluded:

\*Lessee or operator of a natural gas well on a state tract may not legally deduct from royalty due the state a portion of the cost of production, gathering, sale or delivery of gas.

\*Provision that an owner may record and use more than one brand or mark to identify his live-

stock remains in effect.

\*State employees can travel first class on airlines if no tourist class seats are available—and are entitled to out-of-state travel expenses up to \$35 a day.

\*Two bills encompassing types of service now credited under state retirement system are constitutional and not in conflict.

\*Legislation relating to eminent domain proceedings does not violate constitutional requirements of deposits of money. Bill aimed to provide condemnors "full benefits at any stage of litigation process short of a final adjudication."

### CHILD COUNCIL FORMED

Governor has established Council on Early Childhood Development to aid children under six.

Council will study early childhood programs and develop plans for strengthening them. It also will train parents and potential parents in the "art" of child care and guidance and implement new programs for education, health and social services to children.

**PERSONAL IDENTIFICATION CARD NOW IS AVAILABLE**

Colonel Wilson E. Speir, director of the Texas Department of Public Safety, said today that effective September 1, Texans may obtain a special personal identification card.

The card, which was authorized by the 62nd Texas Legislature, is laminated and contains a color photograph of the holder. It is the same size as a Texas drivers license.

Information appearing on the card will include the holder's date of birth, height, sex and eye color. Each card will have a special identification number issued by the DPS.

Speir said the cards should be of value to those persons who do not hold a Texas drivers license, but who need some sort of official card to help establish their identity.

In order to obtain a personal identification card, the applicant must appear at a DPS drivers license field office on or after September 1, execute a special application form, present a birth certificate or other documentary evidence of identity and date of birth, be fingerprinted and pay a statutory fee of \$5.00. The special cards, which will be mailed from DPS Headquarters in Austin, will be dated to expire four years from the applicant's next birthday.

Also effective September 1, certain persons having military service connected disabilities will be exempted from drivers license fees. Speir said those individuals with a 60% or more service connected disability will be entitled to the free drivers license provided they meet other requirements which apply to all applicants. At the time of application for a new
