THEN & NOW!

by Eunice McFall

The time to voice our choice about who we want to run our government has come and gone for this year. Did you go out Tuesday and speak your piece? Hopefully you did--then you have the right to voice your opinions about the laws that are passed, the regulations we have to live by and the new rules that the government wants us to live by.

The time has come for us to forget all the fragments caused by the parties running for election and re-election. Most of us want to just sit back, and watch the politicians to see how many mistakes they make that we can gripe about. We do not take the time to contact them and voice our opinions. After all they are in the governing body to vote as we, the people, wish, the majority not their individual ideas or to vote as a special interest group wishes.

This is the way our government was set up, with ways to be controlled and not just a run-away train. How far will we allow our politicians to go before we take the reins back into our "the people" hands?

First step we must take is to get acquainted with our new members of government. Meet them when they are in your area. Call them to let them know how you feel about pending legislation. After all, this is the only way they can learn of the desires of the people whom they represent.

Simple it is not--we do live in a very complicated world today. We must let our governing bodies know our feelings and thoughts on issues if they are going to be able to vote wisely on the new laws that will be facing them this coming year. Laws that will make a difference in our lives in the future.

Instead of just sitting at home and complaining that the law makers are all just out for what they can get for themselves, why not try to help them make an educated decision. Why not investigate the issues and find the reasons for the bills being passed or the law being enforced.

We "the people" do have a say in what happens in our world. We can either have this say passively or actively. If passively, we really don't have a right to complain if we don't like the way we are governed but if actively, at least we know we have done all we could to make this a better place in which to live--Again, the choice is up to you.

Good Guys Awards

by Ann Coker

Our Good Guys Awards this week go to Byron Young and Lavern Hamner.

I recall when Lavern used to spend Sundays, her only day off from work, making angel food cakes for her diabetic friends. Not many people spend their only day off doing for others.

Anytime anyone needs help it seems Lavern Hamner's name is first on everyone's mind. Lavern always has time for anyone who needs help. We're lucky to have Lavern in our town. She is a "good" lady!

Our other "Good Guy Award" goes to Byron Young. Byron has long been an outstanding citizen of Turkey. He came to the rescue of a little 22 month old boy the other day who had locked himself in his mother's car. Josh Hamilton was visiting his grandparents, the U. F. Cokers, when the incident occurred. After the futile attempts by his grandparents and his mother, Linda Hamilton, to unlock the doors, Byron was called on for help. Byron was quick to respond to the call for help. With the help of a coat hanger and a steel bar, Byron soon freed the little boy. Byron is a "good" guy!

Quitaque Closes City Transfer Unit

As of November 3, 1992 the City of Quitaque had to shut down their city transfer unit. This is the unit west of ADM Paymaster Gin that was used for the dumping of grass clippings, furniture, appliances, tree limbs and brush.

Abuse of the privilege to discard unwanted items in this area is the cause of the shut down. Too many persons were dumping illegal items in the area which resulted in the closing of the unit.

Anyone caught dumping anything in this area will now be fined!

If you wish to discard any unused item, contact Quitaque City Hall and arrangements will be made to take care of it.

Tires are still being accepted at the City barn at the trailer. City employees appreciate your cooperation in this project by neatly stacking the tires.

Disabled Cards Available At Tax Office

The Texas Department of Transportation has issued the new Disabled Person Placards to the Briscoe County Tax Assessor's office. This new card will replace all the Permanently Disabled Cards. At your convenience, please bring your old card by the office and exchange for the new plastic placard. Thank you for doing this before January 1, 1993.

November 7 Jamboree To Have "Valarie"

The Caprock Jamboree is thrilled to announce the special group for the November 7th show will be *Valarie and Friends*. Valarie has won First Place in the "Bob Wills Fiddle Contest" for the past two years. With a highlight such as this you can be sure of a great night of entertainment.

Returning to the show, by audience request, will be the *Line Dancers from Amarillo, The Country Six from Olton, and Otta Bowns from Levelland*. We have been asked repeatedly to get all of these groups back. So, here they are, all lined up to help make the November show a very special night.

Also returning will be our own *Country Sounds*, of which, we have many to say they are hard to beat. They are there when anyone needs someone to back them and do a good job of it.

A newly formed group, *The Rag Tag Band*, will also help to make the show a very special night.

The hamburger supper, prepared by the newly organized Chamber of Commerce of Silvertown, will begin serving at 6:00 p.m.

The music and entertainment will begin at 7:00 p.m. in the County Showbarn. Bring your lawn chairs and get ready for the Caprock Jamboree, November 7th.

Boll Weevil Program Needs Legislative Support Now

A beltwide boll weevil eradication program has virtually eliminated the boll weevil from some eastern states such as Virginia and the Carolinas and also from Arizona and California. The Southeast Eradication Program is moving westward but it will be some years before it gets to Texas.

A Texas Boll Weevil Eradication Program could get underway much sooner if cotton producers in Texas were to decide this is what they want. To find out what the producers want, there has to be a vote, a referendum of cotton producers.

To have a vote, a referendum of cotton producers, a bill must be passed through the Legislature and signed by the Governor. Such a bill was put together in 1991 but there were a few problems with it.

A new Boll Weevil Eradication Bill has been put together by Texas Cotton Producers, Inc. and has the full support of the nine certified cotton producer organizations in the state. It will be sponsored in the House by Representative Pete Patterson and in the Senate by Senator Bill Sims.

To allow the cotton producers to vote on this, we must have this "enabling" legislation passed as soon as possible. The next regular session of the Legislature starts in January, 1993. A special session may be held in mid-November, 1992. Which ever comes first, it is imperative that the Governor call for this bill at the earliest opportunity.

We need your help. We need your voice to be heard, not just through your producer organization, but also from you personally.

You can help by writing a letter to the Governor asking that she put this bill before the Legislature at the earliest opportunity.

Or you may call the Governor's hotline 1-800-843-5789. Ask that she put the Boll Weevil Eradication Bill before the Legislature at the earliest opportunity.

Remember, this bill is "enabling" legislation only. It does not commit anyone to eradication.

Results of Oil Additive Study: Good News!

Here's good news for the growing number of motorists who use Teflon-based oil additives to improve their car's performance. Engineering research studies recently conducted at Allied Signal Aftermarket Group's Fram Filters division, show they do not harm oil filters and oil filter performance.

The studies tested the effect of the oil filter media on the Teflon spheres in oil additives as well as the effect of the Teflon on the filter. In both cases, tests showed the oil additives did not decrease the oil filter's efficiency and effectiveness.

Sales of oil additives and other engine treatments have reached nearly \$150 million and are expected to grow 50 percent per year, say automotive product market analysts.

I enjoyed visiting with Colleen Stone recently. She reported Leroy was doing well and had several more weeks of therapy to take. They are hoping he will have full use of his hand when he returns from Lubbock.

Here for the first week-end of the quail season was Scotty Setliff of Ft. Worth. Scotty and a friend reported good success on hunting last Saturday. The boys were visitors in the home of Scotty's parents, the Arville Setliffs.

Visiting in the home of his grandmother last Sunday was Mike Prather of Amarillo. Mike and his grandmother, Virginia Degan visited in the home of Joe and Leona Degan Sunday afternoon. Mike also took Virginia on a tour of her farm.

Received word last Sunday of the good news that Billy Joe Pinkerton had been removed from ICU in Baptist Hospital in Amarillo. Billy Joe is showing some improvement. His wife, Marjorie, is still with him in Amarillo.

Betty House took three "avid fishermen" with her to her cabin on the Llano near Junction last week. The ladies accompanying Betty were Rita Guest, Beth Mills and Betty's daughter, Sue Proctor.

Beth shared with us that she caught two five pound catfish and one three pound catfish. Sue also caught a good sized catfish.

One day the group drove to Fredricksburg for a day of shopping and sightseeing. Rita decided to use her time touring the Nimitz Museum which the other three had already seen. Rita related she thoroughly enjoyed the two hours of reliving the days of World War II. She even found some information on Smitty Guest's Squadron while they were stationed on Saipan.

Received word last week that Dorothy Maxwell has recently been hospitalized. Her son and wife, Dr. Jon and Debbie Maxwell of Idabel, Oklahoma were visiting at time in Bella Vista, Arkansas. They reported she is now home.

Dorothy is the widow of the late Dr. Maxwell, who was a former Turkey physician.

Perhaps the youngest "Trick or Treaters" in town last Saturday night was Khaki Scrivner. The little two month old girl was dressed as a pumpkin. Needless to say, her parents, Curtis and Ruth Ann, were making the rounds with her.

While Clyde and Josephine Rogers were pruning their trees last Saturday, Josephine suffered a fall. Later the ambulance was called and Josephine was transported to a Lubbock Hospital. After arriving in Lubbock, it was discovered Josephine had broken her hip when she fell. She required surgery on her broken hip.

Received a most welcome letter from J. W. and Jo Lacy the other day. They manage a gin in Sidon, Mississippi.

Jo works in the computer room and also cuts, weighs and tags the bales of cotton. Jo reported they were about one-half through with their ginning and so far had ginned nearly seventeen thousand bales of cotton. The cotton crops had been damaged by worms, too much rain and Hurricane Andrew.

Jay fishes when he finds the time but misses fishing with his Turkey friends.

Rusty Matthews came home last Saturday after spending two weeks in St. Mary's hospital in Lubbock.

Visiting with Rusty after her return home were her brother and wife, Jack and Freddy Lou Moon of

Fritch and her sister, Nada Starkey of Flomot.

Lewis and Mozelle Eudy visited Bill and Cleo Green in Slaton Thursday and Friday. Mozelle had a check-up on her hands by her doctors at University Medical Center in Lubbock. Her report was good and she will continue therapy at home until December 1 when she will receive another checkup.

They visited some fields of colored cotton and brought some home for others to view. The following is the report Cleo received from friends who raised the colored cotton.

Naturally colored cotton called "Fox Fiber." Natural Colors are called Coyote brown and green and are filled with warmth from the earth.

All the brown and green cotton in this area will be ginned at Union Co-op Gin near Slaton. The ginned cotton has been contracted by Levis and will be made into denim at Littlefield. The colors deepen with washing.

The Union Co-op Gin will have some material available to the public later.

Patriots In Playoffs For 3rd Year

by Coach Gilmore
Valley nailed down a playoff spot for the third year in a row with a 54-6 win over the Northside Indians. Valley scored first as Jason Smith intercepted an Indian pass and returned it 75 yds for the TD. Price added the extra point for a 8-0 lead with 3:37 to play in the first quarter.

It didn't take the Indians long to get back into the game as they drove 60 yds the next time they had the ball to move the score 8-6. The Indians scored on a 15 pass from Jim Read to Joseph Bee. The kick failed. Smith added another TD for Valley when he went 24 yds around in for the score. Price added the kick.

In the second Quarter it was all Valley as they scored 38 points. Dewayne Davis had three TDs; a 2 yd run, a 38 yd run and a 10 yd run. Smith added a 5 yd run and had his third INT of the night when he picked off an Indian pass and went 45 yards for the TD and ended the game on the 45 point rule.

Price went 6 for 6 in the extra point department and he and Joe Valdez had great games blocking on the sweeps for the backs. Dewayne Davis had 100 yds on 7 carries while Smith had 49 yds on 5 carries. On defense Price had 11 tackles. Merrell with 5 and a fumble recovery. Davis had 3 tackles and a fumble recovery. Smith had 3 tackles and 3 INTS, two returned for TDs. Josh Scoggins had a good night as he recorded 7 tackles. Danny House had 2 tackles.

Valley Jr. High Wins Over Samnorwood

by Coach Gilmore
The Valley Jr. High Improved their record to 6-1-1 on the season with a 21-6 win over the Samnorwood Eagles. The Patriots and Eagles were scoreless after the first quarter but on the first play of the second quarter Shawn Stephens hit Andre Gaddis on a 48 yd pass to set up Valley's first score.

Brian Moore went over for the TD from the one. Stephens passed to Gaddis for the extra point and the lead 7-0. Valley remained tough throughout the first to go in at half 7-0.

On the opening kickoff of the second half Moore went 75 yds for the TD. Jarrett Pigg caught a Stephens' pass for the extra point and a 14-0 lead. After a fumble recovery by Moore, Jarrett Pigg went in from the 9 on a reverse and Moore added the extra point on a run for a 21-0 lead.

The Eagles did get on the score board on a 38 yd TD pass with 1:04 left in the game. Pigg, Stephens, Moore, Merrell, Gaddis and Henson had a great game on defense. Payne, Merrell and Pigg did a good job opening the holes for the running backs.

Valley will finish the season out when they travel to Patton Springs

Ricky Hughes was back in action Friday as he had a fine on the special teams. We are expecting Hughes to see more action this week. The front line of Merrell, House and Danny Ulrey did a good job of blocking for the running backs.

Valley moves to 8-1 on the season and 3-1 in district. Valley will face Samnorwood on Friday at Samnorwood for the final district game. Game time is at 7:30 p.m.

Valley JV Defeats Jayton 46-12

by Coach Browning
Valley JV beat Jayton by 34 points which marked the first time in 8 games this year that we played a full game. In fact this was first time this year we played in the 4th quarter. Jayton played us tough all night, we were a little rusty from the open date. That hurt us on our extra point in which we missed several extra points.

Offensively we scored 7 touchdowns 5 running and 2 passing. Our linemen did a good job blocking a team that was quiet a bit bigger than we were. Our backs did a good job finding their holes. We were pleased with our players performance after the short lay off.

Defensively we gave up a few points due largely to poor tackling. Both of their touchdowns came after several missed tackles. Both were long runs which made up most of their yardage.

Jayton offense was very difficult to adjust to on the field but our kids did make the adjustments shutting them out the second half. We still played hard and had several players in on the tackles.

We suited up 9 players and each one played a lot and gave 100% each and every play. Even when we messed up we were going 100 mph. As of right now we do not have a JV game this week.

for a rematch with the Rangers. Valley defeated the Rangers 45-0 two weeks ago. Game time 5:00 p.m. Thursday, the 5th.

Diabetic Risks In Pregnant Women

Diabetic women who want children may reduce some of their pregnancy risks by consulting a doctor familiar with their special needs before they conceive.

According to Dr. Karolina Adam, assistant professor of obstetrics and gynecology at Baylor College of Medicine in Houston, a diabetic needs to be sure of her own health and in "good control" of her sugar level before she gets pregnant.

"If her sugar is too high or fluctuates too much, her baby could be harmed even before she knows she is pregnant. She is also risking a miscarriage," Adam said.

A diabetic must also be in good health overall so she can tolerate a pregnancy physically, said Adam, a Baylor specialist in maternal/fetal medicine and high-risk pregnancies.

"She needs to be able to withstand the demands of providing nine months of life support to her developing child without jeopardizing her own health," Adam said. "We want her healthy after she delivers so she can enjoy being a mother."

Before conceiving, a diabetic should make sure her kidney function is good and that she does not have high blood pressure or heart disease—conditions diabetics are at higher risk for. Problems like these should be treated before a pregnancy begins, Adam said.

Adam also has patients checked for diabetic proliferative retinopathy, a condition affecting the retina of the eye that can cause permanent damage or blindness if left untreated. Pregnancy can increase that risk, Adam said.

Once she has conceived, a diabetic will be monitored throughout her pregnancy, Adam said. The obstetrician will keep a close watch on the baby's growth and development and on the mother's blood pressure and blood sugar.

"We want to keep her sugar levels steady in the normal range to keep her baby from growing too large," Adam said. "In addition to causing a woman problems during labor and delivery, a baby that is too big can be injured during birth and suffer from low blood sugar after birth."

CARD OF THANKS

I would like to take this opportunity to thank all of my friends for the lovely flowers, the most welcome cards and especially for your visits while I was a patient in the hospital.

Your caring, love and concern will always be treasured.
Thank you,
Rusty Matthews

I would like to thank everyone who donated money to help me win Halloween Queen. Thank you for the money which went to the Women's Auxiliary to help them also.

I would also like to thank the Women's Auxiliary for the \$50 Savings Bond that was given to me as the prize.
Thank You
Crystal Yates

Adam recommends that pregnant diabetics eat three meals and three snacks daily. Each meal should contain 25 percent of the day's total calories. Snack calories should be divided into 5 percent at mid-morning and at mid-afternoon and 15 percent at bedtime.

"Although some diabetics would be advised not to attempt a pregnancy, many can have healthy pregnancies and healthy babies if they take care of themselves properly," Adam said.

Taking Flu Shot May Be Best

Both influenza A and influenza B could circulate during the 1992-93 flu season, and people in high-risk groups should get vaccinated early.

The influenza strains expected to dominate this season are A/Texas (H1N1), B/Panama and B/Qingdao, said Dr. W. Paul Glezen, epidemiologist at the Influenza Research Center at Baylor College of Medicine in Houston.

A/Texas and B/Panama are covered by the 1992-93 vaccine.

B/Qingdao is not included in the vaccine, Glezen said, but is closely related to B/Panama. The similarity will provide vaccine protection during what is expected to be a mild to moderate season.

Influenza variants are named according to where they were first identified. The A/Texas strain was originally isolated in October 1991 by Baylor's Flu Center.

"People in high-risk groups should get vaccinated soon," Glezen said, "in case this season's outbreak occurs early."

Flu usually appears in early or mid-December and peaks in January or February, but the 1991-92 epidemic began earlier.

In most areas, the vaccine should already be available at physicians' offices and community health centers. It takes two weeks for a flu shot to provide full protection.

The people most at risk of flu complications are the elderly as well as people with heart disease; lung disease, including asthma and chronic bronchitis; diabetes; chronic kidney disease; chronic anemia, including sickle cell disease; and immune-system disorders.

Also recommended for vaccination are care-givers likely to come into contact with those in the other high-risk groups.

Influenza produces fever, generalized muscle pain, weakness and a dry, hacking cough. Victims should rest and drink liquids.

In treating symptoms, people younger than 21 should use only aspirin-free pain relievers. Aspirin has been associated with Reye's syndrome, a flu and chicken pox complication that can cause vomiting, convulsions, brain damage and death in children.

Amantadine, an antiviral drug, will provide specific treatment for influenza A infections; however, it is not effective for influenza B. Treatment should be started within 48 hours after symptoms begin.

The first formal schools were established, historians say, shortly after 3,000 B.C.
