**To the Voters of Hall County**

As members of the Democratic County Executive Committee we would like to call attention of all our people, regardless of party affiliation, to certain conditions that make this year's general election much more important than usual.

1. All legislative districts will be reorganized and enlarged, due to shifts in population to the cities in the last ten years. It is vital to our interests that we preserve the 80th Legislative District as it is now with addition of such counties as may be necessary, which have the same interests as the present nine counties. We could be hurt if tied in with some of the big population counties.

2. Many do not realize how important it is to have a District Court available when needed. Pressure is on to reduce the number of Districts in rural areas, like ours, and give them to the big cities. On several occasions during his 16 years in the Legislature Bill Healty has successfully blocked

passage of bills which would have abolished many District Courts in rural sections, including some involving counties in our own Legislative District. When you need the services of a District Court you shouldn't have to wait up to six months before a term of court is held in your county seat, or worse still, have to drive to Wichita Falls, Abilene, Lubbock Plainview or Amarillo, if an emergency situation develops.

Our present representative, W. S. (Bill) Healty is in position, because of his seniority and membership on committees that deal with these important matters, to see that we are not hurt. Our only chance to have an effective voice in State affairs, which are very critical right now, is to keep experienced men like Bill Healty in office.

We have good government in Texas, and we strongly urge you to vote a straight Democratic ticket as the best way to insure that Texas will not have some of the troubles other states have.

Respectfully,  
 Carroll Fowler

## Shirttail Sermon

The following article from the pen of another, which recently came to my desk is so excellent and pertinent to our needs that I wish to pass it on:

"There's trouble in the land. No wide-awake person will deny that! These upheavals have caused many parents to express apprehension concerning the future of their children. That's understandable! When our children graduate from high school and leave home, many of them also leave the church. Suddenly they are exposed to an environment hostile to Christ, and even to the basic principles of morality. If a young person is not equipped to handle this, he is in grave trouble.

"Unfortunately, at a time when families should be doing everything in their power to 'beef up' their spiritual defenses and intensifying their fight against Satan, many are permitting the safeguards to be torn down. Neglect of Sunday evening services, absence from the Wednesday evening service, and failure to encourage all the family to become totally involved in church centered activities are some of the more obvious evidences of this foolish neglect.

"Parents need to get their priorities straight. Those of us who preach seldom have the courage (or at that late date even the need) to remind weeping parents of the problem. But when dads and moms begin crying over what has happened to their kids, they could be reminded of the days when they chose camping instead of church, weekend trips instead of weekend training, and Sunday night recreation instead of Sunday night inspiration.

"It only takes one hole in the fence to let the sheep out. It's amazing how prolific some people are at inventing new excuses to rationalize their habitual neglect. I would much prefer a person to be honest enough to say, 'I just don't want to' than to forever blame job, health, grandma, or baby! What advantage is there in covering up the real facts in the case? That only adds up to sin!

"Parents, give your kids a break! Put first things first! Let nothing interfere with regular church attendance. Be sure they are deeply involved in all the work and activities of the church. Then, after they've gone from home with that good training, you can do what you want with your own life. And I have a feeling by that time you'll be thrilled with putting spiritual things first, and

will make it a lifetime policy!"  
How true these words are!

Would you answer an ad like that? Probably not, but you might have to live in such a house if you can't make full recovery after a serious loss. A surprising number of people run such a risk by being underinsured!

Naturally you hope you never have a fire or other catastrophe. But insurance, to be effective, must protect you in the event you do. Building costs have risen so substantially that many people don't realize they are no longer fully covered.

Our job is to keep all of our policyholders as completely current as possible—it's part of our service. If you have any question about your present contract, please feel free to call. We will be happy to give you a professional appraisal, without any obligation.
