Mrs. Jack Hulsey returned home from a visit in Amarillo and Claude Wednesday of last week. She went up on Sunday a week ago to visit her son Jackie. While there they spent one day at Thompson Park where they enjoyed a picnic lunch, she went one day with the family to the swimming pool, spent one day at the First Baptist Church in Amarillo. She visited a granddaughter and her family, Mr. and Mrs. Gary Rowell and children, and also visited the Leon Wilhelms.

Mrs. Hulsey visited her daughter and family, Mr. and Mrs. Harley Eddleman and children, in Claude the later part of the week. They enjoyed a family supper and games of "42" afterward, with the Jackie Hulseys and Gary Rowells of Amarillo visiting them.

Mrs. Hulsey returned home Wednesday and that night her nephew,

Carlton Crabb, and his family of Farmington, N.M. arrived for a visit. Mrs. Hulsey reared this boy with her family. They remained until Sunday.

Mrs. Lela Mae Barrett spent from Sunday, July 14, until the following Tuesday visiting her daughter and her husband, Mr. and Mrs. Kenneth Vines in Stratford. Mrs. Vines returned home with her mother Tuesday, and her husband joined her that night. They spent the night and Wednesday with Mrs. Barrett.

Mrs. W. R. Bradley of Amarillo spent Friday and Saturday with Mrs. Barrett.

Mr. and Mrs. Ray Gene Hutcheson and Billy of Midland spent the week - end with their parents, Mrs. Barrett, and Mr. and Mrs. Joe Bedwell. They returned Mrs. Bedwell to her home after she had spent a week in Midland with Mrs. Hutcheson and the baby while Ray Gene was in Tulsa, Okla. on business.

Mr. and Mrs. C. E. Lyon of Amarillo and Mrs. J. W. Lyon, Jr. of Silverton spent a recent week - end with Mr. and Mrs. Will Lyon.

Mrs. Jack Logan and children of Denver City brought H. O. Logan home after he had spent a visit there and they spent Friday night with Mr. and Mrs. James Brunson.

Mr. and Mrs. Poss Hamilton and children of Weatherford, Tex., and her mother, Mrs. Moore, of Paducah, arrived Tuesday of last week to visit his parents, Mr. and Mrs. B. K. Hamilton. All of them attended the showing of "Texas" on Wednesday night at Palo Duro. The Poss Hamilton's report the play as being outstanding. They could not imagine anyone living this close and not having attended. (Ye Editors haven't made it yet.)

Mr. and Mrs. George McAlavey of Flomot spent the day Sunday with Mr. and Mrs. J. W. Harvey.

Mr. and Mrs. Jack Cheatham and children and Mrs. Gladys Wiley spent the week - end with Mr. and Mrs. Bill Day and family in Grand Prairie. They returned Chiquita Day to her home after she had spent two weeks here visiting. Robin Harmon and Roland Hamilton also spent the week end there, going in their own car. They all went to Six Flags Saturday, then attended the All Star Basketball game at Duncanville Saturday night. They report Cheri Rapp of Estelline and Susan Brittain of Springlake, participants in the game, really showed good.

Mr. and Mrs. Glynn Barrett and children of Amarillo spent last week visiting their parents, Mr.

More Peachy Desserts by Betty Crocker

Here come two dessert-dazzlers. The first is a spectacular open-face peach pie baked in a pizza pan. The second is a glorious peach shortcake with pecans baked in the dough. Both solo beautifully at a dessert party — or finish off a patio supper with a flourish. Just one quick tip about peeling pretty peaches: Dip them first into simmering water for half a minute, next into cold water. Then slip off the skins and create a peachy extravaganza.

- FRESH PEACH PIZZA**
- 2 cups New Bisquick
 - 2/3 cup light cream
 - 2 tablespoons granulated sugar
 - 4 or 5 peaches, sliced
 - 1 tablespoon firm butter
 - 1/2 cup New Bisquick
 - 1/2 cup brown sugar (packed)
 - 1 teaspoon cinnamon
 - 1/4 teaspoon nutmeg
- PEACH PECAN SHORTCAKE**
- 2 1/2 cups New Bisquick
 - 1/2 cup chopped pecans
 - 3/4 cup light cream
 - 2 tablespoons granulated sugar
 - 3 to 4 peaches, sliced and sweetened
 - 1 cup chilled whipping cream
 - 1/4 cup confectioners' sugar
- Heat oven to 450°. Mix 2 cups New Bisquick, the cream and granulated sugar with fork to a soft dough. Beat vigorously 20 strokes. Knead 8 to 10 times on lightly floured cloth-covered board. Roll dough out to a 14-inch circle. Ease pastry into a 13-inch pizza pan. Flute edge. Cover crust with peach slices, beginning at outer edge and working toward center. With fork, mix butter, 1/2 cup New Bisquick, the brown sugar, cinnamon and nutmeg until crumbly. Sprinkle mixture over peach slices. Bake 15 minutes or until edge is golden brown. 6 to 8 servings.
- Heat oven to 450°. Mix New Bisquick and pecans. Add cream and granulated sugar; mix with fork to a soft dough. Beat vigorously 20 strokes. Knead 8 to 10 times on lightly floured cloth-covered board. Roll dough 1/2 inch thick. Cut with 3-inch floured cutter. Bake on ungreased baking sheet about 10 minutes. Split warm shortcakes. In chilled bowl, beat whipping cream and confectioners' sugar until stiff. Fill and top shortcakes with peach slices and whipped cream. If desired, garnish each with pecan halves. 6 servings.

CANCER'S WARNING SIGNALS

- 1 Unusual bleeding or discharge
- 2 A lump or thickening in the breast or elsewhere
- 3 A sore that does not heal
- 4 Change in bowel or bladder habits
- 5 Hoarseness or cough
- 6 Indigestion or difficulty in swallowing
- 7 Change in a wart or mole

These signals do not usually mean cancer, but they are warnings; if one lasts more than two weeks, it is important to go to your doctor.

THE VALLEY TRIBUNE — THURSDAY, JULY 25, 1968

Little League All Star Baseball game Saturday night. The grandson of the Boone McCrackens, Ronnie McCracken, was one of the team.

The Boone McCrackens and Mary Ellen McCracken attended another All Star Baseball Game at Turkey Monday night. Another grandson of the Boone McCrackens

Barry Francis of Silverton, was a participant in that game.

Steve Guest, who is attending the summer session at Tech, spent the weekend with his parents, Mr. and Mrs. Smitty Guest.

Mr. and Mrs. Luke Lane and Mrs. Smitty Guest, Neil and Brent

left early Wednesday morning for Rupert, Idaho to return Mrs. Alton Lane and boys to their home. They plan to be gone about two weeks.

Mr. and Mrs. Claude Wilson and Ritchie Fuston spent Sunday in Amarillo visiting Mrs. June Conway and children.

Satellite Combines Weather, Balancing, TV Experiments

VALLEY FORGE, Pa. — An Applications Technology Satellite to be launched from Cape Kennedy this week will combine a delicate balancing system with a weather eye camera that can zero in on storms over the North and South American continents.

The National Aeronautics and Space Administration (NASA) has scheduled ATS-D to be launched into a 22,300 statute mile high orbit July 24 by an Atlas/Centaur booster. This will place the 864-pound satellite above the equator over the Pacific Ocean, about 400 miles west of Quito, Ecuador.

The ATS series of seven satellites, of which ATS-D is the fourth, is designed to provide "in-orbit laboratories" for improving spacecraft systems.

General Electric Company's Space Systems Organization here has the primary mission of demonstrating at an altitude of 22,300 miles the feasibility of a satellite stabilization technique that depends on the gravitational pull of the Earth.

Because of the long slender shape of the football field size satellite (251 feet from tip to tip) one end of ATS-D will be closer to Earth than the other, and thus will be affected more by gravity. Although these gravity forces are very small, about a hundred-thousandth of a pound, they prove to be sufficient to cause a satellite to lock toward Earth.

The delicate gravity gradient balancing experiment in space is aided by deploying four 123-foot long primary booms and two 45-foot long damper booms. However, this action is not taken for approximately seven days into the flight, or until the spacecraft's rate of spin is reduced to near zero.

In the 1970's, weather, communications and navigation satellites, for example, will depend on a steady platform to keep cameras and sensors continually pointing toward Earth. Application of gravity gradient stabilization for long-life satellites is most advantageous because the passive system provides a high degree of reliability and a life expectancy of more than five years.

Designed and built by General Electric's Space Systems Organization for NASA's Goddard Space Flight Center, Greenbelt, Md., this stabilization system has been previously tested on a series of Navy, Air Force and NASA satellites at lower altitudes.

ATS-D will be the first flight for the day/night television camera (885 lines) which will take photos of developing weather systems.

Infrared photos of the Earth have been previously taken by weather satellites, but nighttime pictures in the visible spectrum (that part of the spectrum which man can see) have not been possible.

Each picture will cover an area on Earth 1,150 statute miles square (1.3 million square miles), with a resolution of less than 1.5 statute miles at picture center.

The steerable optics in this image orthicon camera permits cloud cover pictures to be taken 4,000 miles in any direction on the face of the Earth (from the tip of South America to the Hudson Bay).

Sixty-four pictures and three hours will be required to photograph the entire Earth's disk.

Capabilities of this camera system at nighttime will be evaluated under various degrees of moonlight ranging from quarter moon to full moon.

Live television coverage from space of primary boom bending, which is caused by solar heating and radiative cooling against a stellar background, is planned for ATS-D. A standard television camera (505 lines) will measure boom bending on the two satellite legs pointing toward deep space. The meteorological camera will observe the other two spider-like booms as they point in the direction of Earth.

The degree of bending can affect the satellite's pointing accuracy toward Earth, and thus, restrict certain communications and meteorological experiments.

Two other experiments round out the major activities of ATS-D. The microwave communications experiment, present on all ATS spacecraft to date, aboard ATS-D has been designated for simultaneous transmission of voice, television (color and black and white), telegraph and digital data to several ground stations.

The fourth ATS-D experiment is an ion, or electrical engine being satellite tested for the first time. Purpose of this test is to determine how well a small electrical engine with a variable controlled thrust of only five to 20 micropounds can keep ATS precisely on station.

RESEMBLING A SPIDER IN SPACE, Applications Technology Satellite D is an "in-orbit laboratory" for improving spacecraft systems. The four 123-foot long spider-like legs or booms and the two shorter damper booms form a satellite stabilization system that depends on the gravitational pull of the Earth. The delicate balancing system, developed by General Electric's Space Systems Organization, will be demonstrated as feasible on ATS-D at an altitude of 22,300 statute miles above the Earth.

Flomot News

By Jean Kingston

Mrs. P. T. Gentry of Slaton spent the afternoon Tuesday with Mr. and Mrs. Bert Cloyd. Others present in their home this week were Mrs. C. W. Ryan of Killeen, Texas. Then Mrs. Ruby George, Mrs. E. S. Burley of Corpus Christi and Mrs. Gene Fondren of McLean, Virginia spent some time with them and other friends in the community. Mrs. Burley and Mrs. Fondren are daughters of Mrs. Ruby George and are graduates of Flomot High School.

Mr. and Mrs. Colbert Summers and Mr. and Mrs. Leroy Summers of Albertville, Ala. were guests in the home of Mr. and Mrs. G. D. Pope this week. While here, the group visited in Brownfield.

Sgt. and Mrs. James Simpson, Ernie and Leslie of Killeen arrived Sunday for a visit with her uncle, Mrs. James Monk. They attended the play, "Texas" while visiting here.

Mr. and Mrs. James Pope and Mr. and Mrs. Lewis Cannon and Monte visited with their parents, Mr. and Mrs. James Monk.

Major Walter Speer and family

of Clark Air Force Base in the Philippines, visited his mother, Mrs. Effie Speer and other relatives and friends this week.

BRIDAL SHOWER HONORS MISS JUDY GILBERT

A bridal shower honoring Miss Judy Gilbert, bride-elect of Leland Heiskell, was given Saturday afternoon at the Flomot School.

Miss Kathy Gilbert registered the guest in a white satin bride's book. A white and gold pen set with Judy's wedding invitations inserted in the base was used. The registry table was covered with white net. Over sixty guests were registered.

Many useful and beautiful gifts were displayed. They included a set of white Club Aluminum which was the hostess gift, a set of stainless steel cookware, a set of stainless steel tableware, a thirty-cup electric coffee maker, China, several pieces of Corningware, a pressure cooker, a mixer, an electric teapot, canister sets, tea

towels, a rug, juice sets, a chip-and-dip set, pillows, blankets, sheets, pillow cases, towel sets, bath sets, candy dishes, a silver compote, money and numerous other gifts.

Refreshments of white cake squares decorated in gold, gold punch, nuts and mints were served from a table covered in a white

CROPS PROFIT NOTEBOOK

T. R. Cox

Top Varieties Respond To Top Management

By: T. R. Cox, Chief Agronomist
Cyanamid Agricultural Research Center,
Princeton, N. J.

Now is the time to be thinking about those crop varieties for 1969 and seasons ahead, that will respond best to high fertility and all-round top management. If you're about to make hybrid seed purchases—be sure to give full consideration to some of the latest developments by plant breeders. The old corn variety that did so well at the 100 bushel level is most likely to be obsolete for you if you have raised your sights to 150 or more bushels per acre. Apply the same general rule in choosing your varieties of sorghum, soybeans, small grains and many other crops.

It seems obvious that there is a need for fertilizer suppliers and seed producers to work closely together to provide the caliber of information needed by the farmer to fertilize and plant with confidence. The farmer deserves the best possible information as to what a variety may be expected to do under local conditions.

The final and by no means least important research on hybrids is done by the farmer right on his farm. To convince himself that a highly recommended single-cross is good for his soils and growing conditions, the progressive farmer conducts his own careful investigation. He knows that small yield differences add up to big differences in net income. So time spent each season in observing and studying the performance of new varieties is time well spent.

Surveys shows that a high percentage of farmers plant not one but several hybrids,

Cyanamid agronomists say it is a good idea for a producer to try out a hybrid on small acreage to see whether his choice will perform on his soils and under his growing conditions. In this way he can find those small yield differences that add up to big differences in net income.

purchased from more than one seed company. The final choice of variety rests with the farmer. The trend in yields is proof enough that he is making this choice and planning his fertilizer program with much care.

net cloth over gold and trimmed with gold ribbons and write flowers. The center piece was a bride doll. Appointments were crystal and silver.

The hostesses were Mesdames: Howard Rogers, Leonard Crowell, Jr., Herb Martin, G. H. George, Joe Degan, James Monk, Ford Johnson, Crable Jones, O. J. Lee, Ralph Stapleton, Ronald Clay, Louis Gourdon, and Pete Clark.

Corn Popper for Patio Parties

Popcorn-popping, a popular pastime at any get-together, will account for much of the snap, crackle and pop at patio parties this summer. New aluminum electric corn poppers offer all the fun of popping corn and eliminate all the mess. Popcorn gets evenly toasted on all sides, thanks to the rapid, even heat distribution properties of aluminum. The aluminum shell has heat-proof legs that won't scratch your table, and some units have clear cover bowls that let you watch the action, then flip over to become serving dishes. Up to four quarts of popcorn can be made at a time.

QUITAQUE BRIEFS

Lawrence Bedwell of Plainview spent Thursday afternoon with his father, N. L. Bedwell, in the John King home.

Mr. and Mrs. Sid Bogan and Mrs. Glays Wise returned home from Vado, N. M. Thursday of last week. Mrs. Wise had spent three weeks there and the Bogans

spent one week with Mary Ollie Persons in the cool mountains.

Mr. and Mrs. Bogan spent Sunday and attended Services at Glorieta, N. M. reporting a very nice day.

Several from the local Assembly of God Church attended a Fellowship Meeting at Turkey Tuesday of this week. They were the Rev. and Mrs. Lemy Pike, Cecil Rice,

Renay Rice, Connie Brummett, and Mrs. W.W. Cain.

Mrs. Charity Steward and son, Wiley Scott of Ft. Worth spent last week visiting their mother and grandmother, Mrs. W. W. Cain.

Mr and Mrs. J. C. Mabry, Jr. and children of Tulia spent the week - end with her parents, Mr. and Mrs. James Kimbell and her sister Mr. and Mrs. David Setliff.

Mr. and Mrs. James Kimbell and Mary Helen Teeter and children spent from Monday until Wednesday in Tecumseh, Okla., visiting James' mother, Mr. and Mrs. M. F. Jenkins. On Wednesday they drove to Lake Altus and met Mr. and Mrs. David Setliff and enjoyed fishing until Friday when they returned home.

Mr. and Mrs. Bobby Brunson of Amarillo visited her parents Mr. and Mrs. James Kimbell Friday night.

Miss Patty Welch of Amarillo spent Saturday night and Sunday with Cheryl Merrell.

Mrs. C. L. Smith has been staying with her son, Clyde S. Smith and his family in Wichita Falls for the past three months. Her daughter-in-law writes that she is feeling good.

Mrs. Donnie Brunson and Debbie, and Mary Helen Brunson drove to Oklahoma City Monday of last week to visit Mrs. Brunson's sister and mother, Mrs. Thelma Thrift and Mrs. Bessie Wormington. Debbie stayed with her grandmother and aunt and is working.

Mrs. J. P. White was surprised Sunday when two cousins she had not seen in many years visited her. They were Fannie McKinley of Shreveport, La., and Lawrence Goodman, Portland, Oregon. Bo Graham of Amarillo brought them down. They were visiting their sister, Mrs. Palmer Qualls, who is very ill. Mrs. McKinley visited here in 1926, the last time Lillian had seen her, and Lawrence Goodman lived here, leaving in 1930. She had not seen him since. They report having a very nice visit.

Mrs. G. H. Wagnon and J. C. drove to Wichita Falls Friday of last week to visit Mr. and Mrs. Clyde Smith and Mrs. C. L. Smith. They report Mrs. Smith feeling good. She is 89 years of age. J. C. went down to get in some fishing, but didn't have much luck.

Mr. and Mrs. Bud Bailey drove to Enid, Okla. Monday of last week

to visit their daughter and her husband, Mr. and Mrs. Gordon Rothwell. They left there Tuesday afternoon and spent the night at Lake Altus, returning home Wednesday.

Mr. and Mrs. T. J. Reeves of Plainview spent from Thursday until Saturday with the Baileys after they returned home from Lake Altus.

Mr. and Mrs. Ted Bingham, Rhonda and Lori, of Big Spring spent the week - end with her parents, Mr. and Mrs. James Barefield and Joey, and with his mother, Mrs. Bruce Gibson, in Turkey.

Mr. and Mrs. Phil Barefield of Canyon also spent the week - end with their parents, the James Barefields and the Walter Taylors.

A basic rule in pesticide safety is to read and follow directions and precautions on the container, advise Extension specialists at Texas A&M University. Do it each time you use a pesticide; don't rely on your memory. Always remember that many pesticides can be harmful to people and pets if they are not handled, applied and stored with care and caution. Safe storage is particularly important to avoid accidents involving young children.

If a pesticide container has lost its label - dispose of it! Don't save or reuse empty pesticide containers, warn Texas A&M University Extension specialists.

Rolled - up socks stuck into shoes that are packed will serve as trees and keep the shoes in good shape. Cover the shoes with shoebags or, if you have none, some old socks. If you have no case for a hand scrub brush, toothbrush, washrag or anything else that might be damp when packed - wrap the items in aluminum foil or put in plastic bags.

To protect your hairbrush from getting crushed and to keep bottles of liquid from being broken, Gra-

Cool Summer Dessert
Hot summer days call for desserts that are cool and take little time in the kitchen. This pudding dessert has a cool and light taste sure to please family and cook.

Pineapple Pudding Dessert
1 cup sugar
1/2 cup corn starch
2 1/2 cups milk
3 eggs
1 teaspoon vanilla
Dash salt
1 (8 3/4-ounce) can crushed pineapple, drained
1 cup heavy cream, whipped
Combine sugar and corn starch in medium saucepan. Gradually stir in milk, mixing until smooth. Bring to boil over medium heat, stirring constantly; boil 1 minute. Reduce heat to low. Beat together eggs, vanilla and salt. Blend a little hot mixture into eggs, then stir all into remaining hot mixture in saucepan. Cook 2 minutes over low heat, stirring constantly. Cool. Stir in pineapple. Fold in whipped cream. Pile into dessert dishes. Makes 8 to 10 servings.

ham Hard, Extension clothing specialist at Texas A&M University suggest putting inside a rolled shirt cardboard and hold fast with a heavy rubberband.

BRISCOE COUNTY From The County Agent's Desk

Mr. Livestock Producer, the future success of the screwworm eradication program depends on the action you and your friends and neighbors take in regard to checking your animals closely and regularly. Treat all wounds, and collect larvae from the wounds - being sure that you obtain a representative sample of all sizes of worms in the wound - then submit the sample to the Screwworm Eradication Laboratory, P. O. Box 969, Mission, Tex. 78572, for diagnosis. Only confirmed cases can be treated with sterile screwworm flies, so report all possible cases as quickly as possible. Treatment of areas with the sterile flies is begun immediately after cases are confirmed. The Briscoe County screwworm committee has just been reactivated as a result of the alarming increases in screwworm cases in many parts of Texas in late May and June. Texas has already recorded 823 cases this year (696 as of July 1) compared to only 54 cases for the first six months of last year. Although Briscoe County reports

are naught at this date, the chances of having screwworm cases are ever present.

March of Medicine

Medicine's Ancient Life-Saving Tool Modernized
Of all the life-saving mechanisms available to modern medicine, probably the most important, and least understood, is the amazingly-versatile catheter.
A catheter, to begin with, is a hollow tube used by doctors to drain waste body-fluids when illness or blockage of any sort impedes the natural flow. This draining procedure is called "catheterization."
The modern catheter does much more than drain, however. It gives the doctor a simple and direct means of supplying medicated solutions directly to an inflamed bladder, either intermittently or continuously, without interfering in any way with the outward flow of fluids. This is done by using a catheter with a special, added channel.
Another vital use to which catheters can be put is told by scientists of the hospital products division of the Kendall Company, one of the world's largest manufacturers of catheters. They report that modern versions of the instrument can be used to stop minor, post-operative bleeding from the prostatic urethra. This is achieved by inflating a tiny balloon at the top of the catheter after it is in place in the body.
5,000 Years Of Use
As in most areas of medical science, more progress has been made on catheters in the past 30 years than in the preceding 5,000 years. Today's instruments are a far cry from those used for centuries past.
And catheters have been used for thousands of years. Clear evidence exists that Egyptians made them from tubular reeds, from wood, and from gold and iron.
The incredible Benjamin Franklin, whose interests and creative accomplishments knew almost no bounds, also invented a variety of flexible catheter for his brother John who was afflicted with kidney stones.
Kendall Improves On Dr. Foley
The modern catheter, of course, is infinitely more trustworthy than its predecessors. It is also much safer and far less painful to use.
The pioneer of the modern, life-saving catheter was Dr. Frederick E. B. Foley, who first perfected the "Foley Catheter" in 1929. Thirty years later, the Kendall Company dedicated a large portion of its research facilities and a number of its scientists to improving on Dr. Foley's catheter. As a result of this continuing research, Kendall has now made available to doctors and hospitals a series of special-purpose catheters which are modern marvels.
For example, the latest Kendall catheters feature a self-inflating balloon as an integral part of the instrument. This holds the catheter exactly in position for greatest effectiveness. There are also special catheters available for babies. And all varieties are "bacteriostatic," which means that they inhibit bacterial growth.
It is, indeed, quite true to say that this little-known and versatile tool of the medical profession saves many lives every day of the year.

The Tribune

— QUITAQUE BRIEFS —

Mr. and Mrs. Cecil Price and Mr. and Mrs. A. C. Barrett drove to Lockney Sunday afternoon to visit at the rest home. While there they enjoyed the devotion brought by Robert Foster, former Mission pastor here. They also visited Mrs. Ray Payne in the Lockney General Hospital.

ATTEND YOUR FAMILY REUNION

This article was found recently by Mrs. Truman Merrell in NATION'S AGRICULTURE Magazine and found it very amusing and true to life in many ways. I am sure many people find reunions boring and just not worth their time. Sooner or later with an attitude like this, you are gonna lose contact with your family and friends. Much effort on the part of local relatives and friends are put out in getting ready for the reunion and their only reward is your interest shown by attending.

UNCLE DUDLEY'S EPISODES —
"WHAT YEAR WAS THAT"
There should be a historian de-

signed in every family. Now was our last real reunion of the family occasioned by my dad's 70th or 75th birthday? Probably some member of the family will straighten me out.

I would like to know more about my grandfather's family — his aunts and uncles. Actually, we know so little about our ancestors, and what we get has passed through two or three hands. Some one should record this for young people of the future.

On the other hand, would it be possible to record anything but the bare facts, details about what they did on certain dates? Would anyone have the nerve to record

that Aunt Minerva nips rather freely at the bottle between meals, or that uncle George flirts with any woman who comes near? (Of course I just made that up.)

Actually the family reunion is a means of making verbal records of history. Everybody recalls, and retells, what happened that cold winter when Tom married, and how Henry lost his life from a falling tree. And it's a time for checking up on the next generation, the young people just getting out of school and entering careers. And for seeing the new twins, or Young Tom's fiance, that girl from Lexington.

And if the reunion is on a farm, the children are fortunate. They don't want to listen to gossip about yesterday, anyway. There are so many things to have a look at on the farm — the swift-running brook up in the pasture, the old bull who roars everytime you come near his pen, the cats and dogs, the humble bees at the end of the orchard. Many of us carry childhood memories of the old-time reunion on the farm.

Family reunions change, as youngsters grow up and divide their loyalties with in-laws. The only time our clan has really been together, since the occasion mentioned in the first paragraph, has been for funerals. I've often wondered if you should feel guilty "enjoying" a funeral — this frequent chance to visit with old friends and relatives?

I've been thinking about this, and recall my father's funeral. There was sadness, but I think my Dad would have been pleased that there was time for visiting, there in the final resting spot of our forebearers. I think he would have considered this a more fitting end for his earthly activities, than wailing and gnashing of teeth.

Somebody has said that when a good man dies, one should be happy that he lived, rather than sad that he died.

But, a real family reunion needs everybody—and of course a farm. It's a desirable custom.

SOCIAL SECURITY NOTES —

Although the district office for this area is located in Amarillo, social security services is available on a regular basis in most counties the Amarillo office serves, Travis C. Briggs, district manager, said today.

"Ordinarily, folks do not have to wait a very long to be interviewed if they call at our office in Amarillo," according to Briggs, "but we realize that it is not convenient for some to come to Amarillo."

"That's the reason our field representatives set up schedules so the people in a community will know when they will be available for assistance in filing claims for benefits or to answer questions about social security or Medicare."

Those of you living in Briscoe County may wish to contact Gerald Millard in Silverton, Tex., at the Courthouse on August 8 or 22, 1968.

Shirttail Sermon

GOD'S UNCHANGING HAND

One of the most common cries we hear from our communities today is in regard to the violation of individual rights. The practice of "scapegoating" (laying the blame for one's faults on someone else) has become the most common reaction to a great many things. This is the result, I believe, of a breakdown in the discipline of the home and community.

God has said, "Whom the Lord loveth he chasteneth, and scourgeth every son whom he receiveth." (Heb. 12:6). This was demonstrated in David. He was a "man after God's own heart"; yet he felt the heavy hand of God in chastisement. He made the grave mistake of seeking a woman who was married to another. The story of his indictment by one of God's prophets and his subsequent anguish of mind is a poignant one. David, even though he generally did that which was righteous, was not

spared. In fact, to be corrected sharply was for him inevitable; because he was a child of God.

"And ye have forgotten the exhortation which speaketh unto you as unto children, My son, despise not thou the chastening of the Lord, nor faint when thou art rebuked of him; If ye endure chastening, God dealeth with you as with sons; for what son is he whom the father chasteneth not?"

These words from Hebrews are for our time too. Many of us try to hang onto God with one hand, and the world with the other. If we are God's children, we shall surely be halted sharply by the hand of the Father. For some reason we often fail to realize this until the blow falls. We could save ourselves much agonizing distress if we would allow God to keep us free from falling into temptations. We cannot continue in God's favor and that questionable practice which we love at the same time.

Claude Woods

Mr. and Mrs. Jake Lacy of Groom were in Turkey Tuesday and Wednesday of last week. Their daughter-in-law, Charlene Lacy and children, who were spending some time with her parents, Mr. and Mrs. Harmon Grey, returned

to Groom with them. Mr. and Mrs. Lewis Ferguson and family and Trilby Beck left last week for a trip to South Fork, Colo. They returned home this week.

Walk and Be Healthy

By American Podiatry Association

"FOOT HEALTH IMPORTANT TO PHYSICAL FITNESS"

Today's "average" youth is as strong and skilled as the "superior" youth of five years ago, according to the President's Council on Physical Fitness. The Council reports that many states have recently strengthened their requirements, while a high percentage of schools have increased the amount of time devoted to vigorous games and exercise. Some states have established Governors' Councils on Physical Fitness.

Physical Fitness can be defined in many ways. Certainly it is the ability of the individual to live a full and balanced life. Foot health must form part of total health in the attempt to achieve a full and balanced way of life. Dr. Edwin N. Barron, Sr., President of the American Podiatry Association, points out that foot neglect continues among Americans in all age categories, but especially in our youngsters. He indicated that an estimated 60 percent of school children suffer from foot disorders, with 10-15% requiring professional treatment.

Proper foot care in the early years of life will assist substantially in making the adult not only healthier but more productive. An established regimen of preventive and regular care will also help to forestall serious foot problems later. Dr. Barron stated, for example, that twice as many Americans were re-

jected for foot disorders as for dental defects in the first draft of World War II.

"Such facts are generally ignored or overlooked," said the podiatry president. "Most of us fail to realize the importance of our physical foundation — our feet."

In a statement made last November, President Lyndon B. Johnson pointed out, "Despite the ease and convenience of modern life, the crucial tasks of our times demand as much strength and stamina as any in the past. Physical fitness is, therefore, a matter of personal concern for every citizen. People who spend some leisure time in vigorous and enjoyable activities are far more likely to lead long, productive lives than those who confuse leisure with laziness. More and more, we are coming to recognize that physical fitness in the young is the best insurance against infirmity and enforced idleness in old age."

— For more information on foot health, contact the American Podiatry Association, 3301 16th Street, N. W. Washington, D. C. 20010.

Dr. Barron

CARD OF THANKS

We wish to express appreciation and thanks to all our dear friends who sent flowers to the funeral of our sister, Mrs. Arlie Varner, in Ft. Smith, Ark., and since we came home. Your loyal friendship and thoughtfulness has helped to lighten the burden.
Mr. and Mrs. A. E. Gragson and Family

CARD OF THANKS

For the many words of comfort and sympathy and the many deeds of kindness shown to us during the recent illness and loss of our loved

one, we express to you our sincere gratitude.
May God Bless and keep each of you.
